BARBARITY .- The "dark places" of the earth still send their tidings of sin and misery. It is stated that King Theodore of Abyssinia has murdered three thousand of his subjects within a very short period and without any just cause. The last mail brings an account of a characteristic tragedy on the West coast of Africa-in old Calabar; date 12th September. It appears that a chief named Edimi Adam, died rather the idea that he had been the victim of foul play, the jects in the procession was a large banner, on which late chief's wives, to the number of six, and the entire household, who had been suspected, were compelled to swallow a large dose of the "esere," or Calabar bean, (the poisonous properties of which are well known) to test their innocence of being parties unfortunate victims had succumbed to the effects of to the supposed inurder of their chief. Eight of the the deadly poison when the Athenian left, and the thing of the remainder were not expected to survive. A war was waging between the New Calabar and the Ecricke men, and it was reported that a battle had been fought between the two tribes on the 14th of September, and that forty of the New Calabar men were captured, and afterwards kliled, roasted, and eaten by their enemies !

## BRITISH AND FOREIGN.

London, Nov. 22 .- Despatches containing the gratifying intelligence of the safety of Dr. Livingstone, the celebrated traveller and explorer have been received in this city to-day.

The official Blue Book published by the French Government has appeared, and from its pages the following paragraphs are extracted :-"The Government will soon fix the time for the

return of the French troops from Italy." "The Sultan of Turkey, though he has declined to adopt the course adviced by France, is endeavoring

tranquility and peace to the Island of Candia." "The relations of France with the United States have regained their usual warmth."

"France following her old traditions beholds with true sympathy the efforts made in America to efface the traces of civil wars. Regret is expressed that the efforts of France and England to pacify the quarrel between Spain and the Republic of Chilli and Peru were made in vain. It is boped that peace will soon be restored between Paraguay and the South

American powers allied against her." In the House of Commons last night an effort was made to save the lives of the Manchester rioters.

It has been said by a few unfortunate mortals who have striven in vain to gain position of honor and distinction, that they were not sufficiently appreciated. While such ometimes be the case, it is generally to be observed that true deserving worth is cordially accepted and honored,

whether applied to religion, politics, the arts, or invention. Next to religion, invention or discovery has the highest ion, for it wields a mighty influence; through its channels nations have overleaped, as by magic, the bounds of separation, and, united by electric wires, can converse her at momentary will. Indeed, the diversified efforts of man's genius in these respects are a source of admiration and gratitude to the whole human race. In medicine, science has revealed dur ing the last quarter of a century, many hidden truths, which had before been considered to be impossibilities.— The malignity of pestilential disease is now in a great measure bereft of its terror, and even the "insatiate ar-cher," consumption, is ar ested in his deadly march, and
