

EVERY SATURDAY, CORNER QUEEN AND REGENT STREETS, BY THE HERALD PRINTING AND PUBLISHING CO. THE HERALD. FREDERICTON, NOVEMBER 21, 1891.

A WEAK FOUNDATION. The opposition to the local government is badly off for sources of inspiration when its chief organ, the Sun, depends upon the fiction ground out by the nearly defunct and totally discredited Gleaner.

The business which took the most time was hearing and trying to dispose of the application of the old Sun company to be incorporated as a new company.

Again there was trouble in the government camp. Dr. Taylor, M. P. P. for Kings, had resigned, so the public was assured, and was to get the registration of Kings county.

Speaking of resignations reminds me of our friend Phinney. There are those who affirm very strongly that he will not again take his seat in the house.

THAT ALLEGED \$5,000.

That man must be utterly devoid of human feeling who would deny the Sun his sympathy in its present painful situation. We do not mean in this reference to allude even remotely to the recent financial trouble through which our contemporary has passed, such for instance as the sale of its establishment by the sheriff.

WILL THERE BE A GENERAL ELECTION?

We cannot think the rumors of another general election for the dominion, which are again current, have the slightest foundation. Not only are we unable to discern any reason which would be likely to influence the government to try another early appeal to the country, but there are the strongest possible reasons against such a course.

MR. GREGORY'S \$8,025.

The following paragraph appeared in the Gleaner of the 18th inst.:

A. G. Blair would appear to have considerable confidence in the future of the North West. The records of Victoria, British Columbia, show that he has invested of his surplus cash about \$10,000 in real estate in that place.

On the other hand, the records of York county show that George F. Gregory has invested his surplus capital about \$8,025 in the city of Fredericton, dangerously near the Gleaner offices.

Mr. Blair will be glad to hear that he has so snug an estate as the above in B. C., and no doubt, will at once look it up. If he should find the Gleaner's information correct, it is to be hoped his investment will prove more productive than that made by his last partner.

The leader of the liberal party was banqueted at Boston on the 17th inst. by his compatriots resident in the New England states, and made a speech, as was to be expected, on the occasion. Assuming that it was not imprudent on Mr. Laurier's part to accept the invitation tendered him, he appears to have acquitted himself creditably and to have furnished very little, if any, material in what he said for hostile party criticism.

That portion of his speech in which he assumed to speak as leader of the great liberal party of Canada is of more interest than the rest of his speech, or as he might rather say, a subject within the sphere of practical politics. The occasion did not call for any precise or elaborate definition of liberal policy, and, therefore, Mr. Laurier contented himself with saying that one half the people are in favor of Canada regulating its tariff laws so as to serve the interests of Canada, and that the liberal party is in favor of more extended trade relations with the people of the United States.

The tariff policy of the liberal party cannot to our mind be better defined than to describe it as the direct opposite of that of the Tories. The latter is in favor of high taxation as a means of increasing the wealth and promoting the prosperity of the country. The liberals believe that no more taxes should be extracted from the earnings and savings of the people than is necessary for the legitimate purposes of honest government.

It appears strange to a visitor that Millville, one of the most stirring settlements of the county, is without a daily mail, although the railway runs through it and there is an express train to and from Fredericton each day.

LEAVING FOR THE WEST—TEACHER—Bears Captured—Personal Mention.

The people of Brockway are beginning to prepare for the coming winter. Many of the young men are leaving for the West, where they will spend the winter in the lumber woods.

BROCKWAY.

All are glad that the school teacher, Mr. Davis, is staying in Brockway this year. School has been closed for several weeks, but reopens to-day under the control of Mrs. Earnest Smith.

Mr. and Mrs. Davis have just returned from a three weeks trip in Yankee land. Mr. Davis was visiting in Boston and the general sports and friends with whom his house has been filled during the season of spring, summer and autumn, for the purpose of shooting and fishing.

Miss Dolly Brockway has just returned from St. George where she was visiting her relatives.

HARVEY.

A Cheese Factory Contemplated—Pic Social—Visitors.

A big rain storm and a general freeze up seem to be the weather realities this week.

NASHWAAK.

High Wind—Child Seriously Injured—Visiting—Filling Appointments.

The very high wind of the 17th inst. laid trees and fences down in quite a number of places. No further damage seems to have been done.

Miss John Cameron's only child, a boy of about six years, met with a serious accident on Saturday, 14th inst. He was found in the horse pasture with the lower part of his face badly smashed, the fish being torn as far as the temple. The jaw bone is splintered. He will give no account of the cause of the wound, but it is supposed that the coil, which he was forbidden to go near, had kicked him.

Mrs. J. J. Bell has returned home from visiting her sister, Mrs. Brown, at Gibson.

Rev. Isaac Howie, of Sheffield, took the appointments of Rev. T. L. Williams on Sunday, 15th inst. In the Tay church he preached very acceptably from the text found in Matt. xviii. 3rd.

PERSONAL

Concerning People Known to Most Readers.

N. A. Cliff has gone to Florida. Chief Justice Allen returned on Thursday from Andover.

W. P. Dowling paid a flying visit to Woodstock on Thursday last. It is thought that Judge Steadman will spend the winter in the South.

Wm. Harrison has been appointed night clerk of the Canadian Pacific office at McAdam Junction.

LOCAL TALK.

Henry R. Baird, an aged and well known citizen of Woodstock, died quite suddenly Friday morning, of pneumonia.

An explicit synopsis of the address of Prof. Robertson, of the experimental farm, Ottawa, delivered at Stanley, will be found on first page.

Wm. Rosborough is replacing the freestone steps at the post office with granite ones. The old ones have been worn to a depth of over two inches.

Several men went up on the C. P. R., on Tuesday for the lumber regions, some going to the Tobique for Haleson, others going through to the Nashwaak for Jamieson.

The station master is Thomas L. Earle, a well known oil patron of the road as an honest, obliging official, one who is attentive to the interests of the company and also attentive to those who have business with the railway.

Householders, who may have any contagious diseases, should at once notify the Board of Health. There is a penalty of twenty dollars for violation of the law.

An article in the St. John Sun of a late date, reflected somewhat on the city council and the officers and has occasioned considerable talk in the departments. It appears that a private talk was made public and there is some strong language expressed respecting the article in question.

QUEENSBURY.

Two-Boating Closed—Cheese Factories—Fall Ploughing—Gone to the Woods.

On Saturday last three veteran boatmen, Alexander Munroe of Nackawick and Giberson of Brighton, made one of their trips, likely the last of the season as this is the last day for ice and likely to impede navigation.

It appears strange to a visitor that Millville, one of the most stirring settlements of the county, is without a daily mail, although the railway runs through it and there is an express train to and from Fredericton each day.

Since Professor Robertson has commenced his course of lectures on dairy farming, we hear much talk among the United States about cheese factories. All that is required is a live man to work the matter up, the facilities are all that one needs as there are 400 cows at a distance of 8 miles, free site for factory buildings and plenty of the best spring water centrally located.

Dr. Owens, son of John Owens of Fredericton, is the resident physician. He has a large circuit and is generally popular. It is a great benefit to the people to have a doctor in their midst, instead of having, as in old times, to send to Woodstock for attendance.

Lad. Hawkins is the wagon and sled maker. He is a steam engine and turns out a large amount of work during the year.

The country is broken, high hills and deep valleys, with a fair supply of stone, a poor quality of free stone with more or less traces of lime. The land is of good quality, carrying in early days heavy loads of hayload. It is better adapted to grain than to root crops.

Just at present the farmers are exercised respecting the construction of a cheese factory here. It is altogether probable that this industry will be started at an early date and a profitable business done.

Millville is a fair sample of what push and industry can do in New Brunswick. Of course lumbering has been the great support of this industry, but this is dying out in some degree, but other industries are springing up to occupy the vacant place and the village must grow. One thing that is peculiarly noticeable is the neatness shown in all the buildings, there has been plenty of paint used and time given to the beautiful as well as the simply useful.

One of the prominent men of the place is R. R. Burt. He presides over the magistrate's court and performs his duties in a fair and impartial manner.

This village will, as it is in the centre of a rich agricultural country, continue to grow, till it becomes in the near future a little town, as the people have the ambition and necessary push to make it such.

HARVEY.

A Cheese Factory Contemplated—Pic Social—Visitors.

A big rain storm and a general freeze up seem to be the weather realities this week.

The agricultural society held their annual meeting on Monday night, doing some general business and electing officers for the ensuing year. The old officers were re-elected. R. Little, president; J. Mowat, secretary treasurer and R. Thompson depository. There seems to be a strong inclination on the part of the members to have a cheese factory established here and a meeting for the full discussion of the subject has been called for next week, date to be named by the secretary.

A pie social was held in the church last night. A good musical program was arranged and well carried out and a very enjoyable night was spent. The object was to get a set of double windows for the manse.

Misses Dora and Fannie Gray, of Salisbury, are here paying an extended visit to their sister, Mrs. Dr. Keith.
