

this week covered the waters of Portsmouth from land to land. There assembled at the Sovereign's bidding no less than 26 screw line-of-battle ships; nearly 40 frigates, paddle and steam; 20 sloops, corvettes, and brigs; and 164 screw gun boats; in all upwards of 300 sail of men-of-war, having an aggregate tonnage of 150,000 tons, manned by 40,000 seamen, carrying 3,800 guns, and firing at one discharge a broadside of nearly 90 tons of solid iron.

It is only by comparison that we can fairly estimate the enormous power of the fleet assembled at Spithead. In one of our early wars with France we blockaded Brest with 15,000 men, who swarmed over the Channel in 750 sail; 44 ships of the Baltic fleet last year carried 22,000. When the armada was approaching our shores, our ancestors sent out to oppose it 146 ships, crowded with 15,000 men. Should another armada seek to throw a hostile force upon our land, there are ready at Spithead to oppose it 260 ships of all sizes, propelled by screw or paddle. Of this number the 68 line-of-battle and larger ships are armed with 2,564 guns, and manned by 26,560 British seamen, propelled by 11,900 horse power, and have an aggregate tonnage of 109,700. Attached to these would be a gun-boat flotilla, which in its four squadrons would number 160 vessels, each carrying from two to four heavy guns, or a total of 656 guns, 6,318 men, and fitted with 12,420 horse-power. The total available steam force now awaiting at Spithead the signal to weigh and proceed upon its mission, would be impelled by 23,720 horse-power, manned by 32,870 stalwart and disciplined men, prepared to work the 3,220 guns, which would be ready to "hurl their fire" upon the invader, or carry destruction to the foreign foe.

TURKEY.

A Greek newspaper, the *Journal of Minerva*, gives the following account of what has recently happened at the town of Ismi, in Nioecia: "After the reading of the firman, according to which those liberties by which the European Powers think that Turkey may be regenerated, the English urged the Christian inhabitants to mount their bells on their churches, and to encourage them to do it, they actually assisted them themselves, like true sons of liberty, to execute the work. Immediately the Turks came out and attacked them, and in the melee some thirty English and other Christians were killed and wounded. This exasperated the English and the Greeks so much that they actually went and besieged the governor and took him prisoner, with about 200 Turks, and sent them to Constantinople. The Porte, we understand, is rather in a fix about this affair.

Disturbances continue in the Principality. Their future organization will, it is thought, be submitted to the representatives of the people on the withdrawal of the Austrian troops. A general assembly will be called, either of the two provinces separately or conjointly. The Boyards will not alone be represented, but every class will be empowered and enabled to send its delegates, and make its wishes known.

Letters from Constantinople by the last mail report that great excitement reigned at Verna and in the neighbourhood, in consequence of the discovery of the mutilated body of a Christian girl, who had been violated and afterwards murdered. The crime was ascribed by the Greeks and others to a Pasha, and it is clear that such was the popular belief, although the information attainable on the subject is scanty, and tainted in its origin. The Mersey, which left Constantinople on the 3rd inst., has now brought word to Marseilles that menacing demonstrations have been made at Verna. The funeral of the girl was attended, it is said, by 6,000 Christians, and in the church a Bulgarian harangued the people, vehemently demanding justice.

Correspondence from Asia states that Mecca and Djeddah continue in a state of open insurrection; 60,000 men in arms refuse to acknowledge the authority of the new governor appointed at Constantinople. The governor has retired to Cairo. There has also been a revolt in Kurdistan. A chief has refused to pay taxes to the pasha of the province, and the populace has taken part with him. There has been a fight.

UNITED STATES.

THE MURDER OF A WAITER AT A MEMBER OF CONGRESS.—*Washington*, May 8.—Mr. Herbert, a member of the House from California, who shot the head waiter at Willard's Hotel, this morning killing him instantly, has been arrested, and the matter is undergoing investigation. As nearly as at present can be ascertained, the circumstances are, that while Mr. Herbert was eating a late breakfast at the public table of the hotel, a waiter gave him some insolence, when Mr. H. called for another waiter, who came and treated him insolently. It is said that two or three other waiters then came up and commenced an assault on Mr. Herbert with chairs, plates, dishes, etc. They then grappled with him, when several gentlemen standing by interfered, but retreated on being turned upon by the waiters. Mr. Herbert's friends then present that he fired only when it became evident that it was the design of the waiters to kill him, and that after one was killed, two others continued assaulting him until he was rescued by his friends. Mr. Herbert is aided by counsel. Gen. Lane and Mr. McKay of California saw the whole affair.

On the last night of April at about 12 o'clock a fire broke out in Philadelphia in a large rag and paper warehouse on the south side of East North st. below Sixth. The wind was blowing briskly and the whole fire department of the city was called to the scene of the conflagration. The Evening Bulletin says:—

The fire continued to spread until daylight, and when the sun rose a sickening scene was exhibited. Every building on the north side of Market street, from the unfinished iron structure at No. 219 to Sixth street, was in ruins, and most of the houses on the east side of Sixth street to North street, were down. The western ends of North and Commerce streets were in ruins, while ugly gaps were made in the blocks south and west of the bounds described. Some forty buildings were destroyed, many of them stores of great value.

The entire loss is roughly estimated at more than a million dollars.

IMPORTANT FROM NICARAGUA.—Another battle has occurred between Walker and the Costa Ricans, in which the latter lost 600

and Walker about sixty. The Costa Ricans had taken possession of Virgin Bay, and were accused of firing indiscriminately on every person they saw, killing eight or ten American citizens in the employ of the Transit Company. Minister Wheeler had addressed a strong protest to President Mora, threatening decided measures on the part of the United States Government, unless the matter was atoned for.

Temperance Legislation.—Mr. John M. Barnard of Boston, offers a premium of one thousand dollars for the best Essay on the subject of Legislative Enactments designed to regulate the manufacture, sale, and use of intoxicating liquors, to be accompanied by an outline of a Law for consideration. The great object to be accomplished, is a Law for general adoption, that shall best subserve the cause of Temperance, and it will be expected that competitors for the premium will in their essays set forth the principles upon which such a law should be based.

No limits or requisitions are prescribed as to the number of pages, but all will understand the importance of a directness of aim, and a comprehensive brevity. All persons intending to write, are respectively requested to send their productions enveloped and sealed to Mr. Barnard, enclosing their names and places of residence, on or before May 1st, 1857, to be placed in the hands of the Judges.

OREGON.—The Indians here, it seems, managed to place a large war party between the settlements and the United States forces. On March 25th, about 800 Indians attacked the Cascades, and gained possession of the only pass by which communication may be had with the regulars and the volunteers. The Indians burned all the buildings, destroyed the steamer Mary and killed a large number of the citizens. Assistance was sent from Vancouver and Portland, and the latest account state that the fight was still fiercely raging. The inhabitants are seeking protection in Portland, as the Indians are murdering every person they capture. The war up to the present time has cost over \$2,000,000. The funds at Vancouver have given out.

Mrs. Gossell and family, who it will be remembered, were taken captive at the massacre on February 23rd, near the mouth of Rogue River, have been exchanged for four squaws, and \$100 in money.

Provincial News.

AN interesting Canada correspondence has been received this week too late for insertion. It will appear in our next. Also interesting New York correspondence already received.

THE RAILWAYS.—The *Morning News* says:—We have the best authority for stating that the Railway works will commence immediately after the Commissioners are appointed, about the 20th inst. Letters have been received from England authorizing the Government to draw for the first £50,000, as soon as they like, agreeably to the understanding entered into between the Delegates and the Barings, the latter having agreed to advance the money out of their own funds to the extent of £50,000 for this year's operations. The first work will be commenced or resumed at the Bend, and it is calculated that the branch will be completed before Christmas Day. Contracts are to be entered into in the Fall for commencing work on the St. John end of the line on the 1st of January next; the road will be let out in sections; and it is thought the line can be completed to Hampton Ferry by the end of 1857.

The Circuit Court for the City and County of St. John, opened at the Court House, on Tuesday last. Judge Wilnot presiding. The Sheriff's Calendar contains but four cases. The docket 166, besides 13 remainders.

DESTRUCTIVE FIRE.—About eleven o'clock on Tuesday night, a fire broke out in the rear of Peter's street, and spread with great rapidity. The fire companies were early at the scene of disaster, and by their united exertions much valuable property was saved, which would otherwise have fallen a prey to the devouring element. As it was, however, two dwelling houses were destroyed, and a range of outbuildings. One of the houses was occupied by Mrs. Hunt, and the other, a new building, was owned by Mr. Geo. Brown. The fine new stables of Mr. Henry Austin, on Coburg street, were in imminent danger, but were saved through the active exertions of the firemen. We understand that the property destroyed was mostly covered by insurance.—*New Brunswick*.

On Monday last, L. P. Fisher, Esq., was elected Mayor of Woodstock by a majority of twenty over James Robertson, Esq., the other candidate.

Two puncheons, containing whiskey, were seized on Tuesday morning by the Custom house officers, in a boat belonging to the Clarence, late from Galway. It appears that the captain tried to stave in the barrels before the officers took them.

CORONER'S INQUEST.—An inquest was held in the Parish of Kingston, K. C., on the 9th instant, before James Wetmore, Esq., Coroner, on view of the body of Elias D. Fiewelling, found hung a few rods from his own house. Verdict, committed suicide while in a state of mental aberration.

On Sunday morning a little after 1 o'clock, a house in Sheffield Street was destroyed by fire.

SAD CASUALTY.—On Thursday last the steamer *J. D. Pierce*, Captain Wood, started on her second upward trip for the season to Woodstock. About noon, being then thirty miles above Fredericton, while stopping to land passengers, the boiler blew up, in the most awful manner, shattering the boat to pieces, killing and wounding several of the passengers and crew, and knocking others overboard. The boiler shot like a dart through the Ladies Cabin, and went out aft, and the boat immediately sank in five fathoms of water. Three men are missing.—Robert Miller, the Pilot, and three raftsmen, named Wark and Tomlinson. Among the passengers were Mr. T. Johnson, and his wife, (daughter of Charles P. Wetmore, Esq.) Mr. Johnston was struck by something, and considerably bruised. Mrs. Johnson was struck by something, and knocked overboard. She was picked up and carried on board the "Richmond" (which was passing down) in a canoe. Restoratives were applied, and in a short time she rallied. She then spoke cheerfully and did not seem to apprehend any serious consequence; but it was not long before she grew faint, and she succeeded in getting to the shore. On her arrival in town medical aid was immediately procured, but the fit of Almighty Providence had gone forth, and about midnight she expired. Mrs. J. was quite young, she was married last autumn. We sincerely sympathize with the afflicted relatives.—*New Brunswick*.

THE GRAND TRUNK RAILWAY question has been the prominent topic during the week, and several schemes have been proposed for the relief of the company. The principal one among these is that of Hon. W. Napier. It appears in *extenso* in other columns. The main point of it is, that he wants a guarantee of 5 per cent. by the Province, as well for the protection of the shareholders as testifying confidence in the undertaking. It is not probable that his demand will be acceded to. However, if it were, the step would be unpopular in this city, for it would be regarded as a premium to extravagance.

The Government are pushing on their business with all possible speed; and especially is the Hon. Mr. Cartier, Provincial Secretary, making progress with two very important education bills. These have some defects; but, on the whole they will confer great benefits on the Province.

The estimates for the year 1856 have been brought down by the Government. The revenue for the year is estimated at £1,500,000, and the expenditure £1,256,504. The customs duties under the proposed Tariff are calculated to produce £1,200,000.

NOVA SCOTIA.—Recently a Barque of about 430 tons, nearly planked, decked laid, owned by John Bennett, of Digby, was consumed by fire on the stocks at St. Mary's Bay—supposed to be the work of an incendiary. She was insured.

HARRISVILLE, Shelby Co. Ky. April 2, 1849.
J. Kinn & Co.—I am a practicing physician, residing permanently in this place. In the year 1843, when a resident of the State of Missouri, I became acquainted with the superior virtues of Dr. M'LANE'S Vermifuge. At some leisure moment, I will send you the result of an experiment I made with one vial, in expelling upwards of 900 worms.

Dr. M'LANE'S VERMIFUGE.
ANOTHER MEDICAL WITNESS.
It is no small evidence of the intrinsic value of this great Vermifuge, when even physicians, who are generally prejudiced against patent medicines, voluntarily come forward and testify to its triumphant success in expelling worms. Read the following:—

In the year 1843, when a resident of the State of Missouri, I became acquainted with the superior virtues of Dr. M'LANE'S Vermifuge. At some leisure moment, I will send you the result of an experiment I made with one vial, in expelling upwards of 900 worms.

Dr. M'LANE'S VERMIFUGE.
ANOTHER MEDICAL WITNESS.
It is no small evidence of the intrinsic value of this great Vermifuge, when even physicians, who are generally prejudiced against patent medicines, voluntarily come forward and testify to its triumphant success in expelling worms. Read the following:—

HARRISVILLE, Shelby Co. Ky. April 2, 1849.
J. Kinn & Co.—I am a practicing physician, residing permanently in this place. In the year 1843, when a resident of the State of Missouri, I became acquainted with the superior virtues of Dr. M'LANE'S Vermifuge. At some leisure moment, I will send you the result of an experiment I made with one vial, in expelling upwards of 900 worms.

Dr. M'LANE'S VERMIFUGE.
ANOTHER MEDICAL WITNESS.
It is no small evidence of the intrinsic value of this great Vermifuge,
