SUMMER BUTTER MAKING.

Ontario Agricultural College Experimental Station. Many enquiries have recently been received by this department as to printed matter dealing with butter-making.

Our dairy herd at the present time numbers fourteen cows, twelve of which are now giving milk.

At present the cows are at pasture. Night and morning they are brought into the stable to be milked, and are fed a small quantity of bran - about one pound a day.

At the side of each manger is a small box, which is kept full of salt, and in front of each animal is a water trough, where they obtain their drink at will.

DASHED TO DEATH.

Killed by an Electric Belt while Rafting. The very heavy storm of Saturday, the 23rd inst., will be remembered in this locality as through it one man lost his life and another was more or less severely injured.

The man named Randolph Whitlock and another William McCoy, it is supposed, thought that the horn had blown, for the noise of the storm was so great that nothing could be heard, and they started in a rowboat to go to the camp, about half a mile distant.

Whitlock was found lying across the gunwale dead; McCoy was lying across him, and was also dead.

Whitlock was found lying across the gunwale dead; McCoy was lying across him, and was also dead.

BOUESTOWN.

July 22.—Two deaths occurred near this place this week, of persons middle aged and highly respected.

The Rev. Mr. Bell began his round of duties Sunday giving a very stirring and (we hope effective) sermon in the evening.

John Hovey, who contracted for digging and getting ready the stone for the cellar, is about through with his job.

The Court of Foresters organized here last fall although small yet, is steadily gaining ground, securing new members at every meeting.

Our Council which meets on Saturday evenings, has quite a membership and we are glad to say it is not very easy to buy anything intoxicating here just now except it is essence of peppermint, which some say give the desired effect.

Anything in the line of haggis, road carts, farm machinery, etc., can be had from either C. Duffy or W. Sharpe, each having an agency through their respective firm.

Where Alice, as a Man, would seek work and support Freda. Soon after this Ashley Roselle began to pay court to Freda, and Alice heard of this and she threatened to kill Freda for infidelity, and did by cutting her throat.

On this state of affairs the physicians were asked their opinion as to her present "manity." It is understood that Dr. Hammond concludes that she is insane, as also does Dr. Belot of Paris.

Dr. Belot of Paris. Dr. Calendar of this state says she is what is known as progressively insane, and intimates that in time she will become a driving idiot.

THE MAN WHO KNEW ALL ABOUT IT. One of the men who are always sure and never makes a mistake, recently stopped at a Western hotel. On going to his room for the night he changed his mind and called on him in time for an early start. "Now don't you forget the 5.30. That's the train I want."

"But the 5.30" began the landlord. "Never you mind anything about the 5.30, I know all about it. You call me in time to get it. That's what you're to do."

"All right," replied the landlord, a little shortly. "At 5 o'clock the next morning there was a tremendous thumping at the door of the man who knew all about it."

"Getting an early start, ain't it?" "No. Always take the 5.30 when I go through here."

"One of the directors of the road?" "No."

"Superintendent of division mobby?" "No. What are you trying to get at?" "Nothing. Only the time table yesterday, and the first regular train doesn't pull out till 9.15. Didn't know but you had some official connection with the road, and was going to pull out a special 5.30 all by yourself. You wouldn't let me tell you that right, but p'raps ain't too late now."

The man who "knew all about it" walked out of the office without a word, and the landlord smiled as he said to himself, "In the language of Josh Billings, 'It is better not to know so much than to know too much, for you know what you don't know.'"

JAPANESE DOCTORS. A Japanese doctor never dreams of asking a poor patient for a fee. There is a proverb among the medical fraternity of Japan. "When the twin enemies, poverty and disease, invade a home, then he who takes out from that home, even though it be given him, is a robber."

"Often," said Dr. Matsumoto, "a doctor will not only give his time and his medicines freely to the sufferer, but he will also give him money to tide over his dire necessities." Every physician has his own dispensary, and there are very few apothecary shops in the empire.

"When a rich man is in a physician he does not expect to be presented with a bill for medical services. In fact, no such thing as a doctor's bill is known in Japan, although nearly all the other modern practices are in vogue there. The doctor never asks for his fee."

"The strict honesty of the people makes this unnecessary. When he is through with a patient a present is made to him of whatever sum the patient or his friends may deem to be just compensation. The doctor is supposed to smile, take the fee, and thank his patron."

AN ISLAND OF DEATH. The captain of a coasting vessel that trades from San Diego, Cal., to Guaymas, Mexico, says that recently he was blown to sea by a storm and discovered an island not laid down on any of the charts. He landed, and found that the island had undoubtedly been swept by a scourge of some kind. There were numerous huts, but not a living thing was to be found. An examination revealed the fact that the former residents had died in such numbers that they had not been buried. The skeletons were lying around the island where the people were when death overtook them. In one hut were found the remains of seventeen people, who in many others were the bones of great numbers. There had been dead for such a time that the bones were being gnawed by kind of people they were, but it is supposed that they belonged to some of the island tribes which were so abundant in this part of the coast fifty years ago.

SCOTCH SETTLEMENT. July 19.—The fine hot weather of the past week together with the showers of the past few days, have made the crop all look exceedingly well. Farmers report the potato bug very plentiful in this place, but by the looks of the Paris greening a goodly number of them will soon be numbered with the past.

Miss Maggie Clayton, who has been learning the dressmaking trade in Fredericton, has returned home. Miss Addie Allen, of Lowell, Mass., is visiting friends and relatives here. Miss Estey, of Durham Bridge, is visiting her sister, Mrs. Samuel Allen. Mrs. Joseph Smith and family, of St. Mary's, are at present visiting her parents Mr. and Mrs. Jas. F. Clark.

SCOTCH LAKE. July 19.—The crops at this place are looking well. Mr. and Mrs. J. Davidson paid a brief visit to this place last week. Miss Nellie Jackson has gone to Gordonville, the great pain cure, would not be without it if it cost ten dollars a bottle. A good thing is worth its weight in gold, and Neville is the best remedy in the world for all kinds of pains. It cures neuralgia in five minutes; toothache in one minute; lame back on one application; headache in a few moments; and all pains just as rapidly. Why not try it today? Large bottles 25 cents, sold by all druggists and country dealers. Use Polson's nerve pain cure—Neville.

WORTH TEN DOLLARS A BOTTLE. Any person who has used Polson's Nerve Pain Cure, would not be without it if it cost ten dollars a bottle. A REMARKABLE CRIME.

How Alice Mitchell Fell in Love with Freda Ward. As the facts in the celebrated Ward-Mitchell case are being unfolded in the trial at Memphis, Tenn., a story is told that not even Zola, in her wildest realistic flights, has ever conceived.

Alice Mitchell, nineteen years old, fair of face and figure, fresh looking and self-possessed, is on trial for the murder of Freda Ward, and the story of the tragedy and circumstances leading to it forms one of the most remarkable cases in the annals of crime.

The following is a synopsis of the case: The mother was insane after the birth of her first child, and at one time was confined in the insane asylum at Fulton, Mo. Alice is her eighth child and before her birth the mother exhibited some signs of mental aberration. Alice, from a child, took no delight in the pastimes of girls and delighted in marbles, tops and baseball and.

Other Boyish Pastimes. She had no intimate acquaintances or child sweethearts. Alice was grown she had no beaux, and took no pleasure in the society of men. At the change from girlhood to woman's estate she met Freda Ward and loved her from the first time she saw her. The attachment was mutual, but was far stronger in Alice than in Freda. Freda took no pleasure in the sports that Alice delighted in, her instincts being feminine. Time made their love deeper, and when Freda went to Gold Dust to live, over two years ago, Alice visited her, and they were together continually. In 1891.

Alice Proposed Marriage. She repeated the offer three times, and to each Freda replied, agreeing to marry her. Then Alice threatened to kill her if she broke her promise. Shortly after June, 1891, she visited Freda and presented her with an engagement ring. It was agreed that Alice would assume the name of Alvin J. Ward, and the plan of elopement and marriage was arranged.

Alice was to dress as a man, have her hair trimmed, get a license and have the ceremony performed by Dr. Patterson, rector of Grace Episcopal church. After the ceremony they intended to go to St. Louis.

Where Alice, as a Man, would seek work and support Freda. Soon after this Ashley Roselle began to pay court to Freda, and Alice heard of this and she threatened to kill Freda for infidelity, and did by cutting her throat.

On this state of affairs the physicians were asked their opinion as to her present "manity." It is understood that Dr. Hammond concludes that she is insane, as also does Dr. Belot of Paris.

Dr. Belot of Paris. Dr. Calendar of this state says she is what is known as progressively insane, and intimates that in time she will become a driving idiot.
