.... Colored people have a hard time in many of the States. For instance, the statement is made that in Texas alone fifteen churches, belonging to colored people, have been burned by incendiaries since January 1st. It seems that in the South there is a very large class of whites who are determined to put every possible obstruction in the way of the efforts of the freedmen for their elevation, and public sentiment does not allow the Governors of the States to punish the offenders.

.... The annual meeting of the National Temperance League, held in Exeter Hall, London, a tew weeks ago, was deeply interesting. The reports show that temperance work is progressing very encouragingly. In the army, and navy, and all they had, made a fire in the road, and burnt all in the schools, great progress has been made. There is little decrease in the nterest, though from different causes, the number of the meetings has been lessened. During this ime something over six hundred and fifty have professed conversion. All ages, from six years up o sixty, and all classes are embraced in this number. Children in great numbers have been eached. But the work has reached out far beyond them. Men who had not been inside of a church for twenty years-gamblers, atheists, infidels, saloon-keepers, women "whose feet go down to death," whose "steps take hold on hell," merchants, the great manufacturers of the place, the workmen in their shops, lawyers, and judgeshave been brought to feel their sins and to turn to Christ for salvation.
