UNITED STATES.

But little doubt exists at present of the hopelessness of the Confederate cause, unless some foreign interference is obtained. Reports of an alliance between France and the South are probably without foundation, and it is not likely that any European power would, at this stage of the conflict, and while the Federal armies are meeting with such success, presume to interfere to prolong the war, or hinder the subjugation of the revolted States. THE HARP OF JUDAH :- A Collection of Sucred and Secular Music for Choirs, Schools, Musical Conventions, Societies, and the Home Circle; Religious Worship, Choir and School Practice. By L. O. EMERSON, Author of the "Golden Wreath," "Sabbath marmony," &c. The great favor with which Mr. Emerson's works have PATENT and PROPRIETORY MEDICINES. been received has induced the publication of this book. In it the principles of Notation are plainly elucidated and Exercises given of a very pleasing and attractive style. Its Music, embracing every variety, being as a whole, neither very simple nor very elaborate, but conforming to the wants and capacities of a great majority of singers. The Anthems, Sentences, Chorus and Chants are superior to those of most collections, while the Metrical Tunes are to a whole hymn, thus giving a greater variety than can possibly be obtained in any other way. At the same time, each tune can be used for any other hymn of the same me-

hability of its being all that it is represented to be a real, ive music book, replete with all those features that tend to render such a book pleasing and popular.

IMPORTANT TO FARMERS! SAYER'S PATENT NEW BRUNSWICK

Mr. HENRY GRAHAM, No. 90 Union Street, General Agent

PLOUGH. SAYER'S PATENT NEW BRUNSWICK PLOUGHS, which are considered by those who have used them, to be superior to any others now in use in this Province. The peculiar advantage of those Ploughs consists in the gentle convexity of surface which it presents to the soil, making it easy of draught, turning the sod well, and preventing any clogging of the earth to the mould board. The Share is made of a peculiar description of iron and chilled, making it fully equal to steel. The Landside is in two pieces SURGEONS' INSTRUMENTS—in variety; which give it an advantage over the ordinary kind, as the upper part will wear out a number of the lower or sole pieces by which a very great saving is made. I also cast the mould boards for the above mentioned ploughs as well as for other kinds, on patent chilis which makes the wearing surface hard and equal to any steel plough. The advantage of which requires only to be known in order to bring them into general use. For sale low at No. 17 Water Street, New Bridge, and at the New Brunswick Foundry, Caution.—Any person infringing the above Patent will be dealt with as the law directs.
