

G. Archibald, and Hon. Mr. Abbott, will leave for England.

The whole number of passengers carried over the Consolidated Eastern and North American route, during the year ending Dec. 31st, was 508,820.

REMARKABLE CASE.—A few weeks ago, as Mr. Joseph A. Newcomb, of Peru, Conn., was out fishing, his gun burst, and the breach pin was driven into his head, just above one of his eyes. He was unable to extract the pin, and walked half a mile to his home. Medical aid was soon called in, when the iron was withdrawn, not, however, without the loss of a portion of the brain, which is now in the possession of Dr. Miller, Canning. Under the judicious treatment of Dr. Miller and Hamilton, the man is recovering, and in all probability will soon be restored to perfect health. Strange to say, during all this affliction, he has had the proper use of his reasoning powers.—*Windsor Mail.*

So general has the public confidence become in Dr. Ayer's medicines, and so great the demand for them, that unprincipled villains are attempting to deceive the unwary by attempting to impose upon their worthless nostrums under a similarity of name. Cherry Pectoral Lozenges, Dr. Ayer's Troches, Ayer's Pastilles for Coughs, Cherry Pectoral Cough Drops, Ayer's Fever and Ague Cure, Dr. Ayer's Indian Pills, &c. (none of which are of Dr. Ayer's manufacture or composition) are specimens of this villainy and deceit. They not only defraud the sick of their money, but of their health, or the recovery of their health, which is far more important than money. From actual counterfeits the people are protected by law, which the Doctor promptly enforces, but these evasions sometimes elude the law, and purchasers must protect themselves by refusing to be deceived by them.—(Dover (N. H.) Bee.)
