Gagetown, April 9th, 1863. TO the Electors of the City of Saint John .-■ Gentlemen-After having personally received from many of you pledges of support at the coming election in May, for the Mayoralty, I deem it but just to you and to myself to be placed in a correct position as to the course I Handkerchiefs; Hosiery, Gloves, Braces, &c., which will have pursued after having learned that J. G. Campbell, Esq., would be a candidate for that office. There is not a Catholic in St. John but knows and is well aware that I am a Protestant, and as such many of them Corsica," via Halifax.—R. HUNTER has received a pledged me their votes and support. Sorry am I that any manifestation or religious feeling should be excited in the

coming contest, "but it is so." I have waited on the Candidates in order to allay that feeling as much as possible, by reducing the contending parties to a suitable number, so as to have it more equal, and all suggestions made by me were rejected by those who imagine themselves to be the largest sharers in the expectations of the people. I have done everything I could do in justice to myself and friends to allow the contest to be fairly tried-Gentlemen, I find the real question is whether we are to have a Protestant or a Catholic for the Mayor of the City of St. John for the ensuing year? I leave yourselves, Gentlemen, to answer the question at the pells; claiming your support and influence as a Protestant, free to own it and

fearless of consequences. Yours respectfully, JAMES OLIVE. IMPORTANT TO FARMERS!

SAYER'S PATENT NEW BRUNSWICK PLOUGH. THE Subscriber is manufacturing different sizes of SAYER'S PATENT NEW BRUNSWICK PLOUGHS. which are considered by those who have used them, to be superior to any others now in use in this Province. The eculiar advantage of those Ploughs consists in the gentle convexity of surface which it presents to the soil, making it easy of draught, turning the sod well, and preventing any clogging of the earth to the mould board. The Share is made of a peculiar description of iron and chilled, making it fully equal to steel. The Landside is in two pieces which give it an advantage over the ordinary kind, as the upper part will wear out a number of the lower or sole pieces by which a very great saving is made. I also cast he mould boards for the above mentioned ploughs as well as for other kinds, on patent chilis which makes the wearing surface hard and equal to any steel plough. The advantage of which requires only to be known in order to bring them into general use. For sale low at No. 17 Water Street, New Bridge, and at the New Brunswick Foundry,
