Store to Let.—Harlock Coy.

LOCAL NEWS.

LEGISLATIVE—A meeting of the local government will be held next week.
REMOVED WORK—Messrs. Temple and Wilcox, M. P.'s and senator Work have gone to Ottawa.
ICE BUSINESS—Several parties are at work cutting ice, which at present is about four inches thick.
RETURNED—The old mayor and corporation of St. Stephen were returned in the town election on the 20th inst.
BAPTIST—Five candidates were baptised at the F. C. Baptist church by the Rev. F. C. Hartley on Sunday evening last.
MR. SHINOLDS—John A. Morrison, sr., is putting up a large shed for the storage of shingles in connection with his mill below town.

PETITION—A petition is to be prepared by the holders of post office boxes that the office be kept open till 10.30 instead of 9.30 in the evening as at present.

ARRIVED—Michael Ridout of Gibson has arrived in this city on Wednesday, the 22nd inst., by the rev. W. Macdonald.

ROBBIE BURNS—The Robbie Burns anniversary to take place at the Kirk on Wednesday evening last, was postponed on account of several other entertainments being announced.

INDIAN BOY TRAMP—An Indian boy who put in a few days here during the summer, having come from Burnt Church, Miramichi, has been arrested at St. John for vagrancy.

LOS OF WATER—On account of the severe frost a water pipe burst on Queen street, between Carleton and Regent, flooding the street pretty badly. It was rather a difficult job to repair.

ON FIRE—The blacksmith shop belonging to the estate of the late John Brown, West End, was on fire Tuesday afternoon but some lively work stopped the flames. No alarm was given.

CHARLES AN ITEM—J. W. McCready has himself become the pivot of an "item." He got a bad fall on the post office steps on Friday last, with some severe wounds. The steps have been attended to.

COLETS CHURCH—The congregation of Colets Church, Montreal, to whom the rev. Mr. Mowat, lately of this city, ministers, will build a \$10,000 church on one of the principal thoroughfares.

GOING TO MONTREAL—His lordship Bishop Kingston has gone to Montreal to attend a meeting of bishops called to elect a metropolitan. It is believed that the choice has fallen on Dr. Lewis, bishop of Ontario.

EXHIBITION—It is the intention of Agricultural society, No. 34, to erect in the spring a large and suitable building for exhibition purposes. The fair to be held next autumn will surpass anything ever held here.

DEBATING SOCIETY—A meeting was called for Wednesday night last, the object of which was the re-organization of the literary and debating society formed by the students and young men last winter. The work of the society will be resumed.

PERSONAL—Dr. Turner of Ed. River, one of the popular medical men of the upper part of the county, was in town during the week. The doctor, by skill and careful treatment, has built up a large practice in upper York and Carleton counties, and is held in high esteem by all.

KNOCKED DOWN—John Carson, an old man, was knocked down near the corner of York and King streets on Thursday by a runaway horse. He was taken to Miller's livery stable office and attended by Dr. Coulthard. He had no bones broken but was pretty badly shaken up.

BIENNIAL ELECTIONS—There appears to be some doubt in respect to the date for the next election for county councillors. Under the new law an election will have to be held in the autumn of 1893, the councillors then elected to hold their seats for two years instead of one as formerly.

MAL-PRACTICE—The suit, Patterson vs. Turner, for mal-practice, was to have been resumed at the county court on Thursday, but on account of attorney general Blair, for the defence, being engaged by the late B. R. Kelly, the court adjourned till Friday, when the case came up.

BALLET HUNT—One day last week John Delong of Little River, Sunbury county, while working in the woods at that place received a very bad cut on the left hip. He had to be taken home and almost perished on the way from pain and the severe cold. He is, however, doing well.

ON THE TRACK—The horsemen enjoyed some very exciting sport on the river on Tuesday afternoon, where they had a half-mile track prepared. There was good time made, but of course the cold weather affected the watches, so that it would not be wise to give the records to the public.

THE S. A.—Fifteen soldiers were enrolled under the S. A. flag at the barracks of that vigorous religious body on the Tuesday evening by brigadier Jacobs. There was a pleasing address by ensign Smeeten of commandant Booth's staff. The barracks was pretty well filled and good order prevailed.

COMING AND GOING—Mrs. W. J. Robertson and Miss Clyde of St. John, have been visiting at F. B. Edgcombe's. Miss Annie Stanger has been on to the Maugerville school. Hon. R. J. Ritchie visited the city on Tuesday. John V. Ellis, Jr. of the Telegraph, called on his friends here the first days of the week.

BIG BLAZE—On Tuesday morning last the dwelling house of Michael Lennette, of Southampton, was entirely destroyed. Some ashes had been taken from the stove and placed in an out-house and it is thought that this is how the fire originated. All the furniture was destroyed as well as sixty barrels of potatoes.

THE HOSPITAL AID—The hospital aid concert on Monday evening was largely attended, and as before, the entertainment was a success. It was a genuine surprise to many, as it was not supposed that Fredericton had local talent of such a high order. The committee in charge, and those who took part, must have been blessed at the ovation which they received, and at the large attendance.

COURT MELANCHOLIC—The members of Court No. 1, O. F. S. city, will be offered for the term as follows: Wm Christie, C. R.; H. Dougherty, V. C. R.; J. F. Richards, R. S.; H. D. Creed, J. W. Tabor, treasurer; Dr. Coulthard, phys.; Dr. W. Bridges, chap.; H. Woods, S. W.; J. Woodward, J. W.; Harvey, J. B.; J. F. Richards, C. D.; H. C. R. Trustees: J. G. Gunn, J. D. Fowler, W. Christie, J. F. Richards, and J. W. Tabor.

IN WANT—Those in want of organs, pianos, sewing machines or furniture should read the New Home advertisement in another column. The articles are of the best and the prices will suit you. Call and see the new premises at any rate. The New Home sewing machine is the finest in the city and rings are made to suit the hard times. Mr. Duffie has won a reputation for fair dealing and will be treated on a business basis.

AS BEFORE.

The Auditor's Report will not bear investigation.

A glance over the auditor's report, showing the standing of the different parishes of this county for the year, reveals many things that the majority of rate payers are not familiar with. The report is like its predecessor of last year incorrect, but it must be taken as it reads. Beginning with page twenty-six there is an error in the returns of bye road commissioners. There is also an error on page forty-seven. Passing by page sixty-four which is noted in "errata" on last page we turn to seventy-nine. Here there is a mistake of \$6.00 which is carried through pages eighty, eighty-one and eighty-two. The total from eighty-two which is incorrect, has been placed on page eighty-three, school warrants, making an error in total payments to end of fiscal year. This item is then carried into an account on page 100 making that incorrect as well. On page 103 the same figures occur in the total payments, showing a continued mistake. For 1901 James Scott's rates for Dumfries for '92 and '91, make a showing of \$20.54; on page 119, the total takes the sum of \$935.53, or a gain to the parish of Dumfries of \$1.99. Here is one account, add it for yourselves:
Total secretary treasurer.....\$385.53
Delinquent list.....23.15
Five per cent commission.....36.00
\$444.68

Only a mistake of \$14 appears in the accounts of Kingsclear:
Cash from secretary treasurer.....\$378.00
E. Estabrook for poor.....250.00
Goodies, keep Susan Coy.....30.00
J. Simms, wood.....7.60
J. Simms, coffin.....10.00
Mrs. T. Armstrong for Mrs. McCreedy.....35.00
W. T. Estey, for poor.....35.00
Over expended in 1891.....50
\$609.28

Balance on hand.....\$ 9.50
If this is looked into carefully it will show instead of a balance in the hands of the collector of \$9.50, that he owes the county of parish \$31.50.

The balance on hand as stated on page 102 does not put the case fairly. On page 102 under receipts there is a change of \$6.00. The amount paid in by the city for this year for administration of justice, an amount of \$803.00, is also included. This later amount belongs to next year's return. Subtracting these amounts from the \$2,524.01, as reported on last page, the actual showing is a balance on hand of \$1,029.46, instead of \$2,524.01 as reported. It is time a change was made in the system of appointing a public accounts committee who in a few minutes look over the accounts and pass them when they have not time to go into particulars.

Councillors for several parishes have been endeavoring to do the work of the legislature instead of attending to their own, and as a consequence find their parishes heavily in debt. Leaving out the parishes which have a credit or small debt we find that at the end of the fiscal year the debt was as follows: Bright, \$585.73; Canterbury, \$801.88; Kingsclear, \$217.13; Prince William, \$280.00; Canterbury, \$155.30; Southampton, \$322.00; and Stanley, \$294.30. Southampton under the kindness of coun. Pinder and Canterbury under coun. Lawson, appear to have gone into business wholesale. The total indebtedness is \$4,000. It will be said by some of the councillors that the delinquents in the different parishes will all make this up, but it must be borne in mind that most of the delinquents are of seven years standing and some of them are thirteen years and so that there is small possibility of their liquidating the debt.

A scheme is on foot and unless the rate payers return a different set of men at next election for councillors, will be carried through, to the effect that the county, instead of as at present allowing each parish to provide for its own poor, will be taxed as a whole for the maintenance of a poorhouse. The aid of the Gleaser has been invoked to help saddle this debt upon the various parishes. It will benefit certain parishes as it will lessen their poor account, but others will have to pay the difference. Couns. S. Inch, Pinder, McNally and Fullerton, while having many arguments to produce respecting even the appearance of direct taxation in provincial affairs will no doubt tell their constituents that owing to the manipulation of the county funds, they must ask every ratepayer in their district to pay thirty cents of a direct tax on every dollar they pay in as taxes, or suppose the \$10, they will ask for \$13 instead. Mr. Pinder, it appears, is to leave his successor who ever he may be to saddle the burden and the other mentioned should adopt the same plan.

There is another matter of some importance respecting the way the affairs of the county have been conducted during the year and the manner in which the balance sheet has been struck which will have to be held till next issue.

MARYSVILLE CARNIVAL.

Some of the Best Representations Ever Shown.

The carnival at the rink on Friday night at Marysville was far superior to any of last winter, in the number and variety of costumes and in the many peculiar impersonations presented. Marysville turned out in full force and Gibson, St. Marys, and Fredericton were well represented. From the first band till the close the exchanging group of skaters made a pleasing picture, and enjoyment was the order of the evening. As usual no mishap or accidents happened and the best of order prevailed.

Among the best costumes were:
Ladies:
Rose Jewett, Hospital nurses.
Bessie Dunphy, Shavings.
Lou. Davenport, Lou. Davenport.
May Dennison, Maids of Switzerland.
Lena Allen, Ladies of the East.
Annie Heron, Summer.
Grace Allen, Flower girls.
Grace Robinson, Flower girls.
Jennie Grass, Tissue paper.
Lella Linn, Ladies of the East.
Florence Tapley, Goddess of wisdom.
Edith Gibson, Papooses.
Alice Day, Ladies of the East.
Annie Gilmore, School girl.

ENTERTAINERS:
John T. G. Hay, Snow king.
Wallie Titus, Never there before.
Byron Phair, Whitechape.
Evan O'Connor, Heavy weights.
Jack Tapley, Page.
Charles Staples, Jr., Mr. Jones.
Charles Clayton, Grandfather's clock.

The judges were Harry McLeod, James Roberts, and John Henry. They did their work in a satisfactory manner and awarded the prizes as follows:
1st—Weddin' that was to be.
2nd—Shavings.
3rd—Miss Lawless.

ENTERTAINERS:
1st—Heavy weights.
2nd—Dressmaker.
3rd—Hugger.

Among the novelties was the prize fight, boxing, rings, and those who took part, mostly by Byron Phair and then O'Connor. The big sawyer was also new, and Mrs. Jones, the dress maker, was unique. There was a full compliment of Indians, clowns, dunks, earls, firemen, college students, dominos, &c. The band played some very pleasing selections, and the evening passed off very pleasantly. The next attraction will be the appearance of Hagen and Norens if arrangements can be made.

YORK COUNTY—On the 12th inst., C. L. Brown, formerly of Southampton, York county, led the poll of 90 votes in the aldermanic election at Vancouver, B. C. Mr. Brown went to Vancouver some six or eight years ago, and is reported as having done well in the west. The press of that town adds: "Mr. Brown is in the real estate business and has a beautiful home."

ROCKY MOUNTAIN SHEEP—John Edwards, the popular proprietor of the Queen, has received from Henry F. Perley, of Calgary, the heads of two Rocky Mountain sheep. They have handsome horns, the largest ever seen here. Mr. Edwards has sent them to St. John to have them mounted.

FARMERS' CONVENTION.

Annual Session of Farmers and Dairy-men of the Province.

The annual meeting of the farmers' and dairymen's association of New Brunswick was called to order by the president, W. J. Owens, of Tracy Mills, Carleton county, in the city council chamber here, at three o'clock on Wednesday afternoon. Seventy-five persons enrolled themselves as members. Besides these there has been a large number of visitors in attendance, who have been following the discussions on the various subjects with much interest.

The President's Address.
The president, Mr. Owens, opened his address with an expression of gratitude to Providence for the blessings bestowed upon the farmers' labors during the past year, referring particularly to the bountiful harvest given them. In the closing years, he said, he had known of their trials respecting soils, crops and the best method to be pursued in their work, and he hoped that the past year had not been an exception to any of his former years. He had entered upon the 17th year of his existence as an organization, hopeful, he trusted, for the future of the farming and dairying industries of the province. Russia, he thought, was the only country in the world from which statistics had been received where the crops were not up to the average last season. One thing, he said, that was grateful to note was that the returns for 1892 showed that the dairy and beef business had increased rapidly, while that with the United States had as rapidly fallen off. This he attributed to the McKinley legislation, and the consequent impulse given our people by selling their produce in the market of Britain. It was an instance of intended evil producing lasting good. We would not unlearn, of course, all the good that McKinley has taught us, but we would be a very opportune time for our government to step in and encourage the continuance of British trade by making it easy for us to buy from her. He referred to Canada's large wheat crop of the past year and the ready market for it in England. The future of the Northwest as the great wheat belt of the dominion was certainly assured, producing, as it did, three times the quantity needed for the consumption of the provinces of Ontario and Quebec—the centre of the dairy interests of the country—were making rapid advancement both in the quantity and quality of their produce, the output of both butter and cheese steadily increasing each year. In our own province we made no speciality of any particular branch of agriculture, the soil being adapted to all the various classes of crops. He trusted that their energies should be exerted more in one line than in mixed farming; dairying and the by-products of the dairy, he considered, would be the future source of profits to the farmer, and he trusted that he referred in terms of appreciation to the assistance and encouragement given to the dairy interests by the dominion and provincial governments, and thought that the gentlemen employed by the

Provincial Government
last year had succeeded in awakening an interest in the subject amongst our farmers, which would result in much benefit to the farmers themselves and the province at large. As farmers they should work together, and not be governed by selfish motives, but for the good of all and by co-operation with our government, help to encourage and stimulate the dairy interests of the province. We have the climate, pasture, and water; who says we have not the intelligence and pluck? When we consider the progress that has been made in agriculture in New Brunswick during the past few years and the adaptability of our soil and climate to the various kinds of cereals and to the successful pursuit of the dairy industry, surely the young men of our province have no reason to complain that they are not doing well. We have the right here to be proud of the conditions of success in agricultural pursuits. Much has been done by the dominion and provincial governments towards stimulating dairying in the province in New Brunswick, more should be done, and he hoped the farmers would not be disappointed in their expectations in this respect and that, if they were permitted to meet and discuss the subject of their own back and discern marked improvement. He trusted that this year the influence of the association would continue to widen and that more of our farmers would see that it was to their interest to identify themselves with the association, that each might learn and profit by the other's experience.

Reports.
At the close of the president's address the vice-presidents, representing the different counties, were called upon to report on their respective sections, and the following responded briefly: Abraham Alward, Kings county; H. O. McLean, Sunbury; Robert Lamb, Westmorland; H. Emery, Carleton; Donald Inks, Victoria; John Barberie, Restigouche and August Legere, Kent.

Mr. Alward reported the dairying industry progressive in Kings county, the crops of last season fair and the farmers in a fairly prosperous condition.

Mr. McLean reported the crops, on the whole, in Sunbury county last year up to the average, with the lay crop much better—nearly double that of former years. Much interest had been aroused in the dairying interests by the addresses and exhibitions of butter and cheese making given at different points throughout the county by S. L. Peters. At present there was only one cheese factory in operation in the county, viz, that at Sheffield. This was run for about five months in the year, using about one ton of milk per day. An extension of the business in the county would, he considered, pay decidedly.

Mr. Emery reported Carleton county crops last year up to the average, except the buckwheat crop.

Mr. Inks, for Victoria county, reported average crops in his section also. The dairying industry was not so prosperous as it should be. There was only one cheese factory in the county. This was established three years ago, and although operated in the most fertile district of the county, did not pay. Last season the factory was run by a new company and transplanted to the Danish Settlement in the back woods, where he considered the conditions not so favorable as in the former location. Notwithstanding this the factory was being run successfully where it was a failure before. He attributed the reason to the fact that the people were only then led to take hold and co-operate in the work, and expressed the opinion that had the same interest been taken in the factory in its former location, it would have paid far better.

He hoped to be able to report far greater progress in a season or two.

Mr. Legere reported that Kent county last season was up to the average in the matter of crops with the exception of the hay crop. Several local dairying associations had been formed, and the interest of the farmers was beginning to be aroused in butter and cheese making.

Mr. Lamb reported the dairying industry not very progressive in the eastern portion of Westmorland county as yet. They had, however, last season commenced corn growing on a small scale, and he trusted that the branch of agriculture would receive more attention in the future.

Treasurer's Report.
The secretary-treasurer, Thomas Peters, submitted his report, showing an income of \$73.63 for the year and a balance on hand over and above the expenditures of \$14.55. The report was referred to the finance committee.

Secretary's Report.
The corresponding secretary, W. W. Hubbard, submitted his annual report, reviewing chiefly the progress of the dairying and farming industries as he had noted in his tour through the province last summer in his capacity as a commissioner of the local government in the interest of the dairying industry. With Mr. Peters he had addressed some sixty-five meetings endeavoring to stimulate the dairying industry and to impart, if possible, some useful instruction in butter and cheese making. He complimented very highly prof. Robertson for his very fruitful labors in this province in the interest of the dairy. In closing he referred to the rapidly increasing correspondence and work of his office, and suggested the necessity of the appointment of a person of more leisure and means, who could afford to give more of his time to the work.

Mr. Hubbard was tendered a vote of thanks.

Constitution.
Geo. E. Baxter presented the report of the by-laws committee, which, with some slight amendments, was adopted as follows:
1. This association shall be called the Farmers' and Dairymen's Association of New Brunswick.
2. The object of the association is to assist in the development of the agricultural resources of the province.
3. Any person may become a member of the association on the payment of a fee of \$1, and all persons so joining shall continue as members and shall pay an annual fee of \$1.
4. The officers of the association shall consist of a president, a first vice-president and a vice-president for each county in the province, a secretary and a corresponding secretary, who shall constitute an executive committee to manage the affairs of the association. The president, first vice-president, secretary-treasurer and corresponding secretary shall be elected at the annual meeting of the association by nomination and ballot, and the vice-presidents for the several counties shall be nominated by a committee appointed for the purpose by the province.
5. The annual meeting of the association shall be held at Fredericton at such time as the executive may decide.
6. In addition to the holding of the annual meeting of the association, the executive may provide for holding institute meetings in different parts of the province.
7. The accounts of the association shall be audited by a finance committee to be appointed by the president at the first session of the association.
8. The above articles of constitution shall be altered or amended only at a general meeting of the association, notice of said amendment having been given at a previous meeting.
The remainder of the afternoon session was occupied with brief reports from the delegates of some of the agricultural societies.

Wednesday Evening.
Capt. H. Montgomery Campbell and Messrs. Henry Wilcox and H. A. Trueman were appointed a finance committee, and to all the various classes of crops. He trusted that their energies should be exerted more in one line than in mixed farming; dairying and the by-products of the dairy, he considered, would be the future source of profits to the farmer, and he trusted that he referred in terms of appreciation to the assistance and encouragement given to the dairy interests by the dominion and provincial governments, and thought that the gentlemen employed by the

Thursday.
A great part of this morning's session was occupied with an exhibition of the practical working of the Laval cream separator purchased by the local government last year and placed in the Kingsclear creamery, and of the Babcock milk tester, and a practical illustration of butter making by S. L. Peters. The cream separator was operated by Mr. Estey, and the milk tester by Mr. W. Holburn. The latter giving a very clear explanation of the process. The capacity of this separator is 200 pounds of milk per hour, or about thirteen pails. J. W. Hart, superintendent of the State experimental station, worked the Babcock milk tester to the complete satisfaction of the convention. The butter making was done by S. L. Peters, who made a number of interesting remarks on the following lines: The temperature of cream should not be lower than 61—that perhaps was a little low for quick work, but not so for good work. It is not a good preserving butter to keep it from the air. Good butter should be done before churning. There is no harm at any season of the year to use sufficient water to make but a June color, but nothing more to meet said a very large attempt. The great secret of success in butter making was to get a full product from the cream, which was very rarely done. This was largely the reason for the complaints that butter making did not pay. The churn should not be more than from one to two-thirds full of cream. In the washing process about the same quantity of water should be used as the buttermilk draws off. One washing is sufficient; too much washing takes away the delicate flavor and aroma which good butter should possess. Don't hurry the process of softening butter; use soft water for this purpose, it should be as low as 45 in temperature. For the average customer from seven-eighths to 1 ounce of salt per lb. should be used. The secret of preserving butter is to keep it from the air. Good butter should not contain more than twelve degrees of moisture; it should be as near pure butter fat with additional moisture as possible. While it could be made to keep a great length of time by proper attention, it was never better than when about five days old.

Secretary of Agriculture In a brief but very pleasing address, said he was every disposition on his part as well as on the part of the government to meet the views of the association, and he proposed to take the sense of the meeting as to the propriety of furnishing corn seed to farmers again next spring.

Mr. Emery, of Carleton county, further requested that, if the government sent out larger quantities, they be sent out in larger quantities. The speaker then said that the farmers would rather pay for what samples of seed they wanted than get half what they wanted for nothing.

On Friday several important sessions were held and some interesting papers read which must be held till next issue.

THE PARISH PROTESTS.
Coun. Lawson gets up too Early for Coun. Smith.

It will be remembered by those attending the late session of the county council, that a bill was presented by coun. Lawson of Carleton county, that was passed by the board in short order without any investigation. The following respecting the bill has come to hand: The trouble appears to be over the \$131.24 which the county council voted to be paid to Lawson, and which Lawson claims went for supplies to paupers by order of the overseers of poor. Smith says Lawson agreed to have the bill referred to J. J. Law of Canterbury (postmaster) and a man who has a reputation for honesty and straight dealing.

Overseer of Poor Scott, of Canterbury Station, was in town during county session and says that the bill was never received in his hands during 1892, and that he knows nothing of it. Mr. Merritt and G. I. Miller appointed by Lawson and Jamieson for 1890 and 1891 say the bill is not correct and that the parish was not over Lawson's name at all. Coun. Smith wished the bill left over until July for investigation but was voted down by Fisher, Scott, Inch, Cropley, etc., who were posted at the hotel to vote for paying the bill.

Canterbury people are puzzled to understand how councillors for other parishes can vote to have their money paid against their wishes and the present and past overseers of poor; and also when payment was protested against by councillor Smith. Councillor Smith will find he doesn't get up early enough for Lawson when his bookkeeping is to be done.

Notice of Varr.—Not being able to attend to all those calling on him the last time he was in Fredericton, E. Lawrence will again be at Wiley's drug store on Tuesday and Wednesday next, Jan. 31, and Feb. 1st, for the purpose of fitting the E. Lawrence & Co's spectacles and eye glasses. We would advise those who wish to consult E. Lawrence to call early as his time is limited to the two days as above.

OBITUARY.

Deceased Residents who have Passed Away.

Residents of this city and Marysville will be grieved to learn of the death of St. John, on the 21st inst., of Edith Marlow, the little five year old daughter of rev. Howard and Emma Sprague.

On Wednesday last the remains of V. A. Harding of Maugerville, was laid to rest at the lower St. Marys churchyard. A sermon was preached at the house by rev. Mr. Howie, the services at the grave being conducted by rev. Mr. Parkinson of Gibson.

On the 22nd, at Nashwaak village, John Weeks, one of the best known residents of the place, passed away. Deceased was in his 84th year. He leaves a large circle of friends to mourn. He was a very extensive and prosperous farmer. Rev. Mr. Williams conducted his funeral services on the Tuesday following.

Much regret is expressed at Chipman, Queens, over the untimely death of Andrew Harrington. Mr. Harrington, who was engaged in lumbering, drove one of his teams on Thursday night and was putting the horses up. He was blanketed a vicious mare, when she kicked him in the stomach. He only lived 34 hours after. On Tuesday last he was buried at Chipman.

George Fowler, one of the highly respected residents of the Gagetown-Welsford road near Armstrong's corner, Queens county, died on Monday last after a protracted illness, at the age of seventy-three. His funeral, which was largely attended, took place on Wednesday under the auspices of the Episcopal church of which deceased was a member. Deceased was much esteemed in the parish of Petersville, and sympathy is extended to those who are called to mourn his loss. He was a respected resident and a large farmer of lower St. Marys, died very suddenly on Monday evening. He had been in the city on Monday afternoon, apparently in his usual vigor, and returned to his home in the afternoon. In the evening some friends were at his home, and after a round of social chat, they departed. Hardly had they left the house when Mr. Wisely called out to work to a house near where he was standing, but fell to the floor. He never rallied. Heart disease was the cause of death. Deceased was a brother of Mrs. Robert Macklin of Gibson, and Robert Wisely of this city. He was 64 years old and leaves a widow who has all sympathy in this severe affliction. The funeral took place on Friday afternoon.

Marysville News.
Benjamin Brewer, who is seriously ill from blood poisoning, is not improving and may have to suffer the amputation of one arm.

Through the enterprise of alderman Dr. Sharpe the street lamps are rapidly being replaced in the cathedral. Both sides of the river will be lighted.

Many of the farmers attending the association in Fredericton were up to see this town and its many industries.

The curling club here have a good fit out and practice about three evenings each week. They will extend an invitation to the celestial curlers for a friendly game shortly.

The Bishop's Market Memorial.—There was a meeting of the committee Tuesday night, and matters have been advanced a stage. It is understood that the committee is first to address itself to the task of placing in the cathedral a statue in recumbent position of the bishop, after a form peculiar to English cathedrals. Subscriptions both in England and in Canada will be readily forthcoming for this purpose, and the representation of the bishop will be, as a work of art, one worthy of the subject and of the church. The memorial canonry will also be founded from the surplus and from any funds specially given to that purpose. It is understood that an English committee will be at once formed to co-operate with the committee in this diocese.—Sun.

A Good Time.—There will be a pleasant gathering at Fred B. Edgcombe's large establishment next Thursday. Invitations are out for an unlimited number and ample accommodations will be afforded for all who wish to participate in the big remnant sale to begin on that day. Guests are invited for 10 o'clock, a. m., and if coaches can be ordered, for any hour later. Ladies from a distance, who wish to spend the day, will have their refreshments served at the W. C. T. U. coffee rooms, York street.

DEATH.—At St. Stephen on Tuesday the celestial curiers fell victims to the Scoodickies, who carried off a majority of 14, as follows:
CELESTIALS. ST. STEPHEN.
Logan..... 8
Gibson..... 20
Ritter..... 8
Stevens..... 16
Allen..... 18
Chipman..... 10
Total..... 48 62

We received Lucy & Co's clearing out sale to late for this issue. It will appear in our next.

NEW ADVERTISEMENTS.
