

## News of the Week.

## NEW BRUNSWICK.

Dr. T. W. Musgrove, leaves for British Columbia, where he contemplates making his future home. For some time past the doctor's health has been seriously affected by this climate, and it has become necessary for him to seek the less humid slope of the Pacific. Dr. Musgrove's departure will be deeply regretted by all who have come in contact with him on account of his kindness and geniality. His large practice will be deprived of the aid of a skillful and attentive physician while many local movements will miss the support which he has extended to them. Mrs. Musgrove and family will remain in St. John for a time.

The will of the late James Lamb, probated before the Kings County Judge, contained only four or five lines written on a piece of note paper, but it bequeathed \$50,000 to his wife and son, who are to manage his estate. The witnesses to this remarkably brief but important document are Stipendiary Magistrate Wallace and Brown Harrison of the savings bank.

The *Telegraph* says, The square rigged arrivals for the week were three steamers and one ship.

Vessels in port, unclesared, numbered seven steamers, of 11,200 tons; six ships, of 9,146 tons; six barques, of 6,016 tons; two barquentines, of 560 tons; one brig, of 344 tons; one brigantine, of 344 tons, and 28 schooners.

Dr. T. W. Musgrove, just before leaving for British Columbia, was presented with a handsome gold headed cane by a few friends. Rev. G. A. Hartley made the presentation with a few appropriate remarks, to which the doctor replied in a fitting manner.

Mr. R. N. Knight, registrar of vital statistics for the city and county of St. John has received returns for 196 births, 25 marriages and 75 deaths during the month of July.

The small sloop-rigged boat sighted by Capt. Campbell of the Anchor line steamship Anchorage about 500 miles from Boston, carrying a single occupant, is undoubtedly the Nickelson, with C. T. Rogers, of Mansfield, as its occupant. The little boat was some distance from the Anchorage, and as near as Capt Campbell could make out, the name was the Nellie Gordon, of Boston. Mr. Rogers had been thinking over the possibilities of a solitary ocean voyage, and in the latter part of April decided to try his luck.

The Times says that the population of Moncton is now probably in excess of 8,000. The new buildings erected average about 100 each year.

Ballasting and rail laying has begun between Bathurst and Campbellton, about 60 miles of rails will be laid on this division this season.

A number of the station houses on the western division are being painted and put in better condition.

Moncton sugar refinery stockholders have received notice of a dividend of 10 per cent. for the half year, payable this month. The refinery is not working just now, awaiting the arrival of a cargo of raw sugar per bark Victoria, from Havana, now due at St. John.

Only two candidates were nominated for mayor of St. John, Hon. T. R. Jones and W. A. Lockhart.

The Messrs. Humphrey are preparing to build on an addition, 100x30 feet, to their mill at Humphrey's Mills, in Moncton parish. The new building will be of brick, and will increase the capacity of the mill 50 per cent. The stone for the foundation is now being quarried on the premises. This factory now gives employment to 44 persons. Previous to the introduction of the national policy it was simply a country carding-mill.—*Times*.

## NOVA SCOTIA.

It is expected, says a Nova Scotia paper, that upwards of 30,000 bushels of cucumbers will be raised by the Gaspeau farmers. There are two pickle factories in that vicinity.

A sad and fatal accident happened at Guysboro, N. S., by which an estimable farmer named Edmund Dillon lost his life. While the deceased was in the act of securing to the place from which he had broken loose a large Holstein bull, owned by the agricultural society, the brute became, from some unknown cause, enraged at his keeper, and before any assistance could be rendered he had knocked down and gored to death his unfortunate victim. Mr. Dillon was about seventy-four years of age, a native of Kilkenny, Ireland, and has been for sixty years a resident of Guysboro, Riverside and vicinity.

Beginning Aug. 1st and ending Aug. 6th, inclusive, there will be a Canadian medical excursion from Nova Scotia, New Brunswick and the upper provinces to Banff, N. W. T., good to return up to Oct. 6. Fare, including Pullman, meals, a double berth for each person, and four days' board in any hotel at the Banff hot springs, \$108.65 for the double journey.

George H. Lovitt of Yarmouth has just completed arrangements with Oliver Pitfield for the construction of a barkentine in this city. The vessel will be built at Courtney bay and will be about 600 tons register. Work on the vessel will be begun at once.

At 12.15, on the 29th, a fire was observed in the older shed, Acadia mines, which contained some 5,000 tons of coke, and at one time it seemed that the loss would be very large, but the wind being favorable, and the men working hard, the loss will be comparatively small, probably not over \$5,000.

A despatch to Consul General Phelan announces the seizure at Guysboro of the American schooner Vidette. There are no further particulars.

A despatch received in the city Saturday evening reported that all the fireworks for the Halifax carnival had been destroyed early Saturday morning. From the account received, it appears a lamp exploded in the express car which contained the fireworks and immediately the flames spread with the result that the fireworks caught and Mr. Rogers was burned to death in his efforts to save the goods. A man named Gauren who was in the same car, escaped badly burned. The accident occurred between Montreal and Quebec.

The bark Zenobia, which arrived at Parrsboro was struck by lightning in the Gulf Stream, carrying away the top of the topgallantmast and striking the vessel in two places and doing serious damage.

A survey of the proposed route of the Hants Central Railway is to be commenced immediately. W. H. Tremaine, C. E., of Truro, and Prof. Butler of Kings college will respectively have charge of the eastern and western divisions. As the Maitland meeting of the company some \$10,000 was paid in by the stockholders to defray these preliminary expenses.

Messrs. Royal and Leonard Houghton of Hall's harbor, while engaged in drifting for herring early last week, succeeded in securing a hugeshark the length of which was ten feet and weight 1,500 pounds.

The schooner Genius is loading square timber at Moncton for O'Neill and Campbell for use in their contract on the Digby and Annapolis railway.

## OTHER PROVINCES.

The Dominion government have men blasting rocks at the pitch of Grand falls and where the great jam of logs was lost fall.

A telegram was received at the department of fisheries today from Victoria says that the utmost indignation prevailed here over the seizure of the Black Diamond by the American cutter Rusk, and that a public indignation meeting is called to protest against a continuance of the outrages. The Black Diamond had a hundred and thirty skins on board and was immediately after her capture put in charge of a prize crew and sent to Ounaslaska. She was seventy miles from land when seized.

The population of Montreal and Toronto are approximately equal, though Montreal has somewhat the greater number of people. But in June last there were 718 deaths recorded in Montreal against only 158 in Toronto. Nearly 60 per cent of the deaths in Montreal are of children under five years of age. The infant mortality in our largest Canadian city is something alarming as well as discreditable.

The St. Lawrence Sugar Refining company have decided to close down their factory at Hochelago for two or three weeks. It appears that the demand for sugar is unusually light, and that the prices have fallen a quarter of a cent. per pound. Yet notwithstanding this reduction the retailers are holding off buying, in hopes of a still another reduction. In some cases it is alleged that certain grocers have borrowed sugar rather than buy. Consequently upon this dearth of buying the St. Lawrence Refining Co. have decided not to continue laying up stock, as sugar always deteriorates in value from being kept.

Sir John Thompson has signed a warrant for the extradition of Burke, held at Winnipeg for complicity in the Cronin murder, in Chicago.

An old country Frenchman, Albert Aubert, was arrested in Montreal on charge of obtaining \$1,000 under false pretences. He pretended to be a chemist's agent and drew the amount in commission on bogus orders.

The city of Montreal is infested with boy burglars, and detectives claim that there is a gang of at least 100 who are practising the art they read of in dime novels. Yesterday, five of them were sent to the reformatory for five years and to-day six others were arrested.

## UNITED STATES.

The British S.S. "Daventry" which arrived at New York a few days ago is the second of the new kind of freight steamer having great stowage capacity. She is built of Siemens Martin steel, with patent cellular bottom and a peculiar arrangement of the frames that gives an unusually roomy hold. The cabin is under the bridge. It is a round iron turret. Its advantage is that it gives no hold to a heavy sea, which may wash over the ship. The "Daventry" has new and important improvement in marine engines. Hitherto ocean steamers have been obliged to use more or less sea water in their boilers. In the "Daventry" the salt water is pumped into an evaporator supplied with steam from the intermediate jacket of the boiler. By a patented appliance it is rapidly distilled in the evaporator and sent on into the boiler absolutely pure water and at a temperature of 170 degrees. Minute records of the performance of the machine show an average consumption of coal of twelve and one-half tons in twenty-four hours, an indicated horse power of 950 and an average speed of nine knots.

Nine persons were poisoned in Burlington, Wis. July 30, by eating dried beef shipped to local dealers by a Chicago firm. Four of the victims are precariously ill and the others are on the road to recovery.

Chief Hubbard, of the Chicago police is at Winnipeg to take back Burke. He believes Burke is one of the principals in the murder of Dr. Cronin, and expects to make out a strong case against him.

Forest fires, which have been prevailing in Montana for a week, show no signs of abatement. From Helena, west, north and south, a great black

cloud of smoke hangs over the country and for six days the sun has not been seen. It is estimated the damage is half a million dollars. In the neighborhood of the great camp of Phillipsburg the damage is immense, while the town of Granite is in danger of being destroyed. The mountains above the city are all ablaze, and the heat and stifling smoke are almost unbearable.

## BRITISH AND FOREIGN.

Advices from Toski are that Lieut. Dagular with a detachment of Egyptian cavalry and a company of the 11th Sudanese regiment defeated the Derivishes south of Anaby. Seventy Derivishes were killed and eighty taken prisoners. The Egyptians lost three killed, two of them officers.

Thirty persons were killed and 80 injured by the recent earthquake on the island of Kiousiou.

Miss Nellie Flavin, a Liverpool girl, is the only woman who has yet volunteered to devote her life to the lepers at Kalawao. She passed through New York several weeks ago on her way to the settlement. She is said to be an accomplished pianist and of an amiable energetic and resolute disposition.

A despatch from Glasgow at noon, stated that Cross' extensive chemical works were burning. McFarlane's distillery was threatened. A quantity of vitriol from the chemical works ran into the canal. The damage has already amounted to \$20,000.

In the house of commons on the 30th the royal grants bill passed its first reading without division.

Two French men-of-war have been ordered to proceed to the Island of Crete.

The Congo Railway Co. will be regularly constituted at Brussels. Of the proposed capital of 25,000,000 francs the Belgian state has subscribed 10,000,000 francs and the founders 5,000,000 francs. Public subscriptions will soon be opened at Brussels, London and Berlin for 10,000,000 francs.

The Island of Kiou Siou was shaken by an earthquake. A great number of people were killed and a vast amount of property destroyed.

Cretan Mussulmans having burned over 100 houses in a village near Canea the insurgent leaders have appealed to Greece for assistance.

The schooner Black Diamond arrived last evening from Behring Sea.

## EXCELS ALL OTHERS.

I used one bottle of Burdock Blood Bitters for constipation and loss of appetite and it cured me. I would not do without it at six times the price for it excels all others.

WILLIAM WALTON,  
Galt, Ont.

## Food for Consumptives.

Scott's Emulsion of Cod Liver Oil, with Hypophosphites, is a most marvelous food and medicine. It heals the irritation of the throat and lungs, and gives flesh and strength quicker than any other remedy known. It is very palatable, having none of the disagreeable taste of the crude oil. Put up in 50c. and \$1 size.

The great demand for a pleasant, safe and reliable antidote for all affection of the throat and lungs are met with in Bickel's Anti-Consumptive Syrup. It is a purely Vegetable Compound, and acts promptly and magically in subduing all coughs, colds, bronchitis, inflammation of the lungs, etc. It is so palatable that a child will not refuse it, and it is put at a price, that will not exclude the poor from its benefits.

## Do You Drink Ice Water?

That cool refreshing drink in warm weather are delicious is undeniable. That drinking ice water in copious draughts when a person is overheated is injurious, not to say dangerous, is also undeniable. But that the free drinking of water in some form in hot weather must be avoided, is undeniable, and is one of the greatest popular errors extant. When a person is perspiring freely from every pore, a vast amount of water is drawn from the body, which must be re-supplied, or great injury is being done to the physical health, and the foundation of some of the worst forms of kidney disease is being slowly but surely laid. Why! someone will exclaim, that is just what causes kidney troubles, drinking water freely which contains so much lime. Wrong again! So long as the water drunk is freely carried through the system, and converted in its passage to the naturally acid reaction of the urine and perspiration, no danger can occur by deposits of urea or lime in the kidneys and bladder, because they remain perfectly in solution, and are carried out of the body instead of remaining in it. Literally, they are washed out of the body by the copious draughts of water (that most perfect of all known solvents), same as a series of pipes are "flushed" with water to clean them. A clean body is never diseased. Do not drink ice cold water, but pure cool water; a little lemon juice will improve the effectiveness. Plain soda water with a little acid is also excellent. If from drinking too much ice water you have stomach cramps, or are "water-logged," as it is called, or are attacked with Cholera Morbus, Summer Complaint, Diarrhoea, or Dysentery, do not resort to alcoholic stimulating drinks, which irritate rather than soothe and allay the inflammation which has caused the trouble; but adopt the practice of taking daily just before retiring, during July and August, one teaspoonful of Johnson's Anodyne Liniment in a little sweetened water, which will prevent all such attacks and ill effects from ice water. In fact, a little pamphlet sent free to anyone, by L. S. Johnson & Co., Boston, Mass., contains a vast amount of information about treating those Summer troubles.

Pimples, pustules, rash, eczema, all humors and all diseases of the skin, piles, ulcers, sores and wounds, chapped hands, roughness of the skin, are quickly healed and cured by the use of Baird's French Ointment. Sold by all dealers.

For Cholera, Cholera Infantum, Summer Complaint, Cramps and Pains in the Bowls, there is no remedy that can be more relied upon than Kendrick's Mixture, for children and adults.

## HELP WANTED.

By all who suffer from dyspepsia, biliousness, sick headache, jaundice, liver complaint, rheumatism, dropsy, etc. Lose no time in procuring Burdock Blood Bitters, nature's regulator and tonic. It is a prompt and permanent cure for all diseases of the blood, liver, kidneys, bowels and stomach.

That distention of the stomach which many people feel after eating, may be due to improper mastication of the food; but, in most cases, it indicates a weakness of the digestive organs' the best remedy for which is one of Ayer's Pills, to be taken after dinner.

The vicissitudes of climate are trying to most constitutions, especially to people having impure blood. For all such (and they constitute the majority), the best safeguard is Ayer's Sarsaparilla, the use of which cleanses the blood and strengthens and invigorates the system.

## AN OLD FAVORITE.

That has been popular with the people for thirty years is Dr. Fowler's Extract of Wild Strawberry for all varieties of summer complaints of children or adults. It seldom or ever fails to cure cholera morbus, diarrhoea and dysentery.

Their gentle action and good effect on the system really make them a perfect little pill. They please those who use them. Carter's Little Liver Pills may well be termed "Perfection."

Derangement of the liver, with constipation injures the complexion, induces pimples, sallow skin. Remove the cause by using Carter's Little Liver Pills. One a dose. Try them.

There are many forms of nervous debility in men that yield to the use of Carter's Iron Pills. Those who are troubled with nervous weakness, night sweats, etc., should try them.

## ON THE INCREASE.

So increasingly prevalent have scrofulous diseases become that we call the attention of our readers to the best blood purifier and alterative known, viz., Burdock Blood Bitters, which unlocks all clogged secretions and removes all blood diseases from a common pimple to the worst scrofulous sore.

Thomas Robinson, Farnham Centre, P. Q., writes: I have been afflicted with rheumatism for the last ten years, and have tried many remedies without any relief. I got a bottle of Dr. Thomas' Electric Oil, and found it gave instant relief, and since then have had no attack. I would recommend it to all.

A. M. Hamilton, Warkworth, writes: For weeks I was troubled with a swelled ankle, which caused me much pain and annoyance. Mr. Maybee of this place, recommended Dr. Thomas' Electric Oil for it. I tried it, and before one bottle was used I was cured. It is an article of great value.

## A BABY IN DANGER.

My baby was taken very bad with diarrhoea, nothing did any good until I tried Dr. Fowler's Extract of Wild Strawberry. I am certain nothing equals it, and could not do without it in time of summer complaint and diarrhoea.

Mrs. A. L. BUIE,  
Shell River, Man.

FOR DELICACY AND richness of flavor use "Royal Extracts."

USE "MAUD S." CONDITION POWDERS, for Horses, Cattle, Sheep, Hogs and Poultry.

Mr. Joab Scale of Toronto, writes: "A short time ago I was suffering from kidney complaint and Dyspepsia, sour stomach and lame back; in fact I was completely prostrated and suffering intense pain. While in this state a friend recommended me to try a bottle of Northrop & Lyman's Vegetable Discovery. I use one bottle and the permanent manner in which it has cured and made a new man of me is such that I cannot withhold from the proprietors this expression of my gratitude."
