The Carleton Sentinel says: Work has been pushed forward at the Britton mine with a great deal of energy, and the further the progress the brighter the prospects for a rich find becomes. If the result of an assay made by a competent gentleman of this town, last week, of rock taken from the mine, be approximately correct, then indeed Mr. Britton has a bonanza. That the proprietor has full confidence that his mine is rich in silver, at least, if not in gold and other minerals, is shown in the large expenditure he is making to develop the same, and it is ardently hoped that his highest anticipations may be realized.

This year fully two-thirds of the Island produce brought over here has been for points within the provinces. Formerly all the horses went to the States; this year nearly all the Island horses brought over remained in the provinces, a great many going to Amherst and other parts of Nova Scotia.

The P. E. I. Government has been reconstructed, Hon. Neil McLeod becoming Attorney-General and leader.

On Sunday in Montreal a fire broke out in the Herald Publishing Company's building, which resulted in its complete internal destruction. The loss will reach \$15,000. The building was partly insured. The infuriated negroes immediately attacked the old man, stabbing and beating him fatally. Two white constables were sent with warrants to arrest the ringleaders in the row, but they were set upon by the negroes and one of them fatally beaten.

BRITISH AND FOREIGN.

In the French chamber of deputies Thursday Leydet offered a motion in favour of allowing the free manufacture of matches. At present a company pays the state for possession of the monopoly of the business. Rouvier, minister of finance, proposed to withdraw the company's concession and establish a direct government monopoly. This proposal was rejected, 312 to 236, and Leydet's motion was carried 292 to 232. The defeat of the government caused a sensation, and is looked upon as a bad augury for the ministry.

The Emin Pasha relief committee received a despatch to-day from Stanley himself announcing his arrival at Mywamba and stating he expects to reach Zanibar in four or five days.

A London special to the Herald says it is stated in diplomatic circles that Dom Pedro was himself the prime mover in his own deposition. He had endeavored to resist his son-in-law's active hostility to the anti clerical party, and had other reasons to be dissatisfied with him. Furthermore, his Majesty was by no means ignorant of the popular movement, and he felt that if he should not outlive the Republic advance his daughter would be unable to cope with it, particularly under the pernicious guidance of her husband. He, therefore, like a wise and philosophic monarch, anticipated the inevitable, and thus at last saved the prospective bloodshed which he felt would have come with resistance, if not in his time, certainly in that of his successor. Hence his easy and calm acceptance of the situation.

Rumors are afloat that a revolution is in progress in Cuba. So far, it has been impossible to trace these to any definite source. The fact that there is a strict censorship of news despatches at Havana makes it possible for a revolutionary movement to get under way in the island before definite intelligence can reach the outside world.

A later despatch says rumors of a revolution existing in Cuba are without foundation. The island, politically, is entirely tranquil.

Senor Castelar, the eminent Spanish statesman, says the establishment of a republic in Brazil is simply in accord with the enlightened ideas of the century, and will have a marked effect in liberalizing the Portuguese monarchy. It will, he says, have little effect in Spain, where the government is very liberal and is of its own accord approaching a point where republicanism will assert itself as a matter of course by universal consent of the people. The sway of the autocracy on the old continent, he says, is over, and he thoroughly believes that in fifty years Europe will be republican from end to end. These great changes, he thought, would be accomplished without war.

Senator Valente, Brazilian minister at Washington, has received a cablegram from Rio Janeiro saying that all the provinces had signified their adherence to the republic and provisional government, without resistance or protest. The government has extended the right to vote to all citizens, except those who are unable to read or write.

Use after each meal Scott's Emulsion; it is as palatable as milk. Delicate people improve rapidly upon its use. For consumption, Throat affections and Bronchitis it is unequalled. Dr. Thos. Prim, Ala. says: "I used Scott's Emulsion on a child eight months old; he gained four pounds in a month." Put up in 50c. and \$1 size.

JOY IN JASPER.

WHAT IS WANTED.

Burdock Blood Bitters meets every indication expressed above.

NO EXAGGERATION.

Mrs. Jas. G. Ternent, residing at 34 Daly Street, Ottawa, thus expresses herself:—"I am pleased to state that Nasal Balm has already relieved my catarrh to a very great extent. I have not used one bottle, but the nose and throat droppings from the head and throat have almost ceased. I breathe easy now; get better sleep and altogether feel and appreciate the wonderful virtues of the 'Balm.' Its merits cannot possibly be exaggerated for catarrhal troubles and as a cure I believe it to be genuine."
