month. It is expected that there will be a large gathering of representative Christian workers. Among the English ministers who are expected to be present are the Rev. Marcus Rainsford, the Rev. Charles Spurgeon, and the Rev. Dr. Mackay of Hull. Mr. Rainsford is well known as a successful evangelistic worker; Mr. Spargeon is the son of the Rev. C. H. Spurgeon, and possesses a share of his father's power over an audience, while Dr. Mackay is known as the author of Grace and Truth, and as a tireless worker in the evangelistic field.

- No amount of polishing will make a stone a diamond. So no amount of education will make a during its progress through the years since, we are preacher of Christ. It is the heart, the soul, the led to exclaim, "What hath God wrought!" True, the soul to perish in sin? supply, that makes the real successful herald of Christ. There is too much effort at nice, fine sermons nowadays; too much attention to personal done and more progress have been made. But in popularity. We want men who are only voices crying for Jesus and his salvation.

The foregoing (from an exchange) is quite true; it is truth that needs to be remembered. But there is another side of the truth which it is not less important to have in mind. It is thus stated rarely found ready polished. Without the lapidary their true value and brilliancy cannot be determined. It is breadth, culture, a disciplined mind, a mind capable of grasping sublime truths in their purity and beauty, lips trained to speak words fitly chosen, that enables the man whose heart is filled with love to Christ and to souls to become "the real successful herald of Christ." There are a great many voices crying in the wilderness nowadays, where no one heeds them, and no one is saved because of them. It takes piety, brains and culture to make a nineteenth century minister.

- THE WESLEYANS of England found themselve encumbered with about eighty young men, more or less trained for the ministry, for whom no appointments could be found. The President of the Couference proposed to deal with the difficulty in a new way. He determined that these young men instead of being kept waiting or turned adrift, because of the lack of vacancies in the regular ministry, should be employed as evangelists in an irregular fashion. Circuits which, from one cause or another, might not be prepared to accept an additional minister, with all the responsibilities which, in the Connexional system of church order, are involved by that step, might be willing to take a young man as an evangelist and find work for him and something towards his maintenance for one year, it being understood that the young man's ministerial future would in a considerable degree depend upon the mettle which he showed in this kind of guerilla religious warfare. He announces that all the candidates on his list are now engaged, and that he has had applications for nearly twice the number! This seems to show that people dread the ruts and dead levels of conventionalism, but are prepared to respond to a challenge which gives promise of more spontaneous and wholesome efforts.

Home Missions, Foreign Missions, the education of candidates for the ministry, the proper care of the churches, Sabbath-school work, provision for the work than ever before. The Conference will probably give full consideration to them all. Chiefly is it desirable that the importance of devotion to God's service be fully appreciated by all-ministry and laity. The secret of the success of the fathers was their unqualified devotion to the work God gave them to do. They were men wholly consecrated to God; the power of the Holy Spirit rested on them and wrought by them. Like consecration is the need of the ministers and churches of to-day. Without it all our efforts will be poor and feeble. accomplishing little or nothing. O, that the spirit of consecration that characterized the fathers may rest upon us all.
