Campbellton, N. B.  
BOX 480.

## BATHURST HAD TWO SLIGHT FIRES FRIDAY

Citizens Alarmed but no Things not so Lifeless but Damage Done—Social and Personal

BATHURST, Friday.—Miss Laura Power and Kathleen Sutton returned yesterday afternoon from Chatham, where they have been attending the convent.

Douglas Williamson is home from Mt. Allison Academy for the holidays. Principal F. A. Dixon went to Sackville this morning to spend the Easter vacation.

Two alarms have been sent in for fire during the past twenty-four hours. Yesterday afternoon the house on St. George St., owned by Peter Elhatten and occupied by W. P. Craig was discovered on fire. On account of the high wind much anxiety was felt by property holders. It proved nothing serious and was speedily quashed out with water from a nearby well. A spark lodging on the roof is supposed to be the cause.

About two o'clock this afternoon an alarm was sent when the I. C. R. freight shed was discovered on fire. The department responded immediately but before they reached the scene the blaze had been put out by an engine which happened to be in the yard at the time.

Powder L. O. L. No. 122, held a special meeting last evening. Four candidates were advanced to that degree. St. John Lodge F. & A. M. held their regular meeting last evening. Some work was done in the first degree.

**PETTY CHEATING WITH USED STAMPS**  
NEW YORK, Thursday.—"You would be surprised," said a post office clerk at the efforts people make to avoid the payment of postage. And quite often it is not the work of children either. The most common trick is to take the stamp that has been cancelled by hand and the impression just touches the edge of the stamp. After pricking the marked edge with a pin or cutting it with a pair of shears to make it appear as if it were a new stamp, it is put on an envelope for another voyage. All these are placed in the hands of postal inspectors for investigation.

"Others try to give the impression that a stamp had been put on an envelope and became loose and lost in transit by sticking a stamp on the envelope and then putting it with part of the envelope sticking to it off again. These as well as under-paid letters unless they have a foreign destination, where postage is there collected, are marked "Returned for Postage," and sent back to the sender. Second class matter, as rolls of newspapers, is often sealed against inspection by the stamps overlap the cover. Whether foreign or not it is returned for postage. When it again shows up, the mistake is noted, upon inspection it is usually found to contain written letters, photographs (unmounted) jewelry, merchandise of all kinds, making the package underpaid, hence it is returned.

"But the limit of foolishness comes when a person tries to efface the indelible ink from the stamp and with half the features of the stamp missing or rubbed away and some of the ink still remaining affixes it to an envelope, with the address of the sender on the back to facilitate investigation.

This, though it is stretching it a little too much, a postcard that had been put through the cancelling machine and delivered to the addressee had the cancelling impression and the address scratched off with a sharp knife and a new address substituted and a written message pasted on the reverse side.

**DR. KOCH FLEES FROM CHICAGO**  
Scientist Declares he Was Driven from City by Reporters and Friends  
CHICAGO, Friday.—I am literally driven from Chicago where I came Monday for a week's rest by over-solicitous friends and citizens and newspaper men, and I am obliged to leave at once," said Dr. Robert Koch, the German scientist, last night, as he packed his five large trunks and had them shipped to St. Louis by express labelled, "Hold until called for within two or three weeks"—paid his bill, bundled his wife and his brother from St. Louis into a carriage and was driven to the Union station, where he boarded a train for Milwaukee.

The international which so disturbed the scientist reached its climax yesterday when a party of local citizens and scientists stormed his apartments with pressing invitations for banquets and social gatherings.

## IMPROVEMENT IN LUMBER MARKET IN GREAT BRITAIN

LIVERPOOL, Saturday.—There is a slight tendency towards improvement in the lumber trade. Things are not quite so lifeless as they have been for some months past, but the improvement is only of the very slightest. Some Manchester firms seem not even to recognize that there has been any improvement. Other reports state that actual business is increasing and that enquiries show a great improvement on the sluggish state of things which have prevailed of late. Most of the stocks sold have been of a superior sort, and in many instances the concession in prices have been made. Just a little more life is discernible in spruce. A cargo or two is offering at prices ranging about 40c c. l. f. for the usual 50-per cent. narrow. The ball must start rolling early. Stocks are being depleted and seen on a hand to mouth policy must be resorted to. The position is too uncertain to say much about it. Quebec spruce is beginning to move. Some fair lines have been placed at prices similar to last year's opening values. London sales have been very small, but this need not be looked upon as an altogether bad sign. There are many firms in England that have not ordered a stick of wood this season. Apparently they are waiting for a clearing game, and it would not be surprising if it should result in more harm to them than good. There is very good reason to expect a more cheerful tone a little later on, both in regard to the prices and demand.

**JOKE ON ROYALTY.**  
Canadian Farmer Didn't Know the Prince.  
The Prince of Wales is fond of telling a good story on his visit to Canada with his visit to Ottawa some few years ago.

It appears His Highness was an enthusiastic bicyclist, and while at Ottawa Hall a very prominent member of the Government, knowing his likeness for this kind of exercise presented the royal visitor with a cushion-framed bicycle.

The Prince, then Duke of York, stole away for a quiet spin one morning, and in his ramblings met a farmer, headed marketwards, his wagon temporarily stalled by the loss of a wheel belonging to the wifefree bolt. His Highness, with his usual democratic kindness, assisted the man to find a lost nut and to couple up again.

In parting the farmer expressed his rough thanks and asked if he might know the name of the "person" whom he was indebted. The royal cyclist replied modestly, "I am the Duke of York, and may I ask whom I have the pleasure of addressing?"

A broad amused smile beamed from the farmer's face. He pulled out his chest and said, "Mr. McWhip, I'm your uncle, the Czar of Russia!"

The Prince saw the humor of the passage and laughed heartily as he wheeled countrywards.

**ANOTHER REPORT.**  
As a result of striking his pick in a piece of ground where some of the men were at work on the construction of the new Atlantic, Quebec and Western railway at a place called Point Macree, Quebec, an explosion occurred sending six men into eternity, without the slightest warning. The report is sent by Dan S. McDonald, better known as Dynamite Dan, of Skir Dhu, Victoria County, C. B. It happened a week ago, and he says that he and his men had begun to work, and according to Dynamite Dan was directly due to carelessness on the part of the foreman, who was killed instantly with five or six of his gang.

"It was a miss shot," writes the Cape Breton dynamite expert, "and when the working gang came out to work in the morning, one of the fellows for a Sunny Italy struck his pick in the spot where the miss-shot was. Suddenly there was a terrific explosion, six men were killed outright. Parts of some of the bodies were found in the tops of small trees close where the explosion happened, and in order to remove the explosive remnants, it was necessary to cut down the trees. There were three others badly injured, but they will pull through all right. Fortunately I was uninjured, although only a short distance away when the explosion occurred."

Mr. McDonald has in charge of a section of the new road, besides being superintendent of dynamiting.

## Cock-a-Doodle-do

We're justified in crowing over our competitors. Our cocks, stop-cocks, etc., are cock of the pipe. Our joints don't leak. Sewer gas we lead out. We don't find it in the house except when we fix some other fellow's plumbing. Ever have your house tested for sewer gas and leaks? That's one thing we do. Then we fix things. It's worth the cost.

**F. W. CARR, Plumber**  
CAMPBELLTON, N. B.

## FACTORY OF J. & D. A. HARQUAIL CAMPBELLTON, N. B.

When you think of building or improving your home please bear in mind that we have one of the Largest and Best Equipped Planing Mills, Drying Kilns and General Wood Working Establishments in the Maritime Provinces. This, with our advantages of handling large quantities of lumber at little expense, places us so as to compete with any Special attention given to kiln drying.

**THE QUALITY OF OUR WORK CANNOT BE EXCELLED**
