was recovered, and at the inquest held before Coroner Macpherson, a verdict of accidental death was returned.

The Fredericton Branch Railway, to unite with Western Extension, progresses favorably. A friend informed us this week, that Mr. Hartley is proceeding with his survey on the central route as rapidly as possible. He is to reach the head waters of the Macknaquack in a few days. So far, he has met with no insurmountable difficulties. The Tobique grades, supposed to present very serious obstacles, he finds to be not more than fifty-six feet.—The *Sentinel* reports a "free fight" in Johnsville, over a farm in dispute. A legal process is the result.

The *Sentinel* also reports the death of a promising young man—George Watson, by drowning on Smith's Flats, just below Woodstock, a week ago last Sabbath. The young man was much respected, and his untimely death has given his widowed mother the deepest grief.—The *Acadian* reports that the survey of the "Intercolonial" by Mr. Buck and his party, from the Tobique up river, is progressing satisfactorily.—The four steamers, says the Woodstock *Acadian*, continue their trips—carrying down large freights, but not, as yet, bringing up very much. Agricultural products are being shipped off, but not in such quantities as is usual in the Spring. There is apparent, and we believe very real, lack of our wonted abundance.

FIRE.—On the 5th April last, at Jerusalem Settlement, the dwelling house of Martha Hutchison, with nearly all it contained, was destroyed by fire. No insurance.

Prussia bearing Liberal Testimony.

The Medical College, Breslau, Prussia, by command of the Government, instituted inquiries in regard to the purity of Dr. Radway's PILLS. The following is a copy of the report, after a thorough analysis, signed by the Professors of the College:—

REPORT OF AN ANALYSIS OF RADWAY'S REGULATING PILLS,

instituted for the satisfaction of the Prussian Government and people. It appears that the great popularity of the Pills, throughout Germany, as an aperient, anti-bilious and alterative medicine, had provoked the malice of the apothecaries, who caused a report to be circulated that the ingredients were poisonous. Therefore a scientific inquisition into their nature and properties was ordered, the issues of which was a most triumphant vindication of the sanitary value of the Pills.

The Faculty of the College state in their report that *after a careful and minute examination*, they have the honor to state that "the Pills are not only free from every substance injurious to health, but are composed wholly of substances and elements promotive of digestion, and certain at the same time to act favorably upon the nervous system," &c. &c. They state, further, that the injurious rumors set afloat by the Prussian apothecaries originated "in a mean spirit of trade jealousy, excited by the great celebrity attained by the Pills within a very brief period."

Signed in behalf of the College,

DR. PHIL. THEOBALD WERNER,
Director of the Polytechnic Bureau

DR. HEISE,
First Assistant.

A CYNICAL EXPRESSION.—Speaking of a widower who was about to marry, Dr. Johnson said it was "a triumph of hope over experience." The triumphs of Grace's Salve, however, would have led Dr. Johnson, where he now living, to have extolled its virtues in a long dissertation. This Salve is an old remedy; and a few applications of it cure, to entire satisfaction.

BRITISH AND FOREIGN.

On the 23rd instant, the debate on the Irish Church was again resumed, the Suspensory bill being under consideration.

Mr. Gladstone made a speech explaining the character and intent of the measure. He said the Liberals would not consent to subsidize any of the religions in Ireland. He expressed his amazement that the Tories should now threaten resistance to this Bill, after yielding their assent to resolves of which it was the logical result. The House of Lords might possibly reject it, but still it was the duty of the House of Commons to proceed with the movement of reform which it had commenced.

Mr. Gladstone closed by moving that the Bill pass to a second reading.

Mr. Gathorne Hardy moved that the second reading be postponed six months, and supported his motion in a speech of much warmth. He declared that the Bill was a surprise, and meant confiscation but misstated the Queen's reply to the address of the House concerning the disposal of Ecclesiastical patronage, and robbed the Crown of some of its greatest prerogatives, including the veto power. He ascribed the origin of the movement to the enemies of the Church and State, and made an earnest appeal to all the Protestants to oppose it.

The debate was continued at great length. Mr. Disraeli, at a late hour, rose. He defended the action of the Tory party in resisting the Bill. The policy which had created this measure was disastrous to the country, and its direct effect was to the abolition of both the church and State. Mr. Gladstone replied. He said the step taken by the Liberal party was not hostile, either to Protestantism or the church of England. The debate terminated with Mr. Gladstone's speech, and a division took place on the motion that the Bill have its second reading, with the following result: For the second rerding, 312; against, 258. Majority 54.

The announcement was received with loud and prolonged cheers from the Liberal benches.

A motion was then made that the House go into committee for the consideration of the Bill on the 5th of January next. The motion was carried without a division.

Her Majesty the Queen is on a visit to Scotland. The case of Home the spiritualist medium, which came before the Court of Chancery for a long time has at length been decided. GRACE'S SALVE.

The unanimous testimony in favor of this article wherever it has been used, and more particularly in various parts of Essex County, where the manufacturer formerly resided, proves the high value which is placed upon it in all cases where a remedy of such a character is upporpriate. The inventor of this Salve was no mere adventurer, who set the article a going only to make money, without caring whether it injured or cured those who used it, but a skilful physician and surgeon, who for many long years used it in an extensive practice, and, dying, left the recipe as a valuable inheritance to the generation which was to come after him.

For cuts, bruises, sores, and every species of inflammation upon the surface of the body, its use has been followed by the most satisfactory results, and it only requires a trial to prove it to be all that its manufacturer claims for it.—*Haverhill Publisher.*
