

sent state of things; but we are as much indebted for the result to our invaluable Representative Institutions as to the personal efforts of any individual, and when constitutional government was once inaugurated our victory was complete.

Without an improper departure from the spirit of the occasion, may I not express to you my opinion that we have, under God, a magnificent future before us, worthy of the greatest efforts of the British American mind.

Shall we by loyalty to our country, and a wise administration of our government lay the foundation of a future Empire, exalted by righteousness, inflexible in its justice, strong in the affections of the people, and living in all good neighborhood with our friends beside us, only emulous to excel each other in the amenities and courtesies of national intercourse, and in the cultivation of all that can exalt and refine the national character, sedulously developing our boundless resources of wealth, and opening from ocean to ocean another highway for commerce and civilization, or shall we prove to be laggards and so lost to every feeling of national pride and self-reliance as to be unfaithful to our great trust, and allow our birthright to pass into other hands? Let us one and all resolve to be true to our country.

Next to the cause of Christianity, which must ever stand foremost as the noblest which can occupy the mind, and employ the talents of man is that of Education. We want intellectual culture and moral refinement—the education which combines greatness and goodness. It was truly said by one of the old English divines that “Many that are well learned are ill-taught, have a good head and a bad heart. Learning and virtue are excellent company, but they do not always meet.” As the public mind of this Province is now being directed towards the question of popular education, most sincerely and earnestly do I ask the aid of your influential body in the good cause, and may it soon be said of our Province that “there is a school for every child, and that every child fit to be taught is at school.”

We cannot afford to be indifferent on this great question; and in order to the future supply of our higher institutions of learning we must complete and keep in successful operation a thorough system of preparatory schools.

It is my good fortune to be associated with constitutional advisers who are of one mind on this great subject, and who are well inclined to do all they can for the education of the youth of the country.

Be assured that the principles which have directed me in the past shall be my guide for the future. And it will be a source of consolation to me during the short time of the present life which remains to me, to know that my public efforts to advance the interests of my native Province have merited the commendation of those whose good opinion I most highly value.

I thank you for your prayers on behalf of Mrs. Wilmot and myself; and in the spirit of fraternal love most sincerely do I pray that the great head of the church may abundantly bless and prosper you in all your efforts for the extension of the Redeemer's kingdom.

His Excellency is, we believe, the son of a Baptist deacon. The sentiments he expresses are worthy of the body to which he is at present attached as well as that of his honored parent.

One of our Canadian ministers, according to the *Baptist*, has received within the last twenty months no less than five agreeable and profitable surprises from his people and a milk cow from a good sister in addition. After being so well cared for by his people he will surely give them first class sermons.—*Ch. Visitor*.

Is not the reception of these surprises rather an indication that the people have had “first-class sermons?” It is pretty evident that “his people” appreciated the word preached.

Prepared only by FELLOWS, Chemist, St. John, N. B., who is the sole proprietor and manufacturer.

Mr. Fellows:

Sir,—I wish to communicate to you the benefit I received from using one bottle of your Compound Syrup. I suffered for several years from Chronic Bronchitis, and used all the remedies I could hear of, and obtained the best medical advice, only receiving temporary relief. One bottle of the Syrup helped me very much, and I am happy to say I have not had a symptom of the disease since taking it.

Yours respectfully,

ELIZA DEAN.

St. John, N. B., November 2, 1867.

Sold by Apothecaries. Price \$1.50 per bottle, or 6 for \$7.50. On the receipt of \$7.50 the proprietor will forward 6 to any part of Nova Scotia or New Brunswick, Free.

Lunenburg Co.—To be a Justice of the Peace—James Thomson.

J. SCOTT HUTTON, M. A.—The National Deaf Mute College, Washington, District of Columbia, has recently conferred the degree of Master of Arts on J. Scott Hutton, Esq., Principal of the Institution for the Deaf and Dumb in this city. “In consideration of his attainments, and his important labors in behalf of the deaf and dumb.” This flattering and well merited mark of distinction has been conveyed by an official and handsome diploma: “under authority of the United States of America,” and signed by E. M. Gallaudet, President, and William Stickney, Secretary.—*Witness*.

THE NORMAL SCHOOL PRINCIPALSHIP.—The following paragraph appeared in the *Express* of Friday last:

“We understand that at the late meeting of the Local Government held in this city, a commission was appointed, consisting of Professors Hensley and Ross, the Rev. Mr. Daly and Dr. Curran, to investigate and enquire into the capabilities of Mr. Mulholland, who has been recently appointed to the charge of the Normal School in Truro.”

On enquiry, we find, that there is slight mistake in the names of the Commission. It consists of the Provincial Examiners, Rev. Principal Ross, Rev. Dr. Hensley, Rev. T. J. Daly, and Professor D. F. Higgins.

FIRE.—Two alarms of fire were given on Sunday morning—the first was from a barn occupied by Alderman Murphy, extinguished without injury. The other was of a more serious character, from the china and glass store of Messrs. B. O'Neill & Co. Great damage occurred from the water in extinguishing the fire.

A FIRE AT CANNING broke out on Monday morning last, in the store of Messrs. B. & I. Bigelow, and extended to those of C. Dickie; G. E. Eaton & Co.; J. R. Kenedy; Sheffield & Wickwire, and M. Reddy—burning eight buildings, three of them large ones of three stories.—The loss must be very great. We have not heard the amount of damage, nor the supposed origin of the fire.

AN UNNATURAL MOTHER.—A woman calling herself Bishop came to the police station on Monday last with an infant, which she stated had been found near the citadel in a state of nudity. It was taken to the Poor's Asylum. It was subsequently discovered that the woman was herself the mother, that the child was eleven days old, and that she had gone to Pictou. Her proper name appears to be Morrison, and she belongs to Cape Breton.

The Provincial Government have decided to grant a subsidy of \$3000 to Mr. Fishwick's steamer *M. A. Starr* in consideration of her running on the Western Shore.

The *Colonist* is informed that there is a probability of an arrangement being effected whereby the city authorities will obtain the privilege of extending Lockman Street through the Admiralty grounds on accommodating terms.

A TAYLOR IRON SAFE was tested on the Common on Saturday last. It was covered by four or five cords of wood, and a barrel of pitch, having previously had some books and papers, and a \$5 note placed inside. It was locked by his Worship the Mayor, who then applied the match. It soon became heated to a red heat, and continued so for several hours. It was opened on Monday morning, when the contents were found uninjured, with the exception of the leather binding of one of the books having become slightly crisped. The papers and cards were as fresh as when put in.

THE PHILHARMONIC SOCIETY'S CONCERT at Temperance Hall on Monday evening was a very successful one. The pieces were finely rendered and gave much satisfaction to a large and highly respectable audience. It was repeated last evening.

GRANULATED WHEAT.—Messrs Payne Brothers & Co., will accept our thanks for a small package of this new article. It is excellent for porridge, puddings, &c.

NATIVE TALENT.—We had the opportunity, a few days since, of inspecting another oil painting by the young artist, Alfred T. Barrett. It is after a fine painting “the flight of Carrara,” done by Sir Charles Eastlake. It is certainly a fine indication of what may be accomplished by diligent application and genius combined. It would be highly creditable to any amateur, but for a lad of fourteen years of age it shows no small amount of artistic ability.

Ayer's Cherry Pectoral,

For Diseases of the Throat and Lungs, such as Coughs, Colds, Whooping Cough, Bronchitis, Asthma, and Consumption.

Probably never before in the whole history of medicine, has anything won so widely and so deeply upon the confidence of mankind, as this excellent remedy for pulmonary complaints. Through a long series of years, and among most of the races of men it has risen higher and higher in their estimation, as it has become better known. Its uniform character and power to cure the various affections of the lungs and throat, have made it known as a reliable protector against them. While adapted to milder forms of disease and to young children, it is at the same time the most effectual remedy that can be given for incipient consumption, and the dangerous affections of the throat and lungs. As a provision against sudden attacks of Croup, it should be kept on hand in every family, and indeed as all are sometimes subject to colds and coughs, all should be provided with this antidote for them.

Although settled Consumption is thought incurable, still great numbers of cases where the disease seemed settled, have been completely cured, and the patient restored to sound health by the *Cherry Pectoral*. So complete is its mastery over the disorders of the Lungs and Throat, that the most obstinate of them yield to it. When nothing else could reach them, under the *Cherry Pectoral* they subside and disappear.

Singers and Public Speakers find great protection from it.

Asthma is always relieved and often wholly cured by it.

Bronchitis is generally cured by taking the *Cherry Pectoral* in small and frequent doses.

For a Cough and Cold, no better remedy can be had. Take small doses three times a day and put the feet in warm water at night, until the disease is broken up.

For Influenza, when it affects the throat or lungs, take the same course.

For Whooping Cough, give small doses three or four times a day.

For Croup, give large and frequent doses until the disease is overcome.

No family should be without the *Cherry Pectoral* on hand to protect them, in case of attack, from the above complaints. Its timely use often spares the patient a great amount of suffering and risk, which he would incur by waiting until he could get other aid. Parents, keep it in your houses for the exigencies that arise. Lives dear to you may be saved by it.

So generally are its virtues known, that we need not publish certificates of them here, or do more than assure the public that the best qualities it ever possessed are strictly maintained.

Prepared by Dr. J. C. AYER & Co., Practical and Analytical Chemists, Lowell, Mass., and sold all round the world.
