

Easy to Take Easy to Operate

Are features peculiar to Hood's Pills. Small in size, tasteless, efficient, thorough. As one man

Hood's Pills

said: "You never know you have taken a pill till it is all over." Wm. C. I. Hood & Co., Proprietors, Lowell, Mass. The only pills to take with Hood's Sarsaparilla.

If we told you that your baby was starving, that it actually didn't get enough to eat, you might resent it. And yet there are thousands of babies who never get the fat they should in their food or who are not able to digest the fat that they do get. Fat is a necessity to your baby. It is baby life and baby beauty. A few drops of Scott's Emulsion for all little ones one, two and three years of age is better than cream for them. They thrive and grow on it.

SCOTT & BOWNE, Belleville, Ont.

D. POTTINGER,
General Manager.

Railway Office, Moncton, N. B.
10th June, 1897.

Messenger and Visitor

A Baptist Family Journal, will be sent to any address in Canada or the United States for \$1.50, payable in advance.

The Date on the address label shows the time to which the subscription is paid. When no month is stated, January is to be understood. Change of date on label is a receipt for remittance.

All Subscribers are regarded as permanent, and are expected to notify the publishers and pay arrears if they wish to discontinue the MESSENGER AND VISITOR.

For Change of Address send both old and new address. Expect change within two weeks after request is made.

Remittances should be made by postal, or express, money orders—payable to A. H. CHURMAN—or registered letters. Send no cheques.

All Correspondence intended for the paper should be addressed to the Editor; concerning advertising, business or subscriptions, the Business Manager.

News Summary.

Observations to determine the duration of sunshine in Europe showed that Spain had the most sunshine and Scotland the least.

It is estimated that greater quantities of gold and silver have been sunk in the sea than are now in circulation on earth.

Fred L. Jones, inspector of preventive officers, reports a considerable check given to smuggling along the Gulf coast this summer.

John Jacob Astor's electric launch, valued at several thousand dollars, was sunk in New York harbor on Wednesday by coming in collision with a river steamboat.

One of the worst wrecks in the history of the Santa Fe Railroad occurred three miles east of Emporia, Kan., Wednesday evening. Twelve or fifteen persons were killed and as many more badly hurt.

At St. Martins, Wednesday, the dwelling house, barn and store of W. A. Campbell went up in smoke despite all the efforts of the proprietor and the neighbors. The loss is placed at \$2,500. No insurance.

Mr. Murphy, a Truro tailor, while quietly proceeding home, Wednesday evening, was set upon by a gang of colored rascals, and fearfully gashed with a razor. Fifty-one stitches were put in by Dr. Kent.

A circular from the Customs department to collectors states that in the future all teams and carriages engaged in the transportation business may come into Canada free of duty, upon reporting on their return within thirty days.

At Bairdsville, Victoria Co., a few days ago two sons of Fred Brown, a farmer, were working together driving stakes. The head of the mallet flew off, striking one of the boys on the temple. He was rendered unconscious and died the next day.

Some idea of the size of Alaska may be formed when it is known that it contains an area of 577,390 square miles. This is more than twice the area of Texas. Twelve States the size of Pennsylvania could be carved out of the Territory of Alaska, with enough left over to make a State like South Carolina.

England, Germany, France, Australia, Africa, Canada and less important countries purchased over \$7,000,000 worth of bicycles from the United States during the year ended July 1, 1897. For the previous year the value of the exports was less than \$2,000,000.

The Knapp roller boat was launched at Toronto on Wednesday. The vessel, which is cylindrical, is 110 feet long and 25 feet in diameter. At each end are two sixty-horse power engines. Mr. Knapp the designer, by means of the principle of rolling over the water, instead of ploughing through it, expects to shorten the time of a voyage across the Atlantic to two days. The vessel cost \$10,000 and was built by George Goodwin, a wealthy contractor, and Postmaster General Mulock.

Steamer Aorangi has arrived at Victoria with two hundred men on board from Australia and Hawaii bound for the Klondyke. The mounted police who left Victoria about three weeks ago have been successful in crossing Chilcot Pass, and are now at work building their boats ready for the trip to Dawson City. At the time the mail left Dyea there had been continuous rains for five days. The trails on both the Chilcot and White Passes are simply in a deplorable condition, and there is not the slightest possibility of many more men getting over the passes this fall, or at any rate until the frosty weather sets in.

Owing to the prevalence of San Jose scale and other fruit pests in Canada, the Ontario Fruit Growers Association have requested the government to prohibit the importation of nursery stock from the United States, it having been demonstrated that San Jose scale found its way into the Dominion from the importations of stock purchased from New England nurserymen. The government is not prohibiting the importation, but the minister of agriculture is endeavoring to secure the co-operation of the collector of customs with a view of ascertaining where the scions and buds for grafting purposes, and all nursery stock, are imported from the neighboring republic. What good can be accomplished by this move it is difficult to see. Supposing all this information to be forthcoming, what then? Mischief may be done while this information is being collected. The fruit growers say that drastic measures by Hon. Mr. Fisher at this time in the direction asked for by them would be appreciated.

A special despatch from Sault Ste. Marie, Mich., says: "The value of the discoveries along the Michipicoten river, in Ontario, increases every day, and it is now known that the first reports from there, which told of surprisingly rich showings of gold, were afterwards discredited by a carefully circulated report intended to give the discoverers time to get a Canadian land grant covering seven forty-acre tracts. The government sent Prof. Alex McKenzie, the expert on mineralogy, to the field, and he returned here last night. He reports that gold is plentiful."

Last spring over 2,000,000 of the fry were distributed all along the Penobscot above Bangor dam by a car of the fisheries department sent here for the purpose, the fry having been hatched from eggs sent to the United States hatchery at Craig's brook in East Orland from California. Such of the fish as were not disturbed last spring have been growing since then at the hatchery, and are now five months old and about two inches in length.

A Clinching Statement.

A CURE THAT WAS PERMANENT.

The Medicine Used Was
Paine's Celery Compound.

Day after day home and foreign cures are heralded as the result of using this or that medicine. It is safe to assert that many of the published letters are bogus, and others will hardly bear the light of investigation.

The cures effected by Paine's Celery Compound, and noted in the press of the country have all the ring of genuineness and honesty about them, and the original letters can be seen at any time by an interested public.

It has also been proven in numberless instances that the cures made by Paine's Celery Compound are permanent. Another letter has just been received, this time from Mr. P. J. Kilbride, Postmaster, Inverness, P. E. I., testifying to the permanency of his cure. His case was one of the most serious and critical ever given to the public, and his complete cure astonished his many friends and the residents of his town.

Mr. Kilbride says: "Over three years ago I gave you a testimonial for Paine's Celery Compound after it had cured me."

"Today I am in splendid condition, and have not been sick a single day since I used the famous Paine's Celery Compound."

"I certainly owe my present health and strength to your medicine, and I am fully convinced it saved me from a condition bordering on insanity. I can now sleep and eat well, and I thank God for Paine's Celery Compound and the great change."

I have received and answered 250 letters since my testimonial was published. These letters came from all parts of Canada and the United States. It has been a pleasure answering these letters from sufferers, and I trust my recommendation of Paine's Celery Compound will help suffering humanity."

THE OLD SYSTEM GONE.

Better and Easier work Done
by Diamond Dyes.

The dyeing of cotton rags for the making of carpets, mats and rags was for a long time a tedious, difficult and unsatisfactory operation owing to the crude and old-fashioned dyestuffs that home dyers were obliged to use.

Of late years all this has been changed for the advantage and benefit of every home. Science has given the world the Diamond Dyes that have brought joy and comfort to millions of housewives.

The makers of the celebrated Diamond Dyes prepare special cotton colors such as Fast Pink, Fast Orange, Fast Purple, Fast Garnet, Fast Navy Blue, Fast Crimson, Fast Seal Brown, Fast Yellow, Fast Scarlet, Fast Cardinal, Fast Black and other colors that are unfading in washing, and fast in rain or sun. No other dyes in the world can give such wonderful results on cotton goods, and no others but the Diamond Dyes are fully guaranteed.

Make No Mistake.

DO NOT DESPAIR
Until You Have Tried What

SMITH'S...

Chamomile Pills

Can Do for You!

Do you have pains about the chest and sides, and sometimes in the back? Do you feel dull and sleepy? Does your mouth have a bad taste, especially in the morning? Is your appetite poor? Is there a feeling like a heavy load upon the stomach? Sometimes a faint, all-gone sensation at the pit of the stomach, which food does not satisfy? Are your eyes sunken? Do your hands and feet become cold and clammy? Is there a giddiness, a sort of whirling sensation in the head when rising up suddenly? Are the whites of your eyes tinged with yellow? Is your urine scanty and high colored? Does it deposit a sediment after standing? If you suffer from any of these symptoms Use

Taking Care

There has been among our farmers let their grain stand the shock. They money. We do not farmers do this, but have compelled grain as soon as the cause that in custom. All who that grain is in when it has been stored dried out, coming condition than where it and bleached out rain.

There is always a the straw can take shuck. We have of "I cannot see why badly; I have been not feeding them because was in the on be carefully stacked it is thoroughly-dried the market in poor not have such break we now have. Then we are afraid of that stacking, and that is often too small. If enough to make good be done for this reason. When your risk is and is not so easily wet by the rain, and much grain exposed have dropped these think they are over that harvest usually close to corn-p Farmer.

Brain For Cows

There is more advantage to cows in summer gain from keeping up time. If a cow is kept mer she will give more also, provided the sun has not been allowed and vitality to too grow or words, if judicious while at pasture is pr more and better milk be profitably milked calving. This has a the milking character the cow is then bearing.

It has always been milking breed of cow developed except when and moist weather down causing the production culent food. Undoubtedly use of ensilage in the prove the milking qu or will at least prevent ing. But with improvement must also be development greater amount of n seasons of the year. stock, especially for ways be a good feed that only that he must have skill to select best adapted to his Cultivator.

The Importance

The season of 1897 record as the wettest excessive rains, here England at least, have crops of low flat land that are well drained the water runs off fre plant growth, such as ous falling off, if not many of our staple cr
