

## 'WHAT'S KILLING US?'

## The Wonders Which the Microscope Reveals.

One of the leading scientific publications states that many people are now using the microscope to discover the real cause of disease in the system, and to detect adulterations of food and medicines.

This wonderful instrument has saved many a life. A microscopical test shows, for instance, the presence of albumen, or the life of the blood, in certain derangement of the kidneys, but medicine does not tell us how far advanced the derangement is, or whether it shall prove fatal.

The microscope, however, gives us this knowledge:

Bright's disease, which so many people dread, was not fully known until the microscope revealed its characteristics. It greatly aids the physician, skilled in its use, in determining how far disease has advanced, and gives a fuller idea of the true structure of the kidney.

A noted German scholar recently discovered that by the aid of the microscope, the physician can tell if there is a tumor forming in the system, and if certain appearance are seen in the fluids passed, it is proof positive that the tumor is to be a malignant one.

If any derangement of the kidneys is detected by the microscope, the physician looks for the development of almost any disease the system is heir to, and any indication of Bright's disease, which has no symptoms of its own, and cannot be fully recognized except by the microscope, he looks upon with alarm.

This disease has existed for more than 2,000 years. It is only until recently that the microscope has revealed to us its universal prevalence and fatal character. Persons who formerly died of what was called general debility, nervous breakdown, dropsy, paralysis, heart-disease, rheumatism, apoplexy, etc., are now known to have really died of kidney disease, because had there been no disorder of the kidneys, the chances are that the effects from which they died would never have existed.

As the world becomes better acquainted with the importance of the kidneys in the human economy by the aid of the microscope, there is greater alarm spread through the communities concerning it, and this accounts for the erroneous belief that it is on the increase.

As yet neither homeopathist nor allopathist is prepared with a cure for deranged kidneys, but the world has long since recognized, and many medical gentlemen also recognize and prescribe Warner's safe cure for these derangements, and admit that it is the only specific for the common and advanced forms of kidney disorders.

Formerly the true cause of death was discovered only after death. To-day the microscope shows us, in the water we pass, the dangerous condition of any organ in the body, thus enabling us to treat it promptly and escape premature death.

As the microscope in the hands of laymen has revealed many diseases that the medical men were not aware of, so that preparation, like many other discoveries in medicine and science, was found out by laymen, outside the medical code; consequently it comes very hard for medical men to indorse and prescribe it. Nevertheless, Warner's safe cure continues to grow in popularity and the evidences of its effectiveness are seen on every hand.

Some persons claim that the proprietors should give the medical profession the formula of this remedy, if it is such a "God-send to humanity," and let the physicians and public judge whether or not it be so recognized.

We, however, do not blame them for not publishing the formula, even to get the recognition of the medical profession. The standing of the men who manufacture this great remedy is equal to that of the majority of physicians, and the reason that some doctors give for not adopting and prescribing it—viz.: that they do not know what its ingredients are—is absurd.

Mr. Warner's statement—that many of the ingredients are expensive, and that the desire of the unscrupulous dealer or prescriber to realize a large profit from its manufacture by using cheap and injurious substances for those ingredients would jeopardize its quality and reputation; and that Warner's safe cure cannot be made in small quantities on account of the expensive apparatus necessary in compounding these ingredients—seems to us to be a reasonable and sufficient one.

The universal testimony of our friends and neighbors, and the indisputable evidence that it, and it alone, has complete mastery over all diseases of the kidneys, is sufficient explanation of its extraordinary reputation, and conclusive proof that it is, perhaps, the most beneficial discovery known to scientific medicine since the microscope revealed to us the all-important nature of the organs it is designed to reach and benefit.

## News of the Week.

## NEW BRUNSWICK.

E. A. Calder, North Head, Grand Manan, has been appointed sub-collector of customs at Campobello, vice John Farmer superannuated.

The government have appointed the various clerks of the peace throughout the province as registrars of births, marriages and deaths under the act of last session.

A statement of the exports from the port of Windsor, N. S., for 1887, published by the Tribune of that place, shows that 40 cargoes of plaster, amounting to 8445 tons, were shipped to Calais.

A despatch from Flagg's Cove, Grand Manan, Thursday, said that five vessels went ashore in the gale but that no lives were lost.

Donald Brown, charged with an aggravated assault upon his brother on the Miramichi Portage, was committed for trial.

Mr. Geo. Slipp of Queensbury brought a good lot of pork to market last week. He had five spring pigs, eight months old, which weighed respectively 277, 303, 315, 330 and 347 lbs.; and two, 19 months old, weighed one 592 lbs. and the other 597 lbs.

It is rumored that Mr. H. R. Emerson is making an effort to establish a pulp mill at Dorchester.

The potato trade at Shediac has been brisker this fall than for many years. The patent heated cars that enable produce to be moved without freezing is a great advantage, the risks are very much diminished and profits are assured.

The 800 men who have been employed on the Central Railway have been paid off. Since the work began in December last, nearly the whole line has been graded, five stations, an engine house, four water tanks and a "Y" have been built and rails laid and track ballasted over a large portion of the road. The company now have 20 flats, 12 ballast cars and two locomotives.

A few days since James Ruland's house at Norton station, was destroyed by fire. Insured for \$300.

A fire at Milltown, N. B., Wednesday night, totally destroyed a wooden building owned by George A. Boardman and occupied by George Lovejoy groceries, whose loss is \$2,000, uninsured. Daniel Sullivan, shoemaker, loss \$300; uninsured. Loss on building \$1,000, covered by insurance.

As an illustration of the growing trade between the upper and maritime provinces of Canada, it may be stated that the tonnage of vessels arriving at Quebec from the maritime provinces during the past season was 193,000 tons, being an increase of 33 per cent. over the preceding year, and an increase of 47 per cent. over the season of 1885.

FOR INFLAMMATION OF THE LUNGS AND BOWELS, give "Maud S." Condition Powders to your Cattle.

## NOVA SCOTIA.

Returns from 12 gold mines in Nova Scotia for the month of November show a total of 2,517 tons of quartz crushed, with a return of 1,055 ounces of gold, valued at \$21,100. One mill gives the enormous yield of 1914 ounces of gold from 61½ tons of quartz crushed, while another the small return of 38½ ounces from 299 tons of quartz. An association of gold miners has been formed, the annual meeting to be held in Halifax on 3rd February, 1888.

McNeally, the Saco, Me., bank thief, who was under arrest at Halifax, was set free on Sunday by order of the Saco bank authorities.

A new steamship company is being organized in Yarmouth, to be known as the Yarmouth and Shelburne Steamship Co. They propose running a line of steamers between Yarmouth Town and Barrington, calling at intermediate ports. The capital of the company is \$21,000, in 200 shares, all of which have been taken up. The boat is being built by the Burrell-Johnson Iron Company, and is expected to be ready for the route about March. She is 100 feet keel, 20 feet beam, and 8 feet depth of hold, and about 150 tons register.—Yarmouth Times.

A good deal of interest has been aroused in Halifax by the prosecution of Christopher Irving and Henry A. Walker, two Seventh-day Adventists, for performing servile labor on the Lord's day, in violation of the statute. They were proved to have worked at their trade on Sunday. The defence was that the Seventh-day Adventists are a people who religiously and conscientiously keep the seventh day, as the Sabbath, in accordance with the fourth commandment. They find no authority in scripture for keeping the first day (Sunday) and no one else can. Motion reserved judgment.

A goose said to be 23 years old owned by Peter McLean, Gulf Shore, Cumberland, died the other day as the result of an accident. It is said 230 geese were raised from this one.

It is understood the Nova Scotia Sugar Refinery company have realized a profit of between \$300,000 and \$400,000 on the past year's operations. The sales were in the vicinity of \$2,000,000 and the early and judicious purchases of the raw article, all of which was bought before the heavy advance, together with the rise in price of refined sugar, of which they reaped the full benefit, enable them to close the year with the magnificent result. A half-yearly dividend of 10 per cent on the capital stock of \$150,000 is declared.

Of the storm of Wednesday night of last week, a Halifax report says it was one of the worst storms of the year. The wind blew 40 to 45 miles an hour. Many wharves were badly damaged and vessels sustained considerable loss. The schooner Helen, with a cargo of coal, filled and sank. The schooner Kate had her port rigging carried away. The brigantine Ida Maud collided with the schooner Olivia O. Mullin and both were damaged. The Donaldson line steamer Concordia, at the deep water terminus, parted lines several times and had a narrow escape. The Yarmouth schooner Arthur, from Prince Edward Island for Boston, is a total wreck at Sandy Cove, Liverpool. The crew had a very narrow escape; her bottom is out and seven thousand bushels of potatoes afloat.

The pulp mill at Sheet Harbor, is now carrying on a flourishing business. About \$1,300 is circulated monthly and some 35 men are constantly employed.

SICK HEADACHE and Dyspepsia are quickly dispelled by Campbell's Cathartic Compound.

## OTHER PROVINCES.

St. Patrick's Hall, Quebec, was burned Wednesday night. Four men were injured by the falling roof, one, Mathew Gorman, seriously.

The half-breed commission has concluded its labors. Heads of families were awarded \$160 worth of scrip; children of half breed heads of families enjoyed the option of a certificate for 240 acres or scrip note for \$240; the original white settlers or their descendants, not being half-breeds, were given \$160 worth of scrip.

Dr. Harrison has lost no time in completing and rearranging the Manitoba cabinet, as follows. Premier Harrison, president of the council, minister of agriculture and provincial treasurer, Hamilton, attorney-general; Wilson, minister of public works and railway commissioner; Burke, provincial secretary. There were formerly five members of the cabinet, but for the present, at all events, it will be composed of four only.

Senator Schultz is to be the next Governor of Manitoba.

A consignment of turkeys sent from Ontario attracted much attention in the English market. It is believed a large trade will be created in the future.

COUGHS AND COLDS.—If everything has failed, try Allen's Lung Balsam and be cured.

## UNITED STATES.

Daniel Manning, ex-secretary of the United States treasury, died on the 25th.

The best part of Wakefield, Wis. is in ashes, about forty buildings being burned. The loss will be \$100,000, and there is little insurance. Many families are homeless and penniless.

A man said to be worth \$760,000 died in an inebriate asylum in Brooklyn a few days ago.

Miss Phoebe Couzins has announced she will be an independent prohibition candidate for governor of Missouri.

Nathan Reed of Lee county Georgia, who lived unhappily with his wife, killed her and their six children recently, then set fire to the house and killed himself.

A blizzard prevailed all over northwest Kansas, portions of Nebraska and Arkansas, Tuesday. The storm centred in the neighborhood of Topeka, Kan., moving southwesterly. Snow fell fast along the Missouri river, above Omaha, accompanied by a severe gale. Trains were delayed everywhere.

The year's return of failures reported by R. G. Dun & Co. and E. Russell & Co., of the mercantile agency, shows a decrease of two hundred in number, but the large increase of 53,000,000 in liabilities.

Yr.	Failures.	Liabilities.	Average
1886	9834	\$114,644,119	\$11.651
1887	9634	\$167,560,364	\$17.392

The New York Socialist paper, Volks Zeitung, publishes the following circular in German and English, copies being distributed along the lines of railroads and the docks:—

"FELLOW WORKMEN: The hour has come when the agencies of science must play a part in the struggle of the future. Yesterday it was the slaughter of our comrades at Chicago; to-day it is the assassination of 60,000 of our brothers on the Philadelphia & Reading railroad system. It is true the sword is the weapon of circumstances, but their victims perish all the same. Do not waste your force on "scabs"; they are only the effect of the present damnable commercial competitive system. Destroy by all agencies at your command the direct representatives of the system—the Corbans, Maxwells, Goulds. Let the torch and bomb or bullet strike them now. Let all they possess to the flames be given; hound them night and day. This strike must be made a war of the classes against the masses. Brothers, remember Chicago and your oath!"

## BRITISH AND FOREIGN.

The latest reports concerning cholera from Santiago, Chili, are alarming, there being upwards of one hundred patients in the hospital, and the death rate being very considerable. The Chilean papers all unite in declaring that the characteristics of the cholera which has been raging in that republic are of the deadliest type known to science.

Several fatal cases of Cholera at Valparaiso having been reported to the Lima authorities on November 26, a decree was at once issued ordering the closure of all Peruvian ports to vessels arriving from Chilean ports until such time as the lazaretto at San Lorenzo, in Callao bay, be made ready to receive patients. The only exception among the southern ports is Punta Arenas. Serious fears are expressed in Lima as to what will be the result of this quarantine on the provision market. The prices of flour (wheat being almost exclusively imported from Chili) and of meat, owing to the suspension of traffic, have risen, and the prospects of a further advance are ominous.

The British steamer Newcastle City from Newcastle for New York, has been lost. The crew were saved. Capt. Thornton states that his vessel was on the inside, between Nantucket lightship and the land, where the water was two or three fathoms deep whilst the steamer draws over 25 feet. His ship took bottom in a very high sea and the bottom was crushed in when she struck the hard sand. The officers and crew had much difficulty in escaping from the wreck.

The Newcastle City left Newcastle, England, Nov. 29, with a cargo of iron, cement and fire bricks, valued at \$75,000 and is fully insured. The vessel was worth \$100,000 and is only partly insured. She was built in 1882, was of 2,129 tons, and owned by C. Furness & Co., of West Hartleford, England.

A despatch from the Congo says: No news of Stanley has yet reached Bors, but no uneasiness is felt there. The steamers expected from Yamounga Jan. 20 are almost certain to bring news of the expedition. Native reports are reassuring.

The crown Prince continues to improve. His voice is losing much of its huskiness, and the distressing symptoms in the throat are diminishing. But the rejoicings of the Prince's friends are damped by the warning of some of the doctors, who say these favorable signs are fluctuations of the disease rather than steps towards recovery.

During a performance in a theatre at Carthage, Friday evening, a broker occupying a stall, committed suicide, exploding a dynamite cartridge. The concussion extinguished all the lights. The audience, panic stricken, fled and over 100 were injured.

Reliable advices from Vienna say the European situation may be expected to become more tranquil, owing to mutual explanations, either intended or already partly given.
