SAVING WINDOW LABOR

Every motorist, at one time or another, has experienced difficulty in getting car windows to slide smoothly in their channels. When car windows are hard to raise or lower, a preparation of graphite and paraffin will make them work easily.

BE READY FOR WINTER

At this season of the year motorists are advised to have their cars overhauled and prepared for winter driving. Such advice is timely, inasmuch as this marks the close of the heavy driving season and colder weather imposes new burdens on motor cars.
