tirman of the London Board .- Samuel Baker, Esq. Chairman in Liverpool .- CHARLES TURNER, Esq. The Royal Insurance Company is one of the largest

Offices in the kingdom. At the Annual Meeting held in August 1859, the following alone of the last three years exceeds the entire business of some of the existing and of many of the recently defunct

fire insurance companies of this kingdom.

The Premiums for the year 1855 being.....£130,060

While the Premiums tor the year 1558 are.... 196,148 Showing an actual increase of ...... 66,088 or upwards of 50 per cent. in three years. The recent returns of duty made by Government for this latter year (1858) again show the "Royal" as more than maintaining the ratio of its increase as stated in former years. Only one among the London insurance offices exhibits an advance to the extent of one-half the increase of the Company, while all the others respectively fall far short of the

molety of its advance.

LIFE DEPARTMENT. The amount of new Life Premiums received this year is by far the largest received in any similar period since the commencement of the business, and must far exceed the average of amount received by the most successful offices in the kingdom. The number of policies issued in the year was 832, the sum assured £387,752 6s. 8d., and the premium £12,354 3s. 4d. These figures show a very rapid extension of business during the last ten years. in the constitutions of multitudes of men. It either produces or is produced by an enfeebled, vitiated state of the blood, wherein that fluid becomes incompetent to sustain the vital forces in their vigorous action, and leaves the system to fall into disorder and decay. The scrofulous contamination is variously caused by mercurial disease, low living, disordered digestion from unhealthy ood, impure air, filth and filthy nabits, the depressing vices, and above all, by the veneral infection Whatever be its origin, it is hereditary in the constitution, descending "from parents to children unto he third and fourth generation;" deed, it seems to be the rod of

Him who says, "I will visit the iniquities of the fathers upon their children." The diseases it originates take various names, according to the organs it attacks. In the lungs, Scrofula produces tubercles, and finally Consumption; in the glands. swellings which suppurate and become ulcerous sores; in the stomach and bowels, derangements which produce indigestion, dyspepsia, and liver complaints; on the skin, eruptive and cutaneous affections. These, all having the Treenail Machines, of the latest improved kinds; also the various kinds of Saws required for those Machines.

dangerous distempers leave you. With feeble, foul, or corrupted blood, you cannot have health; with that "life of the flesh" healthy, you cannot have scrofulous disease.

AYER'S SARSAPARILLA ounded from the most effectual antidotes that medical science has discovered for this afflicting distemper, and for the cure of the disorders it entails. That it is far supe rior to any other remedy yet devised, is known by all who has given it a trial. That it does combine virtues truly extraordinary in their effect upon this class of complaints is indisputably proven by the great multitude of publicly rkably cures it has made of the following diseases: King's Evil or Glandular Swellings, Tumor's, Eruptions, Pimples, Blotches and Sores, Erysipelas, Rose of St. Anthony's Fire, Salt Rheum, Scald Head, Coughs from tuberculous deposits in the lungs, White Swellings Debility, Dropsy, Neuralgia, Dyspepsia or Indigestion, Syphilis and syphilitic Infections. Mercurial Diseases, Female Weaknesses, and, indeed, the whole series of complaints that arise from impurity of the blood. Minute reports of individual cases may be found in AYER'S AMERICAN ALMANAC, which is turnished to the druggists for gratuitous distribution, wherein may be learned the directions for its use, and some of the remarkable cures which it has made when all other remedies had failed to afford relief. Those causes are purposely taken from all sections of the country, in order that every reader may have access to some one who can speak to him of its benefits from personal experience. Scrofula depresses the vital energies, and thus leaves its victims far more subject to disease and its fatal results than are healthy constitutions. Hence it tends to shorten, and does greatly shorten, the average duration of human life. The vast importance of these considerations has led us to spend years in perfecting a remedy which is adequate to its cure. This we now offer to the public under the name of Aver's Sarsaparitta, although it is RICH BALL AND WEDDING VESTS composed of ingredients, some of which exceed the best of Sarsaparilla in alterative power. By its aid you may protect yourself from the suffering and danger of these disorders. Purge out the foul corruptions that rot and fester in the blood, purge out the causes of disease, and vigorous health will follow. By its peculiar virtues this remedy stimulates the vital functions, and thus expels the

distempers which lurk within the system or burst out on we know the public have been deceived by many compounds of Sarsaparilla, that promised much and did nothing; but they will neither be deceived nor disappointed in this. Its virtues have been proven by abundant trial, and there remains no question of its surpassing excellence for the cure of the afflicting diseases it is intended to reach. Although under the same same, it is a very different medi-cine from any other which has been before the people, and is far more effectual than any other which has ever been

AYER'S CHERRY PECTORAL, The World's Great Remedy for Coughs, Colds, Incipient Consumption, and for the relief of Consumptive Patients in advanzed stages of the Disease.

This has been so long used and so universally known, that we need do no more than assure the public that its quality is kept up to the best it ever has been, and that it may be relied on to do all it has ever done.
