NOW I AM WELL

THANKS TO "FRUIT-A-TIVES"

Eli, Manitoba.

I wish to state, for the sake of others who may be sufferers like I was, that I suffered from severe indigestion and constipation for years and that there was also womb trouble with unpleasant pains in my back which made me miserable, constantly. I tried physicians and took many remedies but I got no relief. I was induced to try "Fruit-a-tives" and I can truly say this was the first medicine that ever did me any good. "Fruit-a-tives" quickly relieved the constipation and indigestion and completely cured me of all symptoms of womb trouble. I cannot express too strongly my great gratitude to this medicine as I am as well now in every way as ever I was, thanks to "Fruit-a-tives". I can strongly recommend "Fruit-a-tives", it is easy to take and the effect is always mild like fruit.

(Sgd) MRS. M. BRELAND.

148

Many women suffer with what the doctors call "Womb Trouble"—"Diseased Ovaries"—"Female Complaints" etc. — when Constipation is causing all the pain. Cure the liver and make the bowels move regularly with "Fruit-a-tives" and the "Womb Trouble" will be cured at the same time.

"Fruit-a-tives" — or "Fruit Liver Tablets" are sold by dealers at 50c a box —6 for $2.50—or will be sent on receipt of price. Fruit-a-tives Limited, Ottawa.

Tenders for Dredging.

Sealed tenders iddressed to the undersigned and endorsed "Tender for Dredging," will be received until Tuesday, May 26, 1908, at 4.30 p. m., for dredging required at the following places in the Province of New Brunswick:—

Buctouche Beach, Buctouche Harbor, Caraquet, Cape Tormentine, Dalhousie, Loggieville, Miramichi Bay, Maguapit Lake, Oromocto Shoals, Pointe du Chene and Quaco.

Tenders will not be considered unless made on the form supplied, and signed with the actual signatures of tenderers.

Combined specification and form of tender can be obtained at the Department of Public Works, Ottawa. Tenders must include the towing of the plant to and from the works. Only dredges can be employed which are registered in Canada at the time of the filing of tenders. Contractors must be ready to begin work within twenty days after the date they have been notified of the acceptance of their tender.

An accepted cheque on a chartered bank, payable to the order of the Honorable the Minister of Public Works, for six thousand dollars (6,000.00), must be deposited as security for the dredging which the tenderer offers to perform in the Province of New Brunswick. The cheque will be returned in case of non-acceptance of tender.

The department does not bind itself to accept the lowest or any tender.

By order,

FRED GELINAS,
Secretary.

Department of Public Works,
Ottawa, May 4th, 1908.

Newspapers will not be paid for this advertisement if they insert it without futhority from the Department. Graphic 3ins.

NOTICE.

Public Notice is hereby given that the Jacquet River Boom Company in pursuance of Chapter 115 of the Revised Statutes of Canada 1906 has deposited with the Minister of Public Works for Canada and also in the office of the Registrar of Deeds, &c., in and for the County of Restigouche in the Province of New Brunswick, a certain Plan and Description of certain Piers, Boom, DDam, and other works constructed and to be constructed by the said company at or near the mouth of Jacquet River in the said County of Restigouche and that the said company will at the expiration of one month from the first publication hereof, apply to His Excellency the Governor General in Council for approval thereof.

Dated this fourteenth day of April, A. D., 1908.

THE JACQUET RIVER BOOM CO.,
Arthur P. Culligan, President.
W. R. McMillan, Sec.-Treas.
W. Albert Mott, Solicitor for Applicant

NOTICE.

Public notice is hereby given that William R. McMillan of Jacquet River in the County of Restigouche, merchant in pursuance of Chapter 115, of the Revised Statutes of Canada 1906, has deposited with the Minister of Public Works for Canada and also in the office of the Registrar of Deede, &c., in and for the said County of Restigouche in the Province of New Brunswick a certain plan and description of certain piers, booms and other works constructed and to be constructed by him at or near the mouth of the Jacquet River, in the said County of Restigouche and that he will at the expiration of one month from the first publication hereof apply to His Excellency the Governor General in Council for approval thereof.

Dated this fourteenth day of April A. D. 1908.

WILLIAM R. McMILLAN.
W. Albert Mott, Solicitor for Applicant.

SLEEP IN THE OPEN AIR IN ALL KINDS OF WEATHER

An out-door woman writes:

I have slept outdoors two years both summer and winter. It is the greatest luxury of my life, because I always feel like a fighting cock' now, whereas I was formerly a slave to colds and throat trouble. The best part of outdoor sleeping is the winter. That does a man the most good, and it is also the most enjoyable.

Sleeping indoors with all the windows open is a poor imitation. I believe it is dangerous. Theoretically there may be no draught, but practically I always caught cold. Now I snap my fingers at colds, and I feel so much better that I could do almost twice as much work. I'm sure I get twice as much fun out of life.

My sleeping room is protected on the north and west from the prevailing winter winds by the walls of the house. It is enclosed by copper screens (thanks to a perfect landlord) to keep out mosquitoes.

About three times during the summer a south wind will bring a torrent of rain into my quarters and drive me indoors. My brother in Michigan has some canvas screens which he can put up on such nights.

This beats sleeping outdoors or in a tent all hollow. I used to be a miserably light sleeper. All the conditions had to be just right, and I had to count 500 or draw long breaths for half an hour before the boon of sleep came and the flap of a curtain would ruin all. Now I often sleep right through the night without stirring and I haven't lost more than an hour's sleep since the panic.

The only drawback to my outfit is that it is rather expensive. It costs about $60 to $75 for a cot with three down comforters, a sort of sleeping bag and a blanket that is twice the usual length. This blanket enfolds the comforters, so that there is no chance for the extremities to become exposed. But I have saved the price of the outfit several times in doctor's bills, to say nothing of the increased pleasure of living.

There is a $10 outfit which can be used both summer and winter even in the tenements of the city. It has an awning to keep out wind, rain and snow, and the bed is moved right up to the window. Only the head is exposed to the air, as there is an arrangement of cloth around the neck which keeps the cold air from getting in.

No extra clothing is required. The head is not outdoors, but just inside the window. I have never seen this contraption, but I know where is can be gotten, and my doctor, who claims to be the original outdoor sleeping crank says it is on the same principle as the thing he used in hospital work among the poor consumptives for many years. It saved many a life.

Now is a good time to begin sleeping outdoors, and it need not cost you anything if you have a screened porch and a cot. The porch can be used in the daytime for an outdoor living room without bringing the bedding indoors, for a seat cover thrown over the bed will transform the cot into a lounge.

If you cannot afford copper screens put up mosquito netting, or perhaps you would be willing to begin as modestly as I did. I put a chair at the head and another at the foot of my cot, and stretched mosquito netting over cot and chairs. On the chairs I used boxes or anything handy to weigh down the ends of the netting, so that it would not sag too much in the middle.

A famous European scientist, Dr. L. G. Rabinovitch, has recently attracted much curiosity and interest among Boston physicians and psychologists by his assertion, backed up with a long string of proofs, that the first born child of a couple is seldom noted for superior qualities of intellect and that usually it is one of the later children that is likely to attain fame and power, if any of them do.

The general theory of Dr. Babinovitch is that the first born child, so to speak, is an experimental offspring. The father and mother, he says may be quite young. They have not themselves yet attained to physical and mental maturity. Their first child, therefore, is not endowed with those qualities which the parents themselves will only acquire at a later period.

Men and women at marriage represent, he says, two different individualities, two distinct temperaments, two distinct natures. It is only as time goes on that these individualities, temperaments and natures are gradually blended into one collective personality.

It has often been remarked that husband and wife, after living many years together, gradually come to resemble one another, not merely in outward appearance, but in tastes, in ways of thinking, and in intellectual capacity. When this period has been reached, they are able to transmit to their children a much more marked and definite personality and one which reflects their own ripeness and completeness. Their cellular potentiality is then at its maximum, from the mental as well as from the physical point of view.

This theory of Dr. Rabinovitch he supports with an army of facts. The Doctor selected 74 men and women of world wide fame, and made an investigation of their family history. The list included statesmen, poets, prose writers, painters and musicians. Out of all these 74, it appeared that only 10 were first born children. Of 42 men of letters, only six were eldest children. Of 17 painters, only one, and of 15 musicians, only two were first-born among their borthers and sisters.

A second interesting fact is that a very large proportion of these 74 typical geniuses were either the youngest or else next to the youngest of the family. Thus, among authors, Balzac was the last of three children. George Eliot the last of four, Washington Irving the last of 11, Coleridge the last of 13, while Fenimore Cooper was next to the last of 12 children.

Among artists and musicians, the great painter Rembrandt was the last of six children, Rubens was the last of seven, as was Sir Joshia Reynolds. Sir Edwin Landseer, the famous animal painter, was a seventh child. Among musicians, Weber was the ninth born, Mozart, the last of seven, Schumann the last of five, Schubert, the last of 14 and Richard Wagner the last of seven.

It is asserted that notwithstanding these examples, the doctor should have included in the list not merely statesmen and artists, but also men of science, and likewise children who had no brothers and sisters, as was the case, for instance, with Alexander the Great and Julius Caesar.

Among scientists, for example, there is the great French astronomer, and matematician, Laplace, who was a first born son. Sir Isaac Newton, perhaps the most extraordinary of all modern men of science, was born when his parents were still quite young, and in fact, within a year after their marriage.

A prominent Boston physician and student of psychology, in reviewing these statements of Dr. Rabinovitch, declares that the scientist has taken onyl a small percentage of the great in citing his illustrations, and that if the example were followed out among people of all classes wherever there have been pronounced geniuses, it would probably show as large a percentage of 'great' first born children as of the last born.

The subject is one which is hardly within the field of the physician, he declared, and yet it throws an interesting side light upon the world of great men, and its keynote may be pathological.

Burdock Blood Bitters.

Turns Bad Blood into Rich Red Blood.

No other remedy possesses such perfect cleansing, healing and purifying properties.

Externally, heals Sores, Ulcers, Abscesses, and all Eruptions.

Internally, restores the Stomach, Liver, Bowels and Blood to healthy action. If your appetite is poor, your energy gone, your ambition lost, B.B.B. will restore you to the full enjoyment of happy vigorous life.

Good Words For Chamberlain's Cough Remedy.

People everywhere take pleasure in testifying to the good qualitis of Chamberlain's Cough Remedy, Mrs. Edward Phillips of Barclay, Md., writes: "I wish to tell you that I can recommend Chamberlain's Cough Remedy. My little girl Catherine who is two years old, ha sbeen taking this remedy whenever she has had a cold since she was two months old. About a month ago I contracted a dreadful cold myself, but I took Chamberlain's Cough Remedy ano was soon as well as ever." This remedy is for sale by all druggists.

Mrs. A. B Movat Morton will be at Mrs. James Gillis,' Matapedia, on Tuesday and Wednesday, the 19th and 20th of May, with a fine display of trimmed millinery. 2ins.

A FRIGHTFUL EPIDEMIC.

Typhoid Rages in a Prison and Over 200 Persons Die.

KIEV, Monday.—A frightful epidemic of exanthematnus typhoid is raging in the city prison. More than two hundred deaths so far have occurred, and practically all of the inmates are affected. The authorities are withholding details.

Minard's Liniment used by physicians.

OTTAWA, Tuesday. — The Ottawa Hunt Club is receiving competitive plans for its new building at Bowesville. The club house will cost from $18,000 to $20,000, and will be ready for opening in September. The work will be commenced as soon as the plans are decided upon.

CARLETON, Tuesday. — The body of a youny man was found on the beach here Saturday evening by R. LeBlanc, who promptly notified the proper authorities and Coroner Dr. DeWolfe of New Carlisle was summoned.

An inquest was held this afternoon In the pockets of the clothes were found seventeen cents and a pocket knife. The body was badly disfigured as decomposition had set in and portions were missing.

LONDON, Tuesday. — Private Moir arrived in this city at 11 o'clock last night on the C. P. R. train. Several hundred people met him at the depot. He was securely handcuffed and was in charge of Detective Nickle. No one was allowed to converse with Moir after his arrival.

OTTAWA, Tuesday. — The Canadian Commissioner of Exhibitions has cabled the minister of Agriculture a denial of the report that the Franco-British exposition will not open till June. It will be open to the public on May 25.

Keep Minard's Liniment in the House.

A manly man likes to acknowledge his faults to a womanly woman who tries to convince him that he has none.

CHINESE REBELS ACTIVE

Had Three Skirmishes With the Troops and Won

PEKIN, Monday.—Alarming news has been received here regarding the progress of a revolutionary movement in Yun-Nan province, on the Tonking border. There have been three engagements recently between the rebels and the provincial troops, in which the former were victorious. Lachu men, Ment-Tzse is a treaty port and seaport of Ment-Tzse is endangered by them.

C. V. E. Bapst, the French minister to China, has been asked to aid in the suppression of the movement. The rebels possess French arms and are said to have been trained by Frenchmen. Ment-Tzse is a treaty port and has a population of about 12,000

OTTAWA, Tuesday. — Mr. Hughes, of P. E. Island, read an article appearing in the Halifax Herald in which he contended he was misrepresented in regard to conversation held on the train about railway men and labor and their hours of work. Laurier said he couldn't say. Fitzpatrick has been appointed Hague Tribunal in connection with arbitration of Fisheries disputes.

Mr. Alex. Robinson, superintendent of schools, British Columbia, is visiting the old homestead near Sussex, N. B., and Dalhousie College, his "alma mater", has recalled her distinguished son from the west to confer upon him the Degree of Doctor of Laws. Supt. Robinson is president of the Dominion Educational Association which meets in July, 1909, at Victoria, B. C.—Educational Review.

Mr. Robinson, above referred to, was for three years principal of the Campbellton Public Schools, a position which he resigned in the year 1889, to take a similar one in the city of Vancouver. Mr. Robinson was well known as an enthusiastic and particularly progressive teacher and had the natural gift of inspiring his pupils with a love for learning. His rapid elevation to the responsible position of superintendent of education in the Pacific province was not therefore surprising. We congratulate Dr. Robinson on the above recognition by his alma mater of his distinguished services to the cause of education.

LONDON, England, Tuesday. — A Kingston magistrate when asked for the discharge of a thief in order that he might be sent to Canada, pointed out that he had been convicted seven times and it was unfair to dump such people on the colonies. Three months imprisonment was the sentence.

MONTREAL, Monday. — Agents of the Dominion Line this evening got a message from the captain of the S. S. Ottawa 320 miles below Quebec, saying he had been in collision with the Norwegian steamer Thorold and badly damaged, with the forehold full of water. The passengers are safe.

QUEBEC, Tuesday. — The S. S. Ottawa has passed Cape Chatte this morning, only making five miles an hour. It will take her two days to reach Quebec. Her No. 1 hold is filled with water and her No. 2 hold is perfectly dry.

MONTREAL, Tuesday. — The Norwegian coal steamer Thorold which was in collision with the Ottawa Sunday night has put into Gaspe Basin in a badly damaged condition.

LONDON, Tuesday. — At a meeting of the British and Foreign Sailors Society, the Duchess of Albany presented Lord Strathcona with the Nelson shield, made of the Foudroyant copper, for presentation to Canadian schools.

BUCKET SHOPS CLOSED.

MONTREAL, Tuesday. — All the bucket-shops were founded up yesterday by the police and not a wire was in operation.

ST. JOHN, Monday. — A special to the Sun from Ottawa says:—Your correspondent noticing in one of the St. John papers of Friday a statement that Hon. Wm. Pugsley had, while while a member of the provincial government largely overdrawn his account, saw Mr. Pugsley last evening and was informed by him that there was no truth whatever in the statement.

Mr. Pugsley said that he had never drawn any amount above what he was justly entitled to and that there was at the present time a considerable sum due him from the province which he had requested the provincial secretary to pay, at the same time offering if the government so desired, to have his account taxed.

Economy may be the road to wealth, but nine-tenths of those who are compelled to travel it never reach the goal.

Tired nerves, with that 'on ambition' feeling that is commonly felt in spring or early summer, can be easily and quickly altered by taking what is known to druggists everywhere as Dr. Shoop's Restorative. One will absolutely note a changed feeling within 48 hours after beginning to take the Restorative. The bowels get sluggish in the winter time, the circulation often slows up, the Kidneys are inactive and even the Heart in many cases grows decidedly weaker. Dr. Shoop's Restorative is recognized everywhere as a genuine tonic to these vital organs. It builds up and strengthens the worn-out weakened nerves; it sharpens the failing appetite, and universally aids digestion. It always quickly brings renewed strength, life, vigor and ambition. Try it and be convinced. Sold by A. McG. McDonald.

REVOLT IN THE CONGO.

BRUSSELS, Monday.—It is reported that a widespread revolt has broken out in the Abir district of the Congo Independent State. The natives refused to collect rubber, attacked the whites and burned several factories. It is reported that the casualties were heavy.

CHICAGO, Ill., Tuesday. — A despatch to the Tribune from Laporte, Ind., says:—A complete solution of the mystery of the Guiness murder farm is expected within forty-eight hours.

The officials who have been conducting the search for the victims of the house of many victims admit this fact today They refused, however, to make known their purpose further than to say that final steps may be taken today or tomorrow at the latest.

The mystery surrounding four of the fourteen deaths which are known to have occurred at the place is cleared by the allegation that Ray Lamphere the former farm hand, prisoner in the county jail, set fire to the home of Mrs. Bella Guiness on the morning of April 28 and thereby caused the death of the widow and the three children. For this, if proven guilty, he is liable under the provisions of the Indiana State laws to conviction for murder in the first degree as well as for arsen. Indictments against him upon both these charges will be asked for of the grand jury on Wednesday.

As to the manner of death of the ten murdered persons whose bodies were discovered in the little patch of ground guarded by close woven wire netting, the silence of the officers in response to queries as to the arrest of one or more accomplices provides the only answer.

That the victims came to their death through the administration of a deadly amount of chloral has been proven. The places at which the drug was purchased during the last eight years have been found

Ask for Minard's and take no other.

TRIBUTE TO CANADA.

LONDON, Saturday.—The Standard, referring to Mackenzie King's report, says Canada has taken full advantage of the opportunity to prove her recognition of imperial responsibilities in the eyes of the world. If all over sea states accept their position in the same generous spirit, difficulties arising from the relations of alien races within the empire need not greatly alarm.

CENTRAL RAILWAY COMMISSION.

ST. JOHN, Monday. — Judge Landry, of the Supreme Court; J. B. M. Baxter, of St. John, and A. F. Trites, of Salisbury, N. B., are named as possibly composing the commission to be appointed by the New Brunswick government to investigate the Central Railway affairs. The appointment of the commission will be authorized by an act now before the Legislature. The enquiry will not begin until after prorogation, which, it is now thought, will be reached by the end of May. It is thought the provincial budget will be brought down on Tuesday.

GENOA, Tuesday. — Prince de Sagan who arrived here from Rome today with Mme Anne Gould and her children has been warned by a friend from Paris that Count Boni de Castellaine who was divorced by Mme Gould recently, is preparing to create a scandal the moment he meets him. The Count is of the opinion that Prince de Sagan caused Madame Gould to bring the divorce proceedings against him.

NEWCASTLE

NEWCASTLE, Wednesday.—Ex-Ald. Thomas A. Clarke, who has been the manager of the business of Clarke & Co., for a number of years, has decided to retire from active work in the company and devote his time to insurance. H. R. Moody of Bridgetown N. S., has been engaged as manager and will take charge this week. Mr. Clarke will still retain his interest in the business, which will continue under the name of Clarke & Co.

The sailor base ball team has been organized, with A. S. Gremley, manager

The 'Dorothy N' is now running between Chatham and Newcastle and Red Bank.

J. D. Paulin, grocer, is building an extension to his store.

SPAIN'S LITTLE SOLDIER.

MADRID, Monday. — A pretty incident occurred at the thanksgiving service held at the palace to celebrate the birthday of the heir to the throne. When the procession formed in the royal apartments to proceed to the chapel the King and the members of the royal family were agreeably surprised and delighted to see that the Queen, who intentionally took the last place bore in her arms a charming little infantry soldier attired in a recruits uniform. It was the Prince of the Asturias. After the service the baby was enrolled by General Prince de Rivera, minister of war, as an ordinary private of infantry in the King's Regiment.

Coil-Spring Wire

imported direct from England is used for the laterals of "Maritime" Wire Fence. This wire, while it stretches up stiff and taut, is yet remarkably springy—makes a fence so elastic that it instantly springs back into its original exact position after undergoing pressure severe enough to stretch an ordinary fence permanently out of shape.

Test the galvanizing of this English Wire with your knife and you'll find it heavier, smoother, better. Fact is, this English Wire makes Maritime Wire Fence fully 25 to 100 per cent. more lasting than ordinary fencing—a 25 to 100 per cent. better investment.

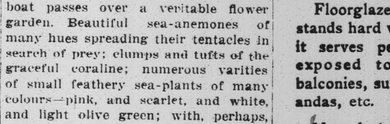

Will you favor us with a request for our **Free Catalogue** and learn more about our superior Maritime Wire Fence?

GARDENS OF EDEN.

(By a Banker.)

In the poorer district of a great city is a small public garden surrounded by squalid, uncared-for tenements, and presenting a truly melancholy and lugubrious picture. Instead of brilliant flower beds and well cared for gravelled walks, a few begrimed and sooty evergreens, here and there a dilapidated vase containing a dead plant, and a few seats, rickety and unclean, create an impression of profound gloom and depression. But not at all, for at the further end of the garden a young couple are walking to and fro, hand in hand, and judging by the rapt, enamoured expression on both their countenances, and the fire of fond affection which glistens in their eyes, they have plighted their troth each to the other, and are indulging in glad anticipations of happiness and of joy. Truly this place is to these a Garden of Eden, a very Paradise.

And there are other of these earthly oases, these Gardens of Edens; some so alluring from their inherent beauties some from their associations and memories. There are for instance the gardens of the seas, such as may well be seen on a quiet day though the transparent waters of the lovely torturous channels flowing amids the Scilly Islands. Here, perhaps, a fine specimen of the peacock's tail, its fringed filaments reflecting all the colours of the rainbow; here an undulating copse of the graceful pink or purplish feather plant, its delicate plumes gently waving to and fro as the oars disturb the clear waters; or here, its enormous bulb firmly fixed to a rock, a great plant of the 'Sea-furbelows,' its outspread fronds perhaps as much as twelve feet in diameter. And now the boat passes over a veritable flower garden. Beautiful sea-anemones of many hues spreading their tentacles in search of prey; clumps and tufts of the graceful coraline; numerous varities of small feathery sea-plants of many colours—pink, and scarlet, and white, and light olive green; with, perhaps, here and there, a specimen of the striking sea-fan, or its still stranger congener the sea-pen; whilst amidst all this labyrinth of beauty from time to time bright silvery fish of various kinds flash by, or hover in search of an unwary shrimp or prawn. Aye, to the lover of the beautiful in nature this is truly a paradise.

But there is one garden of surely infinitely greater interest than any other spot on earth. 'For in the place where He was crucified there was a garden, and in the garden a new tomb.' And this 'Garden Tomb,' situate at the foot of the reputed Hill of Calvary outside the walls of Jerusalem, is now believed by very many to be the actual sepulchre wherein was laid the Sacred Body of the Saviour of the world, after, on the adjoining Golgotha, making expiation for the sins of all who will but appropriate to themselves the benefit of that great sacrifice. And happily this ever hallowed rite is now vested in British lands under a deed of Trust, which provides that it be kept as a quiet spot, and preserved on the one hand from desecration, and on the other hand from superstitious uses.'

The Morning Graphic sent through the mail to any address for 25 cents per month.

Dust is a danger your home shouldn't endure

The floor that is coated with the glass-like, germ-proof, seamless finish Floorglaze gives will exude practically no dust. That ought to mean much in your home.

Floorglaze

Nearly every malignant disease finds dust its best messenger. And this floor-finish, in any of its ten eye-pleasing shades, deprives dust of its chief stronghold—the floor.

Floorglaze costs little—a gallon covers 500 square feet. Anyone can apply it right. It just CAN'T wear off—tho' it does dry hard in a single night.

Floorglaze is so durable, and stands hard wear so well, that it serves perfectly for floors exposed to the weather—balconies, summer houses, verandas, etc.

Most dealers sell Floorglaze. If yours doesn't happen to, tell us his name and receive a Free Book you'll like to read.
