The coincidence is curious-that Delhi should have been captured on the anniversary of the battle of Alma.

Cosound, Canada, 6th Nov. 1857. Tea Meeting-Bad Disease, Very 1-Scenery Canadian Rice--Temperance Demonstra-tion--Imposition.

MR. EDITOR :-- For once let me give the zo-by to the ordinary topics, as railway frauds, fai ures, hard times, etc., and tako such of your readers as choose to accompany me, first to a Tea meeting, and then to a temperance demonstration. The former came off last week in-why should I give the name, which nobody will think of remembering except as attention is called to it-Baltimore, " Baltimore !" exclaimed several readers in a breath, "Were you in Baltimore? Did you go all the way to Baltimore to attend a tea meeting ?"-Yes; and what is more, I accomplished the journey in less than an hour ; buy what of that in these days of railroads and telegraphs ?-of course-for have too much respect for your readers to explain a jest-our Baltimore is some place unknown to fame, within an hour's ride of Cobourg. It is a part of the township of not very definite limits, being a cognomen applied long ago, and prior to the naming of the township. And here is it not worth while pausing for a little to moralize on the absurity of giving old names to new places? We carry this to a ridiculous extent in America. In Canada we have Parisa small village : Scotland, another village ; what cannot at this date be mended without difficulty. By way of variety, I missed my road in going to Balimore, not having had sufficiently correct information-in fact, no formation, blunders on, when convidced that he has missed his course. It is a Canadian peculiarity, when you are seeking directions, to bid you go East, West, North, or South, as the case may be, as if one could tell the points of the com ass when bewildered. But here again the tongue is of service, and-in short, I reached the church in which the tea meeting was held. Soon the house was crowded, and the meeting opened with praise and prayer. The people sat in the pews, and were speedily and readily served with all the substantials and comforts required. After this followed the usual speechitying, in which mirth was blended with sage counsels. One speaker described a disease with which be had found many persons afflicted, and as it is possible some of your readers may have the same disease-your subscribers are free from it-perhaps I may be permitted to speak of it more at length. It is hardly necessary to give the symptoms, most of which have essaped my memory, however. One, I remember; when you talk about the duty of comtributing to benevolent and religious objects, the diseased are observed to put their hands into their pockets, and keep them there till the appeal is at an end. It was described as catching, and was illustrated by the story of a Dutchman who had two horses, one of which was quite willing to draw the whole load, and the other was as willing to let him. This disease is called " the tights." A sad malady, Mr. Editor, and very prevalent these hard times. The scenery, northward from Cobourg is among the finest in Canada. The variety of ill and dale is attractive to the eye of the asteful tourist, and at the season when the fruits of the earth are approaching perfection, one is reminded of the language of the Psalmist : " Thou crownest the year with thy goodness, and thy paths drop fatness .---They drop upon the pastures of the wilderness, and the little hills rejoice on every side. The pastures are clothed with flocks; the valleys also are covered over with corn ; they shout for joy; they also sing." Returning from the back country, which is considerably elevated above the lake, the prospect is delightful, and new beauties burst upon the sight at every turn. The talented author of Roughing it in the Bush," resided for a time in this part of the country. Now for the Temperance Demonstration. Without indicating the precise locality, let it suffice that the writer with two others India, I need not say, is in all our thoughts from Cobourg were invited to take a part in bitter with the sweet-or refuse to swallow still. However much novel-readers may weep over fictitious misery, it is found that they generally have little or no sympathy with real mond suffering. Did you never know a mother to send away a sick child, or a daughter to neglect a sick mother, for the purpose of finishing a novel ? If irreligion and impiety wick do not flourish under such influences, effects cannot be traced to causes.
