The project of a splendid Episcopal cathedral in New York is again revived. It was under consideration when the great panic began, and some progress had been made, but, like everything else, it had to yeild for the time being to the pressure of the times. It is said, however, that at the next meeting of the Diogram Convention, in October, the Bishop will be enabled to announce a contribution of \$200,000 toward the erection fund, from one family alone. With such a start, speedy success would be assured.

The American Presbyterian Board of Foreign Missions closed its year with a decrease in receipts of \$60,288, as compared with last year; of the 5,153 churches in the denomination, 2,343 gave nothing and the heaviest falling off was among the richest churches, the New York Fifth-Avenue Church alone lessening their contributions \$9,238. It is noteworthy that the little church at Gaboon, West Africa, gave nearly as much as all the Indianapolis churches, and more than three times the sum sent by the five churches at Toledo, Ohio.

The assessed values of all kinds in 1864-5 amounted to £330,580,729; in 1866-7 these figures had grown to £490,344,906. The increase is said to be most marked in the assessments on employments and industrial establishments and appliances. it has to be taken into account that of late years exemptions and abatements were considerably extended, so that the actual would be really greater than the apparent increase.
