

Highest of all in Leavening Power.—U. S. Gov't Report, Aug. 17, 1888.

# Royal Baking Powder

## ABSOLUTELY PURE

### News of the Week.

#### NEW BRUNSWICK.

Customs Officer Cochran seized twenty boxes of small bass at the I. C. R., St. John depot, bound from the North Shore to the United States, on account of being out of season.

The first shipment of the Ottawa lumber from St. John will probably be made about the 7th of March in the new steamer Ottawa, of the Furness Line. The opening up of this business is a matter upon which the people of St. John can congratulate themselves, for up to the present time all the lumber of Ottawa has been handled by Portland, Me., and Boston during the winter season.

A horse owned by James Minehan of the St. John country market, and driven by two boys nearly ended an old colored lady's term of existence. At the corner of Duke and Sydney streets the horse was going quite fast and the driver failed to see the old lady who was crossing the street. The shaft of the pung caught her shawl and tore it from her body. She had seen the horse coming and had quickened her pace, and just in time to escape severe injury or perhaps death.

An old man of about 80 so intoxicated that when he fell in the slush and dirt Friday afternoon he was unable to rise without assistance, was one of the saddest sights imaginable. A bar-keeper who would sell the fiery liquid to such as he deserves the severest censure, to put it very mildly.

Mr. Hubert Clark of F'ron has returned from New York where he was under Koch's lymph treatment in the German hospital. The physicians appear to have worked faithfully with him and his many friends regret to learn that he did not reap much benefit at their hands. In fact the results of the treatment in this country have been very indifferent and physicians are becoming cautious in the use of Kochine.

Capt. John Leavitt died Wednesday at Bloomfield, at the advanced age of 82. The deceased was a pilot 60 years ago, but after some years in that business he took up steamboating and was master of some of the first steam vessels that sailed in the Bay of Fundy, among them being the steamers Gazelle, Herald, Maid of the Mist, Pilot and Maid of Erin. He retired some years ago and has resided at Bloomfield.

Brookford Manning of St. John had the first joints of the middle fingers of his left hand taken off and the first finger of the same hand badly mangled while working at some machinery in Scott, Lawton & Love's factory.

Mr. Jordan's store at Pleasant Point opposite Indian town, in the occupancy of Messrs. Smith & Colwell, was entered by some persons, who, not finding any money in the drawer, manifested their disgust by smashing it. They made off with a quantity of raisins, pickles, and other articles, a portion of the goods being found in a lumber pile near at hand. The persons interested have a pretty good idea who the culprits are.

There are 30,000 fruit trees on the nursery grounds at Stanley, and it is intended to plant a great many more this spring, as operations have been very successfully conducted. The district seems well adapted for fruit raising, particularly apples.

#### NOVA SCOTIA.

The house owned by Arthur Ford of Digby was burned on Wednesday—furniture saved. No insurance. Mrs. Ford was very ill at the time, and had to be carried out of the house. Mrs. Bell, also living in the same house had to be carried, with her baby, only a few days old, to a neighbor's house.

A fire at Hantsport early Wednesday morning destroyed the boiler, factory and machine shop of Messrs. E. Churchill & Sons. The adjoining buildings were saved with much difficulty. The property was uninsured. The tools in the boiler shop were saved, but those in the machine shop were nearly all destroyed.

The community of Fort Lawrence was startled by hearing of the sudden and unexpected death of Mr. Travis Smith. Mr. Smith spent the evening at the house of a neighbor, returning home about ten o'clock. The family had retired, but hearing a sound as of something falling, the cause was looked for and Mr. Smith's dead body was found prostrate upon the floor. Heart disease.

In the household of Mr. John Bower of Rockingham, Yarmouth Co., are his father and mother, William and Ann Bower, aged respectively eighty-six and eighty-five years; also Mrs. John Bower's parents, John and Hannah Morton, aged eighty-one and seventy-one. The former couple have spent sixty-five years and the latter fifty-one years of married life.

About one o'clock Saturday afternoon there occurred at the Springhill mine, N. S., the most direful mine explosion that Canada has ever seen. One of the most fatal in the world's history. 120 women lost their lives, with many others injured. 51 widows and over 180 little children appeal pathetically, to the great human brotherhood, to relieve them. The appeal for sympathy being set on foot

should be responded to with a good true Canadian warmth of heart.

#### OTHER PROVINCES.

It is reported that the federal government is going to release \$1,000,000 in bonds, now retained as a guarantee on eastern portion of the Canadian Pacific.

A reaction has set in in Toronto against Koch's tubercule, and a few doctors have much faith left in it as a cure.

One of the oldest of Toronto's journalists, John MacLean, proprietor of the *World*, is dead, aged 65. He was the real father of protection in Canada, having commenced its advocacy in 1864. About a year and a half ago he retired from active life, since which time his health has been precarious.

The office of *L'Evenement*, Quebec, was burned Saturday night.

A despatch from Winnipeg, Manitoba, reports that a young Englishman, while felling a tree in the woods, seriously injured his leg, and a companion attempted to carry him into the camp, three or four miles distant, but becoming tired found it necessary to leave him about half-way and go alone for assistance. When the relief party reached the spot where the young man had been left they found only a few of his bones. Wolves, which have lately infested the district, had attacked him, and being in a helpless state he had fallen an easy prey.

The directors of the Grand Trunk railway have declared a dividend of £1 2s. 6d. per cent. on first preference bonds, making a total of £1 9s. 6d. for the year, compared with a total of £2 8s. 6d. for the same class of bonds last year. The total net receipts are given £643,400.

The election of Thomas Birkett, as mayor of Ottawa, has been voided because of his interest in contracts with the city.

Dun & Russell report 46 Canadian failures the past seven days; there were 41 the corresponding week last year. Bradstreet reports 52 last week.

#### UNITED STATES.

Great anxiety is felt at the prospect of a flood in the Alleghany and Monongahela rivers. It has been raining heavily over 30 hours, and at many places great damage has already been done. At Bradford, Lower St. has been inundated and people have been taken from the houses in boats. At Johnstown the situation is becoming serious. Several bridges have been swept away; low lands are completely flooded.

That the negro is not suffering for want of educational privileges in Georgia would appear from a statement of the Atlanta Constitution that "there are 19 white and 25 colored schools in Baldwin county, and they are all in a flourishing condition."

A fire in a double tenement in Brooklyn, occupied by 23 families, caused the death of six persons on the third flat. The scene was a terrible one.

The eligibility of women to the General Conference of the Methodist Episcopal Church has been put to a vote in many churches of the denomination, and as far as the vote has progressed, it now stands 216,960 for admission and 132,949 against admission, which gives the women a majority of 84,011. This is considered a test vote, although not all of the most active and intelligent members of the church voted. But those who did cast their votes belong almost exclusively to this class, and the women argue that the canvass represents the most devoted and progressive of the Methodist Episcopal laity on the question.

At the Red Beach granite works at Calais, part of the work is being done on a monument to General Grant, and one of the blocks of red granite to be utilized for the purpose, and which was hauled from the quarry the other day, weighed over eleven tons.

The coroner's jury in the case of the death of W. H. Swazey, of Dover, killed in collision on the B. & M. railway at Scarborough beach January 22nd., find that his death was due to the gross carelessness of Rowland B. Bonney, engineer of a wild engine which dashed into the rear of the train. Bonney was arrested on a charge of manslaughter.

The North German Lloyd steamer *Havel* collided with the Italian barque *Mastobela*, from Genoa, off Bay Ridge. The barque sank almost immediately. Two of the crew were drowned, but the remaining 11 were saved. The steamer proceeded to Bremen.

The body of Albert M. Kalloch, aged 51, mate of the schooner *Eliza Levenald* was found near Cushing's wharf, Thomaston, Me., Feb. 18th. Kalloch had been missing since Saturday morning. He belonged in St. George and leaves a widow and children.

The loss of St. Mary's hospital, Rochester, N. Y., burned lately, was \$65,000; insurance \$20,000. Fireman Frank Jayne was fatally hurt by a fall from a ladder. None of the patients were injured. The nineteen attendant sisters worked heroically and to them is due the major portion of the credit for saving the lives of the patients.

#### BRITISH AND FOREIGN.

The financial dispute between the McCarthyite and Parnellite factions of the Irish parliamentary party continues. Of \$40,000 released a month ago from the League funds, \$25,000 went to the campaign committee and \$15,000 to the tenants' defence league. The McCarthyites contend that the latter sum, instead of being devoted to evicted tenants, was used to meet an overdraft on the Hibernian Bank.

John Dillon, M. P., at present undergoing a term of imprisonment in Clonmel prison, has been removed from his cell to the infirmary of that institution.

R. C. Elkin received a despatch last week stating that the bark *Antoinette*, Captain Robinson, bound from Rio Janeiro for Valparaiso in ballast, has put into Montevideo in distress. She is dismantled and her hull is badly damaged. She will probably prove a total wreck. She is a vessel of 1,125 tons register, and was built at Yarmouth in 1874. She is owned by R. C. Elkin, Geo. F. Baird and others. The *Antoinette* is partly insured.

A plague of locusts recently visited Northwestern India, and such immense heaps of them settled on the railway lines that trains could not pass. They darkened the air like a thunderstorm and when they settled on trees strong branches broke under their weight.

The Tithes bill, passed its second reading in the House of Lords, London, without division.

The third £1,000,000 in gold of the £3,000,000 borrowed in bullion from the bank of France during the recent Baring-Argentine financial crisis has been returned to the last named institution. The gold was returned as received, there having been no necessity to open the boxes.

In the House of Commons Morgan's resolution in favor of the disestablishment of the church in Wales was rejected, 235 to 203.

The Servian ministry has resigned. The international dissensions are too bitter to enable the ministry to remain in power.

A startling conspiracy at Buenos Ayres has been discovered. The details are kept secret by the police and government officials but it is known that the plot embraced the proposed assassination of the principal members of the government.

The winter in Spain has been one of the severest ever known—the cold having been intense and the fall of snow quite heavy. As a large majority of the houses in the country have only a single chimney belonging to the kitchen, there are no means of keeping warm.

The Scotch railway companies appear to have suffered a severe defeat in the contest with their workmen which has been raging for many weeks. The latest news is that all the main points contended for by the men have been virtually conceded by the railways. The manager of the North British Railway Co., has issued an official notice in which he publicly accepts the conditions asked for by the men's representatives. These included a reduction of the hours of labor, the withdrawal of all legal proceedings instituted by the company, and it is estimated that the various companies will lose about £750,000 over the year.

"Golden Medical Discovery" cures those diseases which come from blood impurities—scrofula and skin diseases, sores and swellings.

But does it? It's put up by the thousands of gallons, and sold to hundreds of thousands. Can it cure as well as though it had been compounded just for you?

Its makers say that thousands of people who have had Tetters and Salt-rheum, Eczema and Erysipelas, Carbuncles and Sore Eyes, Thick Neck and Enlarged Glands, are well to-day because they used it.

Suppose that this is so. Suppose that a quick-witted man was far-seeing enough to know that to cleanse the blood was to cleanse the life. Suppose that by many experiments, and after many failures, he discovered this golden key to health and that his faith in it for you is so strong that you can go to your druggist, buy a bottle, and if it doesn't help you can get your money returned—cheerfully. Will you try it?

The remedy to have faith in, is the remedy the makers themselves have faith in.

#### Literary Notes.

The *Methodist Magazine* for February, 1891. Price \$2 a year; 20 cents per number. Toronto: William Briggs. This is a special Methodist Centennial number, one of the illustrated articles being devoted to "Footprints of Wesley." Dr. Douglas writes on the development of Methodism; the Hon. J. W. F. White, LL D., on "Lay Preachers," and Dr. Stafford compares at length the characters of "Wesley and Voltaire." There is a valuable sketch of the Moravians. A series of papers on Eastern Europe begins with an illustrated account of Hungary. In the Science department are papers on "How the Prairies were Formed," and "Is there Life among the Stars?" A striking story of "London Life in a Garret," is given. Now is the time to subscribe to this vigorous monthly.

The *Homiletic Review* for February is full of valuable matter. It opens with an article on "The Divine Authority of the Scriptures versus Traditionism." Dr. Deems follows with "Heresy and Christian Doctrine." "College Pulpits" is a strikingly original paper. "The Evangelist and His Work" is treated with ability, and in a good spirit. The Sermon Section is of ability. "Helps and Hints," by Arthur T. Pierson, D. D., expands a former department of

The *Review*, so as to make it virtually a new feature. "The Prayer-Meeting Service," "Studies in the Psalter" and the "European Department," are up to their usual standard. "Why I Wrote Certain Sermons," is a breezy sketch. The section devoted to "Preachers Exchanging Views," is especially full. The "Editorial Notes" treat topics of general interest. Published by Funk & Wagnalls, 18 and 20 Astor Place, New York. \$3.00 per year; single copies, 30 cents.

LITTLE'S LIVING AGE. The numbers of *The Living Age* for the 17th and 24th of January contain Alcega Lorraine in 1890, *Westminster*; Prosper Merimee, by Walter Pater, and Rural Life in France in the Fourteenth Century, *Fortnightly*; Give Back the Elgin Marbles, *Nineteenth Century*; Life among the Druses in 1845 and 1882, *Asiatic*; Switzerland as a School of Politics, *Time*; The Streets of London, *Murray's*; The Journal of Sir Walter Scott, *Temple Bar*; Henry Vaughan, *Macmillan's*; Meteoritic Theories, *Leisure Hour*; Westminster Abbey, *Spectator*; The Carol Speaker; Round about the Bahamas, *Chambers*; with instalments of "My Tutorship," "The Wisdom Tooth," and "The Flight of the Shadow," by George MacDonald, and poetry.

For fifty-two numbers of sixty-four large pages each (or more than 3,300 pages a year) the subscription price (\$8) is low; while for \$10.50 the publishers offer to send any one of the American \$4.00 monthlies or weeklies with *The Living Age* for a year, both postpaid. Littell & Co., Boston, are the publishers.

Harper's *Magazine* for February excels in illustrated articles. The frontispiece is a portrait of Edwin Booth. Two papers appear on Finland, accompanied by twenty-four illustrations. "The Heart of the Desert," has twelve illustrations of scenery in the valley of the Yosemite, the great desert of New Mexico, and the Grand Canon of the Colorado. A voyage in southern latitudes through "Smyth's Channel and the Strait of Magellan" is the subject of an entertaining paper accompanied by fifteen illustrations. An interesting chapter of reminiscences is entitled "The Faith of President Lincoln." The Editorial Departments maintain their usual standard of excellence.

#### One Minute Cure for Toothache.

Toothache, the most common and one of the most painful affections, is instantly cured by the application of Polson's Nerviline. Polson's Nerviline is a combination of powerful anodynes, and it strikes at once to the nerves, soothing them and affording in one minute total relief from pain. Mothers, try it for your children's toothache. Nerviline is sold in 10 and 25 cent bottles by all druggists.

Break off branches of the Norway spruce, and arrange them in a large jug well filled with water. In a few days, tender, pale green branches feather out soft and cool to the touch, and giving a delightful, health-giving odor.

New Spirit: "Was that a very bad man you just turned away?" Saint Peter: "No; his record is good enough; but he's been the head man in a small town all his life, and I know there'll be no living with him."

The whale is no more of a fish than the bat is a bird. Its young are born like the kittens and the puppies, but only one at a time. The young whale takes its nourishment at its mother's breast, just as the human baby does, and it is just as carefully watched and guarded by its parents.

Finland, the north-westernmost province of Russia, is a country seven hundred miles long and, on an average, two hundred miles wide, embracing an area nearly one and a fourth times that of the British Isles. It has a commerce of considerable importance, several interesting towns, a university enrolling 1,700 students annually, a hardy, thrifty peasant population, and scenery peculiarly and characteristically its own.

At ten years of age a boy thinks his father knows a great deal; at fifteen he knows as much as his father; at twenty he knows twice as much; at thirty he is willing to take his advice; at forty he begins to think his father knows something after all; at fifty he begins to seek his advice, and at sixty—after his father is dead—he thinks he was the smartest man that ever lived.

The Island of Juan Fernandez, once inhabited by Robinson Crusoe, is now tenanted by a former Austrian officer, Baron von Rodth, who, after being forced by the terrible wounds which he received at the battle of Sadowna, in 1866, to leave the army, grew tired of the monotony of existence in civilized Europe, and determined to devote his fortune to a life of adventure. For fifteen years past, he has been living on the Island of Juan Fernandez with a small colony of natives and of European deserters from civilization, and only communicating with the world once a year, when he sends his fine sailing yacht to Valparaiso for provisions and supplies.

#### C. C. RICHARDS & Co.

Gents.—I certify that MINARD'S LINIMENT cured my daughter of a severe and what appeared to be a fatal attack of diphtheria after all other remedies had failed, and recommend it to all who may be afflicted with that terrible disease.

JOHN D. BOUTILLIER.  
French Village, Jan'y., 1883.

Money saved and pain relieved by the leading household remedy, Dr. Thomas' Electric Oil—a small quantity of which usually suffices to cure a rough heel a sore, cut, bruise or sprain, relieve lumbago, rheumatism, neuralgia, excoriated nipples, or inflamed breast.

## SCOTT'S EMULSION

Of Pure Cod Liver Oil and HYPOPHOSPHITES of Lime and Soda

Scott's Emulsion is a perfect food. It is a wonderful Flesh Producer. It is the Best Remedy for CONSUMPTION, Scrofula, Bronchitis, Wasting Diseases, Chronic Coughs and Colds. PALATABLE AS MILK. Scott's Emulsion is only put up in salmon color wrapper. Avoid all imitations or substitutions. Sold by all Druggists at 50c. and \$1.00. SCOTT & BOWNE, Belleville.
