London Times, in editorial on wretched condition of Mexico, sees no reason why England should oppose ambitious designs of Government at Washington. It considers establishment of any Government of law and order in Mexico would be a gain; it ridicules the threatened Spanish expedition as a farce, and says every gun fired on Mexican territory is fired to the ultimate profit of the great Anglo-Saxon northern confederation.

A reform conference was held in London the 5th, at which a resolution was adopted requesting John Bright to frame and bring in Reform bill. He accepted the duty.

INDIA AND CHINA.—GREAT VICTORY.—ONE THOUSAND REBELS SLAIN. The following message has been received at the East India House:—

To James C. Melville, Esq., India House, from H. M. Anderson, Secretary to the Government.

QUEEN. Bombay, Sept. 27, 1858. A successful attack on a body of rebels numbering about 3000, posted on the island of the Gogra, took place on the 19th inst. Two companies of Europeans, the Kupperheld Contingent, and some of Hedson's horse attacked and drove them out of their entrenched position on the island, killing, it is reported, 1000.—The artillery fire did great execution among the fugitives, and also sunk two boats laden with the enemy. Two of the rebel leaders are reported to be among the slain. British loss not severe.

CENTRAL INDIA. The Gwalior rebels are still at Seronge, but it is thought that they will make an attempt to cross the Nerbudda between Saugor and Bilas.

CHINA AND JAPAN. Hong Kong, Sept. 13.—Lord Elgin has arrived here. He is the bearer of a treaty concluded with Japan, which is almost identical with the American treaty. One year after its ratification five ports will be opened to English traders. Cotton and woolen fabrics are only to pay a duty of 5 per cent. of the declared value on importation. Almost all other articles to pay 20 per cent.

The Chinese agents for negotiating the tariff are not yet come.

The Canton correspondent of the London Times says:—

"In trade at Canton there was nothing doing, and it was doubtful when the tea market would open. Foreigners with any prudence could only pay low rates for tea, and the enhanced prices in the country do not give any inducement to the Chinese to press the produce on the market. Another impediment to the opening of the market is that a general contribution is to be exacted for war expenses, and it was expected that those who in the outset did business to any extent would have to pay the heaviest levies.

The Chinese commissioners, whose arrival was expected in Shanghai to meet the Ambassadors for the revision of the tariff, had not arrived up to the last date, and nothing positive was known regarding them.

In the Pekin Gazette the objectionable term 'barbarian' continues to be used towards foreigners.

BURNING OF THE EASTERN CITY. The Eastern City, Capt. Johnston, left Liverpool on the 10th of July last for Melbourne, having on board 180 passengers, a crew of 47, and 1,600 tons of general cargo. On the 23rd of August, when about 600 miles from the nearest land, fire was discovered to have broken out in the fore-hold of the ship. At once every endeavor was made to extinguish it, and precautions were taken to prevent its spreading, but notwithstanding the almost superhuman efforts of the captain, crew, and passengers, the flames gained headway, and on the following afternoon it was found that all below the decks was on fire. Hope had almost disappeared from every heart on board, and many farewells were taken, when a sail was espied, and towards night a ship approached, which proved to be the Merchman, bound from London to Calcutta with troops. This vessel succeeded in rescuing every soul on board, with exception of a passenger named Peter McLean, who, it is feared, was suffocated in his berth. The Merchman arrived in Table Bay on the 11th of September, and the passengers were forwarded on to Melbourne. The loss, including passengers' baggage, &c., is estimated at £100,000.

Great praise is accorded to the captain of the Eastern City for the ability and energy he displayed in the hour of peril. The Eastern City was built at Boston, but was owned by a company in Glasgow, and chartered to James Baines & Co. of Liverpool. She was very heavily insured at Lloyd's.

LORD ELGIN AND AFFAIRS IN CANTON.—Lord Elgin seems to have been under the belief that if once he succeeded in drawing an open assent to the hearts of the inhabitants of Canton—that to her would be to obey. In Canton lies the core of the difficulty, and that being diseased no peace can be obtained until the disease has been destroyed by emollients or the knife. There is nothing surprising in his Lordship being adverse to use hostile measures with the Cantonese, for it is no light matter to expose warlike operations with a province numbering some twenty millions of inhabitants, and that he hopes and waits for a peaceable mode of adjusting this difficulty. But will any other means but force avail? His Lordship, it is said, is entirely opposed to the continuance of hostile operations, and we believe that strict orders were given that no operations should be undertaken against the ninety-five villages, the seceding houses of the greater part of the hated shewn towards us. We learn that his Lordship considers that although the infliction of a severe lesson on the Cantonese might have a salutary effect for the time, yet the ill-will excited by the destruction of property and life would in its ultimate result more than counterbalance the benefits derivable from such a course. He attaches great importance to the establishment of ambassadors at Peking as he considers it will be the means of avoiding, or at least of easily adjusting, any future squabble between subordinate officers. He expresses himself most strongly against the bombardment of Canton, saying that three hours would have been enough, instead of 27, and considers it disgraceful to have fired on an unsuspecting city; he did not come out here to be a butcher, he did not come out here to be a conqueror, neither will he be one. Four high commis-

sioners are reported to have left Peking for Shanghai, two of them being the Tientin commissions, with the object of adjusting the Canton difficulty, revising the tariff, and generally carrying out the provisions of the treaty. It is thought very possible they may proceed to Canton with Lord Elgin—so say the Shanghai people.—Hong Kong Register.

We would caution all who buy Pain Killer, to be careful and call for Perry Davis' Pain Killer, and to take none put up in square bottles, with Perry Davis & Son's note of hand on one side of the bottle, and 'Davis' Vegetable Pain Killer' blown in the glass. All others are spurious.

She loved religion in her life, and felt the blessed effect of it in her last sickness, and in the struggles of death. She united with the Free Baptist Church at Millstream at its organization. LADIES! LADIES! Are you afflicted with Nervousness, Dyspepsia, Want of Energy, Weakness, Dizziness, or Sick Headache. Read the following: J. M. HYPERIZER, Doylestown, Pa. June 2, 1853. I have been afflicted with a Nervous Debility since September, 1851, since which time I have been unable to find any physician or medicine that would benefit me. I was told by a friend to try the 'Bitters' of Dr. Harvey, of this town for some tincture of iron, and described to him the afflictions of my wife; he then handed me a lot of papers, but I used them in vain. I then procured a few bottles from him and am pleased to state that the use of the 'Bitters' has done more good than all the cases, but your Pain Killer has done more than a half dozen bottles. These Bitters are prepared by Dr. C. M. Jackson, 418 Arch Street, Philadelphia, Pa., are sold in every town and storekeepers in every town and village in the United States, Canada, West Indies, and South America, at 75 cents per bottle.
