

Sunlight Soap is recommended by those who have investigated the different kind of soaps, as being the best and purest on the market. Those who have gone still further and tried the different methods state that the Sunlight way of washing is greatly superior to ordinary methods because it requires much less work and makes the clothes whiter and cleaner. Because Sunlight Soap is pure and free from adulteration it will not injure delicate fabrics or the hands of the washer.

Your money back for any cause of complaint.

LEVER BROTHERS LIMITED, TORONTO

NEW CURE FOR CONSUMPTION WELL ACCEPTED BY DR. ADAMI.

Montreal Herald.—Much interest has been excited among the members of the medical profession in the announcement in today's cable despatches that a new method of curing tuberculosis has been discovered by Professor Behring, who was the discoverer of the serum for the treatment of diphtheria.

Announcements of a somewhat similar character have been made from time to time with the result that a sceptical or agnostic spirit has been created among the doctors, but the circumstantial account given of the discovery induces the leading practitioners to accept the news as true.

Dr. Adami, professor of bacteriology at McGill University, stated to a Herald representative today that Prof. Behring, who is one of the most distinguished and successful workers in this branch of science, and has already achieved important results in connection with the treatment of tuberculosis in cattle, is just the man from whom one would expect an announcement of the character ascribed to him.

"I think, however," said Dr. Adami, "that it is much to be regretted that he does not see his way clear to give the medical profession and the public the benefit of his discovery at once; although one can hardly blame him for withholding it until he has derived sufficient from the proceeds to recoup him for the expense of the expense of the work made and to enable him to prosecute his researches further. That object is certainly laudable and must command sympathy, but it is most unfortunate in my opinion that there is no means of rewarding him who make important discoveries that are of incalculable value to humanity, so that we might have the benefit of new knowledge of this character at once. The feeling of the profession in England and in all English-speaking countries is that discoveries of such vital importance as this should be fully made known immediately upon the new facts having been successfully established by experiment and demonstration. In this case I think some national laboratory should have taken the matter in hand and provided Prof. Behring with facilities for continuing his work without cost to himself.

"The announcement that the new method of treatment," observed Dr. Adami, "involves the use of neither serum nor vaccine, and is a preventive as well as curative remedy, will cause much speculation as to its character. One naturally wonders what its nature can be. Serum is the blood of the animal which has been selected for the prescribed treatment and vaccine is the culture that is developed and which has the protective properties. It is from these that we naturally look for results to come."

"The cable despatch says that from today onward the victims of tuberculosis may hope again. There is no good ground for hope of cure already in a vast number of cases."

"Of course there is. By skillful treatment by plenty of fresh air, rest and proper food, numerous cures are being effected. But such a discovery as this claims to be would naturally strengthen the hands of the profession and possibly be the means of saving many lives. It is announced that the secret has been communicated to Dr. Roux and Dr. Metchnikoff. Do you know anything about them?"

"Oh, yes; they are the most eminent bacteriologists in Paris."

"So that next to making the discovery public the professor has adopted the best means of making it authoritative?"

"Yes; especially as I happen to know that both these men are opposed to the course that Professor Behring has thought it advisable to pursue in regard to this discovery."

THE HAPPINESS OF HOME.

Very largely depends on the mother's disposition; if she is animated and bright, everyone is happy; but if she is nervous, irritable and cross—everything goes wrong. Bright cheery women usually use Ferrozone, the greatest health-maker known. By acting through the blood Ferrozone is able to reach all the organs that need assistance; it establishes the regular and healthy actions of all functions, builds up the general health, fortifies the system with a reserve of strength that defies disease. Don't put off—Ferrozone costs only 50 cents at any drug store; get it today.

UNCLE ALLEN.

"I've mighty little use," said Uncle Allen Sparks, "for the man who keeps himself so busy with his jaw trying to save the country from going to ruin that he hasn't any time to look after the children while his wife is travelling around attending conventions and mother's congresses."

Only those who have had experience can tell the torture cause. Pain with your boots on, pain with them off—pain night and day, but relief is sure to those who use Holway's Corn Cure.

There are plenty of people who had kind parents and a good bringing up, but you never would know it by watching them.

HOW ONE DAIRYMAN CONDUCTS BUSINESS.

The one referred to is Mr. Stephen Peabody of Woodstock, a modest man who says little about himself. But his experiences and methods are worth notice.

The business in which he and his sons are engaged is supplying milk and cream to the town of Woodstock. On a farm which totals about 300 acres, the largest part being rough and broken land, they keep 19 or 20 cows, and the required number of horses for doing the work. The production of milk is, of course, the specialty. The cows are allowed to go dry from one to two months, but of course, only a few are dry at one time, as the milk supply has to be kept up the year round. They freshen at all seasons.

The cattle are mostly grades, Short-horn, Holstein and Ayrshire, though among them are one or two pure bred Ayrshires. Since all the milk is sold, calves cannot be raised to advantage and the herd has to be kept up by outside buying. This is admittedly a disadvantage as it is easier to raise good cows than to buy them. However, Mr. Peabody is quite successful in getting good ones. Among the herds an old French-Canadian cow was pointed out as being very hardy and an exceptional milker.

Dairying is favored on this farm by an abundance of spring water, the cows having it easy of access in the pasture and at the stables. One spring is high enough to supply the barn and house, and maintain the supply the year round. One branch from the supply maintains a constant flow through a tank in the milk house, and the overflow from the tank maintains the supply of water in the cow's drinking trough. The milk, after being put in the delivery cans is set in this tank over night, where it is kept cool by the flowing water.

Mr. Peabody believes devoutly in selling crops. By the middle of August, owing to the dry season, he had fed about two acres of mixed peas and corn, and then had started in to feed green corn. As a result his cows were maintaining their milk-flow while those of the majority of farmers were giving almost nothing. Woodstock creamery reported such a serious falling off that it hardly paid them to keep in operation. The summer when a dry period will come no man can tell. Even in moist seasons extra food above that supplied by pasture would pay in increased returns. Therefore the wisdom of providing vetches, peas and oats or some similar forage crop, summer feeding... Corn can at least be grown to a sufficient maturity for green feeding, and since it produces so much food to the acre it is of the most value to the dairyman.

PSYCHINE

(PRONOUNCED 'SI-KEEN')

Positively Cures

La Grippe, Lung Trouble, Pneumonia, Night Sweats, General Weakness, Consumption, Bronchitis, Loss of Flesh, Short Breathing, Chills and Fever, Coldness of the Limbs, Obstinate Coughs and Colds, Stops Waste of Lung Tissue.

THIS BOY CURED

Mrs. A. G. Fisher's Recent Statement:

November, 1904. My son Laurence, was taken down with Pneumonia. Two physicians in turn attended him. He lay for three months almost like a dead child. His lungs became so swollen that his heart was pressed over to the right side. Although I don't believe in doctors, and the time he was getting worse. We commenced the Dr. Scholl's treatment. The effect was wonderful. We saw a difference in two days. Our boy is well and strong now and able to enjoy life to the full, and has not taken a drop of medicine since that time.

MRS. A. G. FISHER, Newmarket, Ont.

PSYCHINE

(PRONOUNCED 'SI-KEEN')

For sale at all drug stores. If it so happens that your druggist has no Psychine in stock, order direct, or write for a free sample to Dr. T. A. Scholl, Limited, 179 King Street West, Toronto, Canada.

\$1.00 Per Bottle.

Moncton, Oct. 10.—(Special.)—A family figure in Intercolonial railway circles, passed away this morning in the death of Warren W. Price, the oldest station-master on the I. C. R. which occurred at Pettitodiac.

Mr. Price had been ill for some months and was known to be in a serious condition, but rallied several times. His death occurred unexpectedly about three o'clock this morning.

He had been station-master of Pettitodiac forty-five years and was well known, not only to the employees of the road, but to the travelling public.

He started in the railway service when the line between St. John and Point du Chene, known as the European and North American Railway, was in course of construction. He built the Amagance and

other stations between St. John and Moncton.

Deceased was a son of the late James S. Price, of Pettitodiac, and was born January 27, 1830. He entered the employ of the European and North American July 1st, 1860.

In 1893 he was appointed to the position of station master by the Steamship government and held that position, combined with that of I. C. R. station master up to two years ago.

Price's death was hastened by a blow on the head as a result of a jump thrown at him some time ago by some roughs about the Pettitodiac station.

He is survived by Mrs. Price and a large family.

Two sons, C. W. Price, despatcher of this city, and S. B. Price, locomotive engineer at Campbellton, are well known employees of the I. C. R. Other sons are Dr. O. E. Price, dentist of Moncton, and Horton Price of Sydney.

His daughters are Mrs. Fred Seely of Moncton, Mrs. J. Dalley of Sussex, Mrs. Lawrence of Pettitodiac, Mrs. H. H. Bray of Campbellton and Mrs. Helen of Bathurst.

The late J. E. Price, superintendent of the I. C. R., was a son.

HOT FIGHT AT DEAD OF NIGHT.

New Westminister Police Had a Desperate Struggle With a Maniac.

New Westminister, Oct. 7.—"For God's sake, boys, are ye again to stand by and see the likes o' this? Help, help."

Such were the cries that rang out along Columbia street last night at about 12 o'clock, and soon a big crowd of interested spectators, had gathered on the sidewalk in front of Muir's store, where a terrific struggle was in progress. The centre of the mele was a big man of powerful build and doubly strong with the strength of a maniac, whom Officers Dominy and McDonald, with the help of a couple of passers-by, were endeavoring to capture. Back and forth over the sidewalk the struggling men stamped, and twisted. Officer Dominy's helmet fell off in the struggle and the guardian of the peace felt quite without it. "Will nobody hold his helmet on?" gasped the exasperated officer, and someone of the interested spectators of the scene obligingly complied. With renewed strength the officer got into the fight again, and soon the cause of all the trouble was lying on his back on the sidewalk with one officer on his head, a couple more on his arms, and other helpers scattered at various points along his recumbent form, while Officer Dominy clipped the hand of the man's wrist.

The man came into the city on the delayed eastern train last night. He had been running wild round Westminister Junction for some days, and the train for New Westminister. On arrival, he was handed over to the police, but despite the officers' diplomatic promises of good food and medicine he objected strenuously to going to the station. He told the officers that he had spent the days and nights in the river and was continually promising to go somewhere and get a check for \$100. He is being detained as to his sanity this morning.

WOMAN DISGUISED AS MAN.

Is a Diamond Thief and An Expert Smuggler.

Chicago, Ill., Oct. 7.—Henry Hoffman and Mrs. Henry Schiller, each of whom is said to have a number of aliases, are held here under arrest on a charge of smuggling.

It is alleged that the woman implicated in a robbery in London and in at least two large burglaries in New York city. Government officials say the prisoners have confessed to having robbed the home in New York of Isaac F. Lloyd, Vice-President of the Mutual Life Insurance Company, of \$30,000 in diamonds and silverware, much of which has been recovered and identified. Mrs. Schiller was a servant in the Lloyd house.

The prisoners are also suspected of having robbed the Ansonia Hotel in New York of thousands of dollars' worth of jewellery and clothing. Hoffman was once arrested in Boston on a charge of smuggling diamonds from Europe. Mrs. Schiller is known as an expert impersonator of men. Silk hats and various other articles of men's attire were found in her room. According to the Government officials, Mrs. Schiller was willing to accept all blame, so that Hoffman may be cleared. Hoffman admits that he met the woman near the Lloyd home, staggering under a load of valuables she had stolen. He also admits that he aided her in escaping. About 270 diamonds were found in the possession of the couple when they were arrested.

St. John, Oct. 10.—(Special.)—The Baptists and Free Baptists this morning met and organized a new body to be known as the Association of United Baptists of New Brunswick.

Rev. Dr. McLeod was chosen moderator, Rev. W. E. McIntyre, secretary and E. Slipp treasurer.

A public meeting will be held tonight, when the organization will be completed.

LARGEST ORGAN IN THE BODY.

Is the Liver. Small wonder that liver trouble makes you feel miserable. The symptoms are constipation, dizziness, indigestion, headache, feeling of depression and lack of appetite.

There is but one sure cure—Dr. Hamilton's Pills. In every case they are successful. By relying on Dr. Hamilton's Pills you are sure of strong vitality, nourishing, blood, bright cheery spirits. No longer will you suffer from indigestion, no kidneys. The marvel of this medicine is that it keeps you well—prevents and wards off sickness of every kind. 25c. per box everywhere.

EMMERSON GOING WEST.

Minister of Railways to Inspect Location of the G. T. P.

Ottawa, Oct. 10.—Hon. H. R. Emerson has referred the plans of the route of the Grand Trunk Pacific from Touchwood Hills to Edmonton to Mr. Schreiber. These plans were filed with the Minister about a week ago. Mr. Schreiber will leave on Wednesday to go over the proposed route and will report to Mr. Emerson as to whether it is the best obtainable in the interests of the country.

When at Edmonton Mr. Schreiber will take a look over the country to the west, so that he may be the better able to report upon the route leading to the Rockies, which will shortly be presented to the government.

If necessary, the minister will go west and make a personal examination of the route before reporting upon the plans to the government.

THE SPENCER STAR COURSE.

Under Y. M. C. A. Auspices in This City.

F. G. Spencer is meeting with the greatest success in his series of Star courses throughout the maritime provinces. Word comes from St. John to the effect that the entire capacity of the big theatre is already practically sold out for the entire season.

The local Y. M. C. A. is a so meeting with splendid encouragement, and why would they not when one considers the very excellent value they are giving for so small an expenditure as one small dollar.

These five splendid entertainments will cost so little that all can afford to enjoy them. The opening number of the course the celebrated "Schubert" is well worth the amount asked for the entire course. Reserved seats when required are but 25 cents additional. During the next two weeks the Y. M. C. A. should sell the seating capacity in the city hall, and every citizen of the capital should assist them in so doing.

DR. SUTHERLAND GOING TO CHINA.

London, Oct. 9.—The Methodist General Board of Missions decided at yesterday's session to send Rev. Dr. Sutherland to China and Japan to look over the mission field. Mr. H. Fudger will be asked to accompany Dr. Sutherland, who will remain nine months in the field and prepare a comprehensive report of the work there.

The name of Judge MacLaren was added to the Committee on Foreign work.

The board has decided to send two more missionaries to Japan.

Rev. Dr. Woodworth reported that he had secured forty young men in England to carry on the work in the North.

The expenditures will include: Home missions... \$115,000 India... 98,000 France... 8,000 Japan... 25,000 West China... 18,000 Chinese in British Columbia... 3,300 Japanese in British Columbia... 2,000 Salaries at mission rooms... 5,400

THEY ARE NOT VIOLENT IN ACTION.—Some persons when they wish to cleanse the stomach, resort to Epsom and other purgative salts. These are speedy in their action, but serve no permanent good. Their use produces ineffectual chills, and in persisted if they injure the stomach. Nor do they act upon the intestines in a beneficial way. Parnele's Vegetable Pills answer all purposes in this respect, and have no superior.

The St. John gentlemen who were trying to organize an autumn carnival in that city, have dropped the enterprise, for lack of co-operation from the citizens.
