The "Great Prize Medal" was awarded to Dr. Palmer in London over thirty-five competitors from all parts of Europe, and in this country wherever exhibited, it has invariably received the highest, award. Upwards of 'Four Thousand' of the Palmer Artificial Legs are now in use, and are represented by all degrees and professions,—Farmers, Mechanics, Lawvers, Sailors, Ladies and Children, all use this "unequalled limb" with wonderful ease and naturalness. The Palmer Leg is adapted to every form of amputation, from the shortest to the longe t. The patient is enabled to walk im mediately upon the application of the leg. The limb is an exact copy of its fellow, and the most critical fail to distinguish it from nature. The limbs are very durable, yet so light as to be worn with great comfort. Palmer & Co. have supplied upwards of lifty individuals with two legs each, all of whom walk with surprising naturalness. The recently invented artificial arm is regarded as a complete triumph in the art. The public are cautioned against the circulars and advertisements of charletans and pretenders, who have recently entered the field, and are endeavering to deceive by copying the invention and the indirect use of the Palmer reputation.
