LACK OF BOOKS IN RUSSIA .- In Russia their are districts where it is said one may pass through a population of a hundred thousand people without seeing anything in the form of a book, except the Slavonic Bible or the well-worn

book of an official. According to a correspondent of the Cologne Gazette, there are in Moscow, a town of 800,000 inhabitants, only tour or five Russian book-shops worthy of the name, while there are four German shops. St. Petersburg is better off, but it has only fifty booksellers, or red and sixty uses to which the leaves, fibers, and one to every 14,000 persons. These towns are, of course, the centres from which proceed the publications that supply the rest of the Empire. Warsaw has one vender of books to every 16,-000 people, and Odessa one to every 10,000, but half of the Odessa shops are in a decayed condition. Cronstadt, in spite of its large garrison of educated officers and Finnish sailors, has only one to 20,000; and Omsk, the exile centre of Siberia, and the site of the future university, one to 27,000. Finally, Tashkend is the worst of all, having only a single book-shop to 76,000 people, and that a bad one. Taking provincial Russia, the proportion of booksellers to the town found in towns having less than 10,000 inhabitants. At the same time it may be noted that an Odessa correspondent of the Moscow Gazette

reports that the three best books on farming in South Russia are purchased chiefly by Englishmen. One bookseller told him that he sold twice as many of those books to Englishmen than he did to Russians, and that the purchasers were either tourists or men who had bought
