THE TIDES.—The column of the Moon's Southings gives the time of high water at Pictou, Cornwallis, Horton, Hantsport, Windsor, Newport, and Truro.

High water at Pictou and Cape Tormentine, 2 hours and 11 minutes LATER than at Halifax. At Annapolis, St. John, N.B., and Portland Maine, 3 hours and 25 minutes LATER, and at St. John's, Newfoundland, 20 minutes EARLIER, than at Halifax. At Charlottetown, 2 hours 55 minutes LATER. At Westport, 2 hours 54 minutes LATER. At Yarmouth, 2 hours 20 minutes LATER.

FOR THE LENGTH OF THE DAY.—Add 12 hours to the time of the sun's setting, and from the sum subtract the time of rising.

FOR THE LENGTH OF THE NIGHT.—Subtract the time of the sun's setting, from 12 hours and to the remainder add the time of rising next morning.

For Consumption

And all diseases that lead to it; such as COUGHS, NEGLECTED COLDS, BRONCHITIS, PAIN IN THE CHEST, AND ALL DISEASES OF THE LUNGS.

ALLEN'S LUNG BALSAM

IS THE GREAT MODERN REMEDY

IT IS WARRANTED to break up the most distressing Cough in a few hours time, if not of too long standing. It is WARRANTED to give entire satisfaction even in the most confirmed cases of Consumption! IT IS WARRANTED not to produce costiveness (which is the case with most remedies), or affect the head as it contains no Opium in any form. It is WARRANTED to be perfectly harmless to the most delicate child, although it is an active and powerful remedy for restoring the system. There is no real necessity for so many deaths by Consumption, when Allen's Lung Balsam will prevent it, if only taken in time.

PRICE \$1 PER BOTTLE.

SOLD BY ALL DRUGGISTS.

April 22.

A MAN OF A THOUSAND.

A CONSUMPTIVE CURED.

When death was hourly expected from CONSUMPTION, all remedies having failed, accident led to a discovery whereby Dr. H. James cured his only child with a preparation of CANAABIS INDICA. He now gives this recipe free on receipt of two stamps to pay expenses. There is not a single symptom of consumption that it does not dissipate—Night Sweats, Irritation of the Nerves, Difficult Expectoration, Sharp Pains in the Lungs, Nausea at the Stomach, Inaction of the Bowels, and Wasting of the Muscles.

SCIENCE.

SCARLET FEVER.—A correspondent of the London *Lancet* writes that he "has obtained remarkable success in treating this disease by anointing the patient twice daily with sulphur ointment, and administering five to ten grains of Sulphur in a little jam three times a day. Besides this the room was filled twice a day with sulphur fumes. He states that under this treatment "each case improved immediately, and none were over eight days in making a complete recovery."

BREAD AS NOURISHMENT.—Bread contains 80 nutritious parts in 100; meal, 34 in 100; French beans, 92 in 100; common beans, 89 in 100; peas, 93 in 100; lentils, 94 in 100; cabbages and turnips, the most aqueous of all vegetables, contain only eight pounds of solid matter in 100; carrots and spinach produce fourteen pounds from the same quantity; whilst 100 pounds of potatoes contain twenty-five pounds of solid matter. From a general estimate it results that one pound of good bread is equal to nearly three pounds of potatoes, and that seventy-five pounds of bread and thirty pounds of meat may be substituted for 300 pounds of potatoes.

To RESTORE BLACK MERINO.—Soak the goods in strong soft-soap suds two hours, then, having dissolved one ounce of extract logwood (which is the amount required for one dress) in a bowl of water, add sufficient warm—not hot—water to cover the goods, which are to be taken from the suds without wringing. Allow the goods to stand in the logwood water over night; in the morning, rinse in several waters without wringing; in the last water add one pint of sweet milk, which stiffens the goods a little; iron while quite damp. It will not crack, and looks like new.

Hall's *Journal of Health*, advises over-stout people not to seek to reduce flesh by drinking vinegar or smoking, but to maintain as perfect a digestion as possible and avoid fat-making foods, such as starch in the shape of potatoes, flour, bread, and rice. Spirits, malt liquors, and sweets are to be abjured. The gluten of wheat is the best food. It will sustain life in full vigor, but it will not add an ounce of fat to the body.

SPONTANEOUS COMBUSTION, it is said, has never occurred among waste and rags where petroleum was used as a lubricant. While hundreds of cases can be given, from well authenticated sources, of fires caused by matter saturated with one or another of the animal or vegetable oils, not a single case has thus far been recorded of such a fire originating from petroleum.—The conclusion is that all animal or vegetable oils do cause spontaneous combustion, and that petroleum prevents it.

PENNSYLVANIA has a law which forbids the placing of chairs, stools or benches in the aisles, or any obstacles to ready egress, in any of the passages of a public hall or church.

VARIETIES.

The Punjab may boast of having the smallest horse in the world, if the following be true:—"His highness the Nawab of Laharoot sent a remarkably diminutive Nepauli pony, which is only 8 inches high, as a present to the young Maharajah of Puttiala. The pony is a perfect miniature of a well-bred horse, and is highly valued by the natives."

A Kentish paper announces the death of the "Swanley Fat Boy Richard Beenham." He was twelve years and four months old, stood 5 feet in height, weighed 25 stone, (14 lbs. to the stone,) and measured 69 inches around the waist. The funeral caused some excitement amongst the villagers at Swanley.

LOOK FIRST ON THIS PICTURE.—A company of U. S. women suffragists held a meeting to prove that woman is man's superior in point of courage, but some profane person introduced a live mouse into the room, and those members who couldn't climb upon the table dropped out of the window, and the meeting was broken up.

NOW LOOK ON THIS.—Miss Gilmour, daughter of Rev. J. Gilmour, of Doe Lake, Ontario, while out in a canoe late in the autumn, saw a large deer in the water, upon which she immediately gave chase, and after more than an hour's pursuit, she succeeded in capturing him. When weighed he was found to be over 200 pounds. The young lady was only seventeen years of age.

AGRICULTURE.

CALIFORNIA VEGETABLES.—The rapid growth of most plants and shrubs is something wonderful, and the continual growth for ten months in the year doesn't seem to account for it. Hard, solid heads of cabbages, forty-five to fifty-three pounds each, are sometimes grown, and whole fields of fifteen and twenty pounds to the head are common. One cabbage grew, without heading, seven feet wide, throwing out leaves three and one-half feet long. In many cases the cabbage has been converted into a perennial tree-like plant, by not letting it go to seed, and several are now growing through winter and summer, in rain and drought, from two to six feet high.

The largest squash grown in California was 260 pounds, and the vine which bore it had several others of over 100 pounds apiece and the total weight was over 800 pounds! In 1857 a squash vine in Yuba county bore 130 squashes, weighing in all 2,640 pounds! The largest Onion weighed 47 ounces, and measured 22 inches in circumference.

The largest mangold, a variety in beet, weighed 118 pounds, and was 5 feet long and a foot in diameter. It was three years old. The first year it grew to 48 lbs., and it was left standing to go to seed. But it wouldn't go to seed, but kept on growing next year, and got up to 68 lbs., and the next or third year to 118 lbs. A common white turnip grew to 26 lbs., a carrot to 10 lbs., a watermelon to 65 lbs., a tomato to 26 inches in circumference. They have cabbages, cauliflower, lettuce, turnips, beets, carrots, parsnips, radishes, horseradish, celery, green onions, leeks, parsley, &c., throughout the year.—*Massachusetts Ploughman.*

Experiments are being made in Ireland with a new potato-raiser called the Aspinwall. At a recent trial the *Downpatrick Recorder* saw the potatoes raised clear on the top of the ground in a track immediately behind the machine, none of them being covered with the soil, or damaged by the action of the revolving fork. In less than half-an-hour, the machine raised as many potatoes as twenty women could gather for the remainder of the evening. The trial throughout was most satisfactory, and the opinion of the experienced farmers present was that it was one of the most successful potato raisers that has ever appeared in that country.

CONDENSED EGGS.—The London correspondent of the *Glasgow News* writes:—"The latest novelty put upon the market comes from China, and consists of condensed eggs. We have all heard of eggs in the form of condensed meat, but this notion of condensed eggs is the reduction of compressed nutriment to its ultimate essence. The eggs are taken fresh laid from under the hens, the liquid is evaporated from them by some process known to John Chinaman, and they are then canned and hermetically sealed—all this being done in the immediate vicinity of the place where they are produced. A tablespoonful of the preserved article is stated to be equal to one egg, and the mode of use is to dissolve it well in an equal quantity of warm water, and beat it up into a light froth. What a field this opens up for adulteration. We shall have to abandon the old proverb, "As sure as eggs are eggs."

SPRING CHICKENS ALL THE YEAR ROUND.—It is stated that chickens are hatched by steam at the Vennelyst poultry farm, Pentwater, Mich. The hatching house has been built in the form of a cross, giving five rooms each 12 feet square, in each story. The first floor is devoted to hatching, and the incubator stands in the room looking towards the east. It is not a very pretentious looking piece of mechanism but it will hatch 300 or 400 chickens at a time. Spring chickens all the year round—"tis not a bad idea."

It has claimed that the Western locusts would not eat the Castor bean plant, consequently farmers in the infested regions could grow this crop with impunity, if no other; but it now turns out that while the locust do not trouble the leaves, they eat the flowers off, thereby preventing the productions of the beans, which is just as bad as though they ate up the entire plant, especially if the "hoppers" came during blooming time.

The shipment of American beef to England is becoming a large and growing business. Two Liverpool steamers took over four hundred dressed cattle a few days ago.

Hundreds Cured daily in Nova Scotia

BY THE

DIAMOND RHEUMATIC CURE.

Effectually curing hundreds of our Nova Scotia citizens from that terrible malady

RHEUMATISM.

This statement is substantially a FACT based upon evidence in the possession of the agent, in the shape of numerous testimonials from past sufferers, in the walks of life, and particularly from some of our most respectable and trustworthy families.

DIAMOND RHEUMATIC CURE.

In its history, this invaluable Medicine occupies the most honourable position possible for any remedy to attain. A few years since it was known only to the friends and neighbors and patients of the proprietors, and always sought for by them whenever troubled with Rheumatism, and in this way came to the notice of physicians generally, and through their favorable expression, and its acknowledged value as a Rheumatic Remedy, the demand for it became so frequent and urgent as to oblige its proprietors to increase their facilities for its manufacture. Its reputation rapidly extended, and soon orders, letters of enquiry, letters of thanks, and certificates of praise were daily received from all sections of the United States and Canada; and in this way on a basis of its merit alone—unaided by "tricks of the trade," or special efforts—it has risen to its present exalted position. Wherever introduced it has received the most flattering preference in the treatment of all rheumatic complaints. In this we are really grateful and happy not alone because our medicine finds ready sale, and is consequently profitable to us, do we say this, but because we open a new field in medical science, and cure at once what the best medical practitioners have for ages found so difficult even to relieve. We fill a place heretofore unoccupied. We relieve the suffering and minister to God's poor; we restore the laboring to the use of his injured limbs, and save him scores of times its cost in doctor's bills; we carry contentment and gladness into the home of the afflicted, and consequently are remembered by millions of grateful souls.

The proprietor of this medicine has walked the aisles of the Hospitals of London, Eng., for the past twenty years, making rheumatism a specialty, and the prescription from which this remedy is all he ever used in the treatment of this disease. This medicine is for sale at all the druggists throughout Canada. If it happens that your druggist has not got it in stock, ask him to send for it to
