IMPORTANT TO FARMERS!

SAYER'S PATENT NEW BRUNSWICK PLOUGH.

THE Subscriber is manufacturing different sizes of superior to any others now in use in this Province. The peculiar advantage of those Ploughs consists in the gentle convexity of surface which it presents to the soil, making it easy of draught, turning the sod well, and preventing any clogging of the earth to the mould board. The Share is made of a peculiar description of iron and chilled, mak-ing it fully equal to steef. The Landside is in two pieces which give it an advantage over the ordinary kind, as the upper part will wear out a number of the lower or sole pieces by which a very great saving is made. I also east the mould boards for the above mentioned ploughs as well as for other kinds, on patent chills which makes the wearing surface hard and equal to any steel plough. The advantage of which requires only to be known in order to bring them into general use. For sale low at No. 17 Water Street, New Bridge, and at the New Brunswick Foundry, Portland.
