Alarming Signs of Sickness [BY TELEGRAPH TO THE NEWS ROOM.]

Arrival of the "Europa."

HALIFAX, October 19th. Europa, Capt. Leitch, sailed from Liverpool at 10 30 a. m. on 9th, and arrived at Halifax at 12 midnight on Tuesday, 19th.

Among passengers are Hon. Henry J. Raymond of New York Times and Judge Putnam of Boston.

Europa reports, 14th, exchanged signals with British bark Emigrant bound east. Ship Daniel Webster, arrived at London from New York, reports that on 20th Sept. in lat. 43 30, long. 42 57, passed a number of dead bodies,

supposed from burnt steamer Austria. A deputation from Atlantic Steam Packet Company had an interview with Mr. Hamilton, Secretary of Treasury, on subject of postal subsidies for mail service between Galway, Newfoundland, and America. He stated that Government viewed with considerable interest new line of steamers between Galway and the British North American colonies established by Lever, and the importance they attached to being able to communicate between London and Washington in six days. The Limerick Chronicle says, that on assembling Parliament, Government will recommend giving to Galway a grant of fifty thousand pounds as first instalment for construction of breakwater, should commissioners' report be favorable. Commissioners had arrived to commence investigations.

The Daily News has hopeful editorial on Atlantic cable, and thinks it may yet be rendered available: it says Professor Thompson has nearly succeeded in neutralizing the effects of earth currents, which become perplexing when currents through cable are so weak. Professor Hughes has so modified his printing apparatus that a current of voltaic electricity, generated by small iron wire being held in one hand moistened with water, while a copper wire of equal size is held in the other, the two wires being united to form a circuit, is sufficient in intensity to make his machine print intelligible message So sensitive is his new instrument. that it will still print correctly, though the current, weak.

What? Why a beautiful lead of Hair.

Because it it is the ornament God Himself provided for all our race. Reader, although the rose may bloom ever so all our race. Reader, although the rose may bloom ever so brightly in the glowing cheek, the eye be ever so sparkling the teeth be those of pearls, if the head is bereft of its co-vering, or the hair be snark d and shriveled, harsh and dry, or worse still, if sprinkled with gray, nature will lose more than half her charms. Prof. Wood's Hair Restorative, if used two or three times a week, will restore and perma-nently secure to all such an ornament. Read the follow-ing and judge.
