

# THE RELIGIOUS INTELLIGENCER.

**SUDDEN DEATH OF MR. BROOKFIELD.**—The community was startled on Wednesday morning by the announcement that Mr. Brookfield had been found dead in his bed. Mr. Brookfield was 61 years of age, and a native of Yorkshire, England. For some years he resided in New Brunswick, where he was well known as a railway contractor. Having contracted with the Imperial Government to build some fortifications at Halifax, he removed his family here, and has since been engaged in dangerous works for the Imperial Government, as well as in general building. In every relation of life John Brookfield was a good man. His energy and industry won for him the reputation of a thorough business man. His gentlemanly demeanor made him respected by all who had intercourse with him. His works of unassuming christian charity will be testified to by all who have been engaged during his residence here, in any work having its object the good of the community.—*H. C. Chronicle.*

**DELAY OF JUSTICE.**—Some idea of the injury inflicted on citizens of Nova Scotia thro' the infidelity of Judges, may be gathered from a paragraph in the *Bathurst Express* of Wednesday, which says:—"The Fall sittings of the Supreme Court began yesterday, Mr. Justice Ritchie presided. Mr. Blanchard, Q. C., informally congratulated Judge Ritchie on his elevation to the Bench, and Judge Ritchie replied as usual. The docket was then called. There were two hundred and thirty-three cases for trial; and it may be interesting to suitors to learn that about one quarter of these will be tried."

**SMALL POX AMONG THE DOMINION INDIANS.**—Fearful accounts are coming in of ravages of the small-pox among the Indians on the western plains. From the Rocky Mountains to Swan River and Peace Lake the state of affairs is terrible to contemplate. It is calculated that among the Crees and Blackfeet two-thirds of the Indians have been swept away, and the epidemic is spreading rapidly. At Fort Pitt two hundred corpses were piled up against the stockade and were allowed to rot there, with a view to carry the infection to the whites—for the Indians believe that in proportion as the disease is fatal to the whites, it is the less so to them. All over the prairies wigwams are filled with putridizing corpses, and the Indians are getting desperate. Threats of the most violent kind are made against the whites, and the day may come when the Indians will be surrendered without even making a last effort. The proclamation appeals to the people of France, to maintain their honor, independence and integrity.

Another proclamation is issued, signed by all the members of the Provisional Government, in which they say:—"Marshal Bazaine has betrayed us; he has made himself an agent of the Man of Sedan and the accomplice of the invader, and regardless of the honor of the army of which he had charge, he has surrendered without even making a last effort. The proclamation appeals to the people of France, to maintain their honor, independence and integrity."

There is no preparation that stands so high among farmers, grocers, and livery stable keepers, as Dr. Dow's Sturgens Oil Liniment. It is used with the greatest success as an external application for all the injuries befalling a horse. From having witnessed its healing powers we cease to wonder at the popularity it enjoys.

Professor Clark writes to his agent: "I have undertaken to supply my fellow citizens here in Dominion with a better, stronger, and more reliable condition powder than has ever been made before, and your public have only to use them and prove it." We could add our own experience, but it is unnecessary, as they are everywhere taking the lead.

About fifty young ladies have applied for admission to the medical department of the Michigan University at the opening of the next term. Several others desire admission to the law department.

The value of the coffee which is annually consumed is one hundred and twenty-five millions of dollars.

An Indian, while digging a well recently, came across five hundred old silver dollars ten feet below the surface.

The authorities lately seized twenty-five barrels of powder at a Nenian store in Ireland. They were taken to Woolwich, opened, and found to contain incendiary matches and nails in considerable quantities, mixed through the powder. The barrels, with their contents, were carefully placed on an old sledge and sunk in the river.

On Friday, 30th ult., the Post Office Department of Great Britain issued half penny postage cards with the stamp impressed on one side, leaving the other for any written message or printed matter. They were so extensively used by advertisers, that on the first day more than a quarter of a million was sent through the London Post Office, and in two days the supply which had been prepared was exhausted.—*Newsp.*

When John Saxon, editor of the Canton *Review*, the oldest paper in Ohio, heard of the battle of Sedan and the capture of the Emperor, he wrote and published the account of the event in a column parallel with a reprint of the account he wrote and published in the same paper of the surrender of Napoleon at Waterloo in 1815. He is the only editor, probably, in the world, who has written of the exit of both Napoleons in the same paper.

In Oswego county New York, a farmer is now digging a second crop of potatoes from a field that has hitherto this year, yielded a crop.

The London *Daily News* has undertaken the collection and distribution of a fund for the distressed humanity in those districts of France which have been overrun by the German Armies. It is said there are 200,000 persons on the brink of starvation in the Department of the Ardennes alone. At present about £4,000 have been raised. The National Society, in giving aid to the sick and wounded has received £230,000, and there are 10 other societies in existence having similar objects.

**BRITISH AND FOREIGN.**

**BERLIN.** Oct. 27.—Queen Augusta, who is at present at the royal chateau at Homburg, has received the following telegram from King William announcing the capitulation of the fortress and garrison of Metz, and which has been re-telegraphed to this city to be officially bulletinized.

VERSAILLES, Oct. 27.—*To Queen Augusta, Homburg.* Marshal Bazaine has been expelled from France. His army consists of one hundred and fifty thousand soldiers, including twenty thousand sick, and are prisoners in our hands.

The army under Marshal Bazaine and the regular garrison lay down their arms this afternoon. This is one of the most important events that has occurred to our arms during the present month. Let us return thanks to a merciful Providence who has so graciously accorded us such victories.

Yours most respectfully, DAVID GALER.

## COUNTRY MARKET.

Reported for the *Intelligencer* by Mr. J. W. Farris, Produce Dealer, No. 6 Market Street.

Thursday, Oct. 20, 1870.

Butter, rolls, per lb.	25 to 57c.
