

HOTELS.

QUEEN HOTEL,

Queen Street, Fredericton, N. B.

THIS HOTEL has been REBUILT AND PAINTED IN THE MOST ATTRACTIVE STYLE. ELIGANT GENTLEMEN'S PARLOR, OFFICE, and BEAUTIFULLY DECORATED DINING ROOM on Ground Floor. PERFECT VENTILATION and SHOWER BATHS throughout. LARGE and ABBY BEDROOMS; COMMODIOUS BATH ROOMS and CLOSETS on each floor, and is capable of accommodating ONE HUNDRED GUESTS.

It is rapidly growing in popular favor, and is the best of the HOTELS in the DOMINION.

The Table is always supplied with every delicacy obtainable. The Cooking is highly commended, and the Staff of Attendants are ever ready to oblige.

There are two of the largest and most conveniently situated SAMPLE ROOMS in Canada, having street entrances and also connecting with Hotel Office.

ROBBERIES and CARRIAGES of every style are to be had at the LIVERY STABLES of the Proprietor, immediately adjacent to the Hotel.

The "QUEEN" is centrally located, directly opposite to the Steamboat and Globe Ferry Landings, and within a minute's walk of the Parliament Buildings, County Courthouse, and the Cathedral.

FOR A FIRST-CLASS BARBER SHOP IN CONNECTION.

HEALTH FOR ALL!

HOLLOWAY'S PILLS AND OINTMENT.

THE PILLS

PURIFY THE BLOOD, correct all Disorders of the Liver, Stomach, Kidneys and all Compleats incident to Females of all ages. For Children and the Aged they are preferred.

THE OINTMENT

Is an infallible remedy for Bad Legs, Bad Breasts, Old Wounds, Burns and Ulcers. It is known as "The Ointment of the Ointments" for Rheumatism. For Disorders of the Chest it is not like a charm.

Manufactured only at Professor HOLLOWAY'S Establishment,
75, NEW OXFORD STREET, (late 533, OXFORD STREET), LONDON

and are sold at 1, 1 1/2, 2, 3, 4, 6, 11, 25, and 50, each Box or Pot and may be had of all Medicine Vendors throughout the World.

For Purchasers should look to the label on the Pots and Boxes. If the address is not 1, 2, 3, 4, 5, 6, 11, 25, 533, Oxford Street, London, they are spurious.

FIELD ROOTS.

Their Cultivation and Many Hints Regarding Them.

By field roots I wish to be understood as meaning turnips, (swedes), mangels and carrots. The first thought in connection with the subject should be, what position shall these hold in the rotation of crops? In nearly all cases it will be found the best previous to seeding to clover and timothy. Such a course may lead to more work in cleaning the land than if the crop was placed earlier in the rotation, but even this will depend on the length of the rotation. In the older settled portions of the province a four or five years rotation will soon become a necessity in order that success may be the lot of the farmer—a rotation somewhat like this: clover followed by peas or oats then a hoe crop (roots or corn) followed by barley or wheat, seeded to clover with timothy added, so that in case clover should fail then previous year's seeding could remain another year. Such a rotation as the above will clean the land, give a minimum amount of work on the hoe crop, increase the fertility of the soil, especially in nitrogen, and insure a good "catch" of clover. Someone will say, that is all right, but I have very dirty land full of foul weeds, I cannot secure a "catch" of such except in favorable seasons. To such the best advice is, put on the hoe crop, manure liberally and cultivate thoroughly, then by following some such course as above indicated, ultimate success is reasonably sure. It is a better plan to clean the land, give a minimum amount of work on the hoe crop, than to summer-fallow, which is probably true in all sections. There are several things to consider when deciding which to grow—mangels, turnips or carrots.

The first would be: For what purpose is the crop to be used? For making butter, turnips except white and greytons varieties are very objectionable, whereas mangels and carrots do not injure the quality of the product.

For beefing cattle, sheep and young cattle, turnips are generally accepted as being superior in quality for feeding purposes. Many contend that they can feed turnips successfully without noticing the weeds which require so much work. This one can do it ninety-nine fall. Another consideration that will have influence in guiding us, is the quality of the soil. Turnips do not do well on heavy clay, but are fond of a loamy soil, while mangels do very well on heavy wet or dry seasons. Climatic influences also vary the prospect of success in various localities. The carrot is not adapted to growth on a large scale, owing to work of thinning plants and also labor of harvesting. The mangel will not stand heavy frost, and requires early sowing, and is scarcely safe to leave them out after October 10th to 15th. A mangel crop will usually produce more to the acre than carrots. Carrots should be placed on soil free from weeds. The preparation of the soil should begin in the fall as soon as the previous crop is removed. The usual practice is to plow thoroughly once and leave until spring. If possible and particularly if weeds are abundant, one plowing early and another late would be preferable. This is not always possible owing to pressure of fall work. A first plowing, owing to ample picking coming in October. If the field should be infested with Canada thistles, this fall work will be found of very great advantage, in that the seed immediately after sowing making their destruction more readily accomplished and more certain. Under favorable circumstances many weeds will sprout during the fall cultivation.

Root crops have a short season of growth and require a thoroughly manured soil, and one well prepared in every possible way. Farmyard manure is usually used, twenty to twenty-five loads per acre, would furnish plant food, provided such manure were from well-fed cattle, horses or pigs. It must not be too strewy, otherwise difficulty will be found in sowing the seed. As corn like straw manure, all such had better be kept for that crop, and only well rotted manure used. The quantity of manure required will vary according to the fertility of the soil. If a person has manure left over from the fall work, it can be plowed under and used for carrots and mangels as these crops require early sowing. For carrots and mangels I have tried for years to have the land manured and ridged in the fall, but so far have failed to do time for the work, my intention being to simply split the drills in spring and sow very early. Having the land plowed in the fall, when the spring comes cultivate with spring-tooth cultivator or similar implement, harrow, and if time permits roll as early as other work will allow. The object of this is to encourage the germination of as many weeds as possible. About two weeks later apply the manure, unless such has been done in the fall, plow under, harrow thoroughly, and roll. If this has been done by the 20th of May or 1st of June, about two weeks later a light gang-plowing or two weeks cultivating will bring more weed seed near the surface and encourage sprouting. Every possible means should be used to destroy weeds, as it makes the subsequent seeding easier, and also the freeing of the land from weeds more complete. For mangels and carrots, unless the land has been manured and prepared as previously indicated, apply the manure and plow under as early as possible. Mangels and carrots should be sown early in May, the earlier the better. If good crops will be secured even if they are not sown until May 20th; however the prospects of success are not so good as when sown earlier. Turnips are sown usually from June 15th to 25th, the object being to escape the turnip fly, or more properly beetle. The land for either of these crops, when prepared, should be ridged in drills from twenty-five to thirty inches apart, depending somewhat on the freedom of the soil for the weeds, a wider space between the rows making weed destruction easier. To drill the land use a double-mouldboard plow; if you have none the single plow will answer the purpose, only make more work in marking out the land. Sow the seeds with a drill, using in the case of mangels from two to six lbs., per acre; carrots, one to three lbs., per acre. On clean soil, with good seed, the lower quantities are sufficient, but in the conditions now obtainable, larger quantities are necessary. Too much seed makes more work thinning; too little causes skips, and the plants do not start as readily and thrifty as where more seed is used. Cultivate with a good cultivator as soon as plants can be seen in the row, and as closely as possible. As soon as plants are easily seen, in the case of mangels, hoe and thin to about six or eight inches apart, and

HARRIS EXECUTED.

The Wife-Murderer Killed by Electricity.

SNO, SNO, May 8.—I assert my innocence as firmly now as I did during my trial, I feel as bold now as I felt that day when I entered the district attorney's office and demanded that they tell me what charge they made against me. I hope to be able to go to my death as bravely as I went into the district attorney's office—as bravely as I faced the judge and jury. That was how Carlyle Harris spoke of his approaching doom during his last days on earth, and he met his death in the electric chair to-day in a manner that showed he was not boasting.

Bright spring sunshine did not lighten the gloom that hung over Sing Sing to-day. The air of affliction which one feels at a funeral, filled the place in spite of the clear atmosphere of a perfect spring day. As other electrocutions there have been lively and indifference about the prison, but the dawn of Carlyle Harris' last day was observed by quiet, due to the appreciation that he was no ordinary culprit, but a man whose crime and whose name will be history.

The flag announcing the death of Harris was hoisted at 12.45 p. m.

The official time of the first contact was 12.40. The current was on 561 seconds. The electrocution was a perfect success.

For the first time was a man of a higher order of intelligence undergoing the ordeal of the electric chair. He was a man of education, accustomed to the refinements of good society, educated, a medical student even, and capable of understanding to an unusual degree what was happening to him.

Keener Knaghten sat this morning that Harris rested well. He did not sleep much and what thoughts raked his brain no one will ever know. His self-control was marvellous. His only sign of agitation, was the constant smoking of cigarettes. He was up early this morning and looked at the manuscript which he had prepared to be given out to the press by his relatives, after the final scene in his dramatic life had been rung down.

At 8 o'clock he was cool and collected and appeared to be capable of going through the ordeal which awaited him.

The crime for which Carlyle Harris was executed to-day, was wife murder. Mary Edw. Nelson, wife of Harris died on the morning of Feb. 1, 1891, at the Constock insane asylum in West Fortieth street, New York. Her schoolmates were by her bedside weeping when she came. Carlyle W. Harris, her husband, was there and when death came he flung himself on the bed exclaiming, "What will become of me? Doctor do you think I shall be held in custody?" He was a medical student and had prescribed pills for the dead girl. Dr. Fowler and Kerr pronounced the girl's death due to morphine poisoning, and the only trace of drugs in the room was an empty box that had contained morphine pills. Harris had prescribed twenty-five grains of salicylate of quinine and one grain of sulphate of morphine mixed in six capsules, one to be taken before retiring. The doctors declared that this could not cause death, and Harris coincided with their opinion. After the autopsy had been completed, the presence in the dead girl's stomach of six grains of morphine, he said that the drug must have been taken, although two of the pills which he had kept should be the prescription had been properly filled. It was shown in the trial that Harris had given his wife four of the six pills he went to Old Point Comfort, Va., where he remained for a week. The district attorney impressed it upon the jury that Harris emptied and refilled one of the capsules with six grains of morphine and the fatal pill, went south to avoid suspicion of being concerned in her death. Harris was indicted May 13, 1891. After his conviction his case was given to Howe & Hummel, who went to the Court of Appeals to hold the jury for a new trial before Recorder Smyth, but his motion was denied. An appeal for clemency to governor Flower followed. The governor declined to give any decision until he had received the new evidence which Howe & Hummel had secured. This evidence was the fact that Harris had given his wife four of the six pills he went to Old Point Comfort, Va., where he remained for a week. The district attorney impressed it upon the jury that Harris emptied and refilled one of the capsules with six grains of morphine and the fatal pill, went south to avoid suspicion of being concerned in her death. Harris was indicted May 13, 1891. After his conviction his case was given to Howe & Hummel, who went to the Court of Appeals to hold the jury for a new trial before Recorder Smyth, but his motion was denied. An appeal for clemency to governor Flower followed. The governor declined to give any decision until he had received the new evidence which Howe & Hummel had secured.

WHITE MARBLE GIRL.

Strange Petrified Find in a Tacoma Forest.

TACOMA, WASH., May 6.—The petrified body of a young girl was found on Saturday in the eastern part of this state, by a rancher, while clearing up a small piece of land. The body of the girl was first seen lying about two feet underground, near the root of a tree, as the stump was being grubbed out. It is generally supposed to have lain there nearly twenty years. It must, in all probability, have been covered from view by the continued drifting of earth, dried leaves and the many decayed substances that undoubtedly accumulated at the base of the tree during that period.

The body was removed to the cabin of the rancher, where it was washed and thoroughly dried, when it became as white and as smooth as the purest, finest marble. There is not a scar or flaw visible to mar the symmetry of the graceful proportions of the figure, or the beauty of the phenomenal coloring of the lips and cheeks, which has aroused the interest of the few physicians that have been permitted to gaze upon it. This coloring, strange as it may appear, comes and goes with the appearance and disappearance of the sun. On dark, rainy days, the face remains as pallid as an ordinary piece of marble. Just as sunrise this flesh tint of healthful repose is seen to return upon the features, giving the face the appearance of a living being; but as the shades of night fall the life-like form gradually changes, the whiteness reappears, and the body is again in the icy clasp of death. When the body was found there was a tiny gold chain encircling the neck, with a star-shaped pendant, the initials "E. de V." These initials gave the first clue to the identity of the body. One of the earliest settlers who dared to brave the dangers that threatened every white man who ventured in eastern Washington was Jean de Vallier, a Frenchman who was accompanied by an old Frenchman and a little girl. Years passed away, and the little girl grew to a magnificent-looking woman.

THE MOTHER'S STORY.

New York, May 5.—Mrs. Fannie Korn and her two children, Edwin and Florence, sat down to luncheon in their cozy dining-room on the second floor of the house 101 West 83rd street, this afternoon, shortly after 1 o'clock.

Edwin was 11 years old, large for his age. Florence was 6 years old and had long golden hair which fell in curls.

The children had been playing and were hungry. Until 1 o'clock Mrs. Korn had been sitting near the window with a cold look in her eyes. Then she told her children she would get them something good to eat. There was little on the table when the three sat down except a few rolls.

Near Mrs. Korn's plate was a tin cup with a queer looking mixture in it.

The children clamored for something to eat and Mrs. Korn took a little of the mixture, placed it in a cup and told Edwin to drink it.

"It is medicine and you must take it like a good boy," said Mrs. Korn.

Edwin drank it and began crying. In a moment Mrs. Korn had a similar mixture and forced Florence to drink it.

Mrs. Korn stepped to the mantle and seized a revolver, aimed it at Edwin and fired.

He fell to the floor, but got up and ran out of the door. Mrs. Korn caught the little girl, held her to her bosom for a second, and with the child still in her arms, fired the revolver into her side.

Then she laid her tenderly on the couch and pointed the revolver to her own breast first again.

As Edwin ran down stairs he called "murder" as loud as he could.

The other tenants of the house ran to the doors, but they could see nothing.

At the doorway Edwin met the janitor, John McCann, who had been attracted by the cries.

Edwin said: "I am shot and dying," and he started to run into the store.

When the janitor and a policeman arrived at the Korn's tenement they found Mrs. Korn sitting in a chair moaning, and little Florence lay upon the floor.

Mrs. Korn struggled to her feet and cried: "I have tried to kill my children and myself and I hope I have been successful. Let us die together. I cannot live and I love my children so much that I cannot leave them to the care of strangers."

Little Florence is dead, but Mrs. Korn, although very low, may live, and the boy has also a good chance of recovery.

DUFFIE'S CHEAP SALE.

Furniture of all Kinds.

Parlor Suites, upholstered in Plush or Hair Cloth, only \$35.00.

Price 50 cts. a bottle. Sold by all druggists and general dealers. Manufactured by HAWKER MEDICINE CO., Ltd. ST. JOHN, N. B.

RENETT.

A rennet is at its best when a healthy calf is between three and five days old and has a stomach full of milk. The contents of the stomach should be emptied out and the rennet for either of the above crops, is put on the hoe crop, manure liberally and cultivate thoroughly, then by following some such course as above indicated, ultimate success is reasonably sure. It is a better plan to clean the land, give a minimum amount of work on the hoe crop, than to summer-fallow, which is probably true in all sections. There are several things to consider when deciding which to grow—mangels, turnips or carrots.

The first would be: For what purpose is the crop to be used? For making butter, turnips except white and greytons varieties are very objectionable, whereas mangels and carrots do not injure the quality of the product.

HOYT STATION.

MAY 3.—On Wednesday evening, 26th ult., W. W. Hubbard, manager of the Kingsdale creamery, and J. W. Hart, superintendent of the dominion experimental station at Sussex, by invitation of the Blisville agricultural society addressed a large and representative meeting at the agricultural hall in the interests of a cheese factory. Mr. Hart explained the different systems of co-operative dairying. Mr. Hubbard, after testing several samples of milk with the Babcock milk tester gave some very instructive remarks on dairying. At the close a vote of thanks was tendered to the speakers.

Mr. McKelvie delivered a lecture on the P. C. Baptist church last evening on behalf of the British and Foreign Bible Society.

A certain young gentleman of this place has lately purchased a fine horse and buggy, and the word is that there is a young lady "in it." It is certainly surprising how a horse and carriage outfit helps a young man out.

Blisville Valley council has now a membership of seventy. Some few weeks ago the council was divided for a contest, with Burton Hoyt and Milton Smith as leaders. Each side have two nights for entertainment, and the close of the contest, the party that is beaten, treats the council. Three grand entertainments have been given, consisting of music, recitations, readings and dialogues; but the last and best will be given on Saturday evening, May 13th.

A court of Foresters was organized at Blisville, May 1st, by H. C. R. Coleman and S. C. Wedderburn, when the following officers were duly installed:

J. W. Hoyt, C. R.; W. H. Perry, V. C. R.; C. E. Boone, F. S.; Jacob Hoyt, Treas.; W. D. Smith, E. S. and P. C. R.; B. H. Hoyt, S. W.; D. E. DeWitt, J. W.; A. H. Worden, S. D.

A DREAMFUL TRAGEDY.

A startling story of love's faithfulness, revenge, and ultimate repentance from the little town of Lodz, in Western Poland. In that town there resides the wealthy family of Michaeloff. They had one daughter, a beautiful girl of eighteen. Recently there arrived a wealthy young engineer, twenty-four years of age, handsome and dashing, named Steplief. The two young people met and the girl became madly infatuated with the young man. According to the rumors they were about to be married. Suddenly the young man found out that his lover was a fortune teller, and he fled to his home in the mountains. He was very rich and he began to brood over the faithfulness of his lover. Finally she seemed to have resolved to avenge herself upon the destroyer of her happiness. Accordingly she procured a large amount of vitrol, and waiting until Steplief came to the foot of the staircase to pay a call upon her, she poured the whole lot of the fierce liquid upon him. The young man was finally shower of fire was fatal. In two days Steplief died in the greatest agony. Immediately after this remorse seems to have seized upon the girl. She developed suicidal and homicidal melancholia. Restrained by her father, she finally sought the home of a physician who refused to promise recovery, preparations were made to send her off to Berlin. But she put an end to all these plans. By some means or other she got hold of a piece of broken flower-pot. With this she succeeded in severing several arteries of her left hand, finally her jugular vein. When found she was already dying. On hearing of the death of her daughter, the mother also became insane, and is now a raving maniac, while the father received an apoplectic stroke, from which he will never recover.

A DYNAMITE BOMB.

DUBLIN, May 7.—A dynamite bomb exploded at 10.40 o'clock tonight in the quadrangle of the four courts. The explosion was heard by no one was hurt. It is supposed that the bomb was thrown over the railing in a spirit of bravado.

The police guarded all night the four courts in which the bomb exploded at 10.40 o'clock to-day.

The quadrangle court of the yard the time fuse and fragments of a large zinc canister similar to those left by the explosion in Exchange court last December. Firing stones in the yard were loosened and the walls of the court buildings a little injured.

The police say the bomb was evidently thrown into the deep area from King Jimmy at night. The immediate neighborhood was deserted so it was evidently not intended to sacrifice human life.

The End of the Courtship.—And would you do for me, George? A hundred times! Oh, if your life is insured once it will be enough.

A CLEVER DODGE.

A Lexington (Ont.) despatch says: On Saturday a man with a clerical cast of features called at the house of Joseph Robinson, a wealthy farmer, and represented himself as a preacher, and said that he was on his way to Berlin. He was very tired; would Mr. Robinson help a brother in distress, and allow him to remain all night? The request was readily granted, and for several hours the two talked of spiritual things and debated deep questions of theology. At ten o'clock there was a knock at the door. The new comer was a man. He wanted to see a clergyman, as he and his companion, a young woman, were anxious to be married. "Why," said Mr. Robinson, "we have a preacher right here in this house, and if you have a license he can join you." The anxious couple gladly entered the house and the alleged theologian went through the usual form of words. Of course there had to be witnesses. Mr. and Mrs. Robinson promptly acted in that capacity, and solemnly affixed their signatures to a document which they supposed was a marriage contract. The happy couple then departed, giving the clergyman \$25 for his pains. The latter remained all night and he was so grateful for the kindness of Mr. and Mrs. Robinson that he presented each of them with a crisp \$5 bill. A week elapsed and then the genial host was surprised to receive a telegram from a Windsor bank to the effect that an \$825 note of his had been discounted there. Mr. Robinson was very much surprised, but he at once went to Windsor and it soon dawned upon him very forcibly that the marriage certificate had been signed was nothing more or less than a promissory note. As for the preacher and the bridal couple, it is believed they are Detroit crooks, and an attempt will be made to run them down.

THE EX-POLICE MAGISTRATE OF OLD PORTLAND CITY GIVES HIS EVIDENCE.

There is no more familiar figure in St. John than ex-Police Magistrate Tapley, who for so many years presided over the court of the old city of Portland. Squire Tapley, as he is styled by everybody, has been very ill, and in fact says himself that he had at one time not much hope of regaining his health. But today he is well again and able to attend to the duties of his office without fatigue or exertion. He has been stated that this remarkable change which has been noticed and commented on by all the friends and acquaintances of Squire Tapley, was due to the use of Hawker's Nerve and Stomach Tonic and Hawker's Liver Pills.

On Wednesday, a Manager Russell of the Hawker Medicine Co., invited a San reporter to join him in a call on Squire Tapley and ascertain if this statement were true. They were heartily greeted by the venerable magistrate, and he spoke freely regarding his cure. It was absolutely true, he said, and the case could not be put too strongly, that Hawker's Nerve and Stomach Tonic and Hawker's Liver Pills had restored him to health and vigor from a state so serious that it had caused both himself and his friends the greatest anxiety. Loss of appetite, weakness, nervous prostration, sleeplessness, and a general breaking down and decay of vital powers were, in brief, the symptoms, but they had all vanished under the influence of these wonderful restorative remedies. He began to take Hawker's Nerve and Stomach Tonic and Hawker's Liver Pills about two months ago. Within a week after beginning their use, he was frequently stopped on the street and asked the secret of the marvellous change in his manner and appearance. To such inquiries he had but one answer: Hawker's Nerve and Stomach Tonic and Hawker's Liver Pills had wrought the miracle. This was two months ago, and today, after having used about eight bottles of tonic and two boxes of pills, at a cost of only \$45.00, Squire Tapley declared himself a new man. His appetite returned, his sleep is restful and refreshing and he feels thoroughly renewed and invigorated in every respect.

"You may use these statements freely,"

BROCKWAY.

MAY 4.—Farming has been commenced by some of the neighborhood, but owing to the cold weather not much progress seems to be made.

A pie social was held last evening at the residence of Robert Young. Dancing and games were the order of the evening. All seemed to enjoy themselves heartily.

Edward Davis welcomed the arrival of another son at his home last week.

Mrs. Jas. Vail has taken charge of the school at Elm Grove for two months.

The Menest Man.—His wife went away for a birthday visit to her mother, and he gave her exactly the cost of her fare back and forth. But I won't have anything to spend while I'm there, objected his wife. Yes, you will, answered the wretch, you'll have your birthday to spend.
