That Mary Ann Naylor came to her death by wounds inflicted by some person or persons at present unknown to us, and we are confident, after viewing the body and hearing the evidence, not otherwise. There will probably be a further investigation.

It is said that cleverly-executed-counterfeit \$5 and \$1 bills of the United States are being largely circulated. The paper in the five dollar bill is a trifle thicker than it should be, and the head of General Grant somewhat rougher. In the one-dollar counterfeits the paper is better, but the same defect exists in the head of Martha Washington as in the head of General Grant.

Friday evening a fire broke out in one of the sheds of the Lime Kilns of Chas. Miller at Pokick, above Indian-town. The sheds contained about 1000 barrels of lime which were destroyed. The buildings themselves were mere shells. The tugs Hercules and Captain were sent from Indian-town and the streams which they played on the lower sheds and coooper shop prevented the spread of the fire to them. The upper wharf was slightly damaged. The loss is heavy. There was no insurance. The fire originated in this way: One of the workmen took a lighted lamp to a barrel of oil to fill the lamp. The oil caught fire and in the course of a few minutes the building was in flames.

The doctor was sent for to pull out her teeth. He gave her ether and her husband held her hands. After a number of teeth were extracted she revived and begged them to let her go. Her husband let go her hands, but Dr. Andrews angrily said "Hold on," and some more were extracted. After-

The unfortunate inhabitants do not know which way to turn for food and clothing. They are in a sad condition, and winter has commenced. Their case is one of the severe hardships.

The police are searching everywhere for the Malay.

Are Your Pullets Laying?

This question is often asked at this season by persons keeping hens; and the answer is too often, "No!" and suppose they won't lay until eggs get cheap next spring, just my luck." It ought not to be your luck. Pullets hatched in April last should have commenced laying a month ago; while May and June hatches should be laying this month. It is not too late even now, to force the early pullets to laying in a few weeks. The late ones, even as late as July and August can be brought forward, so as to pay well, while eggs bring good prices. Strictly fresh, pullets eggs will probably retail as high as 50 to 60 cents per dozen, in Boston and New York markets, before March 1st, 1889 Mrs. L. J. Wilson of Northboro, Mass., says: "In past years, I have noticed when my pullets laid at all, they would lay a litter and then, either want to set, or mope around for ten days, often for weeks doing no laying. Last fall and winter, there was no interruption of their laying. The results were the best I ever saw in an experience of eighteen years. My thirty pullets were all just six months old, when they commenced laying. I never saw such return of eggs. In just eight weeks after they commenced to lay, thirty pullets laid 1437 eggs; which I ascribed to the use of Sheridan's Condition Powder, to make hens lay." The new and enlarged edition of the Farmers' Poultry Guide contains much information upon the above subject. L. S. Johnson & Co., 22 Custom House Street, Boston Mass., (the only manufacturers of Sheridan's Powder, to make hens lay) will send a Guide post-paid, to my address for 25 cents in stamps; or two 25 cents packs of Sheridan's Powder and the book for 60 cents, five packs \$1. A large 2 1/2 lb can of the Powder for \$1.20 postpaid and the Guide free; six cans \$5, express pre-paid. They will send a testimonial circular free to any one.
