

NEW ADVERTISEMENTS.
THIRD PAGE.
Telephone Subscribers.....W. E. Smith
Stoves, Guns, Rifles, Etc.....James S. Nell

LOCAL NEWS.

COTTON SHIPPERS.—Large shipments of cotton were made from Marysville last week.

BAICK.—A large quantity of bricks is being shipped from Marysville to points up river.

THE WHEELS.—Considerable work has been done in the way of repairing the city wharves.

THE HOSPITAL.—Arrangements have been made for heating the Victoria hospital with hot water.

THE WATERWORKS.—A new boiler made by James Fleming, St. John, has been put in pumping station.

GOOD FARMERS.—There is excellent feed for cows in the officers' square, which those knowing animals take care to utilize.

SCOTT ACT.—Two months ago the police magistrate's sentence upon Wellington White for selling liquor—was three months.

CHANGE OF NAME.—On and after to-day the New Brunswick railway will become the Canadian Pacific railway, with New Brunswick Division.

THE SMOALS.—Complaints are made of the lack of sufficient water at the Promocio shoals for the ordinary business of the river. Some remedy ought to be possible.

EXHIBITION CONCERT.—Preparations are being made for a grand vocal and instrumental concert at the St. John Exhibition. Leading Fredericton singers will take part.

ON THE SLEET STREET.—Charles Coster and Mrs. Coster, of St. John, and Arthur Coster have been enjoying a ride to St. Andrews. Mr. and Mrs. Coster used a tricycle and the latter a bicycle.

ACCIDENT.—Percy Armstrong, a lad of about ten years, while riding with his father, Wm. Armstrong, Chancy Lane, fell from the wagon on Thursday last and was run over. The little fellow is not likely to recover.

ROSWAY.—G. Bally's horse supplied the regulation Queen street runaway last Thursday. No damage was done except to the wagon; but somebody will get very badly hurt one of these days by these performances.

THE ELECTRIC PETITION.—In reply to many queries, it may be stated that nothing has been done regarding the York petition; but an application is to be made to Judge Palmer on September 11th, in reference to naming a day for the hearing.

INTERVIEW.—Peter McFarlane who was injured last week in the runaway accident, had sufficiently recovered to leave his bed on Friday. Although able to move around the house, he is still far from well, but we are glad to state, rapidly improving.

REMOVAL.—The Fredericton electric light company are removing their electric light plant from the gas house to the new Gas Station street station. The company are rapidly pushing forward the necessary preparations to furnish our citizens with the incandescent light.

ST. JOHN CHURCH.—This comes from St. John and the Gazette is responsible for it: When the Patriarchs Militant arrived at Fredericton Junction on the lower trip last night, the band drew up in line and played the national anthem. The visitors thought they had reached Fredericton, and began to serenade the people.

ELECTION PETITION.—After some delay in getting the Westmorland election petition proceedings started, and after two witnesses had sworn to being paid for their services, Messrs. Stevens and Powell resigned their seats and the proceedings came to a summary end. No costs were allowed the petitioner; but he was compelled to pay \$30 because the case was adjourned over one day through no fault of his.

NO AGREEMENT.—The Calais Times says: Mr. Coleman, the well-known hotel man of Fredericton, who came here last week with a view to leasing the new hotel in St. Stephen, has closed negotiations and gone home. His offer was to pay seven per cent. on the cost of the building, furnishing and equipping the company standing year and year. The main hitch came on disagreement as to the amount that should be invested in furniture.

AN INTERESTING CEREMONY.—The cornerstone of the new Y. M. C. A. building, Moncton, is to be laid on September 23rd, with Masonic honors. The grand master, Dr. Thomas Walker, has issued a call to the grand lodge of Freemasons to all the subordinate lodges in the province to assist him on the occasion. Grand lodge will open at Moncton at 14.30 o'clock on the day named, and the ceremony will take place at 15 o'clock standard time.

FISH FRY.—This comes from Chatham and the World is responsible for it: There was a ballstorm in Wellfield some days ago, with thunder and lightning and when it had ceased several small fishes, some of them three inches long, were picked up on the ground, and several were found in springs. A spring by the roadside, at John Dignam's, in which there were no fish before, is alive with them now. They are growing in size, and are evidently quite at home in the spring. Mr. Dignam says they resemble mackerel in shape and color.

The Spring Hill Road.
A correspondent complains that the Spring Hill road is in a very unsatisfactory condition, and says that so important a highway as this ought to be kept in better order. There is something in the complaint; but it may be added that we will never have as good roads as we ought to have, until a rule is adopted requiring repairs to be made earlier in the season. Good highways are of the first importance. Poor roads mean loss of time in travelling and much discomfort. People do not appreciate this as much as they ought to.

The Parks Cotton Factory.
A meeting of the stockholders of the Parks company took place Wednesday afternoon. A statement of the affairs was laid before the meeting, and some considerable liabilities, with no immediate prospect of meeting them. It was also stated that the Bank of Montreal was pressing payment of an amount due; that in the meantime H. H. McLean, on application of certain creditors, had been appointed receiver, and had been running the works. Pending any determination as to the future, the members of the company approved of Mr. McLean as receiver, and he will continue to run the mill for the present.

Helio Central.
Manager Smith of the Telephone company inserts an advertisement in this issue requesting subscribers to answer the call from the central office every morning. This regulation is in force in all the large cities as the only means of ascertaining early in the day if the telephones, connections, etc., are in working order. During the night wires get crossed, ground, or suffer other slight mishap which prevent the service from doing effective work, and by attending to these calls if anything is found out of order, such can be repaired before the real business of the day commences. The manager should receive that assistance which he desires, and will save much annoyance on the part of the subscribers and remove misplaced blame from the shoulders of the central.

Amusements.
The Mangerville and Sheffield Templars are arranging for their annual picnic during the second week in September.

The A. O. H. excursion to St. Stephen and Calais on September 10th goes by special train, leaving here at 7 a. m., and St. Stephen at 8 p. m. There will be races in St. Stephen on that day. It will be a fine chance for a day off.

The water sports at the river on Tuesday next will begin shortly after one o'clock and will consist of canoe races, swimming matches, walking the grouse pole, egg hunting, tug of war and other trials of strength or skill. The friends of the city and St. Mary's will march in procession to the F. A. association grounds at 7 p. m., where dancing and a variety of games will be carried on. Admission to the grounds, ten cents.

The Woodstock carnival on Tuesday last appears to have been a great success. Quite a large party went up from this city by train, accompanied by the I. C. band. The water sports, the procession, the illumination and fireworks were all very well managed and got up with much good judgment. An immense crowd filled the streets and the universal verdict was that the day's fun more than repaid all the trouble, besides putting a little money in circulation, which in these quiet times is not a bad thing of itself.

The Methodist Sunday school picnic on Friday was a great success. Through the kindness of Hon. R. D. Wilnot, the beautiful grounds on Thatch Island were put at the disposal of the picnicers, and the general verdict was that a better place could not have been selected. The Florenceville made two trips to the grounds, and on her return in the evening was loaded to her full capacity. The athletic sports occupied the attention of the young people. Excellent music was furnished by the I. S. C. band.

The Baptists of Gibson, held their picnic on Wednesday last. They were conveyed to the grounds in buses, fitted for the occasion, in tow of the Bismark. Unfortunately shortly after they started rain commenced to fall, and the day proved to be one of the most disagreeable of the season. The boom houses were kindly thrown open to the pleasure seekers, and they had a capital time. When returning home they all received a thorough drenching; but the Baptists are partial to that fluid and therefore returned home happy when others would have felt grieved.

A Needed Improvement.
Application will, it is said, be made to the city council for the opening of the street between the western end of Northumberland street extension and the Westmorland street, so as to give a continuous street from Smythe to York street. If this is done, a street should also be opened between Regent and St. John Streets in line with Needham street, which would add an additional street to those running lengthwise of the city. We understand that the necessary reservations are provided in the grants of the land, or if not in the grant, by the owners of the land. The town is growing and this new street is wanted. Three new dwelling houses are in course of erection upon the upper part of the proposed street, which will be under way. If the owner of the land had been disposed to sell, when the proposed improvement is made, the lots which formerly made up the exhibition grounds will be soon taken up, as these are very well adapted for building purposes. This will necessitate the laying of another water main the full length of the city, with the exception of what is now Needham street, which has already been provided for in this respect. This is about as far back as streets will be laid out for some time, as the land drops off and is liable to overflow in the spring. The next step will probably be the opening of a street a little above the foot of the hill, and what a picturesque lot of building chances that would give. It would not take very much of a boom to send Fredericton expanding up the hillsides. When one comes to think how the back part of the town has been built up within the last twenty-five or thirty years, it seems not unlikely that we may hope to see several more streets running parallel with Queen.

Stanley Items.
Sanson's mill, that was burnt last fall, is in full operation again. The machinery consisted of one of McFarlane, Thompson & Anderson's latest improved rotary saw mills, which is doing excellent work and giving great satisfaction. Mr. Sanson is also grinding buckwheat by the new roller process, having got the machinery from the United States. This process is making excellent flour which is commanding the highest price in the market. This is the first and only roller mill in the province. Stanley Grange and Andrew Douglas' stores are doing a rushing business. Farmers from a distance come to them to buy and sell, finding it less expensive to come to Stanley with their produce than to drive to Fredericton.

There will be a telephone from Cross Creek station to Stanley village before long as the poles are being hauled out now.

The Royal Templars of Stanley have a very pleasant meeting every Friday evening. They have a card corps in connection with the lodge, and it is a pretty sight to see the little boys and girls going through their drill under the direction of Capt. W. T. Howe.

The Loggie Mill Burned.
(Chatham World.)
Flames burst from the Loggie mill, near the ferry landing, about 4 o'clock Sunday morning, and an alarm brought out the fire department. It being impossible to save the mill, the firemen were called to the rescue of any other property that might be in danger. It was a rainy night, the wind was from the east, and the fire did not spread, although huge sparks were carried a long distance by the wind. The mill burned down in a short time. It was a rotary steam mill, that had not been running for some years. It was owned by the N. B. Trading Co. An offer of \$1,000 for the machinery, including engine and boiler, was made some time ago. The fire, if not put out by an incendiary, was probably started by the pipe of some one who had spent the evening in the building with a bottle. Mr. Peter Loggie was doing a good business as a miller, such and binder maker, planer, etc., when he grew ambitious and erected this mill with which to saw the lumber. It ruined him financially.

Summer Visitors.
Summer travel to Fredericton was late in starting this year, but there never was a season when so many complimentary things were said by visitors. Without taking too much for granted, it looks as if very many more strangers would come to see us next year. No doubt the excellence of the hotel accommodations has much to do with this, but however delightful a place and its surroundings may be, tourists will not stay long unless they can obtain comfortable quarters to put up at. St. John must have made a great deal of money out of tourists this year. One thing that seems to be needed is a handy little guide book to the city and vicinity—nothing very elaborate; but something to tell people what there is to see and where to go. This distributed by hundreds in the steamers coming to St. John and upon the trains, and laid upon the hotel counters of this city, would be very useful and more than pay for itself the first year.

A Presentation.
On Thursday evening a few of John McCoy's friends called upon him at the Barker House and presented him with a very fine watch, having a carved handle and gold mountings. Its cost was \$50. E. H. Allen made the presentation, seconded by F. B. Coleman. Among those present were A. S. Murray, W. McKay, N. Laforest, Dr. McLean and others. Mr. McCoy was of course much gratified at this token of good fellowship, and returns to St. John well pleased with himself and everybody else.

PERSONAL.
Concerning People Known to Most Readers.
Alexander Gibson has gone to England. Mayor Allen left on Friday for Toronto. Dr. Atherton and Mrs. Atherton are in the city.

Hon. James Mitchell was in town this week. Mrs. Cornwall of St. John spent Sunday in the city.

G. W. Fenwick, of Montana, is visiting the city. Warden Scott has returned from St. Stephen.

John O'Brien, M. M. P., was in the city on Thursday. Dr. Cliff and Mrs. Cliff of Boston are here on a visit.

Mrs. Cornwall of St. John spent Sunday in the city. N. A. Cliff is spending a short time in Fredericton.

E. H. Allen and family have returned from Nova Scotia. Hon. J. J. Tweedie has been on a visit to Edmundston.

S. J. King, P. O. inspector, was in town on Tuesday last. Robert Cantors, of St. Francis, was in town last week.

Rev. Dr. Poole, of Detroit, also of Anglo-Israel fame, is in town. J. L. Inches and Mrs. Inches have returned from a visit to Bathurst.

Mrs. and Miss Campbell have returned from a visit to Bathurst. Judge King and Mrs. King have returned from their European tour.

R. K. Jones and Mrs. Jones of Woodstock, were in the city last week. Hon. F. P. Thompson and Sheriff Sherriff visited New York last week.

John E. Stewart of Andover paid a flying visit to Fredericton last week. Storey Hooper and Mrs. Hooper have returned from their western trip.

A. S. Murray has resigned the agency of the Merchants' bank in this city. A. Lottimer spent a short holiday at Lubec, Maine, in tow of the Rev. Dr. Barker.

J. J. Weddall and family have returned from their visit to Marysville. Miss Emily Laforest has entered the nunnery of the Order of Providence, Montreal.

L. W. Johnston and family have returned from a holiday spent at New Carlisle, Quebec. W. F. Ganong, of Harvard University, was the guest of Canon Roberts during the week.

Dennis Hanlon and Mrs. Hanlon are visiting Fredericton after an absence of seven years. J. H. Barry is again absent after his accident. He is somewhat paler, but all right otherwise.

Dr. Kierstead and Miss Barker of Sheffield, who were married recently, have gone to England to live. Sir Leonard Tilley came up from St. Stephen on Thursday and left for St. John again on Friday.

Rev. Mr. Mowatt's name is mentioned in connection with the pastorate of St. Matthew's church, Halifax.

D. Forgan of the bank of Nova Scotia, expects to remove to Minneapolis to take a mercantile position there.

John McCoy was in the city for several days last week. He says he is doing well in his new establishment.

John S. Leighton, of Woodstock, was in town last week on his way to St. John to arrange about purchasing his pure bred stock at the exhibition.

Mrs. Stephen Burt, formerly of St. Mary's Ferry, but of late years a resident of St. John, is now lying at a low point of health in this city. She has for years been a sufferer of asthma.

Miss Miller, formerly of J. J. Weddall's dry goods store, has accepted a situation in a large establishment in Newburyport, Mass., and she will leave for that place in a few days.

G. E. Crosscup, Mr. Crosscup and their two children, of Short Hills, N. J., were the guests of M. S. Hall a few days since. They have gone to Nova Scotia, but will visit Fredericton again before going home.

Allen Staples, formerly a clerk with Mr. Colter & Son, and lately with Geo. Robertson & Co., of St. John, and W. E. Graham, son of Henry Graham, of St. Stephen, have accepted positions in the Eddy, Hammond company.

Mrs. Will Lewis and grandchild, her sister, Mrs. Bennett and child, of New York, who have been visiting Mrs. John Pickard, a sister of Mrs. Lewis, are on their way to St. John on Friday. They will stop a few days in the latter place and then proceed to their home.

The St. John Exhibition.
The attention of the directors of the exhibition association, having been called to the omission of Cleveland boys from the list of horses, for which prizes are often awarded, notified the parties interested, the omission was entirely unintentional, and that the same amount of prizes will be awarded for the exhibition. Cards have been sent out to most of the citizens, asking each one having a room vacant, to place it at the disposal of the committee during the exhibition, in order that ample accommodation may be made for the large number of visitors that will be in the city. A reception room will be kept constantly employed, night and day during the exhibition, and on arrival of visitors in the city they should call at this room, which will be duly advertised, and obtain the addresses of parties having vacant rooms. For more particulars obtain the cards in advance should communicate with Ward C. Pitfield, chairman of that committee.

About sixty cases of West India Island goods have already arrived, and the committee have received notification, that large shipments of fruits and other perishable articles, will be made through the steamers, via New York and Boston.

In reference to stock, agricultural and horticultural products, the committee are making arrangements whereby they hope to meet the wishes of all parties interested as near as possible, relating to the time articles may be detained, and other arrangements which they have been asked to notify.

When George III. was King.
A picture in the show window of Geo. A. Burkhardt's photograph saloon on Queen street has received considerable notice from the public. It is a photograph of a document nearly a century old, beautifully done so that every letter was distinct and legible. It reads as follows:

"THE UNDERSIGNED WITNESSETH that for and in consideration of the sum of fifteen pounds New Brunswick currency in hand paid me, I do hereby bargain, sell and deliver unto my son John, a negro boy named Rippe to be his property and his heirs and successors during the life of the said negro, the receipt of which money from the said John Harding, I do hereby acknowledge; and I, the said George Harding, do also warrant the said property against all claimants whatsoever."

"In witness whereof I have herewith set my hand and seal at Margerville, this eighth day of July, in the year of our Lord one thousand seven hundred and ninety-five."

(Signed) GEORGE HARDING (L. S.),
Sambury County, S. B.

"It is remembered that on the tenth day of February, 1892, appeared before me the above named George Harding and acknowledged the above signature to be his hand and seal and that he delivered the above instrument for the above mentioned purposes."

(Signed) ELIZABH MILLS, Justice Peace.
A Row.—Phonix square was the scene of what promised to be a lively disturbance on Thursday; but quiet was restored by the police. Several soldiers who were engaged in it were locked up in the barracks cells, and a stranger, calling himself Thomas H. Bally, who flourished a revolver, was deprived of that weapon and fined \$20.

The Oat Crop.
From eighty-five reports I gather the following information relative to the oat crop: There has been a marked improvement in the condition of the crop during August, with a prospect of still further improvement, but the condition over the whole province is not up to the average. Assuming 100 to represent prime condition, the reports give the following percentages of condition for the several counties during the week ending August 23:

Albert, 67.2
Carleton, 62.2
Charlotte, 71
Gloucester, 72
Kent, 53
Kings, 68.3
Madawaska, 50
Northumberland, 62.5

A calculation based upon these percentages and the respective out product of the several counties makes the percentage of condition for the province, as a whole, 76.2. The report on the acreage in crop published in July showed a substantial reduction in the breadth sown to oats.

In this connection it may be interesting to stock raisers and others, to know that the condition of the corn and oat crop published in July showed a substantial reduction in the breadth sown to oats.

The oat crop is also light in Ontario. One H. Logan, Secretary of agriculture, Department of agriculture, 25th Aug.

D. Holmes, accountant of the Fredericton branch of the Merchants' bank, of Halifax, is in reference to another agency of the bank and succeeded by H. B. Schofield, late of the bank of New Brunswick.

One Minute Cure for Toothache.
Toothache, the most common and one of the most painful afflictions, is instantly cured by the application of Polson's Nervine. Polson's Nervine is a combination of powerful anodynes, and it strikes at once to the source of the pain, and affording in one minute total relief from pain. Mothers try it for your children's toothache. Nervine is sold in 10 and 25 cent bottles by all druggists.

The railway tunnel under the Detroit river is so far advanced that the workmen can walk from one side to the other. The tunnel is 6000 feet long, 2200 feet being under water. The Grand Trunk railway company are its promoters and it will furnish one more bond of union between Canada and the United States.

Room for Thousands.
A Great and Fertile Wilderness Awaiting Settlers.
A number of farmer delegates are on route from England for Canada to examine and report upon the agricultural capabilities of the Dominion at the expense of the federal government. It is stated that they will visit New Brunswick, which is greatly to be regretted, for in no part of the Dominion will they find a better adapted to the needs of the English farmer with a small capital than in this province. One would suppose that the Dominion authorities would feel themselves called upon to give these delegates more attention than they do in regard to immigration; but it seems to be taken for granted that nothing will be expended out of the federal exchequer in this behalf. Yet a few New Brunswick

Fertile Soil and a Large Area suited to all the requirements of successful farming, yet to be occupied, as well as many opportunities for the purchase of improved farms. Concerning this nothing will be said in this week; but a little space will be given to the former. It is conceded by all who have given the subject consideration that the soil of the Upper Silurian formation in the northeastern part of Nova Scotia is, in point of fertility and adaptation to agriculture, unsurpassed on the continent. This is strong language; but no stronger than the facts will warrant; for taking one thing with another, it may be fairly claimed that one hundred acres of land on the Aroostook, or in the counties of

Carleton, Victoria and Madawaska properly farmed, will give returns equal to a two million acre. There are already in this province two million acres of land, nearly all of this quality, awaiting occupation in the counties named and Restigouche—a great block of rich soil, splendidly wooded and watered, and so situated as to be capable of being made accessible to settlers without any very great outlay, comparatively speaking. At a moderate calculation, fifteen thousand farms could be laid out in this district, and fifteen thousand farms implies a resident population of more than one hundred thousand people. The policy, which shall result in filling this splendid domain with people, is one which should be the most ambitious of our public men. It must be admitted that the possession by the New Brunswick railway company of a very large tract of the best land, lying in the triangle formed by the St. John and the Tobique is an obstacle to be overcome at the very outset; but this need not prevent the

Launching of a Successful Project.
because the Tobique Valley itself furnishes a starting point as well as an avenue of approach to the interior of the region. The land immediately along this river is not anything like properly utilized. The intervals are, perhaps, the finest in the province, and are, largely, covered of land more easily worked or which will stand successively cropping with better results. There is here one hundred miles of river bank, and the whole of which is fit for farming, and only about 1000 people occupy it. There is sufficient fertile land in this valley to that class as all other enumerated in the province. This is to be attributed to the fact that

Lumbering, not Farming.
has been the principal occupation of the people, and this need not be a matter of surprise, because for many years the means of communication along the valley were of the most primitive character. The parish of St. John was settled when there were no roads above Three Brooks, that is twenty miles from the St. John, and it is only some fifteen years since a carriage could be driven to this parish. The water here was a good road of course, but in the summer, the river was the only available highway. Under such circumstances it would have been miraculous if the agricultural development of the valley had been rapid. The authorities agree as to the excellence of the land in Restigouche, adjoining the Victoria county line. It is a comparatively level country, and stands upon a high elevation south of the Public and leads to the south or east, he will see a horizon broken by elevated peaks or long ranges of hills; but to the north and west, the outline is a level and is remarkably smooth and uniform. Here may be reproduced the splendid Aroostook region, which in fertility and wealth is easily without a peer in all New England.
