

THE RUSERRECTION.

The following is the effusion of a man who never enjoyed the advantages of ordinary education. The writer is now hoary-headed, toiling for bis bread in a coopers shop. The helpless crawling caterpillar trace, From the first period of its reptile race. Clothed with dishonor on the leafy spray ; Unseen it wears its silent hours away, Till satiate grown of all that life supplies, Self taught the voluntary martyr dies, Deep under earth its barkling course it bends, And to the tomb the willing guests decends, Where long secluded in the lonely ceil Shut from the world it bids a long farewell,

O'er the wide waste the wintery tempest reigns, And driving snow usurp the frozen plains; In vain the tempests beats and whirlwind blows, No storm can violate his graves repose. But when revolving months has won their way, When woodlands smile and when the zephyrs

When laughs the world in summer's vivid bloom, He burst and flies triumphant from the tomb. And while his new-born beauties he surveys. With conscious joy his altered form displays. Mark, while he moves amid the sunny beams, O'er his soft wings the varying lustre gleams, Launched into the air on purple wings to soar, Gay Natures face with wantom glance explore, Proud of his various beauties wings his war, And spots the fairest flowers, himself more fair than they.

And deems weak man the future promise vain, When worms can die, and glories rise again !

INFLUENCE.

Drop follow drop, and swells With rain the sweeping river ; Word follows word, and tells A truth that lives forever.

Flake follows flake, like spirits, Whose wings the winds dissever ; Thought follows thought and lights The relms of mind forever.

Beam follows beam to cheer The cloud the bolt shiver; Throb follows throb, and fear Gives place to joy forever.

The drop, the flake, the beam, Teach us a lesson ever : The world, the thought the dream,

Impress the soul forever.

Wood—Dear Sir—Your Hair Restorative is r-pidly gaining popularity in this community. I have had occasion to hay prejudice aside, and give your Hair Restora-tive a perfectest:— During the year 1854, I was so unfortunate as to be thrown from my salky against a rock near the roadside, from which my head received a most terrific blow ; causing a great deal of uritation, which communitate to the brain and external surface of the head, from the effects of which my har was finally destroyed over the entire surface of the head. From the time I first discovered its dropping, however, up to the time of its total disappearance, I employed everything t could possibly think o', being a professional man myself, and, as I thought, understanding the nature of the disease, but was finally defeated in every prescription advanced. These and no other circumstances induced me to resort to your worthy Hair Restorative, which I have every reason to belive, produced a very happy result: two months afte the first application. I had as heautiful a head of young hair as I ever saw, for 1 certainly owe you my most sincere thanks. Rest assured, dear sir, I shall recommend your re-medy to all inquirers; moreover, I shall use my influence which I flatter wysels to say, is not a lettle. Yours viry respectfully, M.J. Yours viry respectfully, M. J. WRIGHT, M. D. Office of the Jeffersonian, Philippi, Va., Dec. 12th, 1858 Dear Sir-I feel it my duty as well as my pleasure to state to 5 ou the following circumstance, which you can use as you think proper. A gentleman of this place, (a lawyer) has been bald ever since his early youth; so much so that he was compelled to wear a wig. He was induced to use a bottle of your "Hair Restorative," which he liked very much; and after using some two or three bottles his hair grew out quite luxuriantly, and he now has a hand-som head of hair. The gentleman's name is Bradford, and as he is very well known in our adjoining counties, many persons can testify to the truth of this statement; I give it to you at the request of Mr. Bradford. You could sell a great deal of your Hair Restorative in this and the adjoining counties if you have the proper agents. Yours, & THOMSON SURGHNOR. Dr. Wood,-Dean Sir-Permit me to express the obliga-

I consider your Restorative as a very wonderful invention, guit- efficacians as well as agreeable. B. THALBERG.

The Restorative is put up in bottles of 3 sizes, viz : large medium, and small; the small holds 1-2 a pint, and retails for one dollar per bottle; the medium holds at least twenty per cent. more in proportion than the small, retails for two dollars per bot le; the large holds a quart. 40 per cent. more in proportion, and retails for §3. SCHOFULA, OR KING'S EVIL is a constitutional disease, a corruption o the blood, by which this fluid becomes vi

the blood, by which this fluid becomes vi tiated, weak, and poor. Being in the circu-lation it pervales the whole body, and may burst out in disease on any part of it. No organ is free from its attacks, for is there one which it may not destroy. The scrofu-lous taint is variously caused by mercurial disease, low living, disordered or unnealthy food, impure arr, filth, and fiithy kabits, the depressing vices, and, above all, by the venereal infection. Whatever he its origin, it is hereditary in the constitution, descending "from parents to c'eldiren unto the third and fourth gene-ration;" i. deed, it seems so be the rod of Him who says, "I will visit the inequities of the fathers upon their chi-dren."

Its effects commence by deposition from the blood of cor-rupt or ulcerous matter, which, in the lungs, liver, and in ternai organs, is termed tubercles; in the glands, swellings; ternat organs, is termed tubercles; in the glands, sweinings; and on the surface, eruptions or sores. This foul corruption, which genders in the blood, depresses the energies of lite. so that scrofulous constitutions not only suffer from scroful-ous complaints, but they have far less power to withstand the attacks of other diseases; consequently, vast numbers perish hy disorders which, although not scrofulous in their pature, are still rendered fatal by this taint in the system. Mostof the consumption which decimates the human family has its origin directly in this scroulous contamination; and many destructive diseases of the fiver, kidneys. brain, and indeed of all the organs, arise from or are aggravated by the same cause. same cause. One quarter of all our people are scrofulous; their per-sons are invaded by this jurking infection, and their health is underminded by it. To cleanse it from the system we must renovate the blood by an alternative medicine, and in-vigorate it by healthy food and exercise. Such a medicine we supply up we supply in

Things to Talk About. BY ALIQUIS. NO. II. ASKED TO DRINK.

The stage drew up at the appointed hour, and I was the first to enter it. An engagement in the country the next day rendered it necessary that I should avail myself the public conveyance. Other passengers followed, and among them a woman in the prime of life, inclined to corpulency, accompanied by two little boys. She carried a well-filled decanter, and two or three parcels, and mounted the steps with difficulty. Seating herself beside me, she was inclined to be chatty, but I did not cultivate her acquaintance. Her conversation took a general turn, and we were informed that she was going out of the city for her health, at the recommendation of her physician. Her manners being rather free, some rough, uncomplimentary jokes were uttered. "What is that you are holding ?" "My baby," was the reply. "You kiss it pretty often, I suspect," was the rejoinder. She admitted it, and seemed gratified.

that came."

After a time, we drew up at a tavern, and one of the lads being sent for a cup, brought it to his mother. Having poured into it a liberal quantity of wine, she offered it to me first, and then to the other passengers. Only one accepted it wondered that I had not marked the trembling forming the duties of my calling." -a course man, poorly clad, whose wife sat beside him, and declined the preferred draught. Her husband compelled her to partake, saying in | --must-die. a very harsh tone, " Take it : it will do you no harm." The refusal of so many irritated the woman, and she expressed herself very freely. " I knew that we would have some pious people aboard, and therefore brought wine. For my own of moral courage to quote Scripture to my uncle; sa'e and Retail. part, I like brandy best. Thank God, I can drink it myself, if nobody else will." In this style she raved. After partaking freely, she of- ed ; and the long silence was broken by the text : fered some wine to her children. I shall not soon forget the look of horror which came over the countenance of the younger lad, as he repelled the cup, nor my feelings when I saw her force him to drink what she gave him.

1. STRONG DRINK IS DEMORALISING.

AYER'S CUMPOUND EXTRACT OF SAR-SAPARILLA,

SAPARILLA, the most effectual remedy which the medical skill of our times can devise for this everywhere prevailing and fata malady. It is combined from the most active remedials that have been discovered for the expansion of this foul disorder from the blood, and the rescue of the system from its destructive consequences. Hence it should be employ-ed for the cure on not only scrofula, but also those other af-fections which arise from it, such as Eruptive and Skin Dis-eases, St. Anthony's Fire, Rose, or Erysipelas, Pimples, Pustules, Blotches, Blanes and Boils, Tumors, Tetter and Salt Rheum, Scald Head, Kingworn, Rheumatism, Syphi-tic a d Mercurial Diseases, Diopsy, Dyspepsia, Debility, and indeed, all Complaints arising from vitiated or Impure Blood. The popular belief in " impurity of the blood?" is founded in tranh, forscrofula is a degeneration of the blood. So wide is the field of its usefulness and so unmerous are the cases of its cures, that atmost every section of country abounds in persous publicly known, who have been res-tored from alarming and even desperate diseases of the lungs by its use. Mhen once tried, its superiority over every other medicine of its kind is too aparant to escape ob-servation, and where its virtues are known, the public no longer besitate what antidoteto employ for the distressing and dangerous affections of the pulmonary organs that are incident to our climate. While many inferior remedics thrust upon the community have failed and been discar-ded, this has gained friends by every trial, conferred bene-fits on the afflicted they can never forget, and produced cures too numerous and too remarkable to be forgotten. *Prepared by Dr. J. Must this state of things continue? It will never cease while vice is permitted to do what it pleases. There are some things within the power of legislation. A far tainted meat is fined, and his meat is destroyed. The dealer in obscure books loses them, and is made to suffer for selling them. A madman is apprehended and coufined. An unnatural parent may be declared incompotent to take care of his children and lose them. It ought to be within the power of an officer of justice to destroy
