

FARMERS AND DAIRYMEN.

Meet in Annual Session in this City.

Topics of Great Importance ably Discussed.

The annual meeting of the Farmers and Dairymen's association was called to order in the council chamber of the City Hall at 9 p. m. Tuesday. The president, Wm. A. West, of Hopewell Hill, was in the chair.

The minutes of the summer meeting, held on the occasion of Lord and Lady Aberdeen's visit to Fredericton, August 10th and 11th, 1904, were read and approved.

The president in his opening address said that compared with other countries we had much to be thankful for. The harvest had been an average one and had been obtained in splendid condition.

Following the address of the president came the reports from the various county vice-presidents. All or nearly all expressed satisfaction at the condition of the farm and dairy interests of their respective counties.

At the evening session Professor Robertson, Dominion Dairy Commissioner, addressed a large audience of the members of the association and the citizens of Fredericton in the City Hall.

The following are the members enrolled at the opening session: Henry Wilnot, Ormoco; Wm A West, Hopewell Hill; W H Colpitts, Edgin;

At the time of the reception of the Governor General and the agricultural conference last August, this association assembled so far as it could in securing an attendance of farmers at Fredericton.

Later in the season it was my privilege as a member of the Dominion dairy staff, to visit some five or six localities in each county of the province, and in company with S. L. Peters to address meetings of farmers on dairywork.

acre of cultivated land, taking the province as a whole, is very low. Our people have scarcely as yet awakened to the possibilities of the production of fine dairy goods.

Some of these means would be: (1) A winter school of dairy practice, such as is carried on with good results in other provinces and across the border;

The Dominion, in addition to the work above alluded to, has undertaken to help the farmers of Canada place their winter made butter on the British market under the best conditions.

The government of Quebec has taken the initiative in putting a cash bonus on all butter exported, thus putting the farmers of that province in a better position than those of the rest of the Dominion.

We need at least one thousand active members and a series of county meetings each winter. A little combined effort and industry would accomplish that result.

The association resumed its session Wednesday morning. The following additional members were enrolled: C F Alward; B. H. Harrison; M. A. Mauger;

Whether the second crop of clover should be cut or left to produce the soil is still an open question, said Col. Blair.

Our association, due to its anomalous financial position, has been unable to undertake the kind of work that is performed by associations in other provinces.

During the past season, as has been already stated to you, our dairy work has shown healthy growth, and we have reason to feel encouraged.

Prof. Robertson gave answers to questions asked by members. The best feed for milk cows is mixed cereals from the middle of July to the end of August; then corn. Too much salt makes cheese of a close texture, but enough must be used to balance the

rennet skim milk when fed to calves should be supplemented by flax seed, but why is poor unless enriched by peas meal.

Mr. Taylor moved that in the absence of a provincial agricultural college, the local government should vote a bonus to new Brunswick students at the Ontario Agricultural college.

Mr. Baxter expressed the view that their energies should be devoted to the establishment of an agricultural college in New Brunswick.

The following officers were elected for the ensuing year: President, Geo. E. Baxter, Victoria; Vice-president, H. M. Campbell, Kings;

Prof. Robertson made an interesting address. He first took up food for cows. Indian corn gave the largest amount of food matter, but not in the right proportions.

Prof. Robertson then went on to discuss the conditions essential to good butter-making, and showed how much temperature and cleanliness had to do with it.

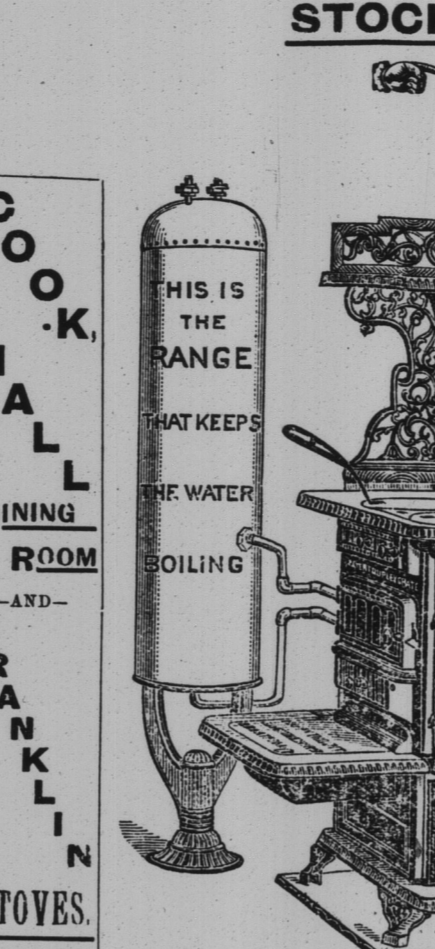

Prof. Robertson then went on to discuss the conditions essential to good butter-making, and showed how much temperature and cleanliness had to do with it.

Prof. Robertson then went on to discuss the conditions essential to good butter-making, and showed how much temperature and cleanliness had to do with it.

Prof. Robertson then went on to discuss the conditions essential to good butter-making, and showed how much temperature and cleanliness had to do with it.
