

October 24, 1879.

## THE RELIGIOUS INTELLIGENCER.

A Congregational Church in Minnesota having become free from debt, the pastor called the trustees to the platform and asked the following public pledge from them: "Do you promise this people that you will never again, so long as you are trustees, allow this church to get into debt; that you will close the doors before you will permit such a thing?" Having answered in the affirmative, they returned to their seats.

The wife of *Mohammed Pasha*, the new Governor of Syria, who recently at Beyrout told Miss Taylor, the principal of the Moslem Girls' School, that her husband meant to call Mohammedan parents to send their children to school. There are now 11,000 children attending schools. The Greek young men have formed a Young Men's Christian Association in imitation of the Protestants, and have opened schools for boys and girls, using the New Testament as a text-book.

The *topical market* is agitated. These chiefly in use are of white wood and pointed at both ends. A patent for fourteen years was obtained for them in 1866, and the factory of the Boston owners at Buckfield, Me., used from 3,000 to 5,000 cords of wood yearly and turned out inconvertible quantities. A box of 2,500 sold for 25 cents, and the profit was large. About eighteen months ago another Boston firm started a factory in the woods of Ohio and used similar machinery. The price then began tumbling, and fell to 20 cents at retail, then to 18 1/2, and 12.

George A. Gardner of Brooklyn, N. Y., and formerly of Portland, Me., died on Sunday in a most shocking manner. About two weeks ago he had a feyful tooth, and temporarily fell ill in Boston, and a short time after he died in New York. Gangrene or blood poisoning set in, and the blood vessels in the neck sloughed off one by one, until the patient laid to rest. The physicians who examined the body, give it as their opinion that the deceased was poisoned by the use of arsenic to kill the nerve of the tooth. The Boston dentist denies ever using arsenic, but it is said that it is sometimes used. If so, so dangerous a practice should be stopped.

Cardinal Manning lends his influence to temperance work in England. At a late Roman Catholic temperance meeting in Liverpool, he said that in Manchester, Liverpool, and the Factory League of the Cross numbered fifty thousand of the soberest men in England. Drunkenness, he declared, was affecting factory hands to such an extent that Americans, who visited England to study the labor question, found that the factory labor of America was more efficient than that of England, in consequence of temperance among English factory operatives.

## LITERARY NOTES.

HARPER'S MAGAZINE for November is an unusually complete and varied number. All but two of its contributions are illustrated.

Benjamin completes his review of American Art with an instructive paper on our early painters, the school of the Hudson River, and the Hudson River School. The leading paper, by W. H. Riebel, is devoted to a subject of curious interest—the Old National Pike between the East and West across the Alleghenies. The article is written by excellent illustrations, reproduces in vivid colors, the lively pageantry of this great highway.

An equally novel subject, and of greater present interest, is that on the "Cattle Ranches of Colorado," which is a very entertaining reading, while it contains full information as to the methods and risks of cattle-raising. The illustrations are especially good.

The November Number closes the fifty-ninth volume, and the publishers offer to send to new annual subscribers beginning with the December Number, 1879, the four previous numbers containing the early chapters of "White Wings" and "Mary Anerley."

GOON COMPANY (3.00 a year). Springfield, Mass. Number Two. Many readers of this magazine will send a sketch of "One of the Congressmen," in which a graphic pen picture was given of Rev. Phillips Brooks and his preaching. The same author now has a sketch, at once vigorous and pathetic, in which all the characters are with trifling modifications drawn from life. The central figure is a western Methodist minister. Other characters are a western clergyman—a lady who is a "Cattle Rancher," and a woman who is a "Cattle Rancher."

Another vivid portrait is a description of an experiment he made in smoking opium in a Chinese opium den in Boston.

The Man of Lake Tahoe graphically pictures the hardy lumbermen of that wonderful and beautiful California lake six thousand feet above the sea in the Sierra Nevada, and some experiences on its shores.

Around St. Paul's describes some of the endless and interesting peculiarities of London.

Rev. Dr. James M. Whiton has Bible Bygones; there is a rumormongering of the "Cattle Ranches of Colorado," which is a very entertaining reading, while it contains full information as to the methods and risks of cattle-raising. The illustrations are especially good.

The editorial departments, including reviews of new books, conclude the number.

Wide Awake for November opens with a good story for the boys, called "Tad's Telephone," and presents following another fine article, also for the boys, "The Training School Ship," with twelve pictures drawn on shipboard. The boys will be much interested in No. XI. of "Our American Artists," this one being about George L. Brown, showing what a plucky boy he was. The funny four-page poem entitled "The Tragic History of Chang Pung Lo," with its comic drawings, will also be regarded by the boys as printed for their special delight. The number closes with a poem by the author of "The Tragic History of Chang Pung Lo," with its comic drawings, will also be regarded by the boys as printed for their special delight.

It is reported that Mr. D. Banks McKenney will soon visit this Province and Nova Scotia.

Nova Scotia is soon to have its first experience of County representative government. The first session under the County Incorporation Act is to take place the third Tuesday in next month.

Joseph Cook's Boston Lectures this season will be delivered in the Old South Church, Tremont Temple having been burned. The first is to be given November 2nd.

Canadian apples have sold well in England this season. The first sales in Liverpool and Glasgow realized excellent profits, good fruit from 23s. to 28s. per barrel.

Rumor says that Mr. Brock, M. P., for West Durham, Ontario, is to vacate his seat to make place for Mr. Blake.

The Stanley matter referred to in the Conference Report will receive some attention next week.

## THE NEWS AND THE PRESS.

SAINT JOHN, N. B., OCTOBER 24, 1879.

Several weeks ago bills were sent to subscribers in arrears. Very few have been heard from. This is to say that we must have an immediate response to the call for payment. "Send the money at once!"

New Brunswick.—Betta, who was charged with killing Brunswick at Northfield, Sunbury Co., was tried at the session of the Sunbury County Court, which opened on Wednesday, and was acquitted.

Mr. Joseph Rowan, Marble Island, Ontario, is building a steamship for Messrs. D. D. Glaser & Son. She will measure 122 feet long, and will be used for towing on the river, taking the place of the Sunbury. Mr. Rowan is also building a schooner of 120 tons. The cases of small pox recently reported are now, it seems, well under control. The Rodgers family have been relieved from quarantine, and the promises thoroughly furnished.

On Tuesday morning Mrs. Zwickler, of Dartmouth, N. S., was preparing for washing, and had put some cold water in a tub, when it commenced to leak, having sprung from the bottom. After placing a basin to catch the leakage, she poured boiling water into the tub. This soon swelled the tub, and while reaching down to remove the basin, she inadvertently moved one of the chains on which the tub was placed, causing it to fall and crush the contents on her infant child who was playing on the floor.

The Yarmouth and Shubenacadie Quarterly Meeting of the Free Baptists will convene, (p. v.), at East Pubnico, Yarmouth County, on Saturday, Nov. 1, 1879, at 2 o'clock, p. m.

Yarmouth, N. S., October 14, 1879.

A missionary just returned says he regards John's *Amos* as the best of all the books of the Bible. It is a great variety of special cases, and is the best pain-killer in the world.

workmen are at present engaged in painting the Suspension Bridge. It will occupy several weeks to complete the work. A well known gentleman of Fredericton has lately visited the gold fields on the Muskeg. He is well versed in gold washing, and says that he found some gold in every pan of dirt which he washed, but that it was very fine, and would require much care and skill to recover. Diphtheria prevails to an alarming extent among the families at St. Croix and Vancouver, Me. Several children have died from its effects.

Edward H. Conroy, book-keeper for Messrs. W. M. Mackay & Co., has absconded with nearly \$800 of his employers' money. On Thursday, he was sent with \$750 to place at the credit of a man in Nova Scotia, with whom the firm had had transactions. It was supposed that he had banked the amount, but on Saturday a note, which the above-named man was to meet, was presented for payment. Inquiries were made for Conroy and then it was learned that he had taken Friday's train for Bangor, and that an additional sum of \$38 belonged to the firm was also missing. It is presumed that Conroy has reached Boston. On Saturday night, about 11 o'clock, Archibald McNaughton, of Portland, heard a noise in his yard. He went to the door in time to see his horse and carriage disappear in the darkness. Officer Malone was once on the track of the thief, but returned without a clue. Nothing further has been heard of the horse or carriage. They were found, however, at T. Wilson Bell, of Dorchester, where found drowned in a well in the cellar of his own house. It seems that he went to the well to get a pail of water, and in reaching down to dip it up, he lost his balance and fell in. He leaves two daughters to mourn their loss, for whom is felt a widespread sympathy. Passages Station was broken open on Wednesday night by some party or parties as yet unknown. Entrance was effected through a back window. Every lock in the building was broken open in the search for hidden treasure, but only a few cents were found. The defaulting book-keeper Conroy was arrested in Boston on Monday, and disgorged \$400 of the money he had stolen. He is still in custody.

If you are going West, purchase your tickets from G. A. Freeze, the agent on Water Street, St. John. Passengers for Winnipeg or other western points have choice of routes. Customhouse provided for all classes and baggage checked through.

The Russian Court invited Dr. Ayer and his family to the Archduke's wedding in the Royal Palace. This distinction was awarded him not only because he was an American, but also because his name as a physician had become favorably known in Russia on his passage round the world.

Mr. J. K. Glenn, Harvey, N. B., writes, I have used Wilson's Polyphonic Cherry Balsam with great advantage in previous years. Recently I caught a severe cough, with much soreness of the lungs, and used this Cherry Balsam, and derived from its use, I at once recovered to, and was cured as before.

CONTEMPORARY.—The bowels become torpid and powerless under constant oppression. Dr. Ayer's Family Anti-Bilious Pills penetrate to the nucleus of the disease and eradicate it. They evacuate the food and vitiated particles from the intestines by a mild, aperient action, and regenerate their exhausted energy by restoring tone and vigor. They induce a healthy action and prevent a relapse of the malady. For piles, fistulas, dyspepsia, and all disorders of the bowels, this medicine is the only reliable remedy.

No other liniment combines, in so compact or concentrated form, the active and essential properties of liniment, or is so well adapted for all purposes, as Dr. Ayer's Liniment. It cures all external pains, rheumatic and gouty tortures, and contracted sinews may be overcome by diligently rubbing this liniment upon the skin.

BAKING FOR THE HAIR.—Use it once and you will have no more. Price, 50 cents per bottle.

To persons employed in constant mental toil, study or anxiety, Wilson's Compound Syrup of Polyphosphates is especially adapted. Highly recommended by Physicians, Clergymen, Editors, Lawyers, and Ambassadors business men.

"THE BEAUTY" of having a bottle of David's Pain Killer in the house, is that you are prepared for the "worst." Croup or Cholera the Pain Killer is a sovereign remedy.

As a GENERAL TONIC, LADIES, who make any pretensions to refinement desire to have soft white hair. We believe that there is nothing will tend more to preserve the hair from becoming thin, than the use of this hair oil.

MURRAY & LANMAN'S FLORIDA WATER mixed with the water in the basin. It removes redness and roughness. The ladies of Cuba and South America, who are especially fond of it, use it for all the virtues of this Florida water as a cosmetic, and have long since discarded the use of all others.

OLD AGE.—Boerhaave, the great German physician, said that "old age was the only disease natural to man." Yet in America only four out of every hundred people reach sixty years and in England only seven. Why should the mortality be less in England—with its dense population and unfavorable conditions for longevity—than in this country? It is doubtless due to a new country, an uncertain climate and the little reverence which is paid by the young to the experience of the old. The young think they know more than their fathers, and they follow only the teachings of their own experience. The result is that they soon find that they have acted foolishly, and prematurely lose their lives. To keep the system healthy the secretions should be kept in order. Dr. Hunter wrote that "he looked upon every adult he met in the streets of London as a walking museum of disease."

It is reported that Mr. D. Banks McKenney will soon visit this Province and Nova Scotia.

Yarmouth, N. S., October 14, 1879.

A missionary just returned says he regards John's *Amos* as the best of all the books of the Bible. It is a great variety of special cases, and is the best pain-killer in the world.

The most dangerous fevers are typhoid, bilious, malarial and gastric. These all originate in the stomach, liver or bowels, and may be easily prevented. One of *Dr. Parson's Proprietary Pills* each night for a week will drive disease from the system.

To CONSUMPTIVES.—The production of a remedy that may truly be said to offer the prospect of curing the consumptive is to give hope. "I have heard of a few cases, and of much prolonging of life in by far the greater number." The only remedy worthy of the name, which, if carefully and faithfully used, will cure the consumptive, is a great desideratum. Yet the consumptive is fully met in *Dr. Parson's Proprietary Pills*, which is a great desideratum. Yet the consumptive is fully met in *Dr. Parson's Proprietary Pills*, which is a great desideratum.

Prepared solely by J. H. ROBINSON, Pharmaceutical Chemist, 35, 37, 39, N. B., and for sale by Druggists and General Dealers.

Price \$1.00 per bottle; six bottles for \$5.

WHAT THEY SAY OF IT: A FEW FACTS FOR THE PEOPLE.—There are but few preparations of medicine which have withstood the test of time. One of these is *Dr. Thomas' Electric Oil*. Read the following and be convinced:—*Thomas' Robinson, Farmington, Conn., writes: "I have been afflicted with rheumatism for the last ten years, and have tried many remedies without any relief, until I tried *Dr. Thomas' Electric Oil*, and since then I have had no attack of it. I would recommend it to all who are afflicted with rheumatism, and I have tried it myself, and it has cured me. I have tried it myself, and it has cured me. I have tried it myself, and it has cured me."*

BRITISH AND FOREIGN.

LONDON, Oct. 13.—A St. Petersburg correspondent says that he learns from a trustworthy source that England has informed Russia that British influence must dominate in Afghanistan's foreign relations.

A fire at Samarcand, in Independent Turkistan, on the 30th of September, destroyed a great bazaar, seven caravanserais and seventy shops.

BRISTOL, Oct. 18.—The Austro-German treaty of defensive alliance signed by the Emperors of Austria and Germany, last week.

MADRID, Oct. 18.—Further inundations have occurred in the provinces of Almeria, Malaga and Alicante districts, 2,000 houses were destroyed, and it is believed that 400 persons perished by floods.

A later telegram from Murcia states that 570 bodies have already been found. It is believed that over 1,000 people have perished.

SOLLA, Oct. 18.—Amer Yakob Khan has announced his determination to abdicate, and states that he intended to abdicate earlier, but was dissuaded. He has been advised, however, to reconsider the matter, but the Amer firmly adheres to his resolution. Roberts is in consequence making arrangements for maintaining the peace in Afghanistan and carrying on the administration.

MANCHESTER, Oct. 18.—At the banquet last night Lord Salisbury also defended the Government's policy in regard to Afghanistan, the principle of which will continue to be defence, not aggression. He observed that the Liberals, in endeavoring to frame the programme, selected that policy to divide their own ranks.

LONDON, Oct. 20.—The *Daily News* understands that the Government has decided on the immediate despatch from Ali Khyel: The magazine of Bala Hissar has been blown up by British troops, and the British troops have been blown up by British troops.
