

Highest of all in Leavening Power.—U. S. Gov't Report, Aug. 17, 188.

Royal Baking Powder

ABSOLUTELY PURE

News of the Week.

NEW BRUNSWICK.

W. Y. T. Simms of F'ton, was taken to the Provincial Lunatic Asylum Wednesday by Officers Phillips and Roberts. He was so violent that it took several men to secure him, and in the struggle the unfortunate man inflicted a severe bite on David Estabrook's hand.

The People's Bank of New Brunswick has declared a dividend of 4 per cent. on the capital stock for the half-year ended December 31st, payable to the stockholders on after Thursday, January 29th.

In lighting a fire with a bottle of kerosene on Saturday evening, Edna, daughter of C. E. Northrup, had the side of her face badly burned. Her sister wrapped her in a cloak and smothered the fire.

St. Martins has among its old residents a Scotchman named Wm. D. Mann, who claims to have been an old school mate of Rt. Hon. W. E. Gladstone. They attended together a private school kept by Dr. Alexander, a short distance from Dundee, Scotland. Mr. Mann states that Mr. Gladstone was at that time studying Latin, and he speaks very highly of Gladstone's character as a boy, his peaceable disposition, his arguative powers, and his love of debate. Mr. Mann says: "Wallie was a good friend to me," and that if he were anywhere within 10 miles of where Gladstone was he would walk all the way to see him, notwithstanding his 78 years. Mr. Mann came to this country in 1855 and has lived in St. Martins since excepting a few years he spent in Kings county. He is hale and hearty and with his wife has charge of Mr. Wm. Patterson's farm.

Canada has 56 paper and pulp mills now in operation, employing 2,250 hands. The manufacture of pulp is fast becoming a special industry, and it is probable that before long wood pulp will form a special item of export. The best wood fibre is made from spruce and poplar, of which the country produces unlimited quantities, particularly in Quebec and New Brunswick, and the conditions for manufacture in those provinces are very favorable.—Canada Lumberman.

A young man named John Boyce, who resides on Bridge street, Indian town, sustained a painful accident a day or two ago while working in the woods at Milkish. He was chopping cordwood at the time and had his foot upon the stick which he was cutting. He had lifted the axe to his shoulder and it was descending in full force, when his foot suddenly slipped and the axe struck his left foot, making a gash four or five inches long. The injured man was at once taken to the city, where he received surgical aid. He is now doing well although suffering considerably.

OTHER PROVINCES.

Monday evening a well-known citizen of Valleyfield, Ont., named Francois Vachon, left his nephew a residence and was never again seen alive. His dead body was found in a barn not far distant. There were no marks of violence, but a sum of money was missing from his pocket.

The post office department has been notified by the postal authorities at Washington that Canadian newspapers containing lottery advertisements will be thrown out of United States mails. There is a question whether or not the lottery act applies to prize lotteries advertised to advance the circulation of newspapers.

A remarkable discovery has been made during the excavation of a big drain to connect Cote St. Antoine drainage with Montreal intercepting a sewer, and when a depth of thirty feet had been reached the workmen came upon a large bed of oysters, the shells of which, although petrified, were firmly closed. The discovery is looked on as very interesting by scientific men. Montreal is a distance of about six hundred miles from the oyster beds of the St. Lawrence.

Several years ago a Presbyterian missionary to the South Sea Islands raised \$1,500 to help build a ship to facilitate evangelistic work among the savages of the islands. The money was deposited in the Central bank to the credit of the missionary ship Erramango, and as the bank is being wound up the liquidators want the court to say what shall be done with it. The Presbyterian church of Canada claimed it, but there was nothing to show that it was ever intended for that church; the case was adjourned.

Amelia Laboubarde aged 17 years of Brockville, Ont. was found dead in the woods six miles south of Malone. It is said her mother told her she was old enough to earn her own living and she started on foot for Malone a distance of 20 miles, to look for work. She was insufficiently clad, became chilled, doublet, and laid down to die.

Ottawa news says that the police patrol at Willow Branch turned back 36 Yankton Indians who had crossed the frontier and were heading for the Qu'Appelle reserves. The Indians faced about quietly and are not heard from since.

It is rumored that Saturday's Gazette will contain a proclamation summoning parliament for the despatch of business on the 26th February.

Deputy Minister of Marine, Smith, opened a court of inquiry in Quebec, Jan. 12, into the facilities and advantages offered by this port for the shipment of cattle and grain.

The governor general has received a cablegram from Sir Charles Tupper asking for information respecting Wadsworth, the Englishman who recently mysteriously disappeared from Wallaceburg, Ont. It is feared Wadsworth, who carried \$3,000 on his person, met with the same fate as Benwell.

UNITED STATES.

With ice at thirty cents a ton, against \$3 and \$4 a year ago, it isn't strange that a lack of enthusiasm is noticeable along the Penobscot and Kennebec ice fields.

A man in Jackson county, Oregon, has been ploughing with a steam engine, and has found that it works quite successfully. He pulls eight plows with his engine, and turns over the soil at the rate of sixteen acres per day. The cost of running the outfit is not over \$5 per day.

The damage in western Connecticut by the recent storms is much greater than at first reported. In 12 places between Danbury and Branchville, on the Danbury & Norwalk railroad, the roads are still so submerged as to be impassable. Many small bridges were swept away. The damage to roads and bridges in that section is estimated at \$25,000. The total loss to railroads in the western part of the state will not fall short of \$175,000.

The Senate at Washington, U. S., adopted the Stewart free coinage amendment to the financial bill.

Nebraska's legislature is in a deadlock and two companies of militia are quartered in the state house ready for service at a moment's notice.

The Aroostook Democrat estimates that over \$100,000 will be paid out for what corn is used in that country this season. This is quite a big hole in what the country will receive from its potato crop, and would be much better kept at home, if possible. Some of the progressive Aroostook farmers ought to see to it that these figures are reduced in the future.

In East Boston, Newell L. Emmons aged 35, shot Terrance Dolan, aged 40. Emmons was a tenant of Dolan. The former owed Dolan \$12 rent, and Dolan attached Emmons' horse and wagon for the amount. This angered Emmons, who laid for Dolan with a revolver, firing four shots at him. Two bullets struck Dolan, probably fatally wounding him. The wounded man has a wife and five children. Dolan has since died.

It is rumored that a syndicate of English and American capitalists, with four or five million dollars capital, is in process of formation, with the avowed object of buying up all the rubber in the world. If the combine succeeds, the price of the article will be much increased. The trust is said to already monopolize one-half of the Para rubber, and its intention is to operate in England as well as in the United States.

A freight train on the Main Central railroad left Luenburg, Vt., at 6:15 o'clock Monday with an engine, 21 freight cars and a caboose broke loose and was held by the brakes. The brakes could not hold the rest of the train on the icy track and the speed increased until it reached a very high rate, when all but the engine and first car left the track and went down an embankment of 500 feet. Two brakemen named Muir and Jarvis were killed. The cars, loaded with corn and grain were smashed to pieces.

There are strong indications that Grover Cleveland will be an easy first choice of the Democratic party as candidate for the presidency next year. There is no other candidate in sight with even apparently equal.

Fred A. Dodge, a brakeman on the 11:40 P. M. outward bound freight train on the New York and New England railroad, was struck by the bridge at Mt. Bowdoin and almost instantly killed. The unfortunate young man was a son of Mr. James B. Dodge of Lakeside, N. B.

BRITISH AND FOREIGN.

The British American Citizen of Boston, states, what is probably not very generally known, that Mr. Justin McCarthy is a Protestant in religious faith. The Citizen adds, "So were Wolf Tone, Robert Emmett, Henry Grattan, Curran, Brinsley Sheridan and Parnell."

The National League at Belfast held a meeting Tuesday. After hours of noisy discussion the committee rescinded the vote of confidence in Justin McCarthy which was adopted some time ago, and then adopted a vote of confidence in Parnell, the vote standing 77 to 34.

Heavy snow storms have again set in in East Prussia causing a suspension of railroad traffic.

A large rebel force is said to be assembled in the province of Entre Rios. Telegraph lines have been cut and the national troops in strong force has been sent to suppress the revolutionary outbreak. Citizens in that province are in a great state of alarm and the wildest rumors are in circulation.

A despatch from Sobolsk, the capital of West Siberia, says that the terrible scourge known as "black death" has reached that city. The whole of Asiatic Russia, from Samarcand to the mouth of the Obi, is suffering from the scourge. Thousands are dying at Odoborsk, near the mouth of the Obi, owing to the lack of physicians. It seems almost hopeless to try and check the spread of the fearful disease.

Andrew Forden, advocate of Christianity, Norway, has written to the department of justice asking for copies of the criminal law of Canada. It appears that an important conference is shortly to be held in Norway for the purpose of selecting from different criminal codes the best measures to recommend to the united parliament of Sweden and Norway for adoption.

Mission News and Notes.

Forty-three young ladies of New Orleans, members of different religious bodies, are carrying on Christian work among the Chinese in that city.

Emperor William has given five hundred dollars to the Stuttgart Foreign Missionary Society, for the work in Cameroons, Africa.

Native Christians in Japan, most of them with average wages of less than twenty-five cents a day, contributed last year \$27,000 to mission work.

The statistics of the Lutheran Church for the year 1890 have just been published, according to which the communicants of that denomination number 1,153,213, this being an increase of 87,167 over the figures of last year. The Lutheran Church has increased in membership nearly sixty-five per cent. in ten years, which is twice the rate of increase of the population of the country.

The Madras Bible Society, according to the *Harvest Field*, circulated last year 3,113 rupees worth of Scripture copies and portions at a cost of 12,690 rupees! It employs fifty-five colporteurs, and each man sold on an average four and five-eighths books per day, for which he received a little over three annas; on the other hand, his wages and travelling expenses amounted to nine annas and seven pies per day.

Any man who cared to cheat need not sell a book at all, but after paying the average sum to the Society for books supposed to be sold, might live in absolute idleness on six annas per day.

Corn Sowing

Is a process conducted by the agency of tight boots all the year round. Corn reaping is best conducted through the agency of Putnam's Painless Corn-Extractor, the only safe and sure-pop corn cure. Putnam's Extractor is now widely imitated. Beware of all poisonous and sore producing substitutes; they are dangerous to use and are sold simply because they afford the dealer large profit.

THE MCALL MISSION.—This remarkable mission begun in Paris, is now being carried on in many parts of France. A recent report says that sixty persons now give their entire time to the work of this mission, and from 600 to 700 persons co-operate with them. This work has spread all over France, and now has 130 sales or halls, at which, during the last year, there was an aggregate attendance of 1,200,000 persons.

COMING EVENTS.

Coming consumption is forshadowed by a hacking cough, night sweats, pain in the chest, etc. Arrest its progress at once by taking Hagyard's Pectoral Balsam, which never fails to cure coughs, colds, bronchitis, hoarseness, etc., and even in confirmed consumption affords great relief.

THE RELIGIOUS NEWSPAPER.—It helps to expel from the homes of his parishioners worthless and injurious literature.

The religious denominational newspaper attaches the people more closely to their own church.

The religious newspaper strengthens the people in the fundamental doctrines of the Scriptures.

The religious newspaper makes the pastor's work more effective by increasing the intelligence of his hearers, by making them acquainted with the philanthropic and missionary enterprises of the day, and by giving them information respecting churches near and far.

Last year:
Her eyes were rheumy, and weak and red,
Her breath—you could smell it afar,
She had ringing and dizziness off in her head,
And the cause of it all was catarrh.
This year:—
Her breath is as sweet as the new meadow hay,
Her eyes are as bright as a star,
And the cause of the change, she is ready to say,
Was the Dr. Sage Cure for Catarrh.

Dr. Sage's Catarrh Remedy will positively cure catarrh in the head, no matter how bad or of how long standing. Fifty cents, by all druggists.

JERUSALEM.—A close inspection of Jerusalem is disenchanted. All poetic and idle conceptions are scattered to the winds. The streets, of which only two are paved, are narrow, crooked and dirty. The Jewish quarters foul with smells and filth. There is no sewerage in it. All the dirt and refuse are thrown into the streets. The houses are poor and crowded. The shops are small, and for the most part squalid. The money-changers still sit, as in olden time, in the streets. The Jews are unclean in their persons, pale and effeminate in appearance, wearing the love lock in front of each ear. They seem to have no enterprise or ambition, and for the most part depend upon alms which come from abroad. Jerusalem has no newspaper. It has only one mail a week. The chief banker has wanted to erect a telephone, but has failed to secure permission from the governor. The government is the chief obstacle to modern improvements in the East. Turkish rule blights everywhere. There are several steam flouring-mills.

FAMOUS YET UNKNOWN.

Wives who are hidden by their husband's fame, yet who are wonderful women.

The wife of a famous man will oftentimes be completely hidden by the dazzle of her husband's fame, and it is astonishing how little is known of those women whose husband's names are household words throughout the whole country. While the newspapers teem with the name of Thomas A. Edison, nothing is comparatively known or heard of Mrs. Edison. Every newspaper reader knows the name of Chauncey M. Depew, but of Mrs. Depew only the most casual reference is made. Even in England, no one ever hears of Lady Tennyson, or of Mrs. Gladstone. And the same is true of the wives of such men as P. T. Barnum, Will Carleton, John Wanamaker, Spurgin, W. D. Howells, Dr. Talmage, "Mark Twain," and James G. Blaine. Often these very wives have been the makers of their husbands' careers. Their portraits are even less known than their lives. In a splendid series to be called "Unknown Wives of Well-known Men," *The Ladies Home Journal*, of Philadelphia, will, during next year, sketch all these women and others, presenting their portraits, in many cases, for the first time to the public.

KEEP OFF THE CHEAPS.

Wet wintry weather causes chapped hands, sore throat, croup, colds, pain in the chest, swellings, etc., for which a certain cure exists in Hagyard's Yellow Oil, the best pain expeller for internal or external use. Keep it on hand in case of emergencies. Every bottle is a little giant in curative power.

A LOVELY THING IN PERFUMES—*"Lotus of the Nile."*

FOR A THOROUGHLY GOOD Extract of Lemon, try the "Royal."

Jos. Beaudin, M. D., Hull, P. Q., writes:—*Dr. Thomas' Electric Oil*, commands a large and increasing sale, which it richly merits. I have always found it exceedingly helpful; I use it in all cases of Rheumatism, as well as fractures and dislocations. I made use of it myself to calm the pains of a broken leg with dislocation of the foot, and in two days I was entirely relieved from pain.

C. C. RICHARDS & CO. Gents.—I certify that MINARD'S LINIMENT cured my daughter of a severe and what appeared to be a fatal attack of diphtheria after all other remedies had failed, and recommend it to all who may be afflicted with that terrible disease.

JOHN D. BOUTLIER, French Village, Jan., 1883.

MEDICAL HINTS.

THE quickest, surest and best remedy for rheumatism, neuralgia lumbago, sore throat, soreness and lameness, is Hagyard's Yellow Oil. It quickly cures sprains, bruises, burns, frostbites, chilblains, etc. For croup, colds, quinsy, etc., take 10 to 30 drops on sugar, and apply the oil externally also, when immediate relief will result.

READ THESE LINES.

1 to 2 bottles of B. B. B. will cure Headache.
1 to 2 bottles of B. B. B. will cure Biliousness.
1 to 4 bottles of B. B. B. will cure Constipation.
1 to 4 bottles of B. B. B. will cure Dyspepsia.
1 to 6 bottles of B. B. B. will cure Bad Blood.
1 to 6 bottles of B. B. B. will cure Scrofula.
