

Rev. J. W. Henry, who went out to the Society Islands to preach the gospel, was threatened with imprisonment or worse, if he attempted to preach, and was obliged to return. The islands being under the control of France, the French priests have power there.

There has been of late years, according to the statements of Jewish papers, an unprecedented return of Jews to Palestine. The Jewish population in Jerusalem, they report, has doubled within ten years, and is continually increasing. Many of the Jews come from Russia.

The Roman Catholic Society of St. Vincent de Paul, which have converted one hundred of the inmates of the penitentiary of Philadelphia. It is hoped that the conversions will last after the inmates are out.

Mr. Gough's autograph album is surpassed in extent by one in possession of Mrs. Harriet Beecher Stowe, which contains twenty-five large volumes, and contains over half a million of names. The exact number is 562,848. They include nearly all the women of eminence in England and her colonies, and all the signatures appended to the appeal, addressed in 1851-52 by the women of England to their sisters in America, on the subject of slavery.

One of the highest characteristics of manhood is the purity of speech. Nothing will tend more to character and reputation as far below par as improper conversation. An obscene story, a filthy joke, a questionable word or gesture, a sentence that would make a pure person blush in public or in private, in select or in mixed company, is a burning shame and scandal to man. An obscene story is next to obscene actions; a filthy joke is usually as wrong as a filthy deed. He who has impure lips and indulges in impure speech is a disgrace and a corrupter of the morals of the young.

Mr. George Dawson, speaking of the Turkish atrocities in Bulgaria, at a meeting in Birmingham, said: "We have found the Turks fraudulent bankrupts in finance, bludgeoners in morals, tyrants in Government, and beasts in war." Strong language, but only too true.

The Jewish Messenger says, that Young Men's Hebrew Associations are forming in many cities. Boston, Philadelphia, Cincinnati, and New York have their thriving organizations, and it hears from Chicago, Baltimore, Washington, New Orleans, and San Francisco, that similar societies will soon be established in those cities.

The poor dying Cardinal Anselmi will leave a little legacy of 200,000 francs, some \$4,000,000, the greater part of which, it is understood, is already bequeathed to the poor prisoner of the Vatican. The subject provokes some of these legacies, is enough to set a crocodile sobbing.

In the lands outside of Christendom there are now established 4,000 centres of Christian instruction; 3,000 Christian congregations have been organized; there are 273,000 members of Christian congregations, and populations adopting the Christian name aggregate about 1,300,000 people.

The following story has a very suggestive lesson in it: "A little six-year-old daughter of a Methodist minister committed a fault and denied it. Her mother, learning she was guilty, asked her why she told an untruth, when she replied, with great sadness, 'I should not, if I believed as you and father do; I am a Universalist!'"

The remaining nine miles, passing through heavy clay soil, has been injured by the weather. The Portland Press says: "It is thought that the floating body recently seen on the river may have some connection with a missing man in the vicinity. Mr. Alexander McDermott of Halifax, recently visited his brother-in-law, Mr. Hodgdon at Woodford's Corner. He went to the Centennial and returned in great haste to reach his home. He missed the train and took the boat for Halifax, or at least purchased his ticket, but he has not reached home, and as he had a quantity of money on his person foul play is feared. He was of perfectly healthy habits. Mr. McDermott has since been heard from.

**TREATING THE WRONG DISEASE.**—Many women call upon their family physicians, one with dyspepsia, another with indigestion, another with trouble of the breast, another with pain here and there, and in this way they all refer all to themselves, and to their easy-going and indifferent doctors, separate and distinct diseases. Assuming them to be such, he prescribes symptoms and poisons; when, in reality, all these symptoms are caused by some one disease, the dyspepsia. While they are thus only able to palliate the disease for a time, they are ignorant of the cause, and the disease, which is a large bill is made, when the suffering patients are no better in the end, but probably worse for the delay, treatment, and complications made, and which a proper medicine, directed to the cause, would have cured in a few days, thereby instituting health and comfort instead of prolonged misery.
