

lines, and the consequent good results that must follow so general an opening up of the country. Those who are assisted in passing measures would, in the future, look back with pride and satisfaction on what they had done.

Wednesday wanted to see where the money was to come from, and whether we were to pay the cost of \$25,000 a year; how then can we now meet the call on us for funds for this undertaking? The bill seems as a net for catching the numbers, yet they had better pass before accepting it. Undoubtedly it would be a long time in getting settled; immigration would not for many years be self-sustaining, and the Government would have to make a project. The \$25,000 a year is a little to build a road, and too much for the country's purse. The road should be built by the House on its own merits, and when Legislature is called by the Speaker of the Commons for the present Parliament. The nomination was received with applause, and the motion was carried unanimously. Mr. Anglin was then conducted to the wing by the mover and second. On taking his place, he said he most sincerely thanked the House of Commons for the honor of the report, and would endeavor to fulfill his duties with the strictest impartiality to all parties in the House.

Mr. John A. Macdonald congratulated the new speaker of the House of Commons, and the consideration of the bill to the address would be taken up to-morrow.

Mr. Mackenzie replied that if possible it would be on Friday the 27th. His Excellency the Governor General delivered his opening speech. It is an able document. We have only space for a few extracts. He recommended the use of the ballot, the establishment of a General Court of Appeals. The amendment of laws relating to controverted elections, and the improvement of the judicial system. The Commons will be called upon to consider what plans will be best and most speedily provide the means for transcontinental communication with British Columbia, and the improvement of the canal and harbor improvements are being vigorously prosecuted, with a view to ensure an early completion of the project.

The report of the Chief Engineer of the Department of Public Works on the proposed canal between the Gulf of St. Lawrence and the Bay of Fundy, and the improvement of the navigation of the St. Lawrence River, was read. The report is a valuable contribution to the knowledge of the subject, and will be of great service to the Government. The report also contains a list of the names of the persons who have been appointed to the various committees of the House of Commons, and a list of the names of the persons who have been appointed to the various committees of the Senate.

On Monday bills were agreed to, to incorporate the Dominion Railway Company and Elgin Mining Company; also to amend the Act relating to the Dominion Railway Company. The last is to provide a road from Balmain through the woods to Hillsboro coal and iron mines, and to establish a toll road. It received much opposition by the people, and was at last amended by providing that the Government in council shall approve of the bill, and that the bill shall be passed by a majority of the House of Commons. The bill was then passed.

The Government bill providing for the process of attachment in the case of a judgment creditor, and the bill providing for the process of attachment in the case of a judgment creditor, were passed. The bill providing for the process of attachment in the case of a judgment creditor, was passed. The bill providing for the process of attachment in the case of a judgment creditor, was passed.

The News and the Press.

ST. JOHN, N.B., APRIL 3, 1874.

New Brunswick.—There are three candidates for the Mayorship of this city. A. C. Smith, A. Rowan, and Dr. Alward. Perhaps the election Mayor Reed will be a contestant. Present Mayor Reed will be a contestant. Present Mayor Reed will be a contestant.

The bill providing for the process of attachment in the case of a judgment creditor, was passed. The bill providing for the process of attachment in the case of a judgment creditor, was passed. The bill providing for the process of attachment in the case of a judgment creditor, was passed. The bill providing for the process of attachment in the case of a judgment creditor, was passed.

fishery vessels. At a public meeting of the inhabitants of the section of Yarmouth County known as Salmon River, and situated between Arcadia and Tusket, held on the 16th March, the name of the place, by a unanimous vote, was changed to "Riverdale." A despatch from Sydney, C.B., dated March 28, states that a shanty at Yarmouth Mines, owned by Mrs. Ross, was burned Thursday night in the absence of the owner. Her daughter, Sarah Ross, and a boarder named W. McKenzie, perished in the flames. The late Judge Bliss was one of the wealthiest men in Halifax. His personal property amounted to \$300,000. A flying fish was captured in Halifax harbor on Wednesday. The New Glasgow Chronicle learns that operations are progressing very favorably at the Drummond Colliery. Explorations of portions of the old "workings" have been made, and no sign of fire detected. The large body of coal in the mine at the time of the explosion appears to be unharmed, and will probably be raised to the surface at an early date. There is every prospect of the Company doing a good season's work in shipments this year. Another fortunate individual has turned up in Nova Scotia. His name is Barrington, and he lives in Cape Breton. He is supposed to be heir to a large property in England. Mr. R. Thompson, of Bass River, N.S., is in search of a pair of thieves, who have robbed him of a horse, harness, and wagon.

GENERAL.—Chlorine claims 400,000 people. There are 350,000 men and 400,000 women of capital employed in the oyster trade. The Governor of Virginia has pardoned a convict on the condition that he shall tollage any kind of alcohol from spirituous drinks of any kind. The sale of liquor has been banished by the prohibitory law and State constables from over 300 towns in Massachusetts. Drinking places are on the increase in New York, and the number of licensed saloons is now reported at 7,514, which gives one to every 133 of the population. A few years ago \$20,000,000 of capital was invested in crinoline. It is now reduced to \$100,000. The rules of the Boston Free Department require that every candidate for election to the office of Mayor must be a resident of the city for a year before he can be elected.

The Roman Catholic Archbishop of Cologne was arrested yesterday for violating the Ecclesiastical laws of the Empire. The Archbishop was arrested for violating the Ecclesiastical laws of the Empire. The Archbishop was arrested for violating the Ecclesiastical laws of the Empire. The Archbishop was arrested for violating the Ecclesiastical laws of the Empire.

On the 28th of March, the morning papers attribute the depression in business to the strikes of the coal miners in Staffordshire, and other parts of England. A French steamer was lost on her last voyage from Hong Kong to Yokohama, and several passengers were killed. The steamer was lost on her last voyage from Hong Kong to Yokohama, and several passengers were killed. The steamer was lost on her last voyage from Hong Kong to Yokohama, and several passengers were killed.

The public are hereby assured, through the columns of the Religious Intelligencer, that the PATENT PROTECTIVE PILLS contain no injurious principle, and that they may be administered to children and the most weak and shattered constitutions in small doses, with great certainty of success.

Dr. A. Johnson, one of the most successful practitioners of his time, invented what is now called Johnson's Anodyne Liniment. The great success of this article in the cure of rheumatism and all diseases of the joints and limbs, will make the name of Johnson not less favorably, if less widely known, than that of Louis Napoleon.

With this changeable weather which come trials to the delicate constitution, over which any one, moderately observed, may have passed, Dr. Wilson's Cherry Balsam may be taken when the first symptoms of disordered Lungs show themselves from health. This mild and powerful expectorant is especially adapted to all kinds of diseases of the Throat, and for all those cases of coughing, by confining them to the house, renders them perfectly liable to catch cold. With moderate attention, and a supply of Dr. Wilson's Cherry Balsam, they will be able to return to their good health, and point out to others similarly situated how this remedy is their best and surest friend.

As Dr. Wilson is anxious to meet with the approbation, not only of the public at large, but also of his professional brethren, he begs leave most respectfully to suggest to the medical world that the use of Anti-Bilious and Preserving Pills, in cases of indigestion, dyspepsia, and other disorders of the stomach, or at least a bond of connection sufficient to justify their very general, if not universal, adoption.

In strains of the Shoulder and obstinate cases of lameness, Dr. Wilson's Cherry Balsam, when used in conjunction with the use of the Cherry Balsam, will give relief to the horse, but by persevering in its use, effects a permanent cure. On the first signs of stiffness in any of the joints or cords, recourse should immediately be had to the Cherry Balsam, which will assuage the painful part, reduce the swelling, and subdue the inflammation.

Professor Clarke writes to the agent of Clarke's Cherry Balsam, by extraordinary care in the selection of the ingredients, and by the closest attention in compounding them, I am now warranted in saying that the Powders I am now sending to the American public are as effective as a remedy as it is possible to procure, and will prevent distempers of various kinds to which horses are liable during the spring and summer months.

WHEN THE HARLEQUIN MAN OF BUSINESS tries to get out of the way of the Cherry Balsam, he is sure to find it in the way of his business. The Cherry Balsam is a remedy for all kinds of diseases of the stomach, and for all those cases of coughing, by confining them to the house, renders them perfectly liable to catch cold. With moderate attention, and a supply of Dr. Wilson's Cherry Balsam, they will be able to return to their good health, and point out to others similarly situated how this remedy is their best and surest friend.
