A specified health is the greatest blessing tint we can enjoy without which all other blessings are of lattle consequence, we deem it of great importance to point out the way for you to onjoy it. The bowels must be kept in a state by which they are enabled to carry of the useless matter ; they are the main channel which nature has appointed to carry everything that is unneccessary. And it is impossible to tell what a large amount of suckness has been caused by costipation, or costive-ness ; in other words, by not keeping the bowels regular; it is the main road to all diseases ; it is the cause of manutari irri-tation to the mucous, or liming membranes of the howels. Having lost their natural strength, they cannot object to what is required of them. Hevce, the bowels become 'inflamed, and unless you find a speedy relief, a thousand other com-plaints are ever roady to drag you through a miserable and wrotched life. Such modicines must be given as will cleanse the stomach and bowels, and restore their natural strength-to accompliab this there is no compound as valuable as these PHB; all other medicines sink to utter insignificance when commered to them ; it seems as though the Author of Nature had de igned them for this as well as other compliants.
