

NEW ADVERTISEMENTS. THIRD PAGE.

Canada Pacific Railroad... 4 Cheap Excursions New York via Montreal...

LOCAL NEWS.

Q. C.—Hon. L. J. Tweedie has been appointed Queen's counsel.

ROTTING.—The Board of Education held a session on Thursday, only routine business being done.

LABOR COL.—Isaac Peabody has a Zephyr colt, two years old, that weighed, a few weeks ago, 1240 pounds.

FARM SOLD.—The Alex. Thompson property at Nashwaak has been sold, the purchaser being Mr. Hill, of the Hill & Berry firm.

PICNIC.—Blackville folks are preparing for a first class picnic on the 18th inst, under the auspices of the Sons of Temperance of that place.

New Town.—Emery Sewell's new steam tug Ernest visited this city on Sunday last and was much admired. She will be put to work at the booms.

FORESTERS.—Court Walocob of foresters, Woodstock, intend having a monster celebration on the 15th July. Many intend going from here.

DAVID WESON.—It is said that the steamer David Weston will resume her trips on the river in a fortnight. This will be satisfactory to all.

CONTRACT AWARDED.—The contract for the bridge across the mouth of Taxis stream has been awarded to Joseph Killam, who will shortly begin work.

SEALING.—Doyle and Trimlet, of the I. S. C. were arrested on Sunday night, charged with stealing money from a comrade's trunk. A court martial has been called.

HAND CUT.—Parent Shaw while working at Victoria Mills, Monday had a thumb and fore finger taken off by one of the shingle saws. He was brought here for treatment.

SCOWING.—Mr. Gibson has had such success scowling lumber to St. John that he has decided to continue. R. A. Estey has also commenced this plan of taking his deals to St. John.

HURO UP.—J. P. Richardson has been compelled to hang up his drive on Keswick after two months hard work. The stream has been very low. He had about three millions and a half.

OVER A HUNDRED.—The remains of the late Mr. Carr of Hamilton, were buried on Wednesday at Geary, Sunbury county, from the residence of his son-in-law, Howard True. Mr. Carr was in his one hundred and fifth year.

RETURNED HOME.—Mrs. Mary Small, of Robinson, Me., passed through the city on her way to Boistown. She was a daughter of Andrew McAllister of that place. Her husband having died leaving five children, she has come home.

RETURNED.—Quite a number of young men returned during the week from Maine and New Hampshire, where they had been driving. Here is a chance for conservative journals to make an item under the heading of returned exodians.

MEMBERS OF THE CORPORATION.—The Royal Gazette contains notice of the election of the Hon. Jas. Mitchell and the Hon. Wm. Pugliese as members of the Corporation of the University of New Brunswick, under chapter 84 of the Statutes.

RATFING.—Rafting has begun at the booms, the full season's work now being commenced. Many young men went to the booms this week. There are several improvements in rafting machinery being tested and are proving all that can be desired.

ALL FOR HIM.—Although the Hon. Peter Mitchell has many friends in the province who hope that he may grace the gubernatorial chair, there are none who so much desire it as the people of his own county Northumberland. They are for him unconditionally.

WORLD'S FAIR.—Professors Robertson and Saunders of the Experimental farm, Ottawa, are asking the support of the government towards an exhibition of the farming industries of the province at the world's fair, Chicago. It is the opinion that the province will make an exhibit.

ACCIDENTAL.—Frank Terny broke his leg while wrestling at Mayville on Saturday afternoon last. Lemuel Shanks cut his thumb very badly in the lath mill at that town on Monday. Dr. Sharp attended both cases. Thomas Shields, of Nashwaak, fell from a wagon on Friday, fracturing an ankle.

RESOLUTION OF EXTREM.—The directors of the People's bank at a late meeting passed a resolution expressing the high regard which they held for the late Henry G. Estey, who for several years held the responsible position of resolving teller of the institution, and also expressing their sympathy for the family so sadly bereaved.

WEDDING.—Miss Marie A. Cooper, daughter of William Cooper, King street, and J. W. McCready, barrister, of this city, were married at the residence of the bride on Wednesday last at ten o'clock, the Rev. Mr. Crawley officiating. The happy couple left on the train for Halifax for a short tour, followed by hosts of good wishes.

SOLD A CHILD.—At Andover on the 25th ult, an act was perpetrated that is without precedent happily in this province. A child was sold to a band of gypsies by a grandmother, with the consent of the child's mother for a pair of pillowcases and a few pieces of lace. The vagrants tried to get papers of adoption made out but the neighbors ordered them off.

CONTRACT AWARDED.—Henry Swin has the contract for the Blackville bridge, and it is expected that Robert Logan of Gibson will have charge of the structure. The bridge will consist of two spans each one hundred and seventy feet clear with long approaches, on account of the low banks. The work will begin at once. Robert Anderson of Kingsclear has the old pieces of the Burnt land brook bridge, Boistown, torn down and will soon be able to begin the superstructure.

FISHERY BOUNTY.—There is considerable rivalry among sportsmen as to who will have the best fishing privileges. Especially is this the case on North Shore waters. The competition at the sale of the Big Hole, Miramichi, privileges was very keen, the price paid being one hundred and twenty-five dollars per year. It was secured by a club composed of Newcastle gentlemen. The right of fishing on the Indian reserve, fronting the Big Hole, was bought by D. R. C. Brown, of Aspen, Colorado, at one hundred and fifty dollars per year.

COMPULSORY EDUCATION.—Classification examinations at the Normal school are going on and the final test will soon take place. There is a great demand for teachers especially in districts that keep school only half the year. Many districts do this that are well able to continue through the year but the trustees think differently. There are other districts which have good buildings and numerous scholars yet do not have a school during any part of the year. It will be necessary in the interests of the children that some measure of compulsory education be enacted so that children in sparsely settled districts may not be robbed of the benefit of the free school law. Many of the people and all the teachers are in favor of such a law.

THE UNIVERSITY.

Mr. B. G. Baxter Delivers the Valedictory.

FREDERICTON LADY CARRIES OFF THE HONORS.

DISTINGUISHED VISITORS.

The encomia exercised at the University on Thursday were of more than usual interest.

On the platform were many distinguished visitors, among them Sir Leonard Tilley, who presided in his official capacity, Sir John C. Allen, the Chancellor, the president and members of the senate, members of the faculty, members of the Alumni society, Dr. W. Mills of McGill, Dr. Walker of St. John, Dr. Warburton of Edinburgh, Professors Robertson and Saunders of Ottawa and the ministers of all the churches.

Reading the Valedictory. Dr. Bridges delivered the oration on the Origin and Work of the University. A full report of his address will be found on our first page.

Miss Ellen Peake, winner of the Douglas gold medal read a portion of her essay on Colonial Empires of the Past and Their Lessons to Those of the Present. At the conclusion of the reading Sir Leonard presented Miss Peake with the medal.

The examiners for the Alumni medal presented their report. A portion of the essay was read. The medal was presented by the president of the society, A. Bowman Mags of the Sophomore class.

Graduation Honors. First division—F. C. Walker, classics; G. Stead, science; G. B. Baxter, philosophy and political economy; F. Yonston, philosophy and political economy; G. Stead, engineering.

Second division—J. Johnston, mathematics; Miss E. B. Hunter, English, French, and German; F. Peake, English, French and German; E. S. Ruel, English and history.

Ordinary Graduation. Second division—F. Barker, Miss M. Hatt. Third division—F. Barker, O. McCallough, T. Peake, V. B. Thorne, F. Tweedie.

Logic—Class 1, Miss J. McIntosh; class 2, H. L. Brittan, Miss J. Williamson.

English—Class 1, Miss J. McIntosh.

Frenchman Class. English—Class 1, Miss M. McLean.

Classics—Class 1, Corwerthwick; class 2, Allen, Miss Thompson.

Class Distinctions. Senior class, mathematics—Class 1, G. Stead.

Junior class, sciences—Class 1, H. H. Hagerman, S. G. Ritchie; class 2, Miss S. H. McKee.

Philosophy—Class 1, Miss M. McLean, R. B. Roseborough.

English—Class 1, Miss F. Everett.

Sophomore class, sciences—Class 1, H. L. Brittan, Miss L. Shaw.

The Stanley Medal. The presentation of the Stanley gold medal to Mr. Stead for proficiency in natural science was made.

The Montgomery Campbell memorial prize was presented to Mr. Francis O. Walker.

Degrees Conferred. The candidates for degrees of B. A. were presented by Rev. Canon Roberts; candidates for M. A. by Mr. Havelock Coy; the candidates for B. C. L. also by Mr. Havelock Coy.

The degree of M. A. was conferred on Rev. J. W. H. Hill, B. A., and Rev. Ernest Barker, B. A.

The degree of B. C. L. was conferred on Jas. A. Vanwart, M. A., Q. C.

The Valedictory. Mr. B. G. Baxter, who delivered the valedictory address as follows:

YOUR HONOR, MR. PRESIDENT AND MEMBERS OF THE SENATE: MR. CHANCELLOR AND MEMBERS OF THE FACULTY:

LADIES AND GENTLEMEN.—The honor of delivering the valedictory for the graduating class has fallen upon myself. Like previous valedictorians, I feel a certain responsibility before you. I hope you will extend to me the charity and kind criticism that you have so often given to men in my position.

Four years ago, we the present graduating class, passed the matriculation examination, and were daily received as freshmen in the university of New Brunswick. To us, having taken the matriculation examination, and our degree seemed a long way off, somewhere at infinity. But at last the long looked for time has arrived. The class of '92 makes its exit from college, and nothing more remains but the sweet sorrow of farewell. Sweet because we welcome the nearer approach of real, active, struggling life; a sorrow, however, which leaves behind forever one of the happy periods of our lives.

Our class history differs from that of previous years. We were the second class in the four year course, and had an opportunity of seeing the working of the old, and of the new system. We received the due amount of "hazing" and endures, when our turn came, to give the due amount. We have shared our studies, our failures, our joys after the joyful fashion of college students. This community of interests has given rise to the fact that we are at long last a member of '92 exists. There has been considerable change in the personnel of the class since matriculation. Some have dropped out. More have entered. On the whole, our number has increased as we advanced. But, on this important day in our class history, we regret the absence of several who might be called our charter members of the class.

Many changes and improvements have taken place in the college, since its first freshmen, we entered its halls. New departments have been established. We now have in good working order departments of civil engineering and experimental physics. Philosophy has been made a department of itself. The other departments have been improved in many ways. The faculty has been enriched by the infusion of young life and energy, fresh from the fields of advanced study. The curriculum has been improved and enlarged; I might say, to an awful extent. A former professor, the learned Dr. Dyde, once told us that a university failed in its duty, failed in its purpose, if it did not, by a severe course, harden men that they would find the world so. There is some truth in the saying of the worthy professor. It is the noble opinion of the students here, that this university is doing its duty, is accomplishing its purpose.

I must speak of one of the changes in the curriculum, namely, the extension of the course that are applied to students in the last year. Formerly, students were compelled to take a course in the last year, but now that of the previous years. But now, a student, having taken the regular course for three years, may, in his last year, substitute for part of the regular course an extended course in any subject he may choose. In the January issue of the University Monthly, 1892, we find Mr. W. F. Ganong, one of the worthy sons of the U. N. B., advocating this principle. Speaking of the different faculties and faculties of students he says: "No two atoms in the universe are acted upon by precisely the same force. It is but strange then, that when atoms are built up into men that the latter should differ in body and mind. But if men's faculties differ, it is right by to train them all by the same rules, or it is reasonable to expect the same training will draw out different faculties?"

The methods of the university were once good because there was no better known it is for the same reason that they are bad in principle now, for there are much better known. Our institution has in the past tried to train her students all in the same way. What a fate would have awaited the intellectual life of the province if she had succeeded by this in moulding their minds all in one cast, in making them all alike in the end. There is no course in our university which allows any student specially interested in one or more branches to follow them further than his fellow students. The system of honor courses does not do this, for it merely adds a course of reading to one whose hands are already full with other work. If the taking of honor courses allowed a dispensation from some of the work of another course, it would be a step in the right direction, and it is along some such line as this that we must look for the introduction of limited electives without additional expense." Such a change as Mr. Ganong has outlined was not practicable

under the three years course; but with the four years course, we have three years for general education and the fourth year for special education. Under the three years course, two years for general education was hardly enough. The knowledge is absolutely necessary for a foundation; but the complexity of modern life places a special emphasis on the specialization. Specialization is the spirit of the age, and the benefit to be derived from its application to college life can readily be seen. It gives to the student more real education, more real training. It gives to the student, with the majority of students, much of the regular work to grind. He does not, in any way, forget directly the examination is passed. But with a student studying his favorite subject the case is different. There is no waste of mental energy. Emergence of a subject is not a mere passing fancy. The fact that we like a subject indicates an ability in that direction. We achieve our results by working along lines that are suited to us. Our heart is in the work. We make it a part of ourselves, and it is with us through life. To devote study to the study of the past is to concentrate their efforts in some one direction. The change from three to a four year course has been attended with many inconveniences, many of which have not yet been smoothed as some might have wished. But time has affected a cure. The little unpleasant difficulties have passed away, and we see the wisdom of the change, but the change has not been carried far enough. The crowning glory yet to come is to add a blurb I refer to that old time worn question of residence of the near future. I do not intend to argue this question, but I do intend to say that the near future, present students and of the past students when I say that a new residence would be a consequence of the change, it is not a recommendation for the future. I feel that I would be leaving myself open to censure from the part of the graduates if I neglected this opportunity to utter a plea in behalf of residence. Dear to our hearts, the residence of the near future, various boarding houses of the city may have its advantages, but it destroys our only as a body of college students. The incidents and little excitements of city life have more effect on us than we are apt to draw our attention from our studies. We feel that true college life cannot be realized in a city residence. I hope that at no distant date, the government will see its way clear to grant a sum sufficient for this purpose.

Prominent among the recent educational advances of the university is the new residence. The movement although new in this part of the country must be productive of good results. To those who cannot come to it is the principle upon which the residence is to be based. Caused by an interest in literature, in philosophy, in science, up from the mass of the people, the residence is to be based upon a more liberal education. Those who had no money could get it, but not so the working people. And now we see the university fulfilling its noblest duty. She is to be a mass of students, she is to be a business of life, supplies them with teachers of an academic standard, and test and marks the work when done. The well tested effect of the university is the popularity of the movement and give an idea of the scope of its usefulness. It is a recommendation for the future. That she was the first in the Dominion to take active steps in this direction. The result must be an increase of power and influence for the university as well as good to the public.

It is with satisfaction that we view the improved circumstances of the university. But there is a yet more important improvement would like to see an improvement in the method of awarding the scholarships. Proficiency, while it is necessary, should not be the only qualification. The needs and circumstances of the country should be taken into consideration. The faculty should be allowed to award the scholarships to students who were nearly equal in a matter of proficiency, to award the scholarship to the one who needed it. With students that are nearly equal in attainments, one examination will do, but in high school, one riding between them. Every one has bright days and dull days, and one can put in a better paper on one day than on another. If a student needs a scholarship and deserves it, his chance should not be put in such jeopardy, but should be left to the consideration of the faculty.

The university is greatly in need of more scholarships or aid to deserving students, something akin to the Price Greenleaf aid. When we compare this university with other universities we find that she does not, cannot, offer the same inducements as they do, refer to this. The fortune, not the fault of this university. Money is what is wanted, not the will to solve the question of how or whence the money is to be derived. What I know is, that many of the students who attend this college, are not over-burdened with the heavy load of debt, and are deserving of whatever aid the university can give them. Being a state university, it is the duty of the university to place the means of higher education in the way of the poorest in the land. The state will repaid for any expense incurred in this direction. "A nation's wealth is that part of the possession that feeds and educates good men and women in life."

I do not take it to be the province of this college to discuss the several minor improvements that are being made. Let the students have the University Monthly wherein to advocate their rights, for even the smallest of our improvements will be of benefit to the state. Let them address the powers that be through its columns. They will have the help of the faculty in every effort to better their condition. The good will of the graduates is ever with them and the U. N. B.

During the time that we have been here, there has sprung up within us any love or affection for our alma mater, seems to eliminate and center in this last farewell moment. Let us be true to her efforts in our behalf. Earnestly, faithfully, she has striven to confer upon us the benefits of an education. Fairly and kindly she has led us through the maze of classical, philosophical, and scientific studies of literature, unfolded to our wondering eyes the secret beauty of nature, trained our minds in perception and reasoning, and crowned all by revealing to us the mysteries of philosophy. Ours the fault, however, if we have not profited thereby. We owe it to ourselves, we owe it to the university not to stop here in the pursuit of knowledge.

Lovingly, sorrowfully do we sever our connection with the college. Pleasant recollections of our college life and of beautiful quiet Fredericton, must ever linger in our minds. The old story of the "mystery of the matter standing half way up the hill" has a new meaning for us. Our best wishes are for the college. Her reputation in every part of the world has been embellished. May it be so in the future. From the depths of our hearts we wish her long life and prosperity.

To our worthy and kind hearted chancellor, to our faculty, to our fellow students, we have been our guides and helpers. Charitably overlooking our many shortcomings, they have labored with us and led us on, and we must thank them for their kind and helpful words. We must thank the people of the city of Fredericton for the many favors that they have shown us during our stay among them. We must thank the faculty for their generous favors that can only be repaid by a grateful remembrance. If during the night you should be awakened by the roar of a cannon, do not get angry and complain, but rather, hear in its harsh tones the last farewell of the class of '92 to the people of Fredericton.

To the students that we leave behind, we have but little to say. You have been our partners for some considerable time. We shall miss your company more than all else on leaving college, it is with pleasure that I contemplate the harmony and agreement that has been between us from the time we have known each other. But we know you are the hardest of all. But we know you are the inevitable. It is pleasant to think that a little later on we may perhaps meet some of you again and enjoy your sympathy and confidence. We must thank the faculty for the example of some of the American colleges and exempt the editors of the college journal from examination in one case subject.

It is for you, students, to sustain the name of the U. N. B. in athletics as well as in scholarship. The first requisite to success is to be a good animal. Let us have many records as you please, we will be proud of you, your alma mater will be proud of you for every success you win. And now my task is done. The class of '92 steps down and out. To one and all, farewell.

Dr. Wesley Mills, professor of physics at McGill university delivered the alumni oration. It was a brilliant lecture, but unfortunately our space forbids insertion.

ALMS HOUSE SUPPLIES.—Contracts for Alms house supplies as follows have been awarded for the ensuing year: groceries, D. W. Estabrook; meat, Geo. Beatty; bread, P. Olyne; medicine, G. E. Davis. Dr. Vanwart will be attendant physician.

WILL NOT ATTEND.—Hiram Lodge, of Masons decided not to attend the ceremony at the Andover church in a body, but it is thought that many will attend. Most of the members could not find time to go, as it would take two days.

THEY HAVE GONE. Those who will be missed from the Home. Private Buswell, well known here in connection with the band of the I. S. C., died at Centreville, Ontario Co., on Sunday last, of consumption.

E. B. Wright, one of the old residents of Temple, York County, died at that place on the 31st. He had reached a good old age being ninety-nine.

On Tuesday, May 24th, Mr. Anna A. Jones, wife of H. Jones died at Lower Southampton. She was a daughter of Israel and Amelia Deans and was twenty-eight years of age.

Mother Vincent, Superior of St. Dunstan's convent here for many years died at St. John on Friday, the 27th. She had spent the greater part of a long life in the convent for the welfare of the people who surrounded her, a life of works and deeds for the benefit of humanity.

On Sunday last Joseph Sutherland, youngest son of James B. Sutherland, Kingston, died of consumption at the residence of Eden Waugh, Douglas. He was in his nineteenth year, and has suffered from this infectious disease for two years. The funeral took place on Tuesday, the Rev. Mr. McDonald officiating.

A Surprise Indeed. Edgecombe & Sons are famous all over the province for their superior make of wagons, sleighs, etc., but they have turned out a "surprise" this time for those who love motoring vehicles. It is a large double horse carriage, the body of which is exactly the shape of a cake of surprise soap. The wagon is gotten up in the very best style, upholstered and finished in the most perfect manner, the joiner work especially being the best turned out for years. The wagon is intended to travel through the roughest roads in the province, and is of the highest quality of the soap. It cost about \$550 and beside being unique, is durable and neat. The St. Croix soap company for whom it is built are aware of business men but they never took a wiser step than when they employed Edgecombe & Sons to make this carriage for them. It is a day.

C. P. R. Excursions. Arrangements have been made for four cheap excursions from the Maritime Provinces to the Northwest, via the C. P. R., on June 13th, 20th, 27th, and July 18th. The tickets will be valid from any point on the Intercolonial P. E. I., Windsor & Annapolis or C. P. Railways in the Maritime Provinces, and to Delmar, Oxbow, Moosomin, Nesbit and Binscarth the fare will be \$22; to Moosejaw, Regina and Forton, \$20; to Calgary and Prince Albert, \$25; and to Edmonton, \$40. They will be good to return within six weeks of the date of issue. A sale of C. P. R. lands at Edmonton is to be held on July 5th, and can be reached by leaving here on June 27th, while those wanting to visit the great western exposition at Winnipeg on July 25th to 30th should go by the last excursion.

Killed in the West. The remains of John A. Davis, of Taxis river, was carried by the C. P. R. train of Monday to Boistown, where it was consigned to the earth, the rev. Mr. Wass officiating. The deceased was a young man of about twenty years. About two years since he went to Woodville, N. B., where he worked in the woods. While loading a sled with logs, a chain broke and flying back struck him in the eye, breaking the frontal bone. He fell on his back, but getting worse, he sent for his mother to attend him, and on Thursday evening last he died. A young friend, William Fletcher, attended him all through his sufferings and came home with the body. Much sorrow is expressed at Boistown where he was well known.

The New York Mutual Branch. John C. Risteen has opened offices in the Wiley building, 304 Queen street, in the interests of the New York life insurance company, and will be pleased to receive a call from his friends at any time. The company has representatives in one of the largest and oldest in the world. It is the policy of this company to open branch offices in the principal cities of Canada and as far as possible to invest its premium receipts in local securities, thereby rendering it a home company in all respects. This move of the New York life will be looked upon with favor by its many policy holders in this vicinity and its immense resources and strict business-like plans will commend it to all.

English Mail Steamers. Mr. John H. Sheldon, of York county, N. B., left on Saturday to join the R. M. S. "Creacion," which sailed Sunday from Rimouski with a full passenger list.

Prof. Stockley and Mr. K. H. Henderick of Fredericton; Mr. George Graham, of Bank of B. N. A., and Mr. Thomas Youngblood, will be passengers for England per S. S. Mongolian, from Rimouski on Saturday next.

The Allan Line now carries the English mails weekly to and from the St. Lawrence, and passengers by this line have the privilege of freight on their baggage. The Allan Line Company's advertisement can be found on our first page and can always be relied on as correct.

Serious Runaway. This morning John B. Guter and wife were driving past the hospital when the horse got frightened at a man standing near the fence with a piece of board in his hand. The man ran, the harness broke and Mr. Guter was thrown forward, the carriage passing over him. The horse then got into the gutter upsetting the carriage throwing Mrs. Guter out. She escaped with a few bruises however receiving a severe bruise on the forehead. Mr. Guter was badly shaken up and had his collar bone fractured. Dr. Curry is attending him. The horse was caught, the wagon and harness being almost a total wreck.

River Trams. For the information of our country readers we may say that the little steamer, Belle, on King street is about finished and also the shore pier near the railway track. A strong party of men are now at work on the approach and shore pier at the Gratton end. The heavy quarry stone for bond and facing has to be taken across by the ferry. The water is yet too high to admit of work at the middle piers; evidently the contractors will have all the necessary preparations made to build the river piers when the water falls.

One of Our Days.—Thursday was the warmest day of the season, the thermometer registering at 85°. In the evening about seven o'clock a very heavy wind and rain storm prevailed but no damage is reported.

SHERIFF'S SALE.

To be sold at Public Auction, in front of the County Court House in the City of Fredericton, York County, on THURSDAY, the twenty-eighth day of July next, between the hours of twelve o'clock, noon, and five o'clock in the afternoon.

All the right, title, interest, property, claim and demand whatsoever, either at law or in equity, of Edward McFarlane, of the Parish of Cambridge, in the County of York, granted to the said Edward McFarlane under the Great Seal of the Province of New Brunswick on the 27th day of June, A. D. 1844, by grant No. 2038, more particularly described in the said grant, containing one hundred acres, more or less, and designated as lot number five in Range four, S. R. L. Lake Settlements.

Also all that certain other lot, piece or parcel of land situated, lying and being in the Parish of Cambridge, in the County of York, granted to the said Edward McFarlane under the Great Seal of the Province of New Brunswick on the 27th day of June, A. D. 1844, by grant No. 2038, more particularly described in the said grant, containing one hundred and eighty-eight and eighty-eight parts of one hundred acres, more or less, and designated as lot number six in Range four, S. R. L. Lake Settlements; together with all and singular the buildings and improvements thereon.

The same having been sold at public auction under and by virtue of an execution issued out of the County Court of the County of Cambridge at the suit of William Balmaitre and George E. Balmaitre against the said Edward McFarlane.

A. A. STERLING, Sheriff. Sheriff's Office, Fredericton, York County, April 25, 1892.—3m.

MORE NEW DRESS GOODS. Just Received from London.
