

A large number of our subscribers ought to report to us at once with payment. Will they be kind enough to make a further call unnecessary by replying promptly to this? All that is in this need.

## TO ADVERTISERS.

By notice in the first column advertisers will see that we have put the management of the advertising department under the control of Mr. M. C. McLeod, who will give all information and make contracts with all who call at this office or correspond with him.

The INTELLIGENCER is a first class advertising medium, as they have proved who patronize it.

## The News and the Press.

ST. JOHN, N.B., JULY 7, 1876.

NEW BRUNSWICK.—King's County Farmers' League meets in Springfield next Monday. Robert Bustin's Fire Escape was exhibited in Philadelphia one day last month, very successfully. One paper says that in the exhibition Mr. Bustin let himself down perpendicularly and at an angle of thirty degrees from the third floor at the eastern end of Machinery Hall, and then took two turns around the building, and then followed himself. A child belonging to Mr. Kennedy, of Petticoe, was burnt to death one day last week. The child was about 18 months old, and its mother went out leaving a fire in the stove. When she returned she found that it had taken a brand out of the stove which set fire to it. The child was so badly burnt it died in about two hours. About two years ago the same man had a child killed to death. The Telegraph says a man by the name of William Kennedy, belonging to St. John, who has been attending school at Cambridge, is wanted by the Sussex Police magistrate. Rouse was charged with an indecent assault upon a little girl who was attending the same school, and a warrant issued for his arrest under which he was taken. The constable who took him allowed him to go to his room to put up some things in a parcel and he has not returned from the room since. While the commission of the law was on guard below House took his departure through an open window for parts unknown. On Friday the house of Mr. Mayes Case, of Wickham, Queen's Co., was burned to the ground. Work is progressing fine on the Albert Railway. There are now over 300 men employed, and the force is being increased as fast as men can get. The Government Engineer made a thorough inspection last week, and expressed himself well pleased with the work done. Over 20 miles is now graded with the bridges and culverts all in, 20 of which have been built. The Petticoe line to Weldon Creek is one continuous line ready to receive the rails. The station house and bridge at Salisbury have been commenced; the iron for the whole line purchased, and the rolling stock is being got ready. It is confidently anticipated that the cars will be running as far as Hillsboro at least before the first of November next. So Oshington says. The contract for the Normal School Building, which has been awarded to Messrs. Crook & Campbell for \$35,135. Work is to be proceeded with at once, and the building is to be completed by April 1, 1877. The Albert Sessions on Friday, very unprofitably voted an additional issue of \$23,000 County bonds to the contractors of the Albert railway, Messrs. McDonald & Kilman. The St. Stephen Journal says that the apple crop in that neighborhood will be almost a complete failure. A correspondent of the Farmer at Norton, N. C., writes as follows:—Crops are looking well, grass especially well. An abundant fruit crop is also excellent; and while many things conspired to render the seed time a late one, there is a reasonable prospect of an abundant harvest. Outside of the barracks ground, below the hospital grounds, a little boy, having lost his life, is the dead body of an infant. A policeman was called to the box, containing the body, dug out of the ground. A pillow case was found on and beneath the corpse, which was in an advanced stage of decomposition. One of the legs looked very much darker than the other, as if it had been bruised. The box and contents were taken to the Dead House. The Telegraph reports that the residence of Mr. J. Valpey, in Carleton, received a daring visit by a burglar last past two on Saturday morning. As was afterwards ascertained, the man effected an entrance by means of a ladder, had been let against the house by painters the previous day. Four bedrooms were visited. Out of Henry Valpey's room the visitor got a silver watch that had been bought a few days before, and \$6 in money; \$3 were taken from Lewis Valpey's room and two pairs of cuff buttons from the young ladies' room. He visited Mr. Valpey's apartment and removed his clothes to the hall and got a watch and \$10 from them. It was after this that he returned and was about removing the jewelry box when the cover snapped and Mr. Valpey was awakened by the noise. She thought it was her daughter and ran after her, but discovering her mistake gave the alarm. Mr. Valpey heard the man endeavoring to make his exit from the front door and procured a revolver. The fellow then opened the hall window and just as his head was pushed out Mr. V. fired at him, the revolver and killed three times. The fourth time the chamber was emptied, but by that time the man had escaped with his booty over a fence. On Monday two men named John Kelly and Philip Anley were killed by falling on Prince's street in this city. They were painters and were working on a four story building opposite the Savings Bank. They had a ladder for a staging, it was held by ropes at each end, but had no support to the middle. The two men were called out at each end moving towards each other, and when they reached the centre the ladder broke suddenly and they fell to the ground, a distance of over forty feet, killing them both instantly. They were both married and leave families of helpless children.

NOVA SCOTIA.—As Saturday night's express train from Halifax was passing over Folly Bridge, Mr. George Smith, of Pictou, came out of the smoking car upon the platform from which he fell down through the bridge, a distance of some fifty feet. The train was stopped and the dead body picked up by Mr. Smith was coming from Pictou to this city to buy iron. Potatoes and tomatoes are in blossom, beans and peas in pod in many gardens. The apple crop in the centre of the valley promises to be light. The grass is looking very heavy, and there will be an abundant return, as nothing now can hurt it before the time of mowing. Strawberries are not plentiful, and are in demand for 14 cents per quart. So Annapolis Farmer says. Schooner Leant, Captain Kidson, which arrived at 25, 30, 40, W. W. passed a day full of water with the bodies of two men in her. Capt. Kidson found it impossible to take the bodies on board owing to the state of the weather. Two men, named Robert McLean and John Blackett, were severely injured by a powder explosion while opening a "silver lead mine" at St. Ann's, Victoria, O. C. Francis, the colored porter who escaped from Yarmouth jail a few days since, was arrested at Kentville on Wednesday and now back in jail. He will be tried immediately as the Court is in session. Last week a number of business men of Yarmouth met with Capt. Coyle, of Portland, at the Yarmouth Hotel, for the purpose of conferring with him respecting the practicability of placing a steamer on the route between Yarmouth and Portland in connection with the Western Counties Railway. The proposition of Capt. Coyle to put the steamer "Falmouth" on the route was unanimously carried. The New Glasgow Copper Mining Company, prospecting near Lochaber,

Lake, Antigonish County, struck what is familiarly known as the "big boulder" lead, on Saturday last. It is about 100 feet long, and is about six feet thick. This makes the fourth lead now opened on this property, all within a few feet of each other. This promises to be one of the most valuable discoveries in mining provinces in our province. The contract for erection and completion of a building for the Exchange Bank, Yarmouth, has been awarded to Messrs. Kinney, Haley & Co. It is to be of brick with freestone trimmings, and is to be located at the corner of Main and Jenkins streets. The space between this lot and the residence of A. C. Robbins, Esq., has been purchased by Messrs. Dodds & Jolly, who is about to erect a store on it in connection with the Bank and of the same external material and style. The block will make a handsome appearance. The Annapolis Farmer reports the following casualties during the late thunder and lightning storm:—The Digby lighthouse was struck in three places, and the child of Mr. Ellis, lighthouse keeper, was injured by the electric light, causing it to continue in a stupor all of Sunday. The child has since recovered. The barn of Abraham Lent, Clementsport, was injured and the posts badly split. Fourteen telegraph posts were split to pieces. Strange to narrate, in the same locality, two years ago, about the same time, telegraph posts were similarly destroyed by extraneous electricity. Several trees were struck in Aylesford. Mr. John K. Ryerson was a member of the Local Legislature of Nova Scotia, and he gave a sworn affidavit that a certain bridge was completed when it was not, and he thus enabled the contractor to get money to which he was not entitled. Ryerson was indicted for perjury, but the indictment has been quashed. Judge Barnes ruled that as there was no law appointing an assessor, no law requiring any one to take such an oath as Ryerson did, therefore the whole thing was extra-judicial, and the charge of perjury could not lie. In the Supreme Court, Yarmouth, July 4, Judge DeBorde passed sentences as follows:—Abram L. Hatfield, for inducing a forgery—three months' jail. Daniel C. Wetmore, for inducing a forgery—three months' jail. Henry Penney, for forgery—three years' penitentiary. Ebenezer Hurlbert, for stealing an ox—two years' penitentiary. The Judge, in addressing each prisoner, made special reference to the crime with which they were charged, and his remarks were most impressive. The mildness of all the sentences evokes general comment, although no fault is found. The Court will be in session during the rest of the week. The weather is delightful, and the crops are well advanced. The number of failures in Nova Scotia for the month ending June 30, was 91, with liabilities of \$1,021,110 and assets, \$500,105. In P. E. Island there have been 15 failures, liabilities, \$105,577; assets, \$60,862. In Newfoundland only two failures are recorded, with liabilities \$35,300, and assets \$15,100. There is a new separate school question in Halifax. The colored people have had a quarrel with their children in connection with Zion church. They will now object to this school, and say they will send their children to the schools nearest their respective homes. The school law makes no distinction of color, but practically the colored people of the city have separate schools. The Bank of Nova Scotia has declared a half yearly dividend of four per cent. Patrick Murray, arrested in Halifax for drunkenness, was held in prison, and the coroner's jury declared that in his opinion the police were guilty of neglect in allowing the deceased to be sent to the prison without an opinion of a Medical Officer. The steamers from the United States are bringing home large numbers of persons who went away hoping to get more work and better wages, but have found that where one honest man cannot get work here, hundreds can.

THE UNITED STATES. The Carrol, from Boston, arrived 125 passengers; the Palomoto, from Portland, 92; and the Carrol, from New York, 21; making a total of 238. It will also be noticed that the passenger lists onwards are becoming smaller.—Halifax Chronicle.

GENERAL.—Five hundred Mennonites for Manitoba have arrived this year. Italy now has the most powerful war vessel in the world, the Duilio, carrying 100-ton cannons. The Florida orange crop is estimated this season at 25,000,000, which is the average price of \$15 per 1000 at the grove is now \$275,000. Most of the trees are now just coming into bearing, and for this reason a large portion of the yield is looked for in the next few weeks. It is thought that the present trees within five years will yield a crop of 100,000,000 oranges. Cholera infantum is killing babies in Baltimore at an unprecedented rate. Fifteen cities in the province of Hunan, China, are in a state of open rebellion. The French Chambers have been planning for a grand canal between Havre and Martinique. One of the plans is for a ship canal 100 feet deep, 100 feet wide, from the Isthmus of Gualea, and Langueudo, shortening the sea route by 800 miles.

COKE & N. B. RAILWAY.—Communicating July 6, Express Trains leave St. John at 8:15 a.m. for Fredericton, Bangor, Baiton, and all points on N. B. & C. Railway, and at 1:15 p.m. Accommodation leaves St. John for Fredericton, at 8:30 a.m., and 3 p.m. for St. John. H. D. McLeod, Carleton, Assistant Superintendent.

## ENGLISH AND FOREIGN.

LONDON, June 29.—Late despatches state that some Serbian volunteers corps on the Drina have been completely routed by the Turkish army. The Paris correspondent of the Standard reports a regular war panic prevailed on the Bourse yesterday, founded on belief that it is impossible to conquer Bosnia. A correspondent writes from the limits of the Ottoman Empire, and a collision between Russia and Great Britain would eventually reach the centre of the Balkan peninsula.

The Dutch steamer Lieutenant General, from Aachen for Batavia, was wrecked on entering the Straits of Sunda. 25 passengers lost. The London Times says that the little hope of maintenance of peace.

Prince Milan left Belgrade for the army this morning, cheered by the populace, and saluted from batteries. It is expected that upon joining the army he will issue a proclamation to the Serbian nation. The Belgrade has gone to the frontier to bless the troops. LONDON, June 30.—In the Commons to-day Isaac Butcher appointed a select committee to inquire into the claims of the Irish people for restoration of the Irish franchise, with power to control the affairs of the country. Boukie, Ex-Imperial Secretary, said that, as far as the Government could ascertain, the rumor of the presence of Russian Grand Duke Vladimir in Serbia was untrue. Prince Milan in a proclamation denies any intention of breaking his bonds with Turkey, but only desires a special administration for Bosnia and Herzegovina. Bulgaria has issued a declaration of Independence.

It is said the Prince of Montenegro has been bribed by Turkey to remain neutral.

LONDON, July 1.—A Berlin special cable to London, July 1, says that the Russian Emperor has issued a proclamation, dated Sunday, giving the following important details:—Montenegro is to-day declared a free state to Turkey. The declaration contains a summary of grievances against the Porte, particularly the blockade of the Montenegrin coast, the Porte's evident hostile intention toward Montenegro, and the impossibility of reforms in Herzegovina.

The people received the proclamation with great enthusiasm.

The declaration has been duly lodged at Vienna.

The Emperor has a special from Paris that the

English, German and Austrian Ambassadors have informed the Porte that the three powers were resolved not to tolerate any further delay. A despatch from Belgrade via Paris on Sunday says a council of war has decided to commence hostilities on the 4th of July.

The Turkish army is concentrating at Mostar. Official intelligence from Belgrade says the Serbian yesterday crossed the frontier at three points.

The Russian Government refuses to give pledge of non-interference. Flags were distributed to the Montenegrin troops after mass on Sunday at Caledonia.

Austria has notified Serbia that she will not place any obstacle in the way of Turkish troops passing through her territory.

VIENNA, July 3.—Serbia has notified the powers that unless they declare the Danube neutral, and prevent the Turks using it for military operations, Serbia will allow foreign telegraphic service.

Paris, July 3.—A despatch from Belgrade reports that Serbian forces have begun an attack upon a Turkish fort at Suputza.

Bucharest, July 3.—Prince Charles, of Roumania, opened an extraordinary session of Chambers to-day. In the speech from the throne he says the imperial treaty guarantees the neutrality of Roumania. The Prince expresses the hope that European peace will stop at the frontier as long as Roumania observes neutrality.

LONDON, July 4.—The Turks have captured some Serbian entrenchments near Zinear. The Serbian lost 3,000 killed and prisoners.

Thousands of Russian volunteers are expected in Serbia. Strong batteries are being erected at Otashkoff. It is generally believed that Russia instigated the war. Russia is known to be making war preparations on a gigantic scale. Military men think that the Russian army will place within a week in the neighborhood of Vitebsk. The Turks are reported to have only thirty thousand men there, but are well fortified.

Official cablegrams from Constantinople represent the Porte confident that it will easily dispossess the Turkish army from the military occupation. The Porte is firmly intent on the military occupation, hoping that Prince Milan will soon sue for peace.

The Turkish Ambassador at Berlin asserts that the Porte has 200,000 of its best troops near the scene of war.

A Vienna telegram mentions a report that seventeen Turkish gun boats are at Widna, ready to bombard Belgrade.

In the House of Lords Earl Derby, in reply to Lord Camperdown, said there was reason to suppose that the Russian officers had entered the Montenegrin army without permission, and by the authority of the Russian Government.

LONDON, July 4.—Later advices confirm the loss of the steamer Lant, General Kroen, in the straits of Sunda. One hundred and thirty persons drowned.

The defeat of the Serbians in the first attack is considered a serious blow. The Russian army has not only driven back the Serbians, but the Turks pursued them into Serbian territory, and advanced victoriously as far as Sotsehar, carrying all the neighboring Serbian towns.

Serbian lost 1300 killed, and 1500 wounded fell into the hands of the Turks. The latter lost 450 killed and 800 wounded.

Reported sanguinary fighting near Nitch, and the Turks have been defeated.

The thousands of the Imperial guard are leaving Constantinople for Serbia.

A Paris telegram says the Khedive has furnished the Porte 120,000 men.

A Berlin special says the northern powers have been asked to send troops to the Balkans in regard to the war. They express determination to remain neutral, and evince a strong desire to localize the struggle.

The Times, commenting on the Eastern Question, concludes that the British people do not expect to see the Turkish army with its hands on the Turkish empire, and that the British people do not expect to see the Turkish army with its hands on the Turkish empire.
