THE COAL MINES OF NOVA SCOTIA.—A recent good authority, reporting of the vast carboniferous area of Nova Scotia, says that a computation has been made, based upon the actual yield of the Sydney and other Breton mines, which shows that for several Breton mines to come into production would not furnish 2,000,000 tons annually for domestic consumption, but provision the steam navy of the world. The island of Cape Breton is a mass of coal; while the territory on the mainland, comprising the counties of Hants, the Colchester, Cumberland, Guysborough, Sydney and Colchester, is almost wholly coal-bearing. The coal field of Sydney is computed to cover an area of 250 square miles, and it is held that each square mile of this area will yield 25,000,000 tons of coal, or, in other words, that the coal field of Sydney alone will yield 6,250,000,000 tons of coal. In 1865 thirty collieries were already at work, and the total quantities of all kinds of coal raised was 651,260 tons, of an average value of two dollars per ton at the mouth of the pits.

BRITISH AND FOREIGN.

London, April 30.—The speech of the Mayor of Cork at the recent Banquet in that City was the subject of a long debate in both Houses of Parliament this evening, the attention of members being called especially to the Mayor's language respecting O'Connell who attempted to assassinate Prince Alfred in Sydney, and to his reference to the Prince himself. The Tories upbraided the Government with being the indirect cause of the state of Ireland.

London, May 1.—The rejection of the Alabama treaty and Senator Sumner's speech caused considerable feeling in England.

The Press generally took Sumner's view as extraordinary and inadmissible.

At a Cabinet meeting the subject had been informally discussed.

Mr. Bright declared that this embarrassment served England right, he argued that he would not consent to entertain the terms foreshadowed in Mr. Sumner's speech.

Lord Clarendon expressed his belief that the actual negotiations on the part of the American Government would be less extreme in character than the speeches of Senators and articles in the Press.

Mr. Gladstone professed to have good assurances from reliable quarters that the rejection of the Alabama treaty was purely a political stroke. He said the present administration will endeavor to settle the question on liberal and honorable terms.

A mass meeting of citizens was held in Cork on Saturday night, at which the speech of the Mayor was warmly endorsed, and resolutions were adopted expressing sympathy with, and confidence in, that functionary.

London, May 3.—The House of Commons in commencing consideration of Irish Church Bill Clause 38, concerning the Regium Donum, was so amended as to include within the provisions for compensation to ministers of all congregations entitled eventually to a share of the grant.

Clause 37, providing for compensation to the Professors and for payments in respect to the building of Belfast College, was stricken out in compliance with the request of the Presbyterian Synod and with the consent of the Government.

Mr. Gladstone intimated that other provisions will be made for the College.

London, May 4.—In the House of Commons tonight while the Irish Church bill was under discussion, Mr. Gladstone proposed that the names of Lord Monck, late Governor-General of Canada, Justice James Anthony Lawson and George Alexander Hays, be added to clause 8, as Commissioners of Church Temporalities in Ireland, constituted under the act.

Mr. Edward Sullivan, member for Malton, will introduce a bill to prevent the Mayor of Cork from continuing to pay for the office connected with the administration of justice in Ireland.
