(usual papers copy) PATENT DOUBLE: ACTION FLEXURE SKIRTS. BY the use of Joints in the hoops of a Skirt, a heavier and better quality of Steel can be used, giving to, and retaining in the Skirt, a more graceful and elegant form; while the flexibility of the joints prevent the bending and breaking of the Hoops under pressure, and brings them back to their origi-

nal form when the pressure is removed, also permits the Skirt to assume an easy position when the wearer is seated. The quality of Braid and the peculiar construction of the Skirt, adding so greatly to its durability, particularly commend it to the favor of those who desire to unite in their purchase Elegance, Conveni-
