

Highest of all in Leavening Power.—Latest U. S. Gov't Report.

Royal Baking Powder ABSOLUTELY PURE

Parliament.

The debate on the Budget has occupied a good deal of time, members seeming disposed to make speeches, notwithstanding the lateness of the session and the warm weather.

Among the notices of motion was one by Mr. Kaulbach for correspondence and reports relating to sawdust on the LaHave river, Lunenburg county, with the object of relieving that stream from the operations of the sawdust act. Mr. Kaulbach pointed out the provisions of the law. The law had been suspended on the Ottawa, and reasons were stronger for its suspension on the LaHave, where the lumber establishments were of such character as to make restrictions more onerous than they would be if imposed on Ottawa lumbermen.

The minister of marine said the question was one of tremendous importance. He was satisfied by the results of a full enquiry that the pollution of streams by the product of saw mills must be detrimental to the fishing interest not only on streams but in the open sea. The guarding of streams in this country had largely preserved our fishery. In the United States, rivers and coast waters, once teeming with fish, had been so polluted that fish had disappeared. Mr. Tupper admitted that his course in enforcing the law was unpopular in many places. He admitted that it met the hostility of the lumber industry. Nevertheless he was convinced that his course was for the public welfare. Some members complain that returns they move for are not brought down promptly. The explanation may be found in an occurrence, when Mr. Trow made a motion of this kind which has been on the order paper for some time. It asked for every sort of information respecting several classes of contracts from the date of confederation down. Hon. Mr. Bowell stated that he had taken means to find out what would be the dimensions of the returns, answering these specific questions. It would deal with 177 contracts containing over 7,000 pages of manuscript, 1,200 pages of tenders, 11,000 pages of specifications, 80,000 pages of correspondence and 100,000 pages of extensions, in all 200,000 pages requiring a force of men several months and costing from \$29,000 to \$34,000. Mr. Trow concluded to reduce his inquiry.

The house went into committee on Mr. Burdett's bill for the prevention of frauds, such as seed grain, hay, pork, lightning rods and shoddy swindles. Speaker White made a strong protest against the clause making it criminal to sell seed grain for double the market price. He thought farmers who hold over specially good grain for seed ought not to be sent to the penitentiary for selling oats at fifty cents when the market price was twenty five. The minister of justice suggested in the bill, which was necessary, the clauses objected to might if it were thought proper be amended. The bill was referred back to the committee.

Those who believe that Dr. Sage's Catarrh Remedy will cure them are more liable to get well than those who don't. If you happen to be one of those who don't believe, there's a matter of \$500 to help your faith. It's for you if the makers of Dr. Sage's remedy can't cure you, no matter how bad or how long standing your catarrh in the head may be.

The makers are the World's Dispensary Medical Association, of Buffalo, N. Y. They are known to every newspaper publisher and every druggist in the land, and you can easily ascertain that their word's as good as their bond. You wind your watch once a day. Your liver and bowels should act as regularly. If they do not, use a key. The key is—Dr. Pierce's Pleasant Pellets. One a dose.

News of the Week.

New Brunswick.

The striking mill men of St. John have organized a Union. They seem determined to resist the demand for a ten hours day.

A young man, book keeper for Arthur Everett, St. John, has been discovered embezzling funds. He had taken about \$500 in a few months.

It is reported that Mr. Gibson contemplates the erection of a large shingle mill on the western side of the Nashwaak, above the old bridge, containing machinery and apparatus for eight shingle cutters.

The military authorities have agreed to give this city the strip of land claimed on George street on condition that the city pay them a shilling a year for rent which the council has accepted.

Thos. Ames of Oak Hill, Charlotte Co., who has reached the age of 104 years, and who has been laid up all winter with a gripe, has so far recovered his strength that he was able to hoe two rows of potatoes the other day by way of exercise.

A mechanic of Portland has patented an invention for converting sawdust and other waste from mills into a wood pulp of peculiar strength and quality that can be utilized for nearly every purpose in which wood is used.

Rev. Dr. Sutherland has decided not to accept the presidency of Mount Allison university.

Mr. James H. Crockett, has entered an action in the law courts against Messrs. Robinson and O'Brien, M. P. Ps, for Northumberland, for sitting and voting in the House of Assembly while having an undischarged contract with the government. The law provides that any one guilty of this offence shall be liable to a penalty of two hundred dollars for every day he sits in the assembly. Dr. A. A. Stockton, M. P. P., has been retained by Mr. Crockett.

As Daniel Dwyer, of Fairville, was driving down King street the bolt which connects the shafts with the wagon came out, and the horse ran away. It made the circuit of the market square and brought up among a number of teams, where it was easily secured. Dwyer was thrown heavily to the ground, the side of his face striking on the street car track and being badly cut. He was assisted into Parker's drug store, where his cuts were dressed, and in a short time he was able to start for home.

Charles Gotro, 22 years old, was drowned off Barachois, near Shediac, on Thursday while fishing mackerel. Gotro was throwing a line out, when the boat capized. Three occupants of the boat clung to the bottom until a breaker struck the boat and knocked Gotro off, when he sank and was seen no more. The other men were rescued by parties who had seen the accident from the shore.

Nova Scotia.

The Nova Scotia sugar refinery, at Richmond, has declared a half yearly dividend of 2 1/2 per cent.

Moir, Son & Co., whose bakery and biscuit factory was destroyed by fire, will rebuild on the old site.

Three men left Daven on Wednesday for Canso with bait. A southeast breeze prevailed at the time. The men never reached their destination and have not been heard of since. The oars of their boat were picked up next day. They were undoubtedly drowned the supposition being that their boat was upset.

Other Provinces.

The large convent, two miles from St. Hilaire, P. Q., on Richelieu river, in charge of nuns, was burned to the ground Wednesday. No lives were lost. Damage \$30,000.

A despatch received by the Quebec government from Dr. Fiset, who was sent down to the Labrador coast to look after a gripe, fully confirms the first reports as to the ravages of that malady.

Crop reports from Manitoba and the Northwest territories are very favorable, and the indications are that the yield of wheat will be as large, if not larger, than of '87.

Last week the Steamer Danube arrived at Victoria, B. C., with the first catch of seal skins, 18,000, all secured outside of Behring Sea. Seals are reported as plentiful as ever.

Craig & Sons, electricians of Montreal have assigned. The liabilities are \$72,000. The creditors are Canadian.

Dun & Russell report 25 Canadian failures the last seven days, and 22 for the corresponding week last year. Bradstreet reports 33 for the past week.

Arthur Olmstead, Grand Trunk railway freight agent at Swansea, was arrested charged with embezzling \$1,070 from the company.

Miss Jane Miller, living in the parish of St. Constant, while returning to her father's house from milking the cows had to cross the Grand Trunk railway and in doing so was struck by a passing freight train and instantly killed. She was 30 years of age.

Cholera morbus and diarrhoea yield to Johnson's Anodyne Liniment taken often internally.

United States.

Four murderers were executed by electricity in New York on the 7th inst.

B. R. Priestly's five story carpet mill at Washington was burned last week. Loss \$100,000.

It is reported that the Circuit Court of the Chickasaw Nation has recently granted divorces from their wives to three prominent Indians, and that in each case the discarded wife was a white woman.

Eighty-one city laborers of New Bedford, Mass., were discharged by order of the mayor, in compliance with a law that all employees of the city must be naturalized citizens. Work on roads and sewers is consequently delayed.

Ameer Ben Ali, or Frenchy, the slayer of Carrie Brown in the East River hotel, was sentenced to state prison for life.

The Leary log-raft is again in Dutch island harbor, having gone but a short distance along the shore, when it was decided to return, owing to the sea.

It is estimated that by the middle of summer at least 15,000 men will be employed upon the several exposition buildings in Chicago.

Up to the present time lumber manufacturers along the Kennebec have managed to keep their mills running up to about their full capacity, but a leading operator informs me that the time has come when, owing to the dull market, there must be a curtailing of the amount sawed. The manufacture cannot be continued at the present rate with so slack a demand. There are some 150,000,000 ft. of logs of last winter's cut in the river, the drying having been very clean. If owing to the weak market the output of manufactured lumber is cut down then next season's cut of logs will most likely be correspondingly small, so that fewer sticks will come down the river next summer than this.

Four thousand women are employed in the various government departments at Washington. They get good salaries, have easy hours and do good work.

Sir Edwin Arnold is coming to America next October with his son and daughter. He has been engaged to deliver a series of lectures on Japan.

What is now carried from Chicago to Buffalo, 800 miles by water and 500 in an air line for one cent a bushel, while the lighter grains are proportionately lower. For cheap transportation this is probably without parallel.

British and Foreign.

The election in Carlow, Ireland, resulted, Hammond (McCarthyite) 3,755 Kettle (Parnellite) 1539. This district was claimed by Parnell as his stronghold.

A special from London says: Permission has been obtained by the Imperial Federation League to erect a monument in St. Paul's cathedral to the late Sir John Macdonald. Lord Brassey has consented to act as treasurer to the fund to be subscribed to pay for the erection of the monument.

The largest number of murderers ever executed at one time by law will shortly be put to death in Mexico. Sixty-three men who have taken human life, and have been condemned to pay the penalty of their crime with their own, will be shot by a company of militia. The convicted criminals make the hours hideous with their shrieks and incantations.

At a meeting of Baring Brothers the firm was shown to be doing a good, sound business, but the figures are very small compared with the old firm's accounts.

The Chronicle's Calcutta correspondent says that owing to the partial failure of the monsoon ten million people are threatened with famine in Madras.

Carmen Sylva, the lovely and accomplished Queen of Roumania, has been scolded by her husband and is banished from the court because of her prominence in a royal love affair which is disturbing the court of her husband. The successor to King Charles is to be Prince Ferdinand of Hohenzollern, Sigmaringen. Prince Ferdinand has fallen in love with Mile. Vacaresco, the literary assistant and companion of Carmen Sylva. But, unfortunately Mile. Vacaresco is not of royal blood, and the union is discouraged. Carmen Sylva, however, permitted the poetess, in her nature, to be stronger than the Queen, and her sympathy for the lovers prompted her to help on a match which could not find favor in the eyes of any or the royal family.

The American barque Snow Queen, from Halifax June 14, arrived at Newcastle-on-Tyne July 9, Capt. McDougall reports that he rescued on the banks two Newfoundland fishermen, named Olsen and Brown, whom he found adrift in an open boat. They had been five days without food when taken on board the Snow Queen.

Mr. Spurgeon is weaker and delirious. A great strike of Belgian miners, in progress the last 70 days, ended July 9. The council of Knights of Labor decided in favor of the general assumption of business, and 4,500 men went to work; the remainder of the men on strike will resume work.

Safe, Sure, and Painless. What a world of meaning this statement embodies. Just what you are looking for, is it not? Putman's Painless Corn Extract—the great sure cure for corns—acts in this way. It makes no sore spots; safe, acts speedily and with certainty; sure and mild, without inflaming the parts; painless. Do not be imposed upon by imitations or substitutes.

Literary Notes.

The July Wide Awake is a good number for hammock and veranda reading for old and young. A Dreamland Lantern, The Rogue's Path, The Anti-Boy Picnic, By Boston Grasshopper, The Wrong Muscles, Amy Robbert's Embroidery at Leicester Hospital, How Teddy Morris made the Weather, My Sea Daisies (natural history article), Pussy in Private Life, Five Little Peppers Grown Up, The Chimney Swallow (anecdotal natural history paper), Miss Matilda Archambau Van Dorn, Marietta's Good Times, How One Mother is being Brought Up, A Midnight Ride, Grim the Corn-Thief. "Guess God won't be angry wis wees," are among the contents. Wide Awake is \$2.40 a year. A specimen (back number) will be sent on receipt of 5 cents. D. Lothrop Company, Publishers, Boston.

The issue of the Dominion Illustrated, for July 4th, has an account of a fishing trip on the north shore of Lake Superior, the wild, grand, and picturesque region opened up by the O. P. R. Miss MacLeod contributes a charming article on Balmoral and the Highlands, illustrated by views of the Queen's favourite residence. "My first Twenty-four Hours in a California Mining Camp" recalls the famous days of the 'forty niners. There are many fine engravings and much bright reading matter in this issue. The Dominion Illustrated is a delightful weekly visitor.

A Portrait of Horace Greeley forms the frontispiece of The Century for July to accompany a hitherto unpublished address by Mr. Greeley on Abraham Lincoln, which, will be read with particular interest. The paper in the California series is one of peculiar interest, being on account of the experience of a girl in making the trip "Across the Plains in the Donner Party" in 1846. The record of these terrible occurrences is told with simplicity, and with an attractive touch of pathos. The paper is copiously illustrated. An important paper in the series on Municipal Government, describes the government of Paris, which he calls the "Typical Modern City." A paper on "General Miles's Indian Campaigns," covers the numerous campaigns of General Miles since '74, including the operations that culminated in the death of Sitting Bull. A paper of popular astronomy is, "A Lunar Landscape," with pictures from negatives taken at the Lick Observatory. "Tao: the Way," deals with interesting questions of European, American, and Japanese art. The poetry of the number includes an illustrated poem, "The Drummer," and other contributions. In the editorial department the series of papers on financial topics is continued. Other editorials are "The New York of the Future" and "Journalists and Newsomongers" Again.

The July St. Nicholas has an abundance of the short and bright articles which children are so fond of reading. "Rescued by the Enemy," deals with the defeat of a party of marauding "Whaleboat-men" in Revolutionary days, by the timely arrival of some British Marine officers. It is illustrated. "Storm Bound Among the Clouds," describes a perilous climb across a terrible icy slide. Two more of the humorous "Swimming-holes Stories," will delight the boys. In the "Tongalo Tournament" we hear the fate of a commercial enterprise to Corea; but we feel sure that few readers will give implicit faith to the story. The serials are full of incident. "A Suggestion" to the Weather Bureau will win indorsement; "A Song of Folly," is illustrated with a clever pencil. There are many more nuggets, including a sunshiny sketch of a little girl going to post a letter.

"Who was Peter?" asked Texas Sunday-school teacher. "Peter was a brick." "Why, Johnny, I'm surprised at you!" "It says so in the Bible, anyhow. I read it the other day. It says, 'Thou art Peter; and upon this brick I'll build my church.'" "Fock, Johnny, rock, not brick." "Well, I knew it was some kind of building material."

One more survivor of the Balacava charge, Lieut. Col. Edmond D'Arcy Hunt, has just died in England.—Only two English officers who fought at Waterloo were alive to celebrate the 76th anniversary of that memorable battle. They were Gen. George Whicheote, who is 97, and Lieut. Col. William Hewett, 96.

People who believe in the heredity of crime will find some interesting evidence on there side in the history of a Charles Ford, who was hanged for murder in Illinois last week. His father was hanged for the same crime before him, and his brother likewise. His mother's brother is now doing time at Sing Sing for train wrecking, and his sister has run a thieves' paradise in New York for several years. She was chased out of Chicago, and her second husband is in the Indiana state penitentiary. There are numerous other relatives in the same line of business, but perhaps this record will do.

BAD ECZEMA ON BABY

Head one solid sore. Itching awful. Had to tie his hands to cradle. Cured by CUTICURA.

Our little boy broke out in his head with a bad form of eczema, when he was four months old. We tried three doctors, but they did not help him. We then used your CUTICURA REMEDIES, and after using them eleven weeks exactly according to directions, he began to steadily improve, and after the use of them for seven months his head was entirely well. When we began using it his head was a solid sore from the crown to the eyebrows. It was also all over his ears, most of his face and small places on different parts of his body. There were sixteen weeks that we had to keep his hands tied to the cradle and held them when he was taken up; and had to keep mittens tied on his hands to keep his finger nails out of his sores, as he would scratch if he could in any way get his hands loose. We know your CUTICURA REMEDIES cured him. We feel safe in recommending them to others. GEO. B. & JENETTA HARRIS, Webster, Ind.

Cuticura Resolvent

The new blood and Skin Purifier, and greatest of Humour Remedies, cleanses the blood of all impurities and poisonous elements, and thus removes the cause, while CUTICURA the great skin beautifier, clears the skin and scalp and restores the hair. Thus the CUTICURA REMEDIES cure every species of itching, burning, scaly, pimply, and blotchy skin, scalp, and blood disease, from pimples to scrofula, from infancy to age, when the best physicians fail.

Sold everywhere. Price, CUTICURA, 75c.; SOAP, 35c.; RESOLVENT, \$1.50. Prepared by the POTTER DRUG AND CHEMICAL CORPORATION, Boston.

Send for "How to Cure Skin Diseases," 64 pages, 50 illustrations, and 100 testimonials.

BABY'S

Skin and Scalp purified and beautified by CUTICURA SOAP. Absolutely pure.

Pains and Weaknesses

THE OWEN

Electric Belt and Appliance Co.

(Head Office, Chicago, Ill.)

Incorporated June 17, 1887, with Cash Capital of \$50,000.

(Patented in Canada, December, 1887.)

71 King Street West, Toronto, Ontario.

G. C. PATTERSON, Manager for Can.

Electricity as Applied by the Owen Electric Belt and Appliances

It is now recognized as the greatest boon offered to suffering humanity. It has, does and will effect cures in seemingly hopeless cases where every other known means has failed. Rheumatism cannot exist where it is properly applied. By its steady, soothing current, that is easily felt it will cure.

Rheumatism, Sciatica, Spinal Diseases, General Debility, Neuralgia, Lumbago, Nervous Complaints, Spermatorrhoea, Dyspepsia, Liver Complaint, Female Complaints, Impotency, Constipation, Kidney Disease, Varicocele, Sexual Complaints, Epilepsy or Fits, Lame Back.

RHEUMATISM.

It is not pleasant to be compelled to refer to the indisputable fact that medical science has utterly failed to afford relief in rheumatic cases. We venture the assertion that although electricity has only been in use as a remedial agent for a few years, it has cured more cases of RHEUMATISM THAN ALL OTHER MEANS COMBINED. Some of our leading physicians, recognizing the fact, are availing themselves of this most potent of Nature's forces.

TO RESTORE MANHOOD AND WOMANHOOD.

A man has not yet discovered all of Nature's laws for right living, it follows that every one has committed more or less errors which have left visible blemishes. To erase these evidences of past errors, there is nothing to equal Electricity as applied by the Owen Electric Belt and Appliances. Rest assured, any doctor who would try to accomplish this by any kind of drugs is practicing a most dangerous form of charlatanism.

WE CHALLENGE THE WORLD

to show an Electric Belt where the current is under the control of the patient as completely as this. We can use the same belt on an infant that we would on a giant by simply reducing the number of cells. Other belts have been in the market for five or ten years longer, but to-day there are more Owen Belts (ELECTRIC SOLES) — Dr. Owen's Electric Insoles will prevent Rheumatism and cure Chills and Cramps in the feet and legs. Price, \$1.00 SENT BY MAIL.

EXTRACTS FROM CANADIAN TESTIMONIALS.

"For eight years I have suffered with 'Saved my life when I had muscular rheumatism, and am now out of pain and rheumatism.'" Mrs. Carroll, West Market growing better daily and in my 75th year. St. Can confidently recommend the Owen Belt. "Your Electric Belt cured a violent attack when everything else fails." A. Menzies, of sciatic rheumatism of several months standing, in eight days." Jas. Dixon, sen., Niagara Falls.

"Having some knowledge of electricity Grand Valley, Ont. and its power, and having used other belts prior to my use of yours, I can say it is the nervous headaches and neuralgia. After best I have ever worn." James Blair, Fort trying one of your belts an more than satisfied when everything else fails." A. Menzies, of sciatic rheumatism of several months standing, in eight days." Jas. Dixon, sen., Niagara Falls.

"Am much pleased with belt; it has done in fifteen minutes that used to keep me in a great deal of good already. J. Ser-bed for days." Thomas Gales, Crawford gerin, Galt, Ont.

BEWARE OF IMITATIONS AND CHEAP BELTS.

Our attention having been attracted to the many base imitations of "The Owen Electric Belt," we desire to warn the public not to be deceived by the false statements of men calling themselves electricians who lacking brains sufficient to produce an Electric Belt of their own creation, have copied as near as they dare in appearance, but only with more than a continental reputation.

In justice to ourselves and generous public we are determined to expose such unprincipled trickery, and prevent, if possible, the unsuspecting from being gullied by such men and means.

The Owen Electric Belt Co. is not afraid of fair and open competition, as their goods have no equal in this or any other country, and will bear inspection by those competent to judge—and so great are they in demand that there are more of them made and in use than all other makes combined—their Chicago factory alone being the largest of its kind in the world.

Our Trade Mark is the portrait of Dr. A. Owen, embossed in gold upon every Belt and Appliance manufactured by the Owen Electric Belt and Appliance Co. None genuine without it.

The cheap so-called Electric Belts advertised by some concerns are perfectly worthless as a curative power and dear at any price. A genuine Electric Belt cannot be manufactured and sold at cheap prices. Send six cents for illustrated catalogue of information, testimonials, &c.
