

ADVANCE PAYMENT. Special Announcement.

We are glad to be able to say that December was a good month, both in renewals and new subscriptions. January also, was encouraging.

There are, however, some hundreds of subscribers from whom we have not yet heard. Some of them are in arrears in various amounts, large and small; but the most of them were paid up to the end of 1887.

These, we feel sure, are intending to send renewals soon. Some of them will have reached us even before these lines are printed.

The special announcement we have to make now is this: Subscriptions received prior to March 1st will be regarded as advance payment. Those not paid by that date will have to be charged at \$2.00 a year.

We greatly prefer to have the payments now at the lower rate. We trust those interested in this announcement will not fail to appreciate the importance to us and the advantage to themselves of making their payment within the specified time.

There is now a full month in which to clean up the whole list. It can be done, if each will promptly do his part. Will you?

Now for a pull all together. If each does his part the INTELLIGENCER will go into the second quarter of this year in a better condition than ever before. We strongly desire this. Not the paper alone, but the subscribers' interests, too, will be served by this. We are determined to give our readers a good paper. They can help us do this by prompt response to this call. Now is the time.

News of the Week.

NEW BRUNSWICK.

Alex Nevers has been appointed Post Master at Hartland, to fill the vacancy caused by the death of S. H. Shaw.

We learn from reliable authority that application will be made at the next session of the local legislature for an act to incorporate a company to construct a subway beneath the harbor of St. John, to connect the east and west sides of the city. Engineers of high standing, it is said have pronounced the project entirely practicable. The construction of such a subway would do away with the necessity of the ferry altogether. The question of cost is an important one, but it is stated such a work will be even cheaper than the expense of running the ferry.—Globe.

An excellent sample of manganese, resembling that being mined at Markhamville, Kings Co., has been discovered on a farm on the line of the New Brunswick Railway. The sample is in the hands of a chemist.

A Saturday despatch to the daily papers says:

The south bound express of the New Brunswick Railway, in charge of Conductor Holt, met with a serious accident, to day, at Bedell's crossing near Andover. The flange of one wheel of the passenger car in the rear of the train broke. The car left the track and after plunging along the sleepers a short distance, broke away from the train, ran down an embankment about 60 feet and fell over upon the ice in the river. It seems almost a miracle that no fatalities resulted. About 12 passengers were in the car at the time, one of whom was an elderly lady. All of them escaped with but comparatively slight injuries. Brakeman Webb was severely burned, sustaining most serious injuries.

S., which arrived at Boston Wednesday morning with a cargo of hides from Buenos Ayres, reports that he was 14 days north of Hatteras, encountering heavy northwest gales and tremendous cross seas, and on Jan. 20 the jibboom sprung, caused by the vessel jumping into the heavy seas. When off Highland Light, Jan. 26, a violent gale was encountered from the northwest, during which the vessel was blown off the coast 60 miles, having a hard time of it ever since. The vessel shipped seas continually, causing her to ice up badly and rendering it very difficult for the seamen to stand on deck.

On Wednesday morning a locomotive and flanger was sent out from Yarmouth to clear the track of the Western Counties railway to Digby. A countryman who was hauling logs with a yoke of oxen, supposing that the regular train had passed, started to cross the track with his load. The greatest land slide ever known in California has taken place on the line of the California & Oregon railroad. The road is a new one, and the recent heavy rains thoroughly soaked the fresh roadbed so that the whole country let go and came down on the track. About 100 miles of track is covered with debris. The worst slides are the divisions between the delta and the 18th crossing of the Sacramento river and between Horn Brook and Ashland. Miss Estes and Blakeley attended church together, and when they came out after service were met by young Estes and his father, both of whom began firing at Blakeley. Blakeley returned the fire, wounding the old man in the shoulder. Then the son shot Blakeley dead.
