STEAM has long been known as the most powerful agent in removing dirt, grease and stains from clothing, and bleaching them white. Paper makers have for many years used steam in cleaning and bleaching their rags, and they succeed in making, by its agency, the filthiest pickings from the gutter perfectly pure and white. Until the invention of the STEAM WASHER, or WOMAN'S FRIEND, although often attempted, no method had been discovered of applying steam directly to the clothing, which could be used in a portable manner for domestic purposes. The WOMAN'S FRIEND washes without labor. It will do the washing of an ordinary family in thirty minutes to an hour. The STEAM WASHER is superior to all other devices, for the following reasons:

1st. It does its own work, thereby saving a large portion of the time usually taken in a family.

2d. It uses much less Soap than is required by any other method.

3d. It requires no attention whatever, while the process of cleaning is going on. A lady can do her washing while

3d. It requires no attention whatever, while the process of cleaning is going on. A lady can do her washing while she is eating her breakfast and doing up the breakfast dishes.

4th. Clothing wears double the time, washed in this Washer, that it will washed by a machine, or by hand-labor,

5th. Lace curtains, and all fine fabrics, are washed in a superior manner. For Flannels, this Washer is most desirable, as it will not full them as a machine or hand rubbing does. All fabrics, from the finest lace to a bed blanket, can be washed perfectly, and with ease, without the rubbing-board.

IT IS TRULY A LABOR AND CLOTHES-SAVING INVENTION. READ THE FOLLOWING CIRCULAR AND TESTIMONIALS:

I respectfully ask you to read this circular carefully, and candidly consider what I now propose to you as a matter of business. Before making known to you my confidential terms, permit me to state that the matter of washing clothes is one of no small consideration; it is something which concerns every family and every individual. It is but recent since Hand Washing was in common use. Latterly, however, the inventive genius of the country has been directed to the invention and construction of various devices or machinery by which much of the labor, drudgery, loss of time, and wear of material, might be obviated. Ponderous as well as intricate Washing Machines have been constructed many of which are decided improvements over the old method of washing—and these machines have been very saleable with all. People will continue to have Washing Machines; but let me ask you, if the STEAM WASHER awithout labor, loss of time, without wearing of clothing, etc., is it not reasonable to suppose that it will supersede, in a great measure, all Washing Machines now in common use? The sale of this Washer is unparalleled, and must be so. There is nothing like it in use. It is new, and every family needs it and will buy it. I wish to secure a few good men to sell rights for me, and in order to secure as many as I need immediately, I offer extra inducements. My price for territory is \$9 per 1.000 inhabitants; but if you will buy a single county, and agree to sell rights for me, I will allow you to deduct 66 2-3 per cent. as your commission; consequently, your county would cost you but \$75, instead of \$225, should it contain but 25,000 inhabitants, more or less in the same proportion. And to those buying rights I will sell Washers at \$60 per dezen; and bear in mind, I will sell to no one except a single dozen until he first buys the right to a county. Any timner can make the washers as well as they can be made here, and save the cost of transportation. Remember that by purchasing the r READ THE FOLLOWING CIRCULAR AND TESTIMONIALS:

DIRECTIONS. 1. Soak the clothes over night in warm suds—in the usual manner,
2. Put in the bottom of the WASHER a quarter bar of good soap enough to make good suds, sliced up thin; then 2. Put in the bottom of the WASHER a quarter bar of good soap enough to make good suds, sliced up thin; then fasten down the false bottom—see that the centre valve is in the proper position; put in water enough to cover the cap over the valve, say about an inch; lay the clothes down smoothly with the soiled parts well soaped, in the WASHER—not relled up, but spread out, so the water can circulate freely—and carefully pack the clothes down; see that the fire is hot sufficient to generate steam; when the water boils, it will begin to flow up the tubes on the outside, at the ends of the WASHER, and through the holes into the washer again; after a steady circulation has been going on in this manner for about thirty to forty minutes, the washing will be completed. Rinse well and wring out, same as in the usual way. Colored clothes must not be mixed with white. Use soft water for boiling always. If hard, use

If it is desired to bleach with the WASHER, this may be done by adding a table-spoonful of borax of commerce to a WASHER full of clothing. Patented in Canada, Jan. 30, 1872. The solvertiser, Mr. Tilton, is a thoroughly reliable gentleman, and will perform all he promises,—Methodist Recorder, Pittsburg, Pa., April 27. COMFORT, KENDALL Co., Texas, Feb. 10, 1873. J. C. TILTON, Esq. - Dear Sir : - The sample Washer which I ordered arrived in due time. All who have seen it in operation are well pleased with it. It will do all that you claim for it. You will please send C. O. D. Deeds for the additional 12 Counties ordered, and oblige,

Very respectfully,

JOS. B. HADDEN.

Dear Sir: Having used your Steam Washer for over four nonths, we are prepared to recommend it to the public as ing very dirty clothing in it, and know it will do all that you claim for it. We have never had to rub a single article you claim for it. We have never had to rub a single article on the wash-board that has been washed in the Steam Washer since we have had it, hence there is a great expense saved in the wearing of clothing. We could not do without it.

J. C. TILTON—Dear Sir: The Steam Washer came to hand last week, Monday evening. Tuesday morning it was at work while we were taking our breakfast, and did its work well. We have given it another trial this week, with good success. Mrs. Stone is quite enthusiastic in its praise. She thinks it gives to women emancipation far surpassing all that woman's suffrage could do for her. \*\*
