shelter. He rode moderately the first part of the ter will be the tone. Set your goblets on the table day, so as not to weary his horse at the outset ; and run over them with your mallet, tapping each and at noon he took a good long rest and gave his gently to ascertain its pitch ; then arrange them in horse a good dinner from a small sack strapped on a row, beginning with the lowest toned glass, and behind his saddle. He was now within the re- proceed upward, according to pitch. Now take the servation. There was neither field nor fence nor lowest toned goblet, and fill it with cold water, human nabitation. A deserted cornfield now and which will of course lower the tone still further, all that gave sign that human feet had ever trod until the sound produced is precisely a semitone those solitudes before. Nearly thirty miles of just above that of the first goblet ; and proceed in this such country lay between him and the settlement. way, regulating the pitch of each by the quantity of The day was unseasonably warm, not a cloud in the water, until you obtain a scale of one octave and sky and scarcely a breath of air in motion. The a half, or two octaves, or as much more as the glassstorm.

-

on the saddle and mounted for his long ride. He In fact the greatest difficulty is to obtain a sufficient rode on rapidly for a couple of hours, when he range or compass of tone, unless you have goblets Oromocto, N. B. noticed that the wind was rising and blowing from of varied size, shape and thickness. But, having the north. It was soon so chilly that he had to put your entire scale completed in regular chromatic on his overcoat ; and it was not long before he was succession, it will be well to go over it carefully, to join ? compelled to unstrap his blankets and wrap them and see that all the intervals are musically accurate ; about him. Still it grew colder. The sky was for unless it be tuned nicely, the whole affair will soon overcast with clouds, a few flakes of snow be- be a noisy failure. Perhaps, however, I am assumgan to fall. The wind grew fiercer and fiercer, and the ing too much for the average reader, when I expect snow and sleet stung like shot as it struck the face. him to be able to set a musical scale successfully by Coats and shawls and wrappings seemed like loose his car alone ; and indeed this seems the more prosheets about a man. The snow grew more and bable when we remember that not one out of five more dense and was fast filling up the trails and hundred musicians can tune an instrument at all. tracks and making all the prairie look alike. Our But in cases where the earis thus deficient, the gobfriend pressed on as fast as his horse could go. It lets can be tuned nicely by any keyed instrument was impossible to distinguish the road, and the only that is itself in tune. In which case he has only to guide was the direction of the wind. The poor start at the tone indicated by his lowest goblet, and horse was becoming bewildered, and could make tune the succeeding ones in unison with those of the but slow progress through the snow and fall prairie ascending scale of the instrument. In any event it grass. The snow was drifting so that everything will be found a fine discipline for the car. Where was filled up level; and every now and then they the experimenter finds it impossible even to tune would plunge into some hole or gully, and horse in unison, he had better direct his efforts in other and rider were almost buried. It was growing channels of course. I am not writing for him. dusk, the thick clouds and the drifting snow bringing on night even before its time. It seemed mad- range your goblets to the best advantage, both for ness to attempt to get through., It could not be quality of tone and convenience of manipulation. less than ten miles to the nearest house, and there To this end it is perhaps better to place your goblets were ten chances to one that he would miss the way. on a long, inverted empty box, made of thin ma-To stay out on the prairie was to freeze to death. terial, securely fastened together. Place the whole Ascending one of the prairie swells, he saw, some on your table, with the goblets arranged in the two miles to the right, a strip of wood, which skirt- same order as the keys on a piano, placing the half ed a stream. To reach this and trust to its shelter tones, or sharps, corresponding to the black keys, 155.-Sublime Porte. seemed to be the only hope. But even this was no slightly in the rear of the main line or diatonic scale, easy matter. From the high ground where he was for the convenience of the performer-being carehe could but just see the tops of the trees ; and ful that no two goblets touch each other ; also that when he descended he would lose sight of it all and they rest firmly on the box, in order to avoid jarsee it no more till he reached it. There was not the ring. If your scale extends to two octaves, it might sign of a path and the darkness was growing thicker be well to arrange your goblets in two separate lines all the time, and the snow and wind were almost perhaps. blinding. But, getting the direction as well as he

could, he started across the prairie. Fortunately,

Feeling in the darkness among his baggage, he The tone may be varied by the use of either the from you here. recting in the darkness among his baggage, he found one single match. But what could he light with it? Everything was buried in snow and the may require. The glasses should be tapped on the outside, near the top. If it he desired to keep the use of either the John C.
