The Non-Conformist says that the National Society for the Education of the Poor in the principles of the Established Church of England has an average attendance at its schools of 1,471,000.

General Sherman says that the conduct of Sergeant Mason in firing at Guiteau will be dealt with in the same manner as if Guiteau had been an unoffending citizen. This is undoubtedly the right view to take of the case.

The present Princess of Egypt, the Khedive's only wife, is a cultivated and liberal-minded woman. She received a European education and her children are brought up by English governesses and in English ways.

The London and Northwestern Railway Company have at last introduced saloon-carriages open from end to end like those on our roads, which can be secured by those preferring them to their old-time compartment cars, close, stuffy, and as has been often proved, unsafe.

The banks all over the United States have, it is said, united in refusing to receive Canadian silver except at a discount of five cents on the face value of each piece, from the 20 cent piece upward. This is done in retaliation for the discount of American silver by the Canadians.

The English Government has received information that the African slave trade is still extensively carried on. It is stated that not fewer than 50,000 or 60,000 negroes are annually conveyed to the Turkish and Egyptian ports of the Red Sea, where they are disposed of to dealers from all parts of the Sultan's dominions.

A Chinese hospital has been opened at Hankow which, though wholly under native management and support, is conducted on Christian principles, and religious services are daily held in it. It was organized by the chief native assistant of the Hospital under the care of the London Missionary Society.

British law is no respecter of persons, it has often been said. This was well illustrated the other day, when Earl Granville was summoned before a magistrate and fined 10s. and costs for maintaining a smoke nuisance at one of his collieries. The noble earl has been twice before convicted of a similar offence.

The French Bishop of Arras has sanctioned a pilgrimage in honor of a Lazarus tomb shed by Jesus Christ on the tomb of Lazarus, which was sent to Pas-de-Calais from Jerusalem by the crusader Godfrey de Bouillon in the 12th century! And yet intelligent Romanists wonder at the spread of atheism in France.

During the evening church service in Chicago, last Sunday, the Inter-Ocean relatives, the preachers noticed several of his congregation dozing and one man in particular was snoring vigorously. The minister paused in his discourse, and pointing to him, said: "Will some one please stop that man's snoring? I fear he will keep the rest of the congregation awake."

The Port LaTour (N. S.) correspondent of the Liverpool Advance writes: "Diphtheria which has prevailed among us more or less during the past summer, has at present assumed proportions causing much alarm and anxiety. The skill of the doctors is somewhat taxed in dealing with it, especially every week of late since its victim. The family of G. A. Crowell, Esq., merchant of this place, has clung his wife and five children, are down with the disease. Three have already died: it is thought unless there will be steady work in the coal mines from this out for a considerable time, quite a large quantity of coal is presently being shipped to Upper Provinces.

"THE BEAK IS A BEAST," says a quaint old book, published in London three centuries ago, "whose flesh is good for mankyd; his fat is good, with ladanum, to make an ointment to heal bald-headed men to receive the hagys agayne." We know of many "balde-headedness" who would be glad to "receive the hagys agayne," but we do not desire to encourage them in the trial of bear's fat and ladanum. Far from it. We however, do not hesitate to commend Dr. J. C. Ayer & Co.'s Hair Vigor, which not only has the effect in some cases of making the hair grow on heads once bald, but cleans the scalp and restores grey and faded hair to its original color and vitality, imparting to it the glossiness and softness of youth. The evidences of its utility are too numerous and of too high a character to admit of any doubt. It requires years of study and scientific experiment to decide upon the combination of ingredients that would accomplish what Ayer's Hair Vigor now does. —The *Interior*, Chicago, Ill.

"In this present age, when the life battle is so ferociously fought, and when even upon the strongest the tag and tussle of it is so heavily, how necessary it becomes to provide for the keeping up of our reserve of sound mental and physical health by the use of such a nervous tonic and vitalizing agent as Robinson's Phosphorized Emulsion of Cow Liver Oil with Lacto-Phosphate of Lime."
